We have marched over a hundred miles in a week during the hottest kind of weather. We destroyed all the forage and supplies and cotton, and drove off all the cattle, horses, and mules between the two lines for a distance of fifty miles. We met no considerable body of the enemy, and had only one or two slight skirmishes; but we ascertained where the enemy was concentrating, and gained much valuable information which may be of use hereafter. It was made our painful but imperative duty to destroy everything—corn, cotton, meat, mills, and cotton gins—that we could find, sparing only dwellings and a small supply of provisions for each family. The command will rest here for a day or so, and then return to Vicksburg, which cannot hold out very long against our forces.

The destruction in the region of Jackson is described on page 66 of this volume.

The number of locomotives and cars destroyed on the railroads of Mississippi during the year is stated to have been seventy-seven of the former, and about six hundred of the latter. Owing to the destruction of bridges it was impossible to remove a large portion of the former after they were captured.

At an election for State officers under the Confederacy, Charles Clark was chosen Governor, C. A. Brougher, Secretary of State, A. J. Gillespie, Auditor, and M. D. Hughes, Treasurer. In a message to the Legislature he described the encroachments upon the State by the Federal army; urged the construction of a temporary penitentiary and the reestablishment of the deaf and dumb and blind asylums destroyed at Jackson, and advised the removal of negroes from the exposed districts.

On the 1st of August Gen. Grant issued the following order recommending that in the region subject to his arms the freedom of the negroes should be acknowledged, and instead of compulsory labor, contracts upon fair terms should be made between master and servants.

HEADQUARTERS DEP'T. OF THE TENNESSEE, }
VICKSBURG, MISS., August 1st, 1863. }

1. All regular organized bodies of the enemy having been driven from those parts of Kentucky and Tennessee west of the Tennessee river, and from all Mississippi west of the Mississippi Central Railroad, and it being to the interest of those districts not to invite the presence of armed bodies of men amongst them, it is announced that the most rigorous penalties will hereafter be inflicted upon the following class of prisoners, to wit: All irregular bodies of cavalry not mustered and paid by the Confederate authorities; all persons engaged in conscription, or in apprehending deserters, whether regular or irregular; all citizens encouraging or aiding the same; and all persons detected in firing upon unarmed transports. It is not contemplated that this order shall affect the treatment due to prisoners of war, captured within the districts named, when they are members of legally organized companies, and when their acts are in accordance with the usages of civilized warfare.

2. The citizens of Mississippi within the limits above described are called upon to pursue their peaceful avocations, in obedience to the laws of the United States. Whilst doing so in good faith, all United States forces are prohibited from molesting them in any way. It is earnestly recommended that the freedom of negroes be acknowledged, and that instead of compulsory labor contracts upon fair terms be entered into between the former master and servants, or between the latter and such other persons as may be willing to give them employment. Such a system as this, honestly followed, will result in substantial advantages to all parties.

All private property will be respected except when the use of it is necessary for the Government, in which case it must be taken under the direction of a corps commander, and by a proper detail under charge of a commissioned officer, with specific instructions to seize certain property and no other. A staff officer of the quartermaster or subsistence department will in each instance be designated to receipt for such property as may be seized, the property to be paid for at the end of the war on proof of loyalty, or on proper adjustment of the claim, under such regulations or laws as may hereafter be established. All property seized under this order must be taken up on returns by the officer giving receipts and disposed of in accordance with existing regulations.

3. Persons having cotton or other produce not required by the army will be allowed to bring the same to any military post within the State of Mississippi, and abandon it to the agent of the Treasury Department at said post, to be disposed of in accordance with such regulations as the Secretary of the Treasury may establish. At posts where there is no such agent the quartermaster will receive all such property, and, at the option of the owner, hold it until the arrival of the agent, or send it to Memphis, directed to Capt. A. R. Eddy, assistant quartermaster, who will turn it over to the proper authorized agent at that place.

4. Within the county of Warren, laid waste by the long presence of contending armies, the following rules to prevent suffering will be observed: Maj.-Gen. Sherman, commanding the fifteenth army corps, and Maj.-Gen. McPherson, commanding the seventeenth army corps, will each designate a commissary of subsistence, who will issue articles of prime necessity to all destitute families calling for them, under such restrictions for the protection of the Government as they deem necessary. Families who are able to pay for the provisions drawn will, in all cases, be required to do so.

5. Conduct disgraceful to the American name has been frequently reported to the major-general commanding, particularly on the part of portions of the cavalry. Hereafter, if the guilty parties cannot be reached, the commanders of regiments and detachments will be held responsible, and those who prove themselves unequal to the task of preserving discipline in their commands will be promptly reported to the War Department for "mustering out." Summary punishment must be inflicted upon all officers and soldiers apprehended in acts of violence or lawlessness.

By order of Maj.-Gen. U. S. GRANT:

T. S. BOWERS, A. A.-G.

On the 10th another order was issued providing for the employment of liberated slaves within his department, and on the 23d, another regulating their conduct in and near his camps.

On the march of Gen. Sherman from Eastport, Miss., where his army abandoned the Memphis and Charleston railroad, to reinforce Gen. Grant at Chattanooga, his force was subsisted on the route.

A very limited amount of supplies was brought by wagons, but the whole country for miles on either flank was stripped of every article of food and every pound of forage. The citizens were sorely pressed for the necessities of life, but the safety and sustenance of armies were balanced against this fact, and decided in favor of the latter.

All animals capable of carrying a soldier, his gun and blanket, were pressed into the service, and almost the whole command consequently arrived mounted.

MISSOURI. The military operations in the State of Missouri were of little national importance during 1863. (See ARMY OPERATIONS.) The movements toward emancipation created great excitement, and form the chief subject of interest. The State Convention, originally convened for the purpose of passing an ordinance of secession, had adjourned from time to time, but was controlled by Union men. The friends of secession mostly retired, and their places were partly filled by Union men. In 1862 it passed an ordinance continuing the State officers which it had previously elected in office

until the election in 1864. The subject of compensated emancipation was discussed in that body without any decided action. A Legislature was elected in November of the same year and assembled in December. Although, at this session, this body did not pass a joint resolution or an act, making it the duty of the governor to call the State Convention together for the purpose of considering a plan of emancipation of the slaves within the State, yet he judged that their proceedings sufficiently indicated a wish that the convention should be convened for that purpose. He accordingly called the convention to assemble on June 15th, 1863.

After the adjournment of the Legislature in the beginning of 1863, affairs remained quiet until the election in the city of St. Louis. This was carried by the unconditional Union men, or radicals, by a large majority. This indicated a change in the sentiment of the people on the subject of emancipation. It led to apprehensions on the part of the conservatives lest the change should extend to the interior of the State, and thus give the radicals a controlling voice and lead to speedy emancipation. To prevent this result, not by open and decided resistance, but by diversion, Governor Gamble issued the call for the adjourned State Convention to reassemble in June to consult and act on the subject of slave emancipation, as it was of the highest importance for the interest of the State that some scheme should be adopted.

About the 1st of May Gen. Curtis, in command of the Department of Missouri, was removed and Gen. J. M. Schofield appointed to his place. The occasion for this removal was thus explained by President Lincoln:

EXECUTIVE MANSION,
WASHINGTON, May 27th, 1863. }

General J. M. Schofield:

DEAR SIR: Having removed General Curtis and assigned you to the command of the Department of the Missouri, I think it may be of some advantage for me to state to you why I did it. I did not relieve General Curtis because of my full conviction that he had done wrong by commission or omission. I did it because of a conviction in my mind that the Union men of Missouri constituting, when united, a vast majority of the whole people, have entered into a pestilent factional quarrel among themselves, General Curtis, perhaps not of choice, being the head of one faction, and Governor Gamble that of the other. After months of labor to reconcile the difficulty, it seemed to grow worse and worse, until I felt it my duty to break it up somehow; and as I could not remove Governor Gamble, I had to remove General Curtis. Now that you are in the position, I wish you to undo nothing merely because Gen. Curtis or Gov. Gamble did it, but to exercise your own judgment and do right for the public interest. Let your military measures be strong enough to repel the invaders and keep the peace, and not so strong as to unnecessarily harass and persecute the people. It is a difficult rule, and so much greater will be the honor if you perform it well. If both factions, or neither, shall abuse you, you will probably be about right. Beware of being assailed by one and praised by the other.

Yours, truly,

A. LINCOLN.

At this time delegations were sent on to

Washington from each party to confer with the President. Ex-Gov. King, a conservative, in a speech at Lexington on May 23d, thus spoke of his interview with President Lincoln:

The President said he could sum it all up in a few words, which was: "That Governor Gamble was a conservative man." He (the President) then related an anecdote about killing a snake. He said that if he met a rattlesnake in his path, and he had a stick in his hand, his first impression would be to kill it; but if he found one in the bed between his children he would pursue a different course, for by killing the snake he may injure the children; therefore he would take a more gentle way to get the snake out before he killed it. The same with slavery; he was satisfied that immediate emancipation would be detrimental to the interest of the State.

Mr. James Taussig, a delegate from the German radicals in St. Louis, later in the same month, thus reports his interview with President Lincoln. The President said that—

The dissensions between Union men in Missouri are due solely to a factious spirit which is exceedingly reprehensible. The two parties "ought to have their heads knocked together."—"Either would rather see the defeat of their adversary than that of Jefferson Davis." To this spirit of faction is to be ascribed the failure of the Legislature to elect Senators, and the defeat of the Missouri Aid Bill in Congress, the passage of which the President strongly desired.

The President said that the Union men in Missouri who are in favor of gradual emancipation represented his views better than those who are in favor of immediate emancipation. In explanation of his views on this subject, the President said that in his speeches he had frequently used as an illustration the case of a man who had an excrescence on the back of his neck, the removal of which, in one operation, would result in the death of the patient, while "tinkering it off by degrees" would preserve life. Although sorely tempted, I did not reply with the illustration of the dog whose tail was amputated by inches, but confined myself to arguments.

The President announced clearly that, as far as he was at present advised, the radicals in Missouri had no right to consider themselves the exponents of his views on the subject of emancipation in that State.

During the month of May a considerable number of disloyal persons were sent south. Those who had families were allowed to take a thousand dollars, and all others two hundred dollars each. The property of these persons was appropriated for the benefit of sick and wounded soldiers.

A respectable writer thus describes the state of affairs in Missouri about the 1st of June:

I had occasion to visit the southeastern, central and extreme northwestern counties,—passing on my return along the fertile country of the Hannibal and St. Joseph railroad.

Everybody was talking of the emancipation question. I was led to think that the convention would probably adopt a gradual system. The difficulty about immediate emancipation seemed to be that there were no funds for compensating the loyal owners. If these funds were at hand, I do not think there would be any considerable hesitation about the matter. The slaves are constantly escaping. It is felt as an act of grace, for the most part, that any able-bodied male slaves remain; and the only question with the slave owner is, whether he shall lose his slaves and get nothing, or emancipate and be paid for them. The substantial dissolution of the tie between master and slave is already accomplished; there is no loyal slaveholder,

I think, who is not an advocate of emancipation; radicals and conservatives all agree in this.

The slave owner would gladly exchange property held by a tenure so precarious, and so little vendible at the present time, for anything of half of the market value it bore before the war broke out. And so, in fact, I was assured by a gentleman of high military position, a member of the last Legislature and of the present convention; he stated that the last State Legislature (which was hopelessly and about equally divided, triangularly, between conservative and radical emancipationists and the opponents of any emancipation) would instantly have found a majority for immediate emancipation, if Congress had appropriated either of the sums named for promoting emancipation in Missouri. This gentleman himself was an advocate of a gradual system. They say that Missouri herself is too poor to do anything, and her paper too much depreciated.

The class of men who oppose any interference with slavery, are probably that very considerable class of slave owners, of doubtful loyalty, who sit at home and sulk, under the double restraint of the oath of allegiance and a very stringent bond to compel its enforcement. I talked with one of this class, a very friendly and sensible man, but perfectly unreasonable upon this subject, who thought the Government had no right to touch the negroes of the rebels, even in the cotton States. This same man had just lost two capital negroes, and had been up to Lexington, fruitlessly, to hunt them up; he was much incensed at the unresponsive attitude of the military authorities there; he could get no satisfaction.

There were eighteen regiments of mounted State militia posted at various points about the State when I was there, and these were mainly on the side of the negroes. A lieutenant told me that he met a party of seventy or eighty negroes near Chapel Hill, on their way to Kansas, piloted by two of the State militia. He and his party were on a scout, and hearing that bushwhackers were after the negroes, they went after the bushwhackers. But, at the same time, I found the greatest contempt for the capacity of the negroes expressed on all hands.

The loyal men, for the most part, oppose slavery, or assent to the opposition, for other reasons than that of justice to the negro or a favorable opinion of his natural rights or capabilities. They say he will not fight. "I will agree," said one very intelligent and very loyal slave owner, "to take five hundred white men and disperse twenty-five hundred of them anywhere. Go up to them and glare at them," said he, with a vigorous gesture, "and they will knuckle, sir, you may depend upon it." People out here did not object to enlisting black troops on any other ground.

I should give you but a poor idea of Missouri, if I omitted to speak of the guerillas, who infest the central and western parts of the State, and occupy the thoughts of everybody. The block houses, and the guard at every bridge on every railroad,—even so far north as the Hannibal and St. Joseph line, remind one of them constantly. Along the Missouri river counties, and generally on the south of that river, a traveller passes no day without a reasonable apprehension of being shot or robbed by them. The soldiers are constantly hunting them, but they bring perpetual anxiety and danger to every loyal household, outside of the large towns where soldiers are permanently stationed. Much of this fear is panic, it is true; but much of it is reasonable.

There is no loyalty so seasoned and thoroughly trustworthy as that of the original Union men in these regions. The distinction of "conservative" and "radical" touches only their State politics. The loyal people present a solid front to the rebels.

On the 15th of June the State Convention reassembled. Gov. Gamble sent in a message expressing his views on the subject of emancipation, asserting that the enrolled militia were

adequate to preserve peace within the State, &c. Several plans of emancipation were immediately proposed, looking to the emancipation of all slaves within a few months, perpetually prohibiting slavery in the State, and proposing a system of apprenticeship for the slaves so emancipated for such period as might be sufficient to avoid any inconvenience to the interests connected with slave labor, and to prepare the emancipated blacks for complete freedom. They were referred to a committee on emancipation. On the 23d, the majority of the committee reported the following ordinance of emancipation:

SEC. 1. The first and second clauses of the twenty-sixth section of the third article of the constitution are hereby abrogated.

SEC. 2. That slavery or involuntary servitude, except in punishment of crime, shall cease to exist in Missouri on the 4th of July, 1870, and all slaves within the State on that day are hereby declared to be free: *Provided, however,* That all persons emancipated by this ordinance shall remain under the control and be subject to their late owners, or their legal representatives, as servants during the following period, to wit: Those over forty years of age, for and during their lives; those under twelve, until they arrive at the age of twenty-three; and those of all other ages, until the 4th of July, 1870. The persons or their legal representatives, who, up to the moment of emancipation, were owners of slaves hereby freed, shall, during the period for which the services of such freedmen are reserved to them, have the same authority and control over the said freedmen for the purpose of receiving the possessions and services of the same that are now held by the master in respect of his slaves: *Provided, however,* That after the said 4th of July, 1870, no person so held to service shall be sold to non-residents or removed from the State by authority of his late owner or his legal representative.

SEC. 3. All slaves hereafter brought into the State and not now belonging to citizens of the State shall thereupon be free.

SEC. 4. All slaves removed by consent of their owners to any seceded State after the passage by such State of an act or ordinance of secession, and thereafter brought into the State by their owners, shall thereupon be free.

SEC. 5. The general assembly shall have no power to pass laws to emancipate slaves without the consent of their owners.

SEC. 6. After the passage of this ordinance no slave in this State shall be subject to State, county, or municipal taxes.

A minority report was also submitted which proposed to abrogate the same clauses of the State Constitution as the above ordinance and declaring slavery to be abolished on the 1st of July ensuing. It provided that the slaves and their issue should be apprenticed to their former owners until the 4th of July, 1870, and required the Legislature to pass laws regulating the relation between said apprentices and their masters, to secure to them humane treatment and necessary education; and provided against the importation or immigration of any negro or mulatto into the State, &c. The ordinance was laid over until the next day.

Gov. Gamble in his message to the convention tendered his resignation as governor. A resolution was now offered providing for an election of the State officers by the people.

To this a substitute was offered requesting Gov. Gamble to withdraw his resignation and continue to discharge the duties of governor. The substitute was accepted by a vote of yeas 47, nays 34, and then adopted by a vote of yeas 51, nays 29.

The ordinance of emancipation was subsequently passed in the form in which it was reported, and the convention adjourned on July 1st. Thus was adopted an ordinance of emancipation by one of the State Conventions originally called for the purpose of passing an ordinance of secession from the Union.

The governor in his message to the Legislature early in January, 1864, thus refers to this ordinance of emancipation:

After a full discussion of the subject of Emancipation, an ordinance was adopted which will relieve the State from chattel slavery on the fourth day of July, 1870, with such provisions for service to be rendered by the emancipated slaves, as justice and humanity appeared to the convention to require. Although the ordinance, as adopted by the convention, is not, in all its different provisions, such as I myself approved, and probably not such as a majority of the Convention would have approved, yet as the subject is one which has always produced a diversity of opinion in regard to details among those who are the most earnest friends of Emancipation, the ordinance, as passed, was accepted by a majority of the friends of Emancipation as the best measure that could be agreed upon.

It cannot be expected of me that I shall enter into a vindication of the ordinance in all its details, as I voted in the Convention against some of its provisions; still, I accepted it as a measure that will, in a brief period, accomplish the great object to be obtained in making Missouri a free State.

I am aware that there are many who seize upon particular provisions of the ordinance as a ground of objection to the whole measure, while others express apprehensions that the delay in its taking effect, exposes the whole measure to the danger of repeal. I am persuaded that no intelligent body of the friends of emancipation who look at the subject in all its different bearings, with the eyes of justice and humanity can ever be assembled without finding themselves differing in opinion about details, and therefore it is no solid objection to a plan of emancipation that some of its details satisfy some of the friends of emancipation, while they dissatisfy others. As to the supposed danger of a repeal of the measure adopted, I regard it as altogether imaginary. I am fully persuaded that those interested in slave property in the State, in view of the great insecurity of such property, will never seek to disturb the measure as adopted, and no others have any interest in doing so; and thus I believe the measure will go quietly into operation and the State be relieved from all the evils of slavery. If I am right in this belief, the further agitation of the subject of emancipation, while it may promote the organization of political parties and keep up a contest for office, will contribute neither to the peace nor the prosperity of the State.

After the adjournment of the convention a meeting was held in St. Louis by those opposed to the scheme of emancipation adopted by the convention, to the exemption of slave property from taxation, to the postponement of the State election, &c. Resolutions were adopted declaring these views, and looking to the next Legislature to call a new convention. An active canvass for the support of these views was now made by the unconditional Union men, or Radical Emancipationists, as they were called,

which resulted in the assembling of a convention representing their views. This body met at Jefferson City on Sept. 1st, and consisted of delegates from four fifths of the counties of the State. The following platform was reported by the Committee on Resolutions, and adopted:

First. Sustaining the Government in a vigorous prosecution of the war to complete the final suppression of the rebellion.

Second. Denouncing the military policy pursued in the State, and the delegation by the General Government of the military power to a provisional State organization, the whole tendency of which is to throw back the people under the control of the pro-slavery party, and by reactionary influences to paralyze the Federal power in suppressing the rebellion, to prolong a reign of terror throughout a large section of the State, and extend aid and comfort to those who are meditating hostility to the national authority in other States.

Third. Endorsing the President's emancipation proclamation and asking for its prompt execution, declaring that they will support no one not pledged to its principles; believing that those liberated under it cannot be reduced to slavery, and refusing to sustain any reorganization of the country that does not embody the freedom principles therein contained.

Fourth. Referring to the French influence in Mexico, and calling on the General Government to resist it.

Fifth. Arraigning the Provisional Government as untrue to the loyal people of the State, and giving eight reasons therefor.

Sixth. Demanding immediate emancipation in Missouri.

Seventh. Favoring a constitutional amendment to disfranchise all who have taken up arms against the Government or adhered to the enemies thereof.

Eighth. Demanding that the Legislature call a new State convention, to take into consideration the grievances under which the State now labors, and in case of their refusal nothing can stop the right of the people to act in the matter.

Resolutions were also passed requesting the Union men of Illinois and Kentucky to unite with the convention in an appeal to President Lincoln; also requesting Governor Gamble and Lieut.-Gov. Hall to resign, and the President to remove General Schofield; also denouncing Quantrell's raid on Lawrence, and expressing the warmest sympathies with the survivors of the massacre; inviting all lovers of "free labor, free soil, and free speech" to seek homes in Missouri, and guaranteeing them protection; thanking the gallant soldiers of Missouri; thanking the President for arming negroes to kill rebels; warning the members of the Legislature against disregarding the will of the people; and requesting the radical members of the Legislature to vote for B. Gratz Brown and Benjamin Loan for United States Senators; also instructing the State executive committee of the emancipation party to prepare a public address calling upon the people to form a State organization and a central organization of the United States to give efficacy and power to reforms in our federal relations. The following resolutions were also adopted:

Resolved, That we respectfully demand of General Schofield permission to recruit negroes belonging to disloyalists of this State. That as the exigencies of the times indicate a change of commanders in the department, we appoint a committee to draft a memorial, which shall be signed by the members of this conven-

tion, requesting the President to assign Gen. Butler or some other suitable man to command this department. That we regard the President's proclamation of January, 1863, irrevocable, and we request our legislature, senators, and representatives of Congress, to use their utmost endeavors to have our national constitution amended, prohibiting slavery forever, in States now free, or hereafter applying for admission into the Union.

Resolved, That in view of the serious complications arising out of hostilities on the part of the Provisional State Government to the national authority and national policy, and the absence of protection from the inroads of guerillas, we hereby instruct the present convention to appoint a general committee of public safety, composed of one from each congressional district, whose duty it shall be to confer with the loyal men of the State, to organize and arm them for protection; and in the event of no relief being obtained from our present troubles, to call upon the people of the State to act in their sovereign capacity, and take such measures of redress as shall be deemed necessary.

A committee of one from each county was also appointed to visit Washington and lay before the President their grievances. Candidates for judges were also nominated.

Aside from the forces under the command of Gen. Schofield, the military power of the State was in the hands of Gov. Gamble. There were in the State two bodies of soldiery known as the Missouri militia. These were designated by the terms "Missouri State militia" and "enrolled Missouri militia." The first were volunteer troops enlisted in the service of the United States, and supported by the Federal Government. Their distinctive feature was that they were intended exclusively for the protection of the State, and the governor could, at his discretion, remove from office all officers, and could accept resignations tendered by officers. Ten regiments of this force were kept in service under the commanding general of the department. The "enrolled Missouri militia" was an entirely different force, organized by order of the governor, controlled by him, and at no time subject to the orders of any United States officer, except the governor thought proper to make them so. This force was enrolled in the summer of 1862, and kept up at the expense of the State when in active service.

On the 30th of December, 1862, Governor Gamble issued General Order, No. 50, in the following words:

The enrolled militia are under the exclusive command of their own officers, except when they are by express orders placed under the command of United States officers, and they will be governed only by such orders as may be issued from these headquarters. If, therefore, any officers of the enrolled militia are engaged in making assessments, in pursuance of orders from United States commanders, they will immediately suspend all action under said orders.

In consequence of this order, the provost-marshal-general of Missouri and his assistants, were denied the aid of the enrolled militia in enforcing their orders.

On the 23d of April, 1863, Governor Gamble issued General Order, No. 14, in the following words:

Hereafter no enlistments will be allowed from any organization of enrolled Missouri militia into the vol-

unteer service of the United States, when such militia shall have been detailed for active service, and shall have been embodied as a force in the field.

These orders were issued while Gen. Curtis was in command of the Department of Missouri. The number of the enrolled militia, thoroughly organized for instant service, was 52,056 fighting men.

On the 24th of May, Gen. Schofield took command of the department, and on the 29th, Governor Gamble issued the following order:

The command of the enrolled militia, now in active service within the State, including the provisional regiments, is conferred upon Major-General John M. Schofield, commanding the Department of the Missouri.

So long as Gen. Schofield and Governor Gamble were in authority, the provost-marshal could not receive aid from the local militia without the consent of the former, neither could the unconditional Union men use this force to assist them in suppressing everything which looked like sympathy with treason.

The committee appointed by the Unconditional Union Convention, proceeded to Washington for an interview with President Lincoln. The substance of their address, made on the 30th of September to the President, was in these words:

It is in your power, Mr. President, to settle the whole difficulty. Only three things are necessary to this end:

1. The cessation of all support from the Treasury of the United States to the enrolled Missouri militia.
2. The occupation of Missouri by United States troops; and
3. The appointment of a department commander in Missouri who will not make himself a party to Governor Gamble's pro-slavery policy.

This is the sum of our requests in regard to military affairs. If they are granted, we can assure you of permanent peace in Missouri.

One other subject demands attention in connection with Missouri affairs. On the 3d of next month an election is to be held in that State for judges of the Supreme and Circuit Courts. We have good reason to believe, and to assert, that a strenuous effort will be made to carry that election against the Radical party by the votes of returned rebel guerillas, bushwhackers, and others who have given aid and comfort to the rebellion.

By an ordinance of our State Convention, passed June 10th, 1862, every voter is required, in order to vote, to take a prescribed oath. Unless the military authorities interpose, we believe that thousands of the above named classes of persons will be permitted to vote without taking that oath. We ask that you will be pleased to direct the department commander to issue such an order as Gen. Burnside issued in reference to the Kentucky election, holding the judges of election responsible to the military authorities if they allow votes to be given by parties who do not take that oath. This will tend to exclude such parties from the polls, and thereby secure a fair election.

The main points of the reply of the President in a letter to the delegation were, that he failed to see that the condition of Missouri, and the wrongs and sufferings of the Union men were to be attributed to weakness, wickedness, or immorality, but rather to civil war. He did not believe that the massacre at Lawrence proved the imbecility of Schofield, as similar acts could have been committed by Grierson or John Morgan had they chosen to commit

them. He approved Gen. Schofield's action in preventing a counter raid into Missouri by the citizens of Kansas, as the only way to avoid indiscriminate massacre. He said that the charges that Gen. Schofield had purposely withheld protection from the loyal people, and purposely facilitated the objects of the disloyal, were altogether beyond belief.

With his present views, he therefore declined to remove Gen. Schofield.

Regarding the enrolled militia, he says he shall ascertain better than he now knows what its exact value is. In the meantime he declined to abandon it, and expressed gratitude to Gen. Schofield for raising it in June previous, thereby enabling him to strengthen Gen. Grant, at a time when reinforcements were imperatively needed. He discussed the propriety of removing Gen. Curtis, concurred in the delegation's request regarding the election, and concluded as follows:

I do not feel justified to enter upon the broad field you present, as regards the political differences between the radicals and conservatives. From time to time I have done and said what appeared to me proper to do and say. It obliges nobody to follow me, and I trust it obliges me to follow nobody.

The radicals and conservatives each agree with me in some things and disagree in others. I could wish both to agree with me in all things, then they would agree with each other, and would be too strong for any foe from any quarter. They, however, choose to do otherwise. I don't question their rights.

I, too, shall do what seems to be my duty. I hold that whoever commands in Missouri is responsible to me, and not either to the radicals or conservatives. It is my duty to hear all, but at least I must within my sphere judge what to do and what to forbear.

The delegation, in an address to the "Radical Union men of Missouri," dated October 22d, says: "The only point in which our mission was a success, is that of the order of the President to Gen. Schofield concerning elections in this State; which you will have noticed with gratification has already been complied with, by the issue of General Order, No. 120."

On the 12th of October, Gov. Gamble issued a proclamation, of which the following is an extract:

The only design of this paper being to guard the unwary against being led by the artifices of these designing men into a false position in relation to the State, which may involve them in danger, it is impossible, within any reasonable limit, to notice the innumerable false accusations which have daily issued from a corrupt and malignant press for many months past. Those which have been noticed above, and which are most important, may be taken as fair specimens of the correctness of all.

It may with propriety be repeated, that no objection is here intended to be suggested to any change in their government which the people may think proper to make by peaceful means, in accordance with the Constitution and laws, but it is intended to warn all persons against any attempt to effect a change by means of violence.

The principle that every Government is bound to protect itself against violence, is the principle upon which the Federal Government is engaged in suppressing a great rebellion, and is applicable as well to the State Government.

Our State Constitution prescribes what shall be treason against the State, and our statutes fix the penalty at death or long imprisonment in the penitentiary. There can be traitors against the State as well as against the Federal Government.

In all treasons the masses engaged are misled by arts and falsehoods of a few designing leaders, and it is now earnestly desired that all the good people of Missouri shall be on their guard against all artifices which may lead them to their ruin.

It is earnestly desired to avoid the spectacle of a social war on this American continent, and that the people of a free country may exercise all their rights under the Constitution and the laws without being hindered by violence, so that at least we may be able to furnish an example of a people capable of self-government.

To the end, therefore, that all the good people of the State may be guarded against being involved in conspiracies or combinations for violence, and that all persons may be induced to exercise their own rights freely, and respect the rights of others, I, Hamilton R. Gamble, Governor of the State of Missouri, while entreating the people to abstain from violence amongst themselves, and from all unlawful combinations, do admonish them that the oath which binds me to see that the laws are faithfully executed, leaves me no choice as to the employment of all the force I can command, to sustain the laws, preserve the peace of the State, and punish those who disturb it. And I do admonish them that, as the highest political right of a citizen is to vote at elections, any interference, especially by the military, with the right of the qualified voters to vote for whomsoever they please, will be regarded as an offence of the greatest magnitude.

On the 28th of September, Gen. Schofield issued the following order relating to the election:

HEADQUARTERS, DEPT' OF THE MISSOURI, }
St. Louis, Mo., September 28th, 1863. }

The right of the people to peaceably assemble for all lawful purposes, and the right to freely express their will at the polls according to law, are essential to civil liberty. No interference with these rights, either by violence, threats, intimidations, or otherwise, will be tolerated.

Any commissioned officer who shall incite or encourage any interference with any lawful assemblage of the people, or who shall fail to do his utmost to prevent such interference, shall be dismissed the service; and any officer, soldier, or civilian who shall, by violence, threats, or otherwise, actually interfere with any such lawful assemblage of the people, shall be punished by imprisonment or otherwise, at the discretion of a court-martial or military commission.

Any officer, soldier, or civilian who shall attempt to intimidate any qualified voter in the exercise of his right to vote, or who shall attempt to prevent any qualified voter from going to the polls or voting, shall be punished by imprisonment or otherwise, at the discretion of a court-martial or military commission.

By command of Maj.-Gen. SCHOFIELD:

C. W. MARSH, Assistant Adjutant-General.

The election was held for Supreme Court Judges, and resulted as follows: for Judge Clover, Unconditional Union, 46,548; Bates, Union, 47,229.

A session of the Legislature assembled immediately after the election. The unconditional Union men had a majority in the House, but not in the Senate. Before the close of the session, in February, 1864, a bill was passed, which provided simply for a call of a convention to revise the organic law of the State. The election for delegates is to be held in November at the time of the general election. At

the same time the people are to vote on the proposition whether they desire a convention or not. If they decide against a convention, then the delegates are not to assemble, and the whole thing falls through. Should the people vote to sustain the proposition, then the convention meets in St. Louis, on the 5th of January, 1865.

During 1863 about fifteen hundred were recruited in the old regiments in the Federal service. No new regiment of infantry was raised, but one of cavalry, and two regiments of negro troops.

For the purpose of promoting emigration to the State from Europe, an agent was sent out, with the promise of a small salary from some of the railroad companies. Another was sent to Germany by a manufacturer in St. Louis, to procure laborers necessary to the conduct of his business.

The institutions of the State have suffered from the disturbances, but are generally in a favorable condition.

MOORE, CLEMENT C., LL.D., an American scholar, died at Newport, R. I., July 10th, 1863. He was born in New York, July 15th, 1779, and was a son of the late Bishop Moore; graduated at Columbia College in 1798, was appointed professor of Biblical learning in the General Protestant Episcopal Seminary in 1821, and subsequently of Oriental and Greek Literature in the same institution, to which he afterward made a gift from his family inheritance of the large plot of ground on which it stands. He retired with the title of Emeritus Professor in June, 1850. His published works are: a collection of Bishop Moore's Sermons (2 vols. 8vo, New York); a Hebrew and Greek Lexicon (1809); a collection of "Poems" in (1844), and "George Castriot," surnamed Scanderberg, King of Albania (1850). Among his poems, the one which is most generally known is the famous Christian ballad commencing "'Twas the night before Christmas, and all through the house." His remains were brought to New York and interred in the family vault at St. Luke's church, on the 14th of July, 1863.

MOUNTAIN, Right Rev. GEORGE JEHOSEPHAT, D.D., D.C.L., Lord Bishop of Quebec, was the second son of Bishop Jacob Mountain, the first Anglican bishop of Quebec. He was born at Norwich, England, on the 27th July, 1789, and died at his seat, Bradfield, near Quebec, on the morning of the 6th of January, 1863. He came to Canada with his father in 1793. In 1805 he returned to England, and was placed, together with his three other brothers, with Rev. T. Monro, rector of Little Easton, in Essex, a favorite pupil of Dr. Parr, and a scholar of repute. In due time he was sent to Cambridge, where he graduated at Trinity College, in the year 1810. In the same year he returned to Canada, and pursued his studies with his father; and at the canonical age was by him ordained deacon, August 2d, 1812, and priest in 1813. Immediately upon his admission he began his

labors in the parish of Quebec, in which, with a short interruption, to be noticed presently, he continued to minister till his death. His first appointment was that of evening lecturer at the Cathedral, which he held till the year 1814. In that year he was appointed rector of Fredericton, in New Brunswick, and continued laboring there with great acceptance until the year 1817, when, to the universal regret of the community of Fredericton, he was made rector of Quebec and bishop's official, and removed to that city again. The deep and lasting hold which he obtained upon the affections of his first independent charge, by the labors of those three years, was very strikingly shown in the great feeling manifested by those of them that remained alive on his visiting Fredericton for the first time, thirty years afterward, in 1847. He was nineteen years rector of Quebec, before he was consecrated bishop; his zeal and devotion to his work during these years nothing could exceed, and his success was correspondingly great. In the midst of those useful labors came that dreadful scourge, the cholera, in 1832, and again in 1834. Then was his ministry put to the full proof, and he literally lived night and day among the dying and the dead. In 1821 he was made archdeacon of Quebec, and in 1825 was deputed to proceed to England on church business, especially in the hope of inducing the Government to appoint the Hon. Dr. Stewart, a son of the Earl of Galloway, as suffragan bishop. In this he succeeded. Dr. Stewart was consecrated Bishop of Quebec the following year. In the year 1835 Archdeacon Mountain was again deputed to proceed to England on the Clergy Reserve question. On the 14th of February, 1836, he was consecrated bishop, with the title of Bishop of Montreal, but in reality to be coadjutor to Bishop Stewart, and entered upon his duties in the latter half of that year. He had been only some ten days in Quebec when Bishop Stewart was obliged altogether to retire from Canada, devolving the charge of the whole province upon Bishop Mountain. He continued, under the title of Bishop of Montreal, to administer this enormous diocese (which has since been divided into six), travelling over the whole length and breadth of the province, until 1839, when Upper Canada was made a separate see. The whole of Lower Canada remained under his supervision until 1850. In that year the diocese of Montreal was, entirely through his exertions, erected; and Bishop Mountain elected to continue in charge of the poorer and by far more laborious portion of his late diocese, the present diocese of Quebec. Previously, however, in 1844, at the request of the Church Missionary Society, he visited the Red River settlement, where there were mission stations, and several missionaries of that society. The visit occupied three months. On his return the bishop's journal was published by the Church Missionary Society, and through the facts thus brought

under the notice of the religious public at home, but more by the bishop's own earnest and repeated representations, the Red River settlement was erected into an episcopal see, under the name of the Diocese of Rupert's Land, in the year 1849. In 1842, by his exertions, the Church Society was established, and from that day, the diocese may be said to have taken a fresh and more vigorous start. In 1843 the Church Temporalities Act, obtained through his exertions, became law. In 1844 he founded, and by great exertions, obtained from friends the partial endowment of the Lower Canada Church University, Bishop's College, Lennoxville. This he always considered as the great work of his life, and he watched over its progress with the greatest anxiety. Its success, especially that of its junior department recently, was one of the great consolations of his latter years. From this college have been ordained about fifty clergymen, most of whom are now successfully laboring in the Canadian dioceses.

MULREADY, WILLIAM, a British painter, born in Ennis, Ireland, in 1786, died near London, July 7th, 1863. He was admitted a student of the Royal Academy at fourteen years of age, having previously executed some sketches which excited the admiration of Banks, the sculptor, who predicted that he would distinguish himself. His early efforts were directed toward what is popularly known as "High Art," and he betrayed the influence of his academic training by attempting such ambitious subjects as "Polyphemus and Ulysses," "The Disobedient Prophet," &c.; but he soon restricted his fancy to shorter and easier flights, and in pictures of modest size and still more modest pretensions he found a range of subjects better suited to his taste and capacity. His "Cottage," "Carpenter's Shop," "Kitchen Fire," and similar pieces, painted at the age of twenty or thereabouts, excited comparatively little attention, but with every year he gained in executive ability and knowledge of external nature, until his merits forced themselves upon public notice.

The "Rattle" (1808), the "Roadside Inn" (1811), and "Punch" (1813), showed him a good painter of *genre*, with a careful eye for color; and in 1815 his picture of the "Idle Boys" caused him to be elected an associate of the Royal Academy. A few months later he was admitted to the full membership of that body, an honor seldom conferred upon an artist so soon after his first election. Thenceforth he was a pretty regular contributor to the annual

exhibitions of the Academy, and during the last few years of his life was its oldest surviving member.

The series of graphic and humorous works which marked his academic career are among the choicest specimens of the modern English school, and in all of them may be seen the conscientious labor of a man who despised no means, however trivial or tedious, tending to perfection in his art. The subjects of his best known pictures sufficiently indicate the scope of his genius. They include "The Fight Interrupted" (1816), "The Wolf and the Lamb" (1820), "The Careless Messenger" (1821), "The Convalescent" (1822), "The Origin of a Painter" (1826), "The Last In" (1835), "Fair Time" (1840), "The Ford" (1842), and a charming series from the "Vicar of Wakefield," of which "Choosing the Wedding Gown," and "Burchell and Sophia Hay-making," may be taken as examples. A set of twenty designs from this story, produced in 1840, are unique in character and execution. Most of the above works have found a place in the royal collection, in the national gallery, and in the chief private collections of the United Kingdom.

For many years during his early struggles toward eminence, Mulready gave lessons as a drawing-master, and the practice thereby obtained, together with his academy studies from the life, gave him a thorough mastery of the human form and of flesh coloring. His "Woman Bathing," exhibited in 1849, though a work of a kind opposite to that in which he had gained his reputation, presents a forcible illustration of his skill in painting the nude figure when he chose to make the attempt. In all technical excellence his career was one of uninterrupted improvement, although in his later pictures the elaborate finish of his style tends perhaps to excess; and for luminous color, delicacy of finish and expression, and accurate drawing, he was almost without a rival. His favorite apophthegm, according to Ruskin, was, "Know what you have to do, and do it," and no one can look at his small and carefully finished pictures, of which he produced scarcely more than one a year for exhibition, without feeling that he conformed faithfully to it. In 1848 a remarkable exhibition of his works was formed in London, and in the spring of 1864 there was another in the same city on a larger scale, to which contributions were sent by the Queen and some of the most eminent collectors in Great Britain.

N

NAVY, CONFEDERATE. The Confederate Navy Department for the year 1863, comprised a secretary, S. R. Mallory, and five clerks; a bureau of Orders and Details, Captain F. Forrest; a bureau of Ordnance and

Hydrography, Commander George Minor; a bureau of Provisions and Clothing, Paymaster John de Bree; and a bureau of Medicine and Surgery, Surgeon W. A. W. Spottswood. The grades remained as previously established, and

among the superior officers were 1 admiral, 12 captains, 30 commanders, and 112 first and second lieutenants, most of whom had belonged to the United States navy. Of those known previous to the war, or by events which have happened since its commencement, the most conspicuous are Franklin Buchanan, admiral, who commanded the Merrimac in her encounter with the Monitor in Hampton Roads; Captains G. N. Hollins, D. N. Ingraham, Samuel Barron, W. F. Lynch, and Raphael Semmes, the commander successively of the privateers Sumter and Alabama; Commanders M. F. Maury, T. J. Page and H. J. Hartstene; and Lieutenants W. L. Maury and John N. Maffit, commanding respectively the privateers Georgia and Florida. Owing to the small number of vessels afloat the greater part of the naval officers discharge shore duties, and some of them are even employed in the army. In determining the relative and assimilated rank of officers who resigned from the navy of the United States to take service in the Confederate navy, reference is had to the date of commissions held by them in the former. The following table exhibits the annual pay of the naval officers:

<i>Grades.</i>	<i>Pay per annum.</i>
Admiral.....	\$6,000
Captains—when commanding squadrons.....	5,000
All others on duty at sea.....	4,200
On other duty.....	3,600
On leave or waiting orders.....	3,000
Commanders:	
On duty at sea first five years after date of commission.....	2,825
On duty at sea second five years after date of commission.....	3,150
On other duty first five years after date of commission.....	2,662
On other duty second five years after date of commission.....	2,825
All other commanders.....	2,250
Lieutenants commanding—at sea.....	2,550
First Lieutenants—on duty at sea.....	1,500
After seven years' sea service in the navy.....	1,700
After nine years' sea service in the navy.....	1,900
After eleven years' sea service in the navy.....	2,100
After thirteen years' sea service in the navy.....	2,250
On other duty.....	1,500
After seven years' sea service in the navy.....	1,600
After nine years' sea service in the navy.....	1,700
After eleven years' sea service in the navy.....	1,800
After thirteen years' sea service in the navy.....	1,875
On leave or waiting orders.....	1,200
After seven years' sea service in the navy.....	1,266
After nine years' sea service in the navy.....	1,333
After eleven years' sea service in the navy.....	1,400
After thirteen years' sea service in the navy.....	1,450
Second Lieutenants—duty afloat.....	1,200
When on leave or other duty.....	1,000
Fleet surgeons.....	3,300
Surgeons—on duty at sea:	
For first five years after date of commission as surgeon.....	2,200
For second five years after date of commission as surgeon.....	2,400
For third five years after date of commission as surgeon.....	2,600
For fourth five years after date of commission as surgeon.....	2,800
For twenty years and upward after date of commission.....	3,000
On other duty:	
For first five years after date of commission as surgeon.....	2,000
For second five years after date of commission as surgeon.....	2,200
For third five years after date of commission as surgeon.....	2,400
For fourth five years after date of commission as surgeon.....	2,600
For twenty years and upward after date of commission.....	2,800

The navy may be said in general terms to comprise two classes of vessels: those intended for river or harbor defence, as ironclads, rams, floating batteries, or river steamboats transformed into gunboats; and sea-going steamers of moderate size, but of great speed and powerful armament. Some of the most formidable of the former class, both completed and in the course of construction, perished amidst the stirring events of 1862; but enough remained at the commencement of the last year to make it a matter of the first importance for the Federal Government to compass their destruction. Among those in existence at the latter date may be mentioned the Chattahoochee, a large ironclad, building in the Appalachicola river: the Atlanta, an ironclad, formerly the Fingal, and the Georgia, a floating battery, in the Savannah river; the Chicora, Palmetto State, and Ashley, ironclads, beside two building and unnamed, in Charleston harbor; the Baltic and Tennessee, ironclads, and the Selma, Gaines and Morgan, "cottonclads," in Mobile; and the Richmond or Merrimac No. 2, ironclad, building at Richmond. These were exclusive of the W. H. Webb, a powerful ram, and various small boats in the Western waters and the harbors of Texas. Rumors also prevailed of rams or ironclads building in the Roanoke, Tar and Neuse rivers, in North Carolina.

Of these the Chattahoochee burst her boiler before getting to sea and became a total loss; the Atlanta was captured by the Weehawken in Ossabaw Sound, near Savannah, on June 17th, after a brief contest; and the Chicora and Palmetto State participated in the attack upon the blockading fleet off Charleston, on Jan. 31st. (*See OPERATIONS OF THE UNITED STATES NAVY.*) The other vessels remained in the possession of the Confederates at the close of the year; but one of them, the Tennessee, met with a fate similar to that of the Chattahoochee, while steaming out of the Mobile river to attack the Federal cruisers, April, 1864. The rebels also lost almost every armed steamer they possessed in the Western waters, including the ram Queen of the West, previously captured by them, and a number of unfinished rams at Yazoo City and elsewhere. Other casualties on the Atlantic seaboard were the destruction of the privateer Nashville under the guns of Fort McAllister by the Montauk, and that of the Isaac Smith captured by the rebels in Stone river, and which was sunk by the blockading fleet, while attempting to run out of Charleston harbor, on June 5th.

The most important operations of the navy, however, were those performed by the second class of vessels belonging to it, the armed, sea-going cruisers, whose depredations upon commerce have cost the United States many millions in money, and have almost paralyzed the shipping interest in the chief seaports. The commencement of 1863 found the Alabama, a vessel built, manned and equipped

in British waters, actively cruising among the West Indies. In the middle of January the *Oreto*, now called the *Florida*, slipped out of Mobile, where she had taken refuge some months previous, and joined the *Alabama* in her work of destruction; and in the beginning of April the *Japan*, subsequently named the *Georgia*, escaped from the Clyde, and proceeding to the neighborhood of Ushant island, on the French coast, was there armed and equipped as a privateer. "Sailing sometimes under the English and sometimes under the rebel flag," says Secretary Welles, "these rovers, without a port of their own which they can enter, or to which they can send a single prize for adjudication, have roamed the seas, capturing and destroying the commercial ships of a nation at peace with Great Britain and France; but yet when these corsairs have needed repairs or supplies, they have experienced no difficulty in procuring them, because it had been deemed expedient to recognize the rebels as belligerents. Not one of the many vessels captured by these rovers has ever been judicially condemned as a legal capture. Wanton destruction has been the object and purpose of the captors, who have burnt and destroyed the property of their merchant victims."

During the first three months of 1863 the *Alabama** and *Florida* cruised with impunity in the West India waters, finding no difficulty, when hard pressed, in taking refuge in neutral ports, or within a marine league of the shore of a neutral Government, and meeting with abundant sympathy from the local authorities and the population. Fulfilling few of the obligations of armed cruisers, they yet demanded and received all the favors accorded to nations having open ports. The Federal war vessels, on the other hand, were invariably subjected to the rules of national law in their strictest construction. The vigilance of the flying squadron under acting Rear Admiral Wilkes, which was organized to protect American interests in that quarter, and especially to guard the treasure ships in their transit to and from Aspinwall, finally made the neighborhood too hot for the *Alabama* and *Florida*, and in April they steered southward, and recommenced their work of destruction off the coast of South America, where many valuable prizes fell into their possession, which were almost invariably burned or bonded, the crews being despatched to the nearest available port. In May the two privateers parted company, the *Alabama* proceeding to the Cape of Good Hope, while the *Florida* sailed northward, and on July 8th ventured within 60 miles of New York. After remaining several days in this dangerous neighborhood, she repaired to Bermuda, and about the middle of August turned up on the track of the Liverpool and New York

packets. Then, after capturing a few prizes near the British Isles, she put into Brest to refit.

In the early part of August the *Alabama*, accompanied by the *Tuscaloosa*, a captured merchantman transformed into an armed tender, arrived at Capetown, where an enthusiastic ovation awaited them. One of the first acts of the privateersmen was to capture the American ship *Sea Bride*, within a marine league of the land. The American consul protested against this proceeding, and also against the admission of the *Tuscaloosa*, before legal condemnation, into Simon's Bay, as a violation of the Queen's proclamation of neutrality, but could obtain no redress. Soon afterward the *Georgia*, which ever since her equipment as a privateer had sailed southward along the African coast, burning and plundering on her way, also arrived at Capetown.

Early in February the *Vanderbilt*, one of the largest and fastest steamers in the United States Navy, was put into commission for special service against privateers in the West India waters, and her commander was ordered, should he be satisfied that the *Alabama* and *Florida* had left that locality, to proceed down the South American coast to Rio Janeiro, and thence to the Cape of Good Hope. In derogation of these orders, Admiral Wilkes, soon after the arrival of the *Vanderbilt* in the West Indies, transferred his flag to her and detained her in his possession until the middle of June, many weeks after the departure southward of the privateers. The latter, in consequence, were enabled to do immense damage to American commerce in the Southern Atlantic, and the plans of the Navy Department for their capture were frustrated. The *Vanderbilt* finally reached Rio Janeiro in the middle of July, and proceeding thence to Capetown via St. Helena, arrived at the former place in September. The rebels, however, were by this time on the alert, and kept out of the way of the *Vanderbilt*, which returned to the United States in the latter part of the year, having accomplished nothing important during her cruise. Subsequent to September the *Alabama* proceeded to the East Indies, and took many valuable prizes in that quarter, while the *Georgia* returned to France.

Early in May the *Florida*, while cruising in the West Indies, captured the brig *Clarence*, which was fitted out as a privateer and supplied with a crew, under command of Lieut. Charles W. Read, formerly a midshipman in the U. S. navy. The *Clarence* immediately steered northward, keeping near the Florida and Carolina coasts, and taking several valuable prizes on the way. On June 12th, when within 30 miles of the capes of Virginia, she captured the bark *Tacony*, to which vessel Lt. Read transferred his command. For the next 12 days he pursued a career of uninterrupted success among the unsuspecting merchantmen and fishing vessels which he encountered; but

* The capture of the U. S. gunboat *Hatteras*, by the *Alabama*, on January 17th, is narrated under the head of NAVY, CONFEDERATE, in Vol. II. of this work.

ascertaining that Union cruisers were on his track, he burned the Tacony, to avoid recognition, and on the 24th transferred his crew and guns to the captured schooner Archer. He then made for Portland harbor, with the intention of burning two gunboats building there and cutting out the revenue cutter Caleb Cushing. At sunset he came to anchor near the entrance of the harbor, and soon after midnight, the moon having then gone down, rowed direct to the Cushing in two boats with muffled oars, boarded the vessel, and having overpowered the crew, started for sea. No sooner was the Cushing missed from her anchorage than the Forest City and Chesapeake, two merchant steamers, were manned with troops and armed volunteers, and started in pursuit. A short distance from the harbor they overhauled her, and having no guns capable of coping with her heavy armament, made preparations to board, perceiving which the rebels took to their boats, after firing half a dozen shots at the steamers. Soon after the Cushing blew up. The boats however, were captured, as also the Archer, and the whole crew securely confined.

On December 17th the steamer Chesapeake, plying between New York and Portland, was seized on her passage to the latter place, when about 20 miles northeast of Cape Cod, by 16 of her passengers, who represented themselves as belonging to the Confederate States. The captain was put in irons, one of the engineers killed and thrown overboard, and the first mate wounded. The crew and passengers, with the exception of the first engineer, retained to manage the steamer, were subsequently put ashore in a boat, and the Chesapeake sailed to the eastward. Upon the reception of the news in the United States, a fleet of cruisers started in pursuit, and on the 17th the Chesapeake was captured by the Ella and Anna, in Sambro harbor, Nova Scotia, and, with a portion of her crew, was carried to Halifax and delivered to the authorities. The prisoners were released by a mob, but the Chesapeake was subsequently restored to her American owners by an order of the chief colonial tribunal. (See PRIZE.)

Of the amount of damage inflicted by rebel cruisers upon American commerce no complete or trustworthy estimate has yet been made. While at Capetown, in September, Captain Semmes stated that the total number of captures made by the Alabama amounted to 56 vessels, which he supposed would involve a direct loss of four million dollars, beside the loss of freight, the high rates of insurance; and other embarrassments caused by the danger of carrying goods in American bottoms. The captures of the Florida were estimated by her commander in September at 72, and their total value at \$15,000,000, which is evidently exaggerated. From tables prepared at the close of the year it would appear that since the commencement of the war 184 vessels, aggregating 84,871 tons, and with their cargoes valued at \$15,000,000, have been destroyed upon

the high seas. Yet this is but a small part of the loss sustained by American commerce, as will be seen by the following figures:

	Value under American flag.	Value under Foreign flags.
Foreign carrying trade in 1860..	\$234,000,000	\$150,000,000
Foreign carrying trade in 1862..	150,000,000	238,000,000
Foreign carrying trade first two quarters in 1863.....	55,000,000	146,000,000

Of the extent to which the city of New York has suffered, the following table, showing how the carrying business, of which she once enjoyed a large share, has been transferred to foreign flags, is sufficiently indicative:

Foreign trade of the port of New York, for the quarter ending June 30th.

1860.	In American vessels.	In foreign vessels.
Value of goods imported.....	\$35,197,101	\$18,242,622
“ “ exported.....	27,401,225	12,776,229
Total trade.....	\$62,598,326	\$30,918,851
1863.		
Value of goods imported.....	\$12,731,819	\$30,139,557
“ “ exported.....	10,672,011	35,750,296
Total trade.....	\$23,403,830	\$65,889,853

A part of this change is doubtless in consequence of the active employment of so many American ships for purposes connected with the war; but, after making allowance for this fact, a sufficient number of vessels could be found for commercial purposes, were not shippers deterred by fear of capture from employing them as carriers. The success of their cruisers already afloat, and the ease with which they could be built and equipped in foreign countries, prompted the Government to contract for others, and during the year the Alexandra, a fast steamer of the Alabama class, and two iron-clad rams, the latter undertaken by Laird, of Liverpool, ostensibly for the “Emperor of China” or the “Viceroy of Egypt,” were under construction in England. The vigilance of the American minister and the consuls prevented the completion of these, and at the close of the year, they were temporarily in the possession of the British Government, subject to the decision of the courts. The Alexandra case, after being carried to the House of Lords, on appeal from the Court of Exchequer, was decided against the Government, and the vessel was restored to her owners (see page 350.) Sufficient evidence of the building of cruisers in France having come to the notice of the American minister in that country, he has laid the facts before the Government. Early in 1864, a document purporting to be the annual message of Mr. Mallory, the secretary of the navy, was published in many of the newspapers of the United States and Europe, and by its frank admissions of the contracts entered into with foreign shipbuilders, was supposed to confirm the above statements. It subsequently, however, proved to be a forgery.

NAVY OF THE UNITED STATES. The following table exhibits the number and capacity of the naval vessels of the United States, whether built or in the course of construction, at the date of the two last annual reports of the Secretary of the Navy:

	No. of vessels.	No. of guns.	Tonnage.
Navy at close of 1863.....	588	4,443	467,967
Navy at close of 1862.....	427	3,268	340,036
Inc. exclusive of vessels lost..	161	1,175	127,931

Of the vessels placed under construction in 1863, 7 were double-end iron steamers, of 12 guns and 1,030 tons each; 20 were single-turret ironclads, of 2 guns and 614 tons each; 4 were double-turret ironclads, of 4 guns and 3,130 tons each; 12 were clipper screw sloops, of 8 guns and 2,200 tons each; 8 were spar deck screw sloops, of 20 guns and 2,200 tons each; and 7 were screw sloops of great speed, carrying each 8 guns, and of which 5 were of 3,200 tons each, and 2 of 3,000 tons each, making a total of 58 vessels, 452 guns, and 48,010 tons. This is exclusive of over 30 vessels commenced previous to 1863, and not yet completed. The remaining vessels added to the navy during the year, comprised over 50 steamers for blockading and supply purposes, of which at least 20 were captured while attempting to run into blockaded ports, beside tugs, tenders, store-ships, &c. The classes of vessels, and aggregate armament and tonnage of the navy, including all the vessels building, at the close of 1863, were as follows:

	No. of vessels.	No. of guns.	Tonnage.
Ironclad steamers, coast service.	46	150	62,518
Ironclad steamers, inland service	29	152	20,784
Sidewheel steamers.....	203	1,240	126,517
Screw steamers.....	193	1,578	187,892
Sailing vessels.....	112	1,323	70,256
Total	588	4,443	467,967

During the year there were removed from the navy by various casualties, 34 vessels, having an aggregate of 166 guns, and 15,985 tons. Of these 12 were captured by the enemy, 3 were destroyed to prevent their falling into the hands of the enemy, 4 were sunk in battle or by torpedoes, and 15 were lost by shipwreck, fire, and collision. In the last named category were the ironclads Monitor and Weehawken, which foundered at sea in stormy weather.

The fleet in active service at the close of 1863, comprised 384 vessels of all classes, distributed as follows: Potomac Flotilla, 19; North Atlantic Squadron, 72; South Atlantic Squadron, 76; Eastern Gulf Squadron, 39; Western Gulf Squadron, 68; Mississippi Flotilla, 85; West India Squadron, 3; East India Squadron, 2; Mediterranean Squadron, 1; Pacific Squadron, 7; Special service, 6; miscellaneous, &c., 6.

The number of officers of the higher grades, at the close of the year, was as follows:

	Active list.	Reserved list.	Retired list.
Rear Admirals.....	6	..	8
Do. Acting.....	5	..	..
Commodores	18	..	33
Captains	*36	10	15
Commanders.....	†72	15	7
Lieutenant-Commanders	144	..	..
Lieutenants.....	85	..	8

Increased facilities for building and repairing national vessels being imperatively demanded, a committee of naval and scientific gentlemen was appointed, under the authority of Congress, to examine and report upon League Island, in the Delaware river, near Philadelphia, and New London, as sites for new navy yards. A majority of the commission recommended New London, but no action was taken upon the subject by Congress previous to the close of the year.

The number of seamen in service on July 1st, 1863, including those on the Mississippi Flotilla, was about 34,000, and during the year enlistments averaged over 2,000 a month. In 1862 the average was 1,529 a month. The demand was altogether in excess of the supply of trained and experienced seamen, notwithstanding the marked decrease in the shipping business which the ravages of Confederate privateers had caused; and the men enlisted were, for the most part, of the class known as landsmen, having little or no knowledge of a seafaring life. Consequently, the number of landsmen in nearly every vessel greatly exceeded that of the classes known as seamen and ordinary seamen, and the reports of the commanding officers show that, in more than one instance, the want of proper material for crews was the cause of disaster. A few vessels intended for special service were provided with picked crews, but, with these exceptions, the quality was far below the average of the old navy. But even with the large body of men in the service, and the increase in the average of enlistments, there was, in the latter part of the year, such a deficiency of material that many vessels were reported at the national yards completely equipped and ready for sea, but unable to sail for the want of crews. At the same time, it was well understood that men could be obtained should the proper means be taken.

One cause for this deficiency was the operation of the Enrolment and Conscription Act of 1863, which provided no exemption for sailors or mariners, a class of men whom most nations foster and cherish by special laws, and who were formerly expressly exempted by act of Congress from militia duty. But the chief cause was to be found in the high bounties offered for enlistment into the army, under the influence of which many sailors, whose service would be much more valuable afloat than on shore, were induced to become soldiers. The

* Beside one not recommended for promotion.

† Beside 18 not recommended for promotion.

fishing towns of New England, which have been the chief nurseries of the American navy, sent a very considerable portion of their sea-faring population into the army, and in the great commercial seaports a similar practice prevailed. "While every able and sound man of proper age," says Secretary Welles, "can be made a soldier, and put into immediate service, there are comparatively few of our population who can be employed as sailors. The latter may be considered experts, and instead of bounties, allurements, or drafts to withdraw seamen from the element to which they belong, the reverse should be the fact." Acting on this suggestion, Congress has authorized bounties to be offered to sailors as well as to soldiers, and measures also have been taken to transfer sailors who had enlisted in the army into the naval service. The result has been to rapidly fill up the deficiencies in the quota of seamen, and to fill the receiving ships to overflowing. In the latter part of 1863 the practice was also introduced of putting on shipboard rebel prisoners who had taken the oath of allegiance to the United States, and desired to enter the national service, but were unwilling to subject themselves to the risk of summary execution if recaptured while serving in the Federal army.

The events of the year have afforded to some extent an elucidation of the several questions involved in the introduction into naval warfare of ironclad vessels, especially of the Monitor type, although no definite conclusions can be said to have been reached. "The Monitor class of armored ships," says the Secretary of the Navy, "with revolving turrets and few guns of heavy caliber, has proved itself to be well adapted for harbor defence and coast service, and in some emergencies these vessels, from their great powers of endurance, have shown themselves to be efficient and serviceable in offensive operations." The occasions upon which they have been most severely tested are described under OPERATIONS OF THE UNITED STATES NAVY. Of the advantages and defects of these vessels, as ascertained by actual test, a variety of opinions from professional men and officers are recorded; a few brief extracts from which are appended.

The repulse of the ironclads before Charleston, on April 7th, had the effect of creating an impression against the efficiency of this class of vessels almost as unreasonable as the prejudice in their favor had formerly been. This was in a measure occasioned by the unfavorable opinion of them, supposed to be entertained by Admiral Dupont, and by the reports made by commanding officers after that engagement. Thus Commander Worden, of the Montauk observed:

I desire to say that I experienced serious embarrassment in manœuvring my vessel in the narrow and uncertain channel, with the limited means of observation afforded from the pilot house, under the rapid and concentrated fire from the forts, the vessels of the fleet

close around me, and neither compass nor buoys to guide me. After testing the weight of the enemy's fire, and observing the obstructions, I am led to believe that Charleston cannot be taken by the naval force now present, and that had the attack been continued, it could not have failed to result in disaster.

Commander Daniel Ammen, of the Patapsco, reports:

I am indebted to Acting Master Vaughan, transferred temporarily to this vessel, for valuable aid in avoiding collisions, as it is out of the question for one person to observe properly from the various lighthouses. I think a want of vision one of the most serious defects of this class, making it impossible to fight them advantageously, to avoid dangers, or to make a satisfactory reconnoissance. Another question of great importance as relates to their efficient employment, is the character of the battery. It is proposed to batter down forts with a 15-inch gun, then it is quite plain that we have to come within distances at which heavy ordnance, if employed in heavy batteries against us, cannot fail in the end to injure or perhaps disable us.

Commander G. W. Rodgers, of the Catskill, reports:

I was surprised to find, even with this severe fire, that these vessels could be so much injured in so short a time, two or three having passed me during the action to which some disaster had happened. This vessel was struck some twenty times, but without any serious injury, except one shot upon the forward part of the deck, which broke both plates, the deck planking, and drove down the iron stanchion sustaining this beam about one inch, causing the deck to leak.

Commander Fairfax, of the Nantucket, reports:

Our fire was very slow, necessarily, and not half so observable upon the walls of the forts as the rain of their rifle-shot and heavy shell was upon this vessel. After the third shot from the 15-inch gun the port stopper became jammed, several shots striking very near the port and driving in the plating; it was not used again. * * * I am convinced that, although this class of vessels can stand a very heavy fire, yet the want of more guns will render them comparatively harmless before formidable earthworks and forts. I must say that I am disappointed beyond measure at this experiment of monitors overcoming strong forts. It was a fair trial.

On the other hand, Chief Engineer Stimers, who had witnessed the engagement from a position outside the bar, observes in his official report to Secretary Welles, under date of April 14th:

The firing on the part of the enemy was very terrific. He was not only able to keep up a very rapid fire from his numerous guns, but, I felt satisfied, was using reckless charges of powder, which it was clearly wisdom for him to do. I therefore expected to find on my visit to them (the ironclads) at least an approach to the destructive results which had been obtained by the chief of the Bureau of Ordnance in his experiments against iron targets in the ordnance yard at Washington. I was, however, agreeably disappointed to find, upon my inspection of the Monitor vessels next morning, that there were no clear passages through the decks and no penetrations through the sides of the vessels, or the pilot-houses. The blunt-headed shots had proved much less effective than the round shot, not only in confining their injury to the indentation made more distinctly than is the case with round shot, but the indentations themselves were less than those made by the spherical balls. On the other hand, I found casualties had occurred which occasioned loss of life in one instance, and disabled guns in others, through faults of design which only such experience

could point out, and which, I think, can be entirely removed in the new vessels now building.

In conclusion he says:

I take the liberty to express my firm opinion that the obstructions can be readily passed with the means already provided, and our entire fleet of ironclads pass up successfully to the wharves of Charleston, and that the Monitor vessels still retain sufficient enduring powers to enable them to pass all the forts and batteries which may reasonably be expected.

The Passaic, which was one of the most badly damaged of the ironclads in this affair, was sent to New York in May for repairs, and by direction of Secretary Welles a commission, headed by Captain J. C. Rowan, was appointed to examine and report upon the amount of injury she had received from the fire of the batteries or from the effects of the gale which she encountered on her passage north. They found that but 4 shots had damaged any part of the structure to an extent worthy of particular attention, and that only one of these, a 10-inch shot which disabled the working of one of the guns, by deranging the gun slides, had affected the fighting efficiency of the vessel. They also reported that the Passaic had not been strained or injured by the gale.

From a recently published report of Admiral Dahlgren, reviewing the service of the ironclads during 1863, we extract the following table showing their capacity for endurance:

	No. shots fired.		Total hits.
	15-IN.	15-IN.	
Katskill	133	425	106
Montauk	301	478	214
Lehigh	41	23	36
Passaic	119	107	134
Nahant	170	276	105
Patapsco	178	230	144
Weehawken	264	633	187
Nantucket	44	155	104
Ironsides	..	4,439	164
	1,255	6,771	1,194

	No. shots fired.		Wt. proj. fired, tons.	
By Ironsides...	4,439		288½	
11-in. by Mon'rs	2,332	3,587	151½	365
15-in. by Mon'rs	1,255		213½	
	8,026		653½	

He adds:

What vessels have ever been subjected to such a test? It is not surprising that they should need considerable repair after sustaining such a severe pounding for so long a time, but only that they could be restored at all to a serviceable condition. The force of a 10-inch shot must be experienced to be appreciated. Any one in contact with the part of the turret struck, falls senseless, and I have been nearly shaken off my feet in the pilot house when engaging Moultrie. All the little defects of detail were marked by such a searching process. Decks were cut through, cannon were rooted out, side armor shaken, tops of pilot houses crushed, &c. But all these were reparable, and no vital principle was seriously touched. With such workshops and means as a northern navy yard includes, the repair of all monitors would have been speedily executed.

In respect to the powers of their ordnance he says:

In operations against earthworks, whose material cannot be damaged permanently, but only disturbed, and which are only to be dealt with by keeping down their fire, a much lighter projectile would be preferable, in order that the practice may be as rapid as possible. Hence a piece of 16,000 lbs. for 10-inch or 11-inch shot and shell. When a number of monitors are brought together, it would be better also to have guns of like kind in each turret, and bringing into action whichever might be preferable. Each of the monitors of this squadron had a 15-inch and a smaller gun, 11-inch or 8-inch rifle, and hence the rapidity of fire which was most desirable was not attained.

Of their sailing qualities he says:

The speed of the monitors is not great (seven knots), but it is quite respectable with a clear bottom, and is fully equal to that of the Ironsides. Their steerage is peculiar, but, when fully understood and rightly managed, not difficult of control. They pivot with celerity, and in less space than almost any other class of vessels. The number of men required to work them and the guns is only eighty, which is very moderate. In common with all ironclads the scope of vision is much restricted, for the plain reason that in such vessels apertures of any size must be avoided. There are some other defects, but they are not inherent, and it is believed are susceptible of being remedied wholly or in part.

The New Ironsides he considers a "fine, powerful ship," but defective in having her ends unplated. They are consequently easily damaged by a raking fire and involve to a certain degree the rudder and screw, while she can return no fire in either direction. The monitors, on the other hand, are almost equally well defended on all sides, and can fire in any direction. In summing up their respective offensive qualities, he says that the Ironsides is capable of a more rapid and concentrated fire than the others, and that on that account her guns are more effective than the 15-inch guns of the monitors.

On the other hand, she was restricted by draft to the mid-channel, was very vulnerable to the raking fire, and the direction of her own guns was very limited laterally. The monitors could operate in most of the channels, could direct their fire around the whole circle, and were almost equally well defended on all sides. The defects in both classes of vessels are susceptible of being remedied partially or entirely. The defence of the Ironsides could be made complete, and that of the monitors equally so. The armament of the monitors could be perfected so as to give all desirable rapidity of fire, but by no contrivance could the Ironsides be enabled to use much heavier guns than those mounted. Yet when such changes were made as experience suggested, there still would remain to the monitors the light draft, choice of guns from the heaviest to the lightest, defensibility, and direction of fire around the whole circle; consequently the ability to carry a heavy battery into the least depth of water, with equal power of offence and defence in any direction, and that with half the number of guns carried in broadside by another vessel.

He observes, in conclusion, with reference to the selection by the Government of vessels of the Monitor type:

It is evident that it was not designed to adopt any one style exclusively, for of the three vessels first ordered, two were of the ordinary broadside class—the Ironsides and the Galena. The latter was quickly proved to be absolutely inefficient, and so must any armored steamer of that size. It is universally admitted that plates of less than four and a half (4½) inches cannot stand the shock of heavy projectiles, and ves-

sels so armored must be of considerable tonnage. I presume the department only intended to build such vessels as were best adapted to the service at the scene of war.

Keeping in view the peculiar exigencies of the case, which required light draft and great ordnance power, it appears that the selection of the department could not have been more judicious in preferring a number of monitors to operate from a heavy frigate as a base; and if the intent of the department could have been carried out in regard to numbers, we should now have been in entire possession of the coast from the Capes of Virginia to New Orleans, including Wilmington, Charleston, Mobile, &c.

Many defects of both classes are easily remediable, but some of those in the monitors could only be determined by the test of battle; before that, approximation only was possible.

In response to a resolution of Congress, Secretary Welles transmitted to that body in April, 1864, a voluminous report on the efficiency of the ironclads, embodying the opinions of some of the first naval authorities in the country, including Rear-Admirals Dupont, Porter and Goldsborough, and Captain John Rodgers. Admiral Dupont adheres to the views previously expressed by him.

I am well aware, he says, that the results at Charleston were not all that were wished for, and I quite agree with the department that there was, nevertheless, much in them that was gratifying, particularly that the loss of life was so small, and that the capacity of the ironclads for enduring the hot and heavy fire brought to bear upon them, which would have destroyed any vessels of wood heretofore used in warfare, was made so evident. But I must take leave to remind the department that ability to endure is not a sufficient element wherewith to gain victories, that endurance must be accompanied with a corresponding power to inflict injury on the enemy; and I will improve the present occasion to repeat the expression of a conviction which I have already conveyed to the department in former letters, that the weakness of the Monitor class of vessels, in this important particular, is fatal to their attempts against fortifications having outlying obstructions, as at the Ogeechee and at Charleston, or against other fortifications upon elevations, as at Fort Darling, or against any modern fortifications before which they must anchor or lie at rest, and receive much more than they can return. With even their diminished surface they are not invulnerable, and their various mechanical contrivances for working their turrets and guns are so liable to immediate derangement that, in the brief though fierce engagement at Charleston, five out of eight were disabled, and, as I mentioned in my detailed report to the department, half an hour more fighting would, in my judgment, have placed them all *hors de combat*.

Rear-Admiral Porter, on the other hand, finds little to disapprove of, and much to praise, in the monitors. "I remember," he says, "pronouncing the first Ericsson Monitor a perfect success, and capable of defeating anything that then floated. I was looked upon at that time as something of an enthusiast, as my opinions were widely at variance with those of some scientific gentlemen. The results have justified me in forming a high estimate of the Monitor principle." He has a high opinion of the ironclads building on the Ohio at the commencement of 1864, and thinks one of them capable, when completed, of destroying every vessel on the Mississippi between Cairo and the Gulf. He adds:

I think too much has been expected of monitors heretofore, and the fact that two or three of them were not able to overcome obstacles formidable enough to keep out a large fleet of three-deckers, has, in a measure, weakened the confidence of the public (who generally know little or nothing about such matters) in them. But the monitors for harbor defence are just as valuable as they were on the day when the first one drove the *leviathan* Merrimac back to her hole, and saved the honor of the nation. I am sure that monitors would have done much better on this river than the old poop gunboats did, which were built for temporary purposes only, or until monitors could take their places. Earthworks on elevated positions are difficult to silence, it is true, except by a concentrated fire of many guns, and monitors are not well provided in numbers. No vessels have been more successful than the Mississippi gunboats, whenever they have been called upon to attack such works. Still they were very deficient in one respect, as they were very vulnerable, suffered a good deal, and proved that in the end the monitor principle, from its invulnerability, was the only thing that could be safely depended on. For this reason I often wished that I had been provided with one good monitor, with which at certain times I could have accomplished more than with a fleet of such boats as we have here.

The resistance of iron, he finds from personal observation, depends more on the wooden backing than on the thickness of the iron, and that two inches of iron on thirty-six inches of oak will resist more than three inches of iron on fifteen inches of oak. "I have, moreover, noticed," he observes, "that where there is a backing of wood covered with three-inch iron, and that iron with wood again, the resistance of the latter will prevent balls of heavy size from entering the iron. In fact it is hardly indented." He closes a warm tribute to the efficiency of the monitors in the following words:

Any professional man who will lay aside his prejudices, caused by the discomforts incident to the monitors, must admit that, as a harbor defence, they are the best and only vessels to be built, and I hope we shall see every harbor in the United States where there is a chance of an enemy penetrating, supplied with two or three of these floating batteries. If they have not been able to penetrate the harbor of Charleston, where fifty guns to one were opposed to them, and where they had to contend with obstructions placed in their way, impossible to be removed, it in no way detracts from their well-earned reputation for efficiency. They have done at Charleston what no other vessels ever built could possibly have accomplished, and though the army, as usual (when combined operations are carried on), has monopolized all the honors, it is a very certain fact that the monitors held their own as no other vessels could have done, and under their shelter the army was enabled to perform its work successfully.

Admiral Goldsborough thinks that, as experiments have shown that a seagoing vessel of war cannot be covered with iron throughout her vulnerable parts, so as to render her proof against large round-shot and rifle projectiles, the use of plating should be restricted to the most vitally exposed parts, and should be "of such practicable thickness as to secure immunity in those places against the explosive effect of shells generally, and against the damaging effect of other projectiles striking obliquely, or otherwise unfavorably to the material damage of the iron." A hull thus arranged, with water-tight bulkheads and turrets for the bat-

teries, he conceives to be "about all that can be done in the way of plating with iron, consistently with all the considerations involved." Celerity of turning should be one of the chief elements of efficiency, and "every ironclad, as a matter of course, should be an unexceptionable ram; or, in other words, susceptible herself of being used as a projectile." The value of rams at this moment, he thinks, cannot be overestimated, and a few of them in each prominent seaport would effectually prevent a blockade. His views on this point are embodied in the following paragraph:

Rams, intended purely for harbor defences, would be better without than with guns. They themselves are to be the projectiles; or, if you please, they are to be the shot, and the steam is to be the powder; and the effect of both, properly combined, would be absolutely irresistible. Guns, I repeat, would be detrimental to unity of purpose, and also in other respects; or, in short, be of more harm than good in the long run. Besides, to fit the rams for them, would be to swell the item of cost largely, and thus abridge their multiplication; and the distinctive plating which their protection would involve, could be used to more advantage elsewhere about the hull. The essential points to be secured in these rams, each to a degree as consistently with all the rest as practicable, are great strength throughout every part of the hull, not overlooking the bottom by any manner of means; every protection that supportable plating can afford; a high velocity; an ample security of machinery; the utmost rapidity in turning; a suitable bow.

Of the respective merits of the Monitor and New Ironsides types of ironclads, he speaks as follows:

The monitors we have already constructed and used in service, I am impelled to regard as open to the serious objections of a marked deficiency in ability for general naval purposes, and in strength of bottom, seaworthiness, speed, turning qualities, height of deck above the water, and habitability; yet for mere smooth-water harbor operations, the object, I suppose, for which they were intended, they undoubtedly do possess formidable offensive and defensive properties, viewed in a relative sense.

Their absolute worth, however, in these particulars, I cannot regard as entitled to the extravagant merit claimed for it, induced, I apprehend, in a great measure, by conclusions drawn from the encounters of the first monitor and the Weehawken, with the Merrimac and Atalanta, without a sufficient knowledge of the facts attending them, and without any (or more than an unwilling) reference to the cases of opposite results, as for instance the Ogeechee, and the repeated displays before Charleston.

* * * * *

The New Ironsides I regard as a much more efficient type of ironclad than the monitors just discussed, because of her possessing decided advantages over them in the particulars of fitness for general purposes, seaworthiness, relative strength of bottom, or absolute capacity to endure vibration thereat; security against antagonist vessel getting astride of her; speed, and habitability. Had she been planned for turrets, instead of the use of guns at broadside ports, she would have been, I think, still more formidable; nor is she unexceptionable in other respects; and among them speed and turning qualities. It is necessary to try her more at sea, and more at closer quarters with an enemy, than she has yet been tried, in order to determine positively her relative merits in some highly important particulars.

Capt. John Rodgers, who participated in all the important actions of the monitors against

the forts at Charleston, and also commanded the Weehawken in her contest with the Atalanta, thus sums up his conclusions after a careful comparison of the New Ironsides and the monitors:

I think that the Monitor class and the Ironsides class are different weapons, each having its peculiar advantages—both needed to an iron-clad navy—both needed in war; but that, when the Monitor class measures its strength against the Ironsides class, then with vessels of equal size, the Monitor class will overpower the Ironsides class; indeed, a single monitor will capture many casemated vessels of no greater individual size or speed; and as vessels find their natural antagonists in forts, it must be considered that upon the whole the Monitor principle contains the most successful elements for plating vessels for war purposes.

Of the sea-going qualities of the monitors, nearly every prominent naval officer speaks with distrust or with positive disfavor. See accounts of loss of Monitor and Weehawken, under OPERATIONS OF THE U. S. NAVY.

NAVY, U. S., OPERATIONS OF. During 1863 six squadrons were maintained by the United States Government along the Atlantic seaboard, and in the Western waters, viz.: 1, the North Atlantic Squadron, Acting Rear-Admiral S. P. Lee; 2, the South Atlantic Squadron, Rear-Admiral S. F. Dupont, who was relieved, July 6th, by Rear-Admiral J. A. Dahlgren; 3, the Eastern Gulf Squadron, Acting Rear-Admiral T. Bailey; 4, the Western Gulf Squadron, Rear-Admiral D. G. Farragut, who was temporarily relieved in July by his second in command, Commodore H. H. Bell; 5, the Mississippi Flotilla, Rear-Admiral D. D. Porter; 6, the Potomac Flotilla, Commodore A. A. Harwood. There were also small squadrons on the Pacific and East India stations, and a number of vessels were employed in searching for rebel privateers and on other special service.

1. *North Atlantic Squadron*.—The operations of this squadron have comprised chiefly blockade duties along the coasts of Virginia and North Carolina, where, according to the Secretary of the Navy, the officers in command "have been sleepless sentinels, and have exhibited examples of heroic bravery and daring, in repelling the rebels and protecting and succoring the army when in difficulty, which reflect honor on themselves and the service." So effective were their services that along the entire station all intercourse with the enemy was cut off, with the single exception of the port of Wilmington, the closing of which was difficult on account of its two inlets, thirty miles apart, flanked by extensive batteries. A few steamers from the Clyde and elsewhere, of light draught, succeeded, under cover of the darkness, in eluding capture, but most even of that description of vessels fell into the hands of the blockaders, or were run on shore and destroyed. Many of the operations of the blockading fleet were performed in connection with the land forces, and will be found described under that head. Those only will be mentioned here in which the navy performed the sole or the chief part.

On January 14th the screw steam gunboat, *Columbia*, Lieutenant Joseph O. Couthouoy, while cruising between Federal Point and Masonboro' inlet, was wrecked on the bar off the latter place, and, before assistance could be procured from her consorts, was too much broken up by the sea to be got off. On the afternoon of the 15th, the *Penobscot* anchored near her, and by means of a surf-line succeeded in rescuing about thirty of the crew; but a heavy gale setting in at nightfall, she was obliged to run to sea again. Early the next morning several rebel shore-batteries opened upon the *Columbia*, and later in the day the *Penobscot*, *Cambridge*, and *Genesee* approached her. The surf was too high, however, to enable them to render any assistance to Lieutenant Couthouoy, who, being helpless against the fire of the enemy, was compelled, in the afternoon, to surrender the remaining officers and crew, forty in number. He had previously spiked and thrown overboard his guns, drowned the powder in his magazines, and destroyed his signals.

On the morning of March 14th, an attack was made by the troops under General D. H. Hill upon Fort Anderson, an unfinished earthwork on the left bank of the Neuse, opposite Newbern, which was garrisoned by a single regiment of volunteers. The fort had no guns mounted, and the troops in Newbern were unable to render assistance. The gunboats *Hunchback* and *Hetzel*, however, assisted by the *Shawsheen* and some smaller vessels, came promptly to the rescue, and by a well directed fire silenced the enemy's artillery, consisting of 14 pieces, and by compelling the retreat of Hill saved the fort. A nine-inch shell from the *Hetzel* dismounted and broke a Parrott gun, and killed and wounded a number of rebels. The enemy were followed and harassed in their retreat up the Neuse river by several light-draught vessels.

During the attack on Suffolk, Virginia, in the latter half of April, the small fleet of U. S. gunboats on the Nansemond took a distinguished part. On the 14th the *Mount Washington*, *Stepping Stones*, and *Commodore Barney*, the first named being at the time disabled, succeeded, with but slight loss, in silencing a formidable battery; and on the 19th Lieut. R. H. Lamson, with the *Stepping Stones*, aided the land forces under General Getty in capturing a battery of five guns, manned by 161 men. These exploits are noticed under ARMY OPERATIONS.

The part taken by the navy during the investment of Washington, N. C., by General Hill, in March and April, being in intimate connection with the operations of the army, is described under that head.

In June and July a number of small gunboats coöperated in the expeditions up the York, Pamunkey, and Mattaponi rivers undertaken for the purpose of occupying West Point and threatening Richmond. There were also

during the year joint army and navy expeditions, chiefly in the nature of reconnoissances, up the James, Piankatank, Ware, and other rivers of Virginia, and among the inlets between the York and the Rappahannock, most of which were attended by substantial successes. Similar operations were conducted at various times along the shallow sounds and inlets of North Carolina, and in the Roanoke and Chowan rivers.

During the latter half of the year, and particularly after the harbor at Charleston had been rendered inaccessible to blockade runners, Wilmington became the chief port of resort on the Atlantic coast for vessels of this class. The addition to the blockading fleet of several swift steamers, newly built at the national yards, or captured, greatly increased the risk of entering the Cape Fear river, by either inlet, and, in consequence, many valuable prizes were taken, and nearly as many vessels were driven ashore and destroyed. Although the enemy professed to receive constant supplies from abroad, through this source, captured documents written by persons engaged in blockade running showed that, in fact, very few of the vessels which attempted to run in succeeded in making the port. Many, also, upon arriving off Wilmington, and seeing how vigilant were the national cruisers, put back to the ports from which they had sailed, or kept further down the coast in the expectation of landing their cargoes in some obscure inlet. The hardships and perils encountered by the blockading squadron, whose station comprised one of the most inhospitable portions of the Atlantic coast, were cheerfully borne by officers and crews; but too often their well-deserved prize money was snatched from their grasp after they had driven vessels ashore, by the activity displayed by the enemy in destroying such vessels, or removing their cargoes. Two exploits, evincing the energy and daring of the fleet, are worthy of being recorded.

On July 12th the *Penobscot*, Lieut. Commander De Haven succeeded, after a short chase, in driving the iron steamer *Kate* ashore on Smith's Island, where she was immediately deserted by her officers and crew. A boat was sent in to get her off, but, as the tide was falling, this was found impossible, and arrangements were made to burn her, should the attempt to float her off at high water prove ineffectual. At noon a battery was brought to the beach by the rebels, the fire from which drove out the party from the *Penobscot*. Under these circumstances, the *Kate* was ordered to be set on fire by shells, and was rendered, as was supposed, totally unserviceable, together with her cargo. Upon the departure of the *Penobscot* the enemy immediately stripped the *Kate*, and on the night of the 31st succeeded in floating her off, the damage to her hull proving to be slight. On the morning of August 1st, she was discovered on her way to Fort Fisher, on Federal Point, the

northern side of New Inlet, towed by a number of small boats, and the Mount Vernon, James Adger, and Iroquois at once bore toward the shore to cut her out. The enemy abandoned her at the approach of the blockading vessels, and, the Mount Vernon running alongside, in the midst of a severe fire from the rebel batteries at New Inlet and Zuk's Island, fastened a hawser to her port bow and by great exertions towed her out of the range of the fire. The Kate proved to be a new steamer, very fast, and built entirely of iron. Her machinery had been removed, but her hull was scarcely injured.

At daylight, on Aug. 18th, the steamer Hebe attempted to run into Wilmington by the New Inlet entrance; but being intercepted by the Nippon, she headed for the shore, a few miles above Fort Fisher, and her crew escaped in boats. As it was blowing too hard to get her off, a boarding party was sent from the Nippon to destroy her. Two Whitworth guns soon after opened fire from the beach upon the ship, which was found to be hard aground in 7 feet of water. The boat from the Nippon having been swamped almost as soon as she reached the Hebe, and the violence of the gale preventing the blockading vessels from sending effective assistance, nearly the whole boarding party was compelled to wade ashore and surrender to a force of Confederate cavalry and riflemen which had meanwhile arrived. The Hebe was then set on fire by shells from the Shokokon, and burned to the water's edge. The enemy, however, succeeded during the next few days in discharging a portion of the cargo in a damaged state; whereupon the Minnesota, running up to within 600 yards of the wreck, drove the rebels from their battery and completed the destruction of the hull and machinery. A party then landed and brought off the two Whitworth guns.

The most serious disaster of the year on this station was the loss of the ironclad, Monitor, Commander Bankhead, the celebrated pioneer vessel of her class, which foundered at sea in a gale, south of Cape Hatteras, on the night of Dec. 30th, 1862. The Monitor left Hampton Roads in tow of the side wheel steamer Rhode Island, on the 29th, the weather being then pleasant, and until 7 P. M. of the 30th, the voyage was unattended by any special incident. At that hour the wind, previously light, hauled round to the southward, gradually increasing in violence until midnight, with a heavy sea. As the swell increased the Monitor began to tow badly, and the bilge pumps, which during the day had kept her free from water, were no longer available. At 8 P. M. she labored heavily, the seas completely submerging the pilot house, and washing over and into the turret, and at times into the blower pipes. It was observed that when she rose to the swell, the flat under surface of the projecting armor would come down with great force, causing a considerable shock to the vessel and turret, and

thereby loosening the packing around its base. The Rhode Island was several times signalized to stop, with a view of ascertaining whether the Monitor would ride easier, but she immediately fell off into the trough of the sea, and the water in her hold continued to gain steadily. The centrifugal pump was then started, and notwithstanding it worked well, the water had by 10½ P. M. risen several inches above the level of the engine room floor. Signals of distress were now made to the Rhode Island, which despatched two boats to the assistance of the Monitor, and at considerable risk the steamers came alongside of each other. While getting the men into the boats (a very hazardous operation, in consequence of the heavy seas breaking entirely over the deck of the Monitor), the sharp bow of the ironclad came into such dangerous proximity to the Rhode Island, that the latter was obliged to steam ahead, to avoid being stove near her water line. During the absence of the boats the rapidly rising water put out the fires in the Monitor, and her engines having stopped, she rolled into the trough. By letting go her anchor her head was again brought to the sea and the remaining crew and officers were taken off, except a few who, stupefied by fear, refused to leave the ship and went down with her. Several men had previously been washed overboard and drowned. At about 1 A. M. of the 31st, she disappeared. One of the boats from the Rhode Island employed in the last trip from that vessel did not return, and was supposed to have been swamped. It was however picked up on the morning of the 31st, by the schooner A. Colby, and the crew were safely landed at Beaufort. The total casualties of the Monitor were four officers and twelve men missing.

"I am firmly of the opinion," says Commander Bankhead, in his official report of the disaster, "that the Monitor must have sprung a leak somewhere in the forward part, where the hull joins on to the armor, and that it was caused by the heavy shocks received as she came down upon the sea. The bilge pumps alone until 7 P. M. had easily kept her free, and when we find that all her pumps a short time after, with a minimum capacity of 2,000 gallons per minute, not only failed to diminish the water, but, on the contrary, made no perceptible change in its gradual increase, we must come to the conclusion that there are, at least, good grounds for my opinion."

On the morning of June 24th, the blockader Sumter, while cruising off Smith's Island in a dense fog, came into collision with the transport General Meigs, from the effects of which she soon after sunk, being very rotten. The officers and crew got off in boats, and were taken on board the schooner Jamestown, but everything else in the ship went down with her.

2. *South Atlantic Squadron*.—The field of operations embraced by this squadron com-

prised the coasts of South Carolina and Georgia and the northeast coast of Florida, and at the commencement of the year the greater part of the squadron was engaged in the blockade of Charleston, or stationed at Port Royal. Early in January the first instalment of ironclads destined to operate against Charleston arrived, and with a view of testing the efficiency of this class of vessels, Admiral Dupont ordered Commander Worden, with the *Montauk*, to enter Ossabaw Sound and attempt the capture of Fort McAllister, at Genesis Point, on the Great Ogeechee river, under cover of which was lying the steamer *Nashville*, recently fitted by the enemy for a privateer, and which was waiting to run the blockade. On the morning of January 27th, the *Montauk*, supported by several small gunboats, opened fire upon the fort, which proved to be a formidable casemated earthwork with bomb proofs, and mounting nine guns. The enemy's practice was excellent, but under the fire of the *Montauk's* 15 and 11-inch guns their fire slackened. Owing to obstructions in the river, the *Montauk* was unable to advance within effective range, and having expended her shells she retired. She was struck thirteen times but received no injury.

Early on the morning of January 29th the iron propeller *Princess Royal*, four days out from Bermuda, attempted to run past the blockading fleet into Charleston. The U. S. gunboat *Unadilla*, Lieut. Quackenbush, apprised of her approach by a blue light from the schooner *Blunt*, slipped her cable and stood in shore, firing a couple of shots at the *Princess Royal*. The latter was then run ashore and abandoned by her captain, supercargo, pilot, and some of the petty officers. A boat's crew from the *Unadilla* at once took possession of the prize, which several hours later, with assistance from other vessels of the blockading fleet, was got off without sustaining any injury. Her cargo proved to be one of the most valuable taken in the course of the war, consisting of two complete engines of great power, intended for ironclads, beside rifled guns, arms, ammunition, medicines, and a variety of miscellaneous articles. The *Princess Royal* was two days later taken to Port Royal and subsequently sent to Philadelphia for adjudication.

The loss of the *Princess Royal* was a severe blow to the enemy, who, ascertaining on the next day that she was still lying at anchor off Charleston harbor, organized a daring scheme to recover possession of her, and at the same time to inflict as much damage as possible upon the blockading squadron. Accordingly at 4 A. M. of the 31st the iron-clad steam rams *Palmetto State*, Lieut. Rutledge, and *Chicora*, Commander Tucker, in the former of which was Flag officer D. N. Ingraham, commanding the station, ran out from Charleston by the main ship channel, and aided by a thick haze commenced an onslaught on the blockaders. The latter at that time consisted of the steam-

ers *Housatonic*, *Mercedita*, *Ottawa*, *Unadilla*, *Keystone State*, *Quaker City*, *Memphis*, *Augusta*, *Stettin*, and *Flag*, beside the pilot boat *Blunt*, and some smaller vessels. Most of these were of the light class of purchased vessels, the ironclads and two of the heaviest men-of-war, the *Powhatan* and *Canandaigua*, being at Port Royal coaling or repairing. The *Mercedita*, Captain Stellwagen, was the first vessel attacked, and was almost immediately rendered helpless by a 7-inch shell from the *Palmetto State*, which, entering her starboard side, exploded in the port boiler, blowing a hole in its exit from four to five feet square, and killing and wounding several men. So suddenly had the ram come upon her in the haze, that it was impossible to bring any of her guns to bear, and further resistance being useless, Captain Stellwagen, in reply to a demand for surrender, announced that he was in a sinking state. An officer from the *Mercedita* was immediately sent on board the ram and tendered the surrender of the officers and crew, who were paroled.

The *Palmetto State*, leaving the *Mercedita* to her fate, then made for the *Keystone State*, Commander Le Roy, which was also at the same time assailed by the *Chicora*. The *Keystone State* returned their fire vigorously, but having been set on fire in her forehold by the explosion of a shell, was obliged to keep off for a few minutes until the flames could be got under. Commander Le Roy then turned his ship and with a full head of steam bore down upon the nearest ram at a speed of twelve knots, intending to sink her. He also trained his guns for a plunging fire at the moment of collision; but before this could occur a shot passed through both steam chests of the *Keystone State*, rendering her powerless. Ten rifle shells also struck her, mostly in the hull, near or below the water line, and about the same time the fire in her forehold burst out again, and the engineers reported the ship taking in water rapidly. Commander Le Roy accordingly hauled down his flag, but finding that the enemy were still firing upon him, he directed the colors to be rehoisted and the fire to be resumed from the after battery. At this moment the *Augusta*, *Memphis*, and *Quaker City* came up, and by diverting the attention of the rams, enabled the *Keystone State* to get out of the range of the fire. Subsequently she was taken in tow by the *Memphis* and reached Port Royal in a very crippled state, about one fourth of her crew being killed and wounded. The *Mercedita* also arrived there on the same evening without assistance, having succeeded in temporarily stopping the hole in her side and in getting up steam in her uninjured boiler.

Meanwhile the rams carried on a sort of running combat with several of the blockading fleet, which, having no guns capable of making an impression on ironclads, kept prudently aloof. Upon the approach of the *Housatonic*, the only heavy man-of-war then on the station,

Flag-officer Ingraham deemed it prudent to retire, and at about 7½ A. M. both rams took refuge in the swash channel, and subsequently anchored in shoal water near the shore, to the eastward of Fort Moultrie. They remained here until 5 P. M., attended by several small steamers, and then disappeared behind Fort Moultrie. One of them, while returning into the harbor, had her pilot house carried away by a shot from the Housatonic. During this attack the Princess Royal, which was the principal object of contest on both sides, lay quietly at her anchorage. After the retreat of the rams she got to sea, and arrived safely at Port Royal.

The raid had failed of its object, and beyond the temporary disabling of two vessels of the blockading squadron, no practical advantage had been gained by the enemy. But as the latter maintained telegraphic communication with Richmond, and could send north their own statements of the occurrence several days in advance of despatches from the fleet, it was determined to forestall the Union accounts, and, if possible, induce foreign powers to believe that the fleet before Charleston had been dispersed and the blockade raised. Accordingly the Richmond papers of the 2d of February published despatches from Charleston announcing as the result of the naval engagement of Jan. 31st, two U. S. vessels sunk, four set on fire, and the remainder driven away. The following "official proclamation" was also given:

HEADQUARTERS LAND AND NAVAL FORCES, }
CHARLESTON, S. C., January 31st, 1863. }

At about five o'clock this morning the Confederate States naval force on this station attacked the United States blockading fleet off the harbor of the city of Charleston, and sank, dispersed, and then drove out of sight for a time the entire hostile fleet; therefore we, the undersigned commanders respectively of the Confederate States naval and land forces in this quarter, do hereby formally declare the blockade by the United States of the said port of Charleston, S. C., to be raised by a superior force of the Confederate States, from and after this 31st day of January, A. D. 1863.

[Signed] G. T. BEAUREGARD, Gen'l Com'g.
D. N. INGRAHAM, Flag-officer,
Commanding Naval Forces.

[Official] THOS. JORDAN, Chief of Staff.

"Yesterday evening (Jan. 31st)," said another despatch, "Beauregard placed a steamer at the disposal of the foreign consuls to see for themselves that no blockade existed. The French and Spanish consuls, accompanied by Gen. Ripley, accepted the invitation. The British consul with the commander of the British war steamer Petrel, had previously gone five miles beyond the usual anchorage of the blockaders, and could see nothing of them with glasses. Late in the evening four blockaders reappeared, but keeping far out. This evening a larger number of blockaders are in sight, but keep steam up, evidently ready to run." And it was subsequently announced that the consuls held a meeting on the night after the above proclamation was issued, and

decided unanimously that the blockade had been legally raised.

The publication of these despatches caused considerable uneasiness at the North. It was not doubted indeed that despatches from Admiral Dupont would put an entirely different face upon the matter, but apprehensions were entertained in some quarters that statements of this kind going abroad, uncontradicted by other evidence, might be only too readily seized upon by unfriendly powers as a pretext for insisting that the blockade had been raised, and that having been once raised, it could not be declared renewed without formal notice from the United States authorities. These fears, however, proved groundless. Foreign journals or governments declined to be influenced by *ex-parte* statements, and despatches from the blockading fleet showed that nothing approaching a raising of the blockade had been effected.

For the purpose of fortifying his own statements, Admiral Dupont subsequently sent an official refutation of the Beauregard and Ingraham proclamation, and the rebel despatches, dated Feb. 10th, and signed by nearly all the commanding officers of vessels that were lying off Charleston harbor on the morning of Jan. 31st. "We deem it our duty," they observe, "to state that the so-called results are false in every particular—no vessels were sunk, none were set on fire seriously. * * * So hasty was the retreat of the rams that, although they might have perceived that the Keystone State had received serious damage, no attempt was ever made to approach her. The Stettin and Ottawa, at the extreme end of the line, did not get under way from their position till after the firing had ceased, and the Stettin merely saw the black smoke as the rams disappeared over the bar. The rams withdrew hastily toward the harbor, and on their way were fired at by the Housatonic and Augusta until both had got beyond reach of their guns. They anchored under the protection of their forts and remained there. No vessel, iron-clad or other, passed out over the bar after the return of the rams in shore. The Unadilla was not aware of the attack until the Housatonic commenced firing, when she moved out toward that vessel from her anchorage. The Housatonic was never beyond the usual line of the blockade." They also state that no vessel ran in or out of the port during the day, and that no attempt was made to run the blockade, and conclude as follows: "We do not hesitate to state that no vessel came out beyond the bar after the return of the rams, at between 7 and 8 A. M., to the cover of the forts. We believe the statement that any vessel came anywhere near the usual anchorage of any of the blockaders, or up to the bar, after the withdrawal of the rams, to be deliberately and knowingly false. If the statement from the papers, as now before us, has the sanction of the captain of the Petrel and the foreign consuls, we can only deplore

that foreign officers can lend their official positions to the spreading before the world, for unworthy objects, untruths patent to every officer of this squadron." Previous to the preparation of this paper the blockading fleet before Charleston had been strengthened by the New Ironsides, Powhattan, and Canandaigua.

On January 30th, the gunboat Isaac Smith, Lieutenant Conover, while engaged in reconnoitring the Stono river, was obliged to surrender to a rebel land force. She had passed some miles beyond Legaréville, as she had been in the habit of doing for weeks previous, and was on her way back, when three shore batteries, previously concealed, opened a concentrated fire upon her from heavy rifled guns. Lieut. Conover replied with vigor, and endeavored to steam down past the batteries, but a shot in the Smith's steam chimney effectually stopped the engine, and with no wind, little tide, and boats riddled with shot, she was left at the mercy of the enemy. Resistance appearing useless, the ship was surrendered, after 24 men had been killed and wounded. It subsequently appeared that, from information communicated by a deserter, the enemy had planned the ambushade by which the Smith was captured, and had aimed at her boiler and machinery, which were very much exposed.

On the morning of Feb. 1st, the Montauk again engaged Fort McAllister, at a distance of about 1,400 yards, the water being too shoal to permit her to approach nearer. Some injury was done to the parapets of the fort, and the Montauk was hit 46 times, but without receiving material damage. For eight months previous the privateer Nashville had been lying under the protection of the fort, watching an opportunity to run the blockade; and to prevent any attempt by the gunboats to cut her out, the river had been staked and a line of torpedoes laid across the channel. She had been frequently observed close under the fort, ready to make a dash if the opportunity offered, or quietly waiting for an ironclad to tow her to sea. On the morning of the 27th, a reconnoissance discovered the Nashville aground, and Commander Worden seized the opportunity to bring the Montauk close up to the obstructions in the river, and commence a bombardment upon her. In less than 20 minutes the Nashville was in flames from exploding shells, and half an hour later her magazine blew up with terrific violence, leaving not a vestige of the vessel in sight. The Montauk was struck five times by shots from Fort McAllister, and while she was dropping down beyond the range of the enemy's guns a torpedo exploded under her, inflicting a slight amount of injury.

By this time several additional ironclads had arrived at Port Royal, and for the purpose of subjecting their various mechanical appliances to the full test of active service, before entering upon more important operations, Admiral Dupont ordered them to make a concentrated

attack on Fort McAllister. This took place on March 3d, the Passaic, Capt. Drayton, the Patapsco, Commander Ammen, and the Nahant, Commander Downes, participating, under the command of Capt. Drayton. The Passaic, by skilful pilotage, was brought up to within about 1,000 yards of the fort, and for eight hours withstood its chief fire, retiring only when her ammunition was expended. Few of her shots failed to strike above the parapet of the fort; but beyond disfiguring the face of the work they effected no injury which a night's work would not repair; and, in the opinion of Capt. Drayton, the fort could "not be made untenable by any number of ironclads which the shallow water and narrow space would permit to be brought in position against it." The Passaic was struck 34 times in all, 9 shots being against her side armor, 13 against her deck, 5 against her turret, and 2 against her pilot house. In all these parts of the vessel the bolts were more or less started by the violence of the concussion; and indentations, varying from half an inch to 2 inches, were made in the armor. A 10-inch mortar shell, loaded with sand, fell on the deck over the bread room, crushing in the planking, and would have gone through, had it not struck on a beam. "Had it been loaded with powder instead of sand," said Capt. Drayton, "it might have set the vessel on fire. This certainly does not say much for the strength of the deck, the injury to which has been so much more serious than to that of the Montauk, that I must attribute it to a worse class of iron, unless heavier guns have been mounted since the attack made by Commander Worden." Everything about the guns and carriages was reported to have worked well, except that the concussion of the 15-inch gun broke all the bolts holding the side of the box to the turret. The Patapsco and Nahant were unable to approach so near the fort as the Passaic, and received but a slight fire from the enemy, who directed their efforts chiefly against the latter. The Patapsco was struck but once, and the Nahant not at all. Satisfied with the experiment (for such the engagement had been on the part of the ironclads), Capt. Drayton immediately returned to Port Royal, where the Passaic, and also the Montauk, underwent repairs.

By the commencement of April, the preparations, which for many months previous had been making for a combined attack by the ironclads upon the fortifications of Charleston harbor, were completed, and on the morning of the 6th the whole fleet crossed the bar, with the intention of reducing Fort Sumter on the same day, and thence proceeding up to the city. But the weather becoming so hazy as to prevent the pilots from seeing the ranges, the attack was deferred until the next day, and the fleet anchored about five miles from Fort Sumter. At noon, on the 7th, this being the earliest hour at which, owing to the state of the tide, the pilots would consent to move, signal was given

by Admiral Dupont from his flag-ship, the *New Ironsides*, for the vessels to weigh anchor: According to the plan of attack the vessels were to form in the following order ahead, at intervals of one cable's length: 1. *Weehawken*, Capt. John Rogers; 2. *Passaic*, Capt. Percival Drayton; 3. *Montauk*, Commander John L. Worden; 4. *Patapsco*, Commander Daniel Ammen; 5. *New Ironsides*, Commodore Thomas Turner; 6. *Catskill*, Commander George W. Rodgers; 7. *Nantucket*, Commander Donald McN. Fairfax; 8. *Nahant*, Commander John Downes; 9. *Keokuk*, Lieut. Commander Alexander C. Rhind. The squadron was then to pass up the main ship channel without returning the fire of the batteries on Morris Island, unless signalized to do so, and was to take up a position to the northward and westward of Fort Sumter, and engage its northwest face at a distance of from 1,000 to 800 yards. A squadron of reserve, consisting of the *Canandaigua*, *Unadilla*, *Housatonic*, *Wissahickon*, and *Huron*, under the command of Capt. Joseph H. Green, of the *Canandaigua*, was ordered to remain outside the bar, and be in readiness to support the ironclads, when they should attack the batteries on Morris Island, which would be subsequent to the reduction of Fort Sumter.

The chief works erected by the enemy for the defence of Charleston may be thus briefly described: On the upper or north end of Sullivan's Island a powerful sand battery guarding Maffit's Channel; another large sand battery, called Fort Beauregard, between this and the Moultrie House; Fort Moultrie, which had been greatly strengthened since the commencement of the war; Fort Sumter, built upon an artificial island in the middle of the channel, near the entrance of the inner harbor, and about $1\frac{1}{2}$ miles west of Fort Moultrie; Battery Bee, adjoining Fort Moultrie, on the western extremity of Sullivan's Island; the Mount Pleasant battery on the mainland between Sullivan's Island and Cooper river; Castle Pinckney, built on an island about a mile distant from Charleston; all, with the exception of Sumter, being on the right or northerly side of the harbor. On the other side of the harbor, in the immediate vicinity of the city, was the Wappoo battery on James Island, commanding the embouchure of Ashley river; next to which was Fort Johnson, and between it and Castle Pinckney, Fort Ripley, a work erected on an artificial island in what is known as the "Middle Ground." On Cumming's Point, Morris Island, opposite Fort Moultrie, was Battery Gregg, and a mile south of this Fort Wagner, an extensive sand battery of the most powerful construction. Finally, at Light House Inlet, which divides Morris Island from Folly Island, was another fortification covering the landing at that place. Within a few days of the attack the enemy also erected a new sand work between the two last mentioned. The number of guns mounted on these works was estimated at several hundred, comprising the heaviest

smooth-bore ordnance, and many rifled pieces of English manufacture; and as an additional means of protection, the channel between Fort Sumter and Sullivan's Island was obstructed by rows of floating casks supporting torpedoes and other submarine obstacles, and in that between Sumter and Cumming's Point were no less than four rows of piles extending nearly up to Charleston.

At half past twelve the fleet began to move, the *Weehawken*, the leading ship, having a pioneer raft attached to her bows for the purpose of exploding torpedoes and clearing away obstructions. Almost immediately her raft became deranged, and nearly an hour was consumed in putting it in position. At half past one the vessels were again under way and moved slowly up toward Fort Sumter, passing the works on Morris Island, which held an ominous silence. They then steered toward the entrance of the inner harbor, intending to pass between Fort Sumter and Sullivan's Island, and shortly before 3 o'clock came within effective range of these positions. At 2.50 P.M. the guns of Fort Moultrie opened upon the *Weehawken*, followed shortly after by all the batteries on Sullivan's Island and Morris Island, and by Fort Sumter. The remainder of the squadron followed steadily in the wake of the leading ship, which, however, upon reaching the entrance of the channel between Sumter and Sullivan's Island, encountered obstructions of so formidable a nature, that Capt. Rodgers considered it impossible to pass through them. He accordingly turned his ship to gain a better position for attack, and his movements being followed by the vessels immediately behind him, the line, in consequence of the narrowness of the channel, and the force of the tide, was thrown into some confusion. The *New Ironsides*, in attempting to turn, was caught in the tideway, refused to obey her rudder, and became in a degree unmanageable; while, to add to the complication, the *Catskill* and *Nantucket*, which kept in her wake, fell foul of her, and for fifteen minutes the three vessels were in a dead lock. On this occasion, and once subsequently, the *Ironsides* was obliged to come to anchor to avoid drifting ashore, in which case she would inevitably have been lost.

Nothing now remained but for the admiral to make signal to the fleet to disregard the movements of the flag-ship, and take up such positions as might seem most available. This was at once done, and shortly before 4 o'clock the remaining eight vessels were ranged opposite the northeast front of Sumter, at distances varying from 550 to 800 yards. The enemy during this time had not been idle, and from Forts Beauregard, Moultrie, and Sumter, Battery Bee and Fort Wagner, the concentrated fire of 300 guns was poured upon the devoted fleet, exceeding probably in rapidity and power any cannonade previously known in warfare. To this the eight ironclads could oppose but 16 guns. During the climax of the fire 160 shots

were counted in a single minute, and officers described the projectiles as striking their vessels sometimes as rapidly as the ticking of a watch. It is estimated that from first to last the enemy fired not less than 3,500 rounds of ammunition.

Placed in the focus of this tremendous fire, the ironclads fought at a disadvantage which rendered their offensive power of little effect. The confined space in which they were obliged to manoeuvre called for unusual vigilance on the part of their commanders in avoiding collisions, as also in keeping clear of the floating obstructions and submerged batteries against which the tide was constantly bearing them. The dense clouds of smoke which hung over the water proved an additional source of embarrassment. They, nevertheless, entered resolutely upon the work before them, and directed their principal attack against Fort Sumter. Upon receiving the order to disregard the movements of the flag-ship, Lieut. Commander Rhind gallantly ran his vessel, the Keokuk, up through the others to within 550 feet of the fort, where she became a special target for the enemy. During the short period that she was able to retain this position, she was struck 90 times in the hull and turrets, 19 shots piercing her at and below the water line, and others entering her turret. The vessel was in fact so completely riddled, that her commander, fearing she could not much longer be kept afloat, withdrew from action at the end of half an hour, and succeeded in getting her to anchor out of range of fire. She was kept afloat during the night by means of her pumps, but sank the next morning. The Keokuk was only able to fire three times during the engagement, one of her guns having been almost immediately disabled, and the other rendered unavailable by casualties to the crew. She differed in construction and strength from the other ironclads of the squadron, and her side and turret armor of an average thickness of $5\frac{1}{2}$ inches, proved entirely insufficient to withstand the terrible fire to which she had been subjected.

The remaining vessels, though suffering no calamity comparable in extent with that of the Keokuk, were more or less damaged by the fire from the forts. The Nahant had her turret so jammed as effectually to prevent its turning, and the pilot house became nearly untenable in consequence of flying bolts and nuts. The Passaic was unable to use her 11-inch gun after the fourth fire, and had her turret temporarily jammed. The Patapsco lost the use of her rifle gun after the fifth fire, owing to the carrying away of her forward cap square bolts; and the Nantucket had her 15-inch gun permanently disabled after the third fire. The Weehawken, Montauk, and Catskill were obstructed in the use of their guns only by the obstacles to navigation above mentioned. The New Ironsides never got nearer than within 1,000 yards of the enemy's fire, and directed her chief attention to Fort Moultrie, against

which, however, she was unable to discharge but a single broadside.

At 4.30 P. M. Admiral Dupont observing signs of distress on the part of several of his ships, made signal to withdraw from action, intending to resume the attack the next morning. The reports, however, which the different commanders made on that evening respecting the injuries to their vessels, the character of the obstructions in the inner harbor, and the number and weight of the enemy's guns, convinced him of the "utter impracticability of taking the city of Charleston with the force under his command." During the forty-five minutes that the fleet had been under the hottest concentrated fire of the enemy, one vessel had been wholly, and four partially disabled, and in the opinion of the admiral another half hour would have sufficed to put the remainder *hors de combat*. To compensate for these damages, nothing had been effected by the ironclads beyond some injuries to the east wall of Fort Sumter—a result which confirmed the admiral in his opinion that the opposing forces were too unequal to justify him in renewing the contest. The nine ships of the squadron had been able to fire but one hundred and thirty-nine shots against Fort Sumter in reply to the thousands of shells, solid shot, and steel pointed bolts hurled against them from six or seven different forts; and there was good reason to suppose that even had Sumter been silenced, the obstructions beyond would have been impassable, and the fire from the forts have sunk every vessel attempting to go up the harbor. This opinion, however, was not shared by all. Under these circumstances Admiral Dupont not only determined not to renew the fight, but to recross the bar and return with the ironclads to Port Royal; being prompted to the latter course partly by the necessity of making repairs, and partly by his belief that the anchorage inside or outside the bar was unsafe for vessels of the Monitor class. On the 12th the whole fleet, with the exception of the New Ironsides, which anchored outside Charleston bar, returned to Port Royal.

The casualties of the fleet were remarkably few, considering the fierceness of the enemy's fire, and resulted in almost every case from flying bolts and concussions within the turrets. But one man died of injuries received, and about twenty-five were wounded, principally on the Keokuk and Nahant. In some of the vessels no casualties whatever were reported. The Passaic was struck 35 times, the Nahant, 36 times, the Patapsco, 47 times, the Nantucket, 51 times, the Montauk, 14 times, and the Catskill, 20 times. Many of the shots made but slight indentations in the turrets and side armor, but in every ship repairs of greater or less extent were considered necessary. The Ironsides escaped with comparatively little injury, having during the whole engagement been out of range of the severest fire. The capabilities of the ironclads in contests of this

nature, and the opinions of their officers and of other naval commanders, are stated under the head of NAVY OF THE U. S.

In explanation of his failure to renew the attack, Admiral Dupont wrote as follows to the Navy Department, on the 15th:

Any attempt to pass through the obstructions I have referred to, would have entangled the vessels and held them under the most severe fire of heavy ordnance that has ever been delivered; and while it is barely possible that some vessels might have forced their way through, it would only have been to be again impeded by fresh and more formidable obstructions, and to encounter other powerful batteries, with which the whole harbor of Charleston has been lined. I had hoped that the endurance of the ironclads would have enabled them to have borne any weight of fire to which they might have been exposed; but when I found that so large a portion of them were wholly or one half disabled, by less than an hour's engagement, before attempting to overcome the obstructions, or testing the power of the torpedoes, I was convinced that persistence in the attack would only result in the loss of the greater portion of the ironclad fleet, and in leaving many of them inside the harbor, to fall into the hands of the enemy. The slowness of our fire, and our inability to occupy any battery that we might silence, or to prevent its being restored under cover of the night, were difficulties of the gravest character, and until the outer forts should have been taken, the army could not enter the harbor or afford me any assistance.

On the 13th, the President despatched the following telegram to Admiral Dupont:

Hold your position inside the bar near Charleston; or, if you shall have left it, return to it and hold it until further orders. Do not allow the enemy to erect new batteries or defences on Morris Island. If he has begun it, drive him out. I do not herein order you to renew the general attack. That is to depend on your own discretion or a further order. A. LINCOLN.

And by another order, dated on the succeeding day, he directed him, should he not succeed in taking the batteries on Morris Island or Sullivan's Island, to continue the demonstration for a time, and to make "the attempt a real one, though not a desperate one, if it affords any considerable chance of success." In reply, Admiral Dupont said that he should use every exertion to push forward the repairs of the ironclads, and get them inside the bar. "I think it my duty, however," he observed, "to state to the department that this will be attended with great risk to these vessels from the gales which prevail at this season, and from the continuous fire of the enemy's batteries." He urged various objections to a further employment of them against the works on Morris Island, but expressed his willingness to obey all orders with the utmost fidelity, even should his judgment be opposed, and to renew, if necessary, the attack on Charleston, although he thought such a measure "would be attended with disastrous results, involving the loss of the coast."

In the early part of June, Admiral Dupont, having reason to believe that the Atlanta and other rebel ironclads at Savannah were meditating an attack upon the blockading vessels in Warsaw Sound, despatched the Weehawken, Captain John Rodgers, and the Nahant, Com-

mander J. Downes, thither to prevent any disaster to the fleet. The Atlanta, originally a swift and powerful British steamer called the Fingal, had early in the war run the blockade of Savannah, and been converted by the enemy into an ironclad at a great expense. She was 191 feet in length, and 40 feet beam, somewhat over 1,000 tons in measurement, and had a low deck, with a casemate or covered iron-plated house in the centre, with sloping sides and ends, in which was her battery, consisting of two 6-inch and two 7-inch rifled guns. Of these the former were broadside guns, and the latter worked on a pivot, either as broadside or bow and stern guns. She was further armed with a powerful ram, and had attached to her bow a submarine torpedo, charged with about fifty pounds of powder. No efforts had been spared to render her formidable, and it was believed by the enemy that her speed, her heavy armament, and her ram, would render her more than a match for any two vessels of the Monitor type. They therefore boldly steamed down the sound at dawn of June 17th, followed by several small steamers conveying pleasure parties who were to be the witnesses of her triumph. At a few minutes past four she was perceived by the Federal ironclads, which were lying at anchor near the mouth of Wilmington river, and they at once prepared for action. The Weehawken, being nearest the enemy, got under way first and stood up the sound, followed by the Nahant, which, having no pilot, was ordered by Captain Rodgers to keep in the wake of his vessel. A few minutes before five, the Atlanta, which was then lying across the channel awaiting the attack of the Federal steamers, fired a single shot at the Nahant, which failed to take effect. The Weehawken steamed steadily toward the Atlanta, and when about 300 yards distant opened upon her with her 15-inch gun. Drifting 100 yards nearer, she discharged both her guns, upon which the Atlanta hauled down her colors, and ran up a white flag in token of surrender. The signal was not understood until after another discharge from the Weehawken, when all firing ceased, and the prize was taken possession of, after a contest of scarcely fifteen minutes, in which the Weehawken alone had participated.

On examination it was found that the enemy had been struck four times. The first shot knocked a hole in her casemate, without, however, going through, and scattered over the enclosed decks great quantities of wood and iron splinters, by which upward of 40 men were stunned and wounded, one of whom subsequently died. This is believed to have been the first shot from a 15-inch gun fired in a naval combat, and according to the rebel officers its effect was to demoralize the whole crew of the Atlanta. The second shot struck the edge of the overhang; the third knocked off the top of the pilot house, wounding two pilots and stunning the men at the wheel, and

the fourth struck a port stopper in the centre, breaking it in two and driving the iron fragments through the port. The first and third shots decided the battle, the former, as Captain Rodgers observed, having taken away the desire to fight, and the latter the ability to get away. The captured prisoners amounted to 145, officers and men, and the hull of the *Atlanta* was so little injured that in a short time she was enabled to take her place among vessels of her class in the United States navy.

The combat was characterized by the Secretary of the Navy as "the most marked and extraordinary in the service during the year, and in some respects one of the most significant and instructive naval battles of the war." Whatever opinions may have been entertained of the efficacy of ironclads against forts of masonry or sand, few could doubt after this that when ironclads were pitted against ironclads their execution could be of the most decisive character. The Monitor class of vessels, which had fallen into temporary disfavor after the attack on Fort Sumter, became again popular, and were recognized as likely to be of the highest value in harbor or coast defence. The brevity of the conflict and the complete disabling of the *Atlanta* also reconciled many to the heavy ordnance carried by these vessels, the efficacy of which had been a subject of some dispute among professional men.

Notwithstanding the failure of the attack of April 7th, the Government was unwilling to relinquish further efforts against Charleston, and as the tone of Admiral Dupont's letters indicated that he was opposed to a renewed attack upon the forts, it was determined to relieve him by the appointment of Rear-Admiral Foote. That officer dying in New York before his departure, Rear-Admiral Dahlgren was appointed to the command of the squadron, and entered upon his duties on July 6th. Previous to this date the demonstrations against Charleston had been exclusively naval, but with the arrival of General Gillmore as commander-in-chief of the military department of the South, arrangements were made for combined operations by the land forces and the ironclads.

On July 10th, the *Catskill*, *Montauk*, *Nahant*, and *Weehawken* coöperated with the land attack upon the rebel works on Morris Island, and during the greater part of the day maintained a vigorous fire upon Fort Wagner. The *Catskill*, which was selected as a special mark by the enemy, was struck 60 times, but came out of action in good working order. The other ironclads escaped with trifling injury. A few days later the *New Ironsides* was brought over the bar, and on the 18th she with the four vessels above mentioned and the *Patapsco* was laid abreast of Fort Wagner, to coöperate in the intended assault by the troops. The fort was completely silenced during the day, but darkness having come on before the assault was made, Admiral Dahlgren was

obliged to discontinue his fire, not being able to distinguish whether it took effect on friend or foe. The enemy were in consequence enabled to return to their guns, and the assault was repelled with great slaughter. On the 16th an attack was made by shore batteries on the gunboats *Pawnee* and *Marblehead*, in the Stono river, but was repulsed after an animated contest.

For upward of a month after this no important action took place. General Gillmore was engaged in pushing his intrenchments toward Fort Wagner, and the navy was unable to effect anything without coöperation from the land forces. Every day two or three of the ironclads bombarded Fort Wagner and Battery Gregg, on Cumming's Point, to divert the attention of the enemy, but escaped any serious casualty. The *Ironsides* was struck repeatedly by 10-inch shot, at a distance of 1,200 to 1,400 yards, without material impression. Early on the morning of August 17th, General Gillmore opened all his batteries upon Fort Sumter, firing over Fort Wagner and the intervening space; and about the same time Admiral Dahlgren brought the *Ironsides*, *Weehawken*, *Catskill*, *Nahant*, and *Montauk* abreast of Fort Wagner, which was effectually silenced by them during that day. The *Passaic* and *Patapsco*, having rifled guns, took a position about 2,000 yards from Sumter, and coöperated with the shore batteries in the attack upon it. No material damage was done to the ironclads, but the navy suffered a severe loss in Capt. George W. Rodgers, of the *Catskill*, chief of staff to Admiral Dahlgren, who was killed while in the pilot house by a flying piece of fractured plating. Shortly before dawn, on the morning of the 23d, five ironclads opened fire upon Sumter at a distance of about 800 yards, but retired at about 6 A. M., after inflicting considerable damage upon the fort. By the 1st of September Sumter was almost entirely disabled, and with a view of removing the obstructions between it and Fort Moultrie, the ironclads were on that night brought up to within 500 yards of the former work, and for several hours a steady fire was maintained, which was answered by Fort Moultrie and the batteries on Sullivan's Island. The ebb tide setting in before daylight, the ironclads retired.

On the night of September 6th the enemy evacuated Fort Wagner and Battery Gregg, and on the succeeding day Admiral Dahlgren sent a demand to Gen. Beauregard for the surrender of Fort Sumter. Receiving no reply he put in operation a plan to capture the fort, by sending the *Weehawken* in by a narrow channel winding about Cumming's Point to cut off all communications in that direction. In making this movement she got hard aground, and so remained for many hours. Late in the day the admiral with the remaining ironclads moved up to feel and, if possible, to pass the obstructions between Forts Moultrie and Sum-

ter. A severe cannonade ensued between the vessels and the forts with no definite results. Early on the morning of the 8th the enemy perceived the condition of the Weehawken and opened upon her from Fort Moultrie, in consequence of which the admiral ordered the ironclads to cover her. The Weehawken however gallantly replied to the enemy's fire, and the second shot from her 15-inch gun exploded a magazine in the fort, which was silent for some time afterward. She received no further molestation from the batteries on Sullivan's Island until the afternoon, when, in the face of a heavy fire, she succeeded in getting afloat and returned to her anchorage.

The evacuation of Morris Island by the enemy seemed to Admiral Dahlgren to afford an opportunity to assault Fort Sumter, which was well broken on the gorge and southeast face, and thus to pass the obstructions in the main channel. The night of the 8th was selected for the undertaking, and the storming party, comprising 34 officers and 413 men, who volunteered for the duty, was put under the command of Commander T. H. Stevens, of the Patapsco. The expedition started in twenty boats soon after 10 p. m., with the intention of assailing the fort at two points, one party landing at the gorge wall and mounting up over the ruins to the parapet, while another was to attempt an entrance through the lower embrasures. At about half past one o'clock the first line of boats was challenged by the sentry on the fort, from which a sharp fire of musketry was immediately opened. At a signal from the fort all the rebel batteries bearing on Sumter began to fire on the boats, the garrison aiding the gunners to obtain the range by throwing lights upon the water. A rebel ram also came up and attacked the boats at close quarters. Seven boats nevertheless reached the gorge wall, amidst a storm of musketry, grape, canister and hand grenades, only to encounter unforeseen difficulties of a formidable nature. Instead of the débris up which the stormers expected to ascend, they discovered a solid wall of sand bags 12 feet high, from which the enemy fired upon them with deliberate aim. No scaling ladders had been provided, and the men could neither advance nor retreat. Under these circumstances orders were given to withdraw, and four of the boats succeeded in making their escape. The other three were swamped by the enemy's guns, and the whole number who landed, 10 officers and 104 men, were either killed or taken prisoners. Several of the boats were driven off by the ram and took no part in the assault, which may be considered a fortunate circumstance, as, had the whole force landed, they would doubtless have been cut off to a man. (*See ARMY OPERATIONS.*)

With this attempt ended the important operations before Charleston, in which the navy bore a prominent part. The ironclads cooperated with General Gillmore's batteries in completing the destruction of Fort Sumter, but no

further effort was made by them to pass into the inner harbor, notwithstanding many of the obstructions were torn up and washed ashore by the violence of the December gales. Subsequent to the evacuation of Morris Island by the enemy, a line of interior blockade was established by Admiral Dahlgren, extending from the island to a point off Fort Moultrie. The ironclads were placed on this line, each taking its turn of picket duty, near the entrance of the inner harbor, and as they thereby commanded Maffit's Channel, through which the greater part of the blockade runners had entered Charleston, the harbor was thenceforth effectually closed. "Not a single blockade runner," says Secretary Welles, in his annual report, "has succeeded in reaching the city for months, and the traffic which had been to some extent, and with large profits, previously carried on is extinguished. As a commercial mart, Charleston has no existence."

On the night of October 5th, the New Ironsides, while lying at her moorings off Morris Island, was struck by the rebel torpedo steamer David, whose apparatus exploded at the moment of contact, giving the ship a severe shock, and throwing a column of water upon her spar deck and into her engine room. No perceptible injury was done to her armor or hull. The David, a cigar-shaped vessel, fifty feet long by five in diameter, is supposed to have been sunk by the shock of the torpedo, as nothing was subsequently seen of her. She had a crew of four persons, two of whom were picked up out of the water.

Early on the morning of Christmas day, the gunboat Marblehead, Lieut.-Commander R. W. Meade, jr., while lying on the Stono river, opposite Legaréville, was fired upon by two batteries of field and siege pieces, the latter being posted in a thick wood. A spirited contest of over an hour ensued, at the end of which the enemy retired in disorder, leaving behind them two 8-inch howitzer iron guns and caissons. As the practice of the Marblehead was excellent, their loss is supposed to have been severe. The gunboat received twelve shots in her hull, and was considerably injured in her upper works and rigging. She had three men killed and four wounded. The Pawnee came up at the conclusion of the fight and annoyed the retreat of the enemy.

The chief maritime disaster on this station was the loss of the Weehawken, which sank at her moorings on the morning of December 6th, during the prevalence of a northwesterly gale, carrying with her to the bottom four of her engineers and twenty-six of her crew. The remainder of the ship's company escaped in the boats, or by jumping overboard at the moment of going down. The most of those who perished were probably drowned in the turret and immediately below it, while seeking to force their way through the narrow openings which afford the only means of escape. The disaster was at the time attributed to her hatches.

being unclosed. Having a full supply of coal and ammunition on board, and lying low in the water, it was supposed she was put out of trim by shipping a sea in her hold through the open hatches, and before the pumps could be got to work, careened over and went down. From the evidence given before the court of enquiry ordered by Admiral Dahlgren, however, it would appear that the cause of her foundering was a rupture between the overhang and the hull of the vessel, produced, as in the case of the Monitor, by the incessant pounding of the overhang against the waves as the vessel rose and fell in a heavy sea. She lay in twenty feet of water, and measures have been taken to raise both her and the Keokuk.

3. *Eastern Gulf Squadron*.—The cruising ground of this squadron comprised the coast of Florida, from Cape Canaveral to Pensacola, and as no important military operations were conducted on this line during the year, the vessels were employed almost exclusively in blockading duties, and by their vigilance succeeded in capturing upward of a hundred prizes. Among the incidents which relieved the monotony of this service were several boat expeditions for the purpose of destroying salt works, or cutting out or destroying vessels. One of these was sent, in the middle of December to West Bay, where the Confederate Government had extensive salt works producing 400 bushels daily. At this place 27 buildings, 23 large boilers, and 200 kettles were destroyed, together with 5,000 bushels of salt, and store houses containing three months' provisions, the whole estimated at half a million dollars. From this point the expedition proceeded down the bay, destroying private salt works, which lined each side for a distance of seven miles, to the number of 118 different establishments, averaging 2 boilers and 2 kettles to each. 507 kettles were dug up and rendered useless, and over 200 buildings were destroyed. The entire damage to the enemy is estimated at \$3,000,000.

4. *Western Gulf Squadron*.—The proper station of this squadron is along the Gulf coast from Pensacola to the Rio Grande, but owing to military movements, in Mississippi and Louisiana, Rear-Admiral Farragut was obliged to employ many of his vessels in the Mississippi and Red rivers, in active coöperation with the land forces. For the same reason he gave his chief attention to this portion of his squadron, leaving the blockade of the coast to his subordinates. The inland operations of the navy, having been for the most part intimately connected with those of the army, have been treated under that head, and it will be necessary to give here but a brief outline of what was done.

In the latter part of January, the army of General Grant and the Mississippi Flotilla under Rear-Admiral Porter commenced the siege of Vicksburg, and, for the purpose of hastening the reduction of that place, Admiral Farra-

gut was ordered to move up the river and open communications with Grant and Porter, who were operating above Vicksburg. On the night of March 14th he passed the batteries of Port Hudson, with his own ship (the Hartford) and the Albatross, the remainder of his fleet being driven back, and the Mississippi destroyed. He then succeeded in approaching to within a short distance below Vicksburg, and communicating across the Peninsula with the Union commanders, after which he blockaded the Red river for several weeks, effectually intercepting the supplies from Texas destined for Vicksburg and Port Hudson. Having been relieved from this duty early in May by Admiral Porter, who had run the batteries at Vicksburg with a portion of his fleet, he returned to New Orleans by way of the Atchafalaya, and, until the surrender of Port Hudson, directed the naval operations against that place. He then turned over the entire control of the Western waters, above New Orleans, to Admiral Porter. (See ARMY OPERATIONS.)

The capture of the U. S. gunboat Hatteras, by the privateer Alabama, is related under the head of OPERATIONS OF THE CONFEDERATE NAVY (vol. II. of this work, p. 604); and that of the Harriet Lane under TEXAS (vol. II., pp. 774-775).

On Jan. 21st, the bark Morning Light and the schooner Velocity, of the blockading fleet off Sabine Pass, were captured during a dead calm by two cotton-fortified steamers. The gunboats Cayuga and New London subsequently pursued and overtook the Morning Light near the entrance of the pass, but found her in flames. She was totally destroyed, but the enemy were unable to secure her guns. The commanding general, Magruder, immediately issued a proclamation stating that, as the port of Sabine Pass had "ceased to be actually blockaded, by the capture of the enemy's fleet near the same," friendly nations were invited to resume commercial intercourse with it, until an actual blockade should be reestablished with the usual notice required by the law of nations. To this Commodore Bell, commanding the U. S. fleet on the coast, replied by a counter-proclamation, warning all concerned that Sabine Pass, as well as the whole coast of Texas, was under an actual blockade, and that merchant vessels appearing off any part of the coast, or attempting to pass out of a port, would be seized as lawful prizes.

On the morning of September 8th the light-draught gunboats Clifton, Sachem, Granite City, and Arizona crossed the bar of Sabine Pass, conveying a fleet of transports on which were 4,000 troops under General Franklin. Somewhat later in the day the Clifton and Sachem engaged a six-gun battery on shore, but, getting aground and becoming disabled, were compelled to surrender. The remaining gunboats and other transports succeeded, with some difficulty, in retiring. (See ARMY OPERATIONS.)

Other casualties to the squadron were the destruction by fire of the sailing sloop *Preble*, of the old navy, at Pensacola, on April 27th; and the sinking of the gunboat *Kinsman*, from striking a snag in the Mississippi river on the night of Feb. 23d.

5. *Mississippi Flotilla*.—The operations of this fleet, like those of the preceding, were almost exclusively undertaken in conjunction with the land forces, and are described under ARMY OPERATIONS. It may be stated briefly that Admiral Porter coöperated in the capture of Arkansas Post, Jan. 11th, in the protracted and hazardous movements, extending over a period of nearly six months, which led to the fall of Vicksburg and Port Hudson, and in various important expeditions up the White and Red rivers, in all of which the gunboats acquitted themselves with distinction. An expedition up the White river in the latter part of August made important discoveries respecting the strength and movements of the enemy in Arkansas. Important services were also rendered by the gunboats in patrolling the Tennessee and Cumberland rivers, and dispersing the guerillas who fired upon supply steamers and transports. To the gunboats on the Ohio, which in July coöperated with the land forces in the pursuit of Morgan, was in a considerable degree due the capture of that leader and his force.

The flotilla on the Mississippi numbered at the close of the year upward of a hundred vessels, carrying 462 guns, with crews amounting in the aggregate to 5,500 men. Thirteen of these were efficient ironclads, 33 "tinclads," so called from being less heavily plated than the others, and the remainder consisted of despatch and auxiliary vessels, rams, &c. There were also a number of iron and tinclads in the course of construction.

6. *Potomac Flotilla*.—The vessels of this squadron are principally light-draught river steamboats and tugs, and their field of operations comprised Chesapeake Bay and the Potomac and Rappahannock rivers, where they were employed to prevent contraband traffic between Maryland and Virginia and perform other police duties. By their vigilance they succeeded in capturing many petty blockade runners and in intercepting rebel mails; and during the invasion of Maryland and Pennsylvania by the enemy in June and July vessels were stationed at Havre de Grace, Wilmington, Del., Annapolis, and other salient points of attack. In the latter part of August the gunboat *Satellite* and tug *Reliance* were surprised and captured by a party of the enemy near the mouth of the Rappahannock; but subsequently they were attacked and destroyed by a land force under command of Gen. Kilpatrick.

The chief naval incident on foreign stations was the attack by the *Wyoming*, Commander McDougal, upon several Japanese batteries and armed vessels at Simonosaki, on July 16th, in retaliation for an outrage upon an American steamer. In an action of an hour the vessels

were partially destroyed and the batteries much injured. The *Wyoming* lost 11 killed and wounded, and was hulled 11 times. See JAPAN.

The number of vessels captured by the several squadrons from the commencement of the war to Nov. 1st, 1863, was 1,045, classified as follows: steamers, 179; ships, 15; barques, 26; brigs, 30; schooners, 547; sloops, 131; yachts and small boats, 117. The value of all the prizes sent to admiralty courts for adjudication is estimated by Secretary Welles at upward of \$13,000,000; and the value of those condemned, the costs and amounts distributed are shown in the following table:

	No. of cases.	Gross amount of sales.	Costs and expenses.	Net amount for distribution.
Boston.....	13	\$864,322 15	\$25,188 44	\$839,133 71
New York....	89	2,218,263 29	281,162 07	1,937,101 22
Philadelphia	57	*1,859,434 76	149,806 06	1,670,512 97
Key West....	71	1,432,952 30	133,291 55	1,304,053 51
Washington..	44	72,091 62	11,966 12	60,909 08
Illinois.....	11	91,619 28	5,993 40	85,625 83
Total....	285	\$6,538,683 40	607,407 64	\$5,897,970 36

The number of prizes captured in 1863 by the four principal coast squadrons considerably exceeded 300, of which about one third were steamers, in many cases built expressly for blockade running, and loaded with valuable cargoes.

NELSON, WOLFRED, M. D. Dr. Nelson was born at Montreal in July, 1802, and was the son of an English commissariat officer. Educated to the medical profession, he was admitted to practice in 1811, and established himself at St. Denis on the Richelieu river. In the war with the United States which shortly after ensued, he volunteered and served as surgeon of the battalion raised in that district. In 1827 he successfully contested the representation of Sorel with the then Attorney-General—afterward Chief Justice Stuart, and was after that a prominent man in the political world. Whatever objects others may have proposed to themselves, his was to obtain for British subjects in Canada the right enjoyed by their fellow subjects in Great Britain. Conceiving those rights to have been unjustly infringed, he took up arms in 1837 to enforce them, and fought bravely, however rashly, in the cause he had adopted. He won the one victory at St. Denis, which served to gild the desperate fortunes of the insurgents. When the advance of the victorious troops of Colonel Wetherall rendered further resistance hopeless, he fled, and sought by pursuing back roads and traversing forests to make his way to the United States. He was captured upon the frontier, and carried to Montreal and imprisoned. Even his adversaries of those days respected him for bravery and consistency. His life was spared, and he was sent into exile. Released from Bermuda, he settled in the United States, and came to live as near Canada as possible—at Plattsburg, N. Y. As soon as the amnesty permitted, he returned to his na-

* The sum of \$39,115.73 allowed to claimants by decree of court.

tive country, and resided in Montreal during his remaining days. In the year 1844 he was elected by his old friends on the Richelieu to represent the county of that name, and was re-elected to the next parliament. He became the ardent friend of the party essaying to work the British Constitution in its fulness in Canada. Declining a third election, he was appointed in 1851 an inspector of prisons—an office for which his professional career and his earnest philanthropy fitted him. In 1859 he became chairman of the Board of Inspectors. During the ship fever of 1847, he had rendered great service to the poor, sick and dying immigrants, at the risk of his own life, and during the cholera years, as chairman of the Board of Health, he was also most zealous. He has been once or twice elected President of the College of Physicians and Surgeons for Lower Canada. He died on the 17th of June, 1863. Through a life full of adventures as that of a hero of romance, he preserved a name unsullied by any baseness. He carried into politics and official life a heart tender as a child's, excitable and romantic as a woman's. Possessed once of wealth, he sacrificed it on the altar of (what he esteemed) his duty to his country—and in his later years, when other men were accused of enriching themselves at the expense of the country, his escutcheon ever escaped unstained.

NEW HAMPSHIRE. The election in New Hampshire for State officers was held on the 10th of March. There were three candidates for governor, viz.: Ira A. Eastman, Democratic; Joseph A. Gilmore, Republican, and — Harriman, Union. The total vote cast was 66,240. In 1860 the total vote was 65,923. The result was as follows:

Eastman.	Gilmore.	Harriman.
32,833	29,035	4,372

No one received a majority, and Gilmore was subsequently chosen by the Legislature, which was divided as follows:

	Senate.	House.
Republicans.....	9	189
Democrats.....	3	142

The vote for members of Congress was as follows:

	Republican.	Democrat.
1st District, Eastman..	11,979	12,059
2d " Rollins....	10,365	9,999
3d " Patterson. 10,347		10,571

On the 26th, the following order was published in the "Independent Democrat," at Concord:

Special Orders, No. 119.

WAR DEPARTMENT, ADJUTANT-GENERAL'S OFFICE, }
WASHINGTON, March 13th, 1863. }

To the Governor of New Hampshire:

[EXTRACT.]

34. By direction of the President, the following officers are hereby dismissed from the service of the United States. * * * *

Lieut. A. J. Edgerly, 4th New Hampshire volunteers, for circulating Copperhead tickets, and doing all in his power to promote the success of the rebel cause in his State.

By order of the Secretary of War.

L. THOMAS, Adjutant-General.

Edgerly was a lieutenant of the 4th New Hampshire regiment, which had been in Florida.

On the 3d of June the Legislature assembled at Concord, and elected not only Gilmore as governor, but Allen H. Tenney, Secretary of State, and Peter Sanborn, State Treasurer, and other officers.

The revenue of the State during 1863 was: taxes, \$137,065.61; loans, \$239,300; total, \$376,365.61. The expenses amounted as follows: ordinary, \$210,539.32; aid to families of volunteers, \$183,810.56; total, \$394,349.88. The debt of New Hampshire, at the end of the fiscal year 1862, was \$735,100. During 1863 additional loans have been negotiated to the amount of \$239,300 for the temporary use of the State, and \$482,300 for military purposes. The amount paid out by the State on account of the war to June 1st, 1863, was \$1,305,835, a portion of which had been paid back by the Federal Government. The number of men which the State had furnished at that date was 17,788, being her quota upon every previous call. Gov. Gilmore, in his message, stated that the State banks, with a capital of over four and a half millions, had over a million and a quarter of State and National securities. The railroads in the State had done a fair business during the year which had passed. The mutual insurance companies had proved a failure in the State. The State prison, insane asylum, house of reformation and other benevolent and reformatory institutions, were described to be in an excellent condition. The same was the state of the educational institutions. The general condition of the State was represented to be prosperous. All departments of business had flourished, produce had increased, and industry had gained its reward.

A bill was proposed in the Legislature giving to soldiers in the field the privilege of voting. The opinion of the Supreme Court was, that it was opposed to the spirit and letter of the State Constitution, as well as the law, which requires the presence of the voter at the polls.

Some popular disturbances arose in the State during the draft for soldiers. Some of the towns of the State had previously furnished an excess above their quota, and considered the draft upon them under such circumstances as peculiarly burthensome. Upon the representation of the facts to the War Department, the promise was given by the provost-marshal-general that the surplus men should be discharged in such towns from the number taken by the draft. The governor thereupon promised this remittance to the towns. But when the attempt was made to carry out this plan the difficulties were found to be so great that it was impossible to execute it. At Jackson a mob burned the Forest Vale House, half way between the Crawford and Glen Houses, and stoned the agents of the marshal engaged in notifying the drafted men. The loss of property was valued at \$8,000. In Portsmouth a

disturbance also took place. (*See Riots.*) The decision of the department was, however, acquiesced in when the circumstances were fully understood.

NEW JERSEY. At the session of the Legislature at the commencement of the year a series of resolutions were passed which were intended to express the views of the majority of the voters on public affairs. The series passed the Senate by a vote of 12 yeas to 8 nays, and the House by 38 yeas to 13 nays. The resolutions declare that the State in promptly answering all the calls for troops, believed and confided in the declarations of the President made in his inaugural address, and in the resolutions of Congress passed July, 1861; and that, having waited with patience and forbearance for the redemption of these pledges, she conceives it to be her solemn duty to urge upon the President and Congress in the most respectful but decided manner the redemption of the pledges under which the troops of the State entered upon and have continued in the contest; and as the devotion of the State to the sacred cause of perpetuating the Union and maintaining the Constitution has been untainted, in any degree, by infidelity, bigotry, sectionalism, or partisanship, she now, in view of the faith originally plighted, of the disasters and disgrace that have marked the steps of a changed and changing policy, and of the imminent dangers that threaten the national existence, urges upon the President and Congress a return and adherence to the original policy of the administration, as the only means by which the Union can be restored, and the nation saved. The other resolutions were thus expressed:

3. *And be it resolved*, That it is the deliberate sense of the people of this State that the war power within the limits of the Constitution is ample for any and all emergencies, and that all assumptions of power, under whatever plea, beyond that conferred by the Constitution, is without warrant or authority, and if permitted to continue without remonstrance will finally encompass the destruction of the liberties of the people and the death of the republic; and, therefore, to the end that in any event the matured and deliberate sense of the people of New Jersey may be known and declared, we their representatives, in Senate and General Assembly convened, do, in their name and in their behalf, make unto the Federal Government this our solemn protest:

Against a war waged with the insurgent States for the accomplishment of unconstitutional or partisan purposes;

Against a war which has for its object the subjugation of any of the States, with a view to their reduction to territorial condition;

Against proclamations from any source by which, under the plea of "military necessity," persons in States and Territories, sustaining the Federal Government, and beyond the necessary military lines, are held liable to the rigor and severity of military law;

Against the domination of the military over the civil law in States, Territories, or districts not in a state of insurrection;

Against all arrests without warrant; against the suspension of the writ of *habeas corpus* in States and Territories sustaining the Federal Government, "where the public safety does not require it," and against the assumption of power by any person to suspend such

writ, except under the express authority of Congress;

Against the creation of new States by the division of existing ones, or in any other manner not clearly authorized by the Constitution, and against the right of secession as practically admitted by the action of Congress in admitting as a new State a portion of the State of Virginia;

Against the power assumed in the proclamation of the President made January 1st, 1863, by which all the slaves in certain States and parts of States are forever set free; and against the expenditure of the public moneys for the emancipation of slaves or their support at any time, under any pretence whatever;

Against any and every exercise of power upon the part of the Federal Government that is not clearly given and expressed in the Federal Constitution—reasserting that "the powers not delegated to the United States by the Constitution, nor prohibited by it to the States, are reserved to the States respectively, or to the people."

4. *And be it resolved*, That the unequalled promptness with which New Jersey has responded to every call made by the President and Congress for men and means, has been occasioned by no lurking animosity to the States of the South or the rights of her people; no disposition to wrest from them any of their rights, privileges, or property, but simply to assist in maintaining, as she has ever believed and still believes it to be her duty to do, the supremacy of the Federal Constitution; and while abating naught in her devotion to the Union of the States and the dignity and power of the Federal Government, at no time since the commencement of the present war has this State been other than willing to terminate, peacefully and honorably to all, a war unnecessary in its origin, fraught with horror and suffering in its prosecution, and necessarily dangerous to the liberties of all in its continuance.

5. *And be it resolved*, That the Legislature of the State of New Jersey believes that the appointment of commissioners upon the part of the Federal Government to meet commissioners similarly appointed by the insurgent States, to convene in some suitable place for the purpose of considering whether any, and if any what plan may be adopted, consistent with the honor and dignity of the National Government, by which the present civil war may be brought to a close, is not inconsistent with the integrity, honor, and dignity of the Federal Government, but, as an indication of the spirit which animates the adhering States, would in any event tend to strengthen us in the opinion of other nations; and hoping, as we sincerely do, that the Southern States would reciprocate the peaceful indications thus evinced; and believing, as we do, that under the blessing of God great benefits would arise from such a conference, we most earnestly recommend the subject to the consideration of the Government of the United States and request its co-operation therein.

No draft took place in the State. The quota at the time the draft was made was 8,783; these were raised by volunteering. Up to the 1st of January, 1863, the number of troops which the State had been called upon to furnish was 27,199, and the number of men furnished up to that time was 30,214. Liberal bounties were paid by the counties and cities, which were to be reimbursed by the State. An enrolment of the citizens made in anticipation of a draft, returned the number in the State liable to military duty 71,697.

No election for State officers was held during the year. County officers and members of the Legislature were chosen, comprising one third of the Senate and the Assembly. This body was divided as follows:

	Senate.	Assembly.
Republicans.....	7	20
Democrats	14	40

The balance in the State Treasury at the beginning of the year was \$92,084. The State has no debt of consequence except that contracted as war expenses. The local institutions were prosperous during the year. On the invasion of Pennsylvania, the troops of the State were promptly sent to repel the enemy. (See ARMY OPERATIONS.)

The railroad system of the State has attracted much attention. Situated geographically as the State is, between the great cities of New York and Philadelphia, and the States in which those cities are located, the route of communication necessarily passes over her territory. This embraces likewise the principal portion of the communication by land between the north and the central and southern part of the country. Four rivers of some importance intersect this route, viz.: the Hackensack, the Passaic, Raritan and Delaware. The necessity of an easy communication between the above cities was so manifest in the war of 1812, as to be considered a work of national importance, and deserving the aid of the Federal Government. Congress, however, refused to authorize any expenditure for such an object. Thirty years ago, when the Delaware and Raritan canal and the Camden-Amboy railroad were chartered, the projects were considered to be so visionary that the charters could with great difficulty be given away by the State. Indeed they could not be given away upon terms on which capitalists were then willing to accept them unless they were impregnably protected from competition. This protection was thus given from the necessity of the case, as without it neither railroad nor canal would have then been built. On the fares paid by passengers and merchandise which pass over the railroad and canal a percentage is paid, which amounts to \$200,000 on the thousands of passengers and hundreds of millions of merchandise thus transported. In principle the tolls which are paid into the treasury of New York from the business done on her canals, is similar to those which New Jersey exacts for the business done on her public works. The fares on these routes are as low or lower than those on any other works in the country. The final success of the companies chartered in 1830 has been such as enabled them to assist in the construction of railroads in all parts of the State.

An application was made to Congress at the session commencing in December, 1863, to declare the Delaware and Raritan railroad a post and military road of the United States. This road runs from Keyport, on Raritan Bay, to the Delaware river opposite Dover, but is completed to its intersection with a road from Philadelphia to Atlantic City. A committee of the House reported unanimously in favor of the application. The question involved

the important consideration as to the right of the Federal Government to enter a State and give certain privileges to a corporation controlled by its local laws. By means of their route the Delaware and Raritan Company had transported troops and freight from Philadelphia to New York, but were enjoined from continuing to do the same by the chancellor of New Jersey, who ordered the payment to the Camden and Amboy Railroad Company of all sums received by said Delaware and Raritan Company, on the ground that an act of the State makes it unlawful for any road to be constructed during the existence of the Camden and Amboy charter, "which shall be intended to carry passengers and merchandise between New York and Philadelphia," without the consent of the said Camden and Amboy Company.

According to their report the committee of Congress find that from September 1st, 1862, to June 1st, 1863, there were transported over the Delaware and Raritan Bay Company's road seventeen thousand four hundred and twenty-eight men, six hundred and forty-nine horses, and eight hundred and six thousand two hundred and forty-five pounds of freight, by order of the Government.

They also find that Congress has five times exercised the power of establishing post-roads. 1st. In the case of the bridges across the Ohio at Wheeling and Bridgeport, Virginia, which law was sustained by the Supreme Court. 2d. In a special law of Congress declaring that all railroads in the United States shall be post-routes. 3d. Act of 1863, where that legislation is reaffirmed. 4th. In an act declaring a bridge partly constructed across the Ohio river at Steubenville, Ohio, to be a lawful structure. 5th. In the act of 1863, authorizing the President to seize any railroad when the public safety may require it, so that it shall be considered a part of the military establishment of the United States, as well as a post-road. The committee then proceeded to argue from article 1, section 8, Constitution of the United States, that Congress "shall have power to regulate commerce with foreign nations and among the several States, and with the Indian tribes," and quote at length views of the Supreme Court in cases arising under that clause. The committee then present a record of the action of Congress, the various State Legislatures, etc., for better railway connection from New York to Washington.

NEW YORK. On the first day of 1863, Horatio Seymour, who had been previously elected, was inaugurated governor of New York. On this occasion, in his brief inaugural address, after complimenting Governor Morgan (then retiring) on the manner in which he had discharged his duties, Governor Seymour said:

Fellow citizens: In your presence I have solemnly sworn to support the Constitution of the United States, with all its grants, restrictions, and guarantees, and I shall support it.

I have also sworn to support another Constitution—the constitution of the State of New York—with all its powers and rights. I shall uphold it.

I have sworn faithfully to perform the duties of the office of Governor of this State, and with your aid they shall be faithfully performed. These Constitutions and laws are meant for the guidance of official conduct and for your protection and welfare.

The first law I find recorded for my observance is that which declares “it shall be the duty of the Governor to maintain and defend the sovereignty and jurisdiction of this State,” and the most marked injunction of the Constitution to the Executive is, that he “shall take care that the laws are faithfully executed.”

These Constitutions do not conflict; the line of separation between the responsibilities and obligations which each imposes is well defined. They do not embarrass us in the performance of our duties as citizens or officials.

After a brief allusion to the quiet transfer of power from one political organization to another, and the expression of the hope that, before the end of two years, the nation would be again united and glorious, and thanks to the assemblage, the governor withdrew. During the year which he had thus commenced, the governor was called upon to encounter some new questions in the administration of the affairs of the State. The most exciting of these arose out of the orders of the Federal Government for a draft of men for the army. The number of men to be taken by the draft was ordered to be one fifth of the number enrolled in each congressional district who belonged to the first class, or were between the ages of twenty and thirty-five, with the unmarried between thirty-five and forty-five. It was always admitted as a fundamental principle in raising troops, and so provided by the Enrolment Act that the burden should be borne equally by all parts of the country. The obligations of a State should be in proportion to the number of its citizens liable to military duty. It happened that, under the system of volunteering in 1861 and 1862, some States had contributed proportionally more men than other States; and parts of some States had contributed proportionally more than the remainder. The first question to be determined by the Federal Government was the credit for volunteers which each State was entitled to receive. Great difficulties arose in solving this problem, from the manner in which volunteers had been obtained. (*See ENROLMENT.*) Other difficulties arose from the unequal proportions of similar ages in various States. Thus New England, whose youth emigrate in large numbers, would show a smaller number liable to military duty, in proportion to her population, than other portions of the Union. So New York City, which is the headquarters of European emigration, would show a greater proportion of the military age than was really subject to military duty. The commencement of the draft in New York City, in July, was accompanied with a riot, and it was suspended until August. (*See RIOTS.*) A correspondence then ensued between the governor and President Lincoln. On the 3d of August the gov-

ernor, in a letter to the President, referred to the provision of the Enrolment Act, which requires that the quotas should be so assigned as to equalize the number among the districts of the several States, allowing for those already furnished, and for the time of service. New York had hitherto furnished a surplus, and was entitled to credit, said the governor, but the statement of the provost-marshal did not agree with the records of the State adjutant-general's office. He therefore asked that the records of the two offices might be compared. He also asked that the draft might be suspended, as it had been elsewhere, until the results of recruiting, then actively going on in the State, should be apparent. He also stated that “it was believed by at least one half of the people of the loyal States that the Conscription Act was in itself a violation of the Supreme Constitutional Law,” and therefore “earnestly urged that the Government interpose no obstructions to the earliest practical decision upon this point.” He said: “Our accustomed procedures give to our citizens the right to bring all questions affecting personal liberty or compulsory service in a direct and summary manner, to the judges and courts of the State or nation. The decisions which would thus naturally be rendered within a brief period, and after full and ample discussion, would make such a current of judicial opinion as would satisfy the public mind that the act is either valid or void.”

On the 7th of August the President briefly replied, as follows:

EXECUTIVE MANSION, WASHINGTON, }
August 7th, 1863. }

His Excellency Horatio Seymour, Gov. of New York:

Your communication of the 3d instant has been received and attentively considered.

I cannot consent to suspend the draft in New York, as you request, because, among other things, time is too important.

By the figures you send, which I presume are correct, the twelve districts represented fall into two classes, of eight and four respectively. The disparity of the quotas for the draft, in these two classes, is certainly very striking, being the difference between an average 2,200 in one class and 4,864 in the other. Assuming that the districts are equal one to another, in entire population, as required by the plan on which they were made, this disparity is such as to require attention.

Much of it, however, I suppose, will be accounted for by the fact that so many more persons fit for soldiers are in the city than in the country, who have too recently arrived from other parts of the United States, and from Europe, to be included in the census of 1860, or to have voted in 1862. Still, making due allowance for this, I am yet unwilling to stand upon it, as an entirely sufficient explanation of the great disparity.

I shall direct the draft to proceed in all the districts, drawing, however, at first, from each of the four districts, to wit: second, fourth, sixth and eighth, only 2,200, being the average quota of the other class.

After this drawing, these four districts, and also the seventeenth and twenty-ninth, shall be carefully re-enrolled, and, if you please, agents of yours may witness every step of the process. Any deficiency which may appear by the new enrolment, will be supplied by a special draft for that object, allowing due credit for volunteers who may be obtained from these districts,

respectively, during the interval. And at all points, so far as consistent with practical convenience, due credit will be given for volunteers, and your excellency shall be notified of the time fixed for commencing the draft in each district.

I do not object to abide a decision of the United States Supreme Court, or of the judges thereof, on the constitutionality of the draft law. In fact, I shall be willing to facilitate the obtaining of it, but I cannot consent to lose the time while it is being obtained. We are contending with an enemy, who, as I understand, drives every able-bodied man he can reach into his ranks, very much as a butcher drives bullocks into a slaughter pen. No time is wasted, no argument is used.

This produces an army which will soon turn upon our now victorious soldiers, already in the field, if they shall not be sustained by recruits as they should be. It produces an army with a rapidity not to be matched on our side, if we first waste time to reëxperiment with the volunteer system, already deemed by Congress, and palpably, in fact, so far exhausted as to be inadequate; and then more time to obtain a court decision as to whether a law is constitutional which requires a part of those not now in the service to go to the aid of those who are already in it; and still more time to determine with absolute certainty that we get those who are to go in the precisely legal proportion to those who are not to go.

My purpose is to be in my action just and constitutional, and yet practical, in performing the important duty with which I am charged, of maintaining the unity and the free principles of our common country.

Your obedient servant, A. LINCOLN.

On the 8th, the governor replied, expressing regret that the draft could not be suspended until a judicial decision could be had, and forwarding a report of the judge-advocate-general. The governor said:

I wish to call your attention to the tables on pages 5, 6, 7, and 8, which show that in the nine congressional districts in Manhattan, Long, and Staten Islands, the number of conscripts called for is 33,729, while in nineteen other districts the number of conscripts called for is only 39,626. This draft is to be made from the first class; those between the ages of twenty and thirty-five. It appears by the census of 1860, that in the first nine congressional districts there were 164,797 males between 20 and 35. They are called upon for 33,729 conscripts. In the other nineteen districts, with a population of males between 20 and 35 of 270,786, only 39,626 are demanded.

Again, to show the partisan character of the enrolment, you will find in the 21st page of the military report, that in the first nine congressional districts, the total vote of 1860 was 151,243. The number of conscripts now demanded is 33,729. In the nineteen districts, the total vote was 457,257; yet these districts are called upon to furnish only 39,626 drafted men. Each of the nine districts gave majorities in favor of one political party, and each of the nineteen districts gave majorities in favor of the other party.

On the 11th, the President briefly replied as follows:

EXECUTIVE MANSION, WASHINGTON, }
August 11th, 1862. }

His Excellency Horatio Seymour, Gov. of New York:

Yours of the 8th inst., with Judge Advocate-Gen. Waterbury's report, was received to-day. Asking you to remember that I consider the time as being very important, both to the general cause of the country and to the soldiers in the field, I beg to remind you that I waited at your request from the 1st until the 6th inst., to receive your communication dated the 3d. In view of its great length and the known time and apparent care taken in its preparation, I did not doubt that it contained your full case as you desired to present it. It contained the figures for twelve districts, omitting

the other nineteen, as I supposed, because you found nothing to complain of as to them. I answered accordingly. In doing so, I laid down the principle to which I propose adhering, which is to proceed with the draft, at the same time employing infallible means to avoid any great wrong.

With the communication received to-day, you send figures for twenty-eight districts, including the same sent before, and still omitting three, for which I suppose the enrolments are not yet received. In looking over the fuller lists of twenty-eight districts, I find that the quotas for sixteen of them are above 2,000 and below 2,700, while of the rest, six are above 2,700, and six are below 2,000.

Applying the principle to these new facts, the 5th and 7th districts must be added to the four in which the quotas have already been reduced to 2,200 for the first draft, and with these four others must be added to those to be reënrolled. The correct case will then stand: the quotas of the 2d, 4th, 5th, 6th, 7th, and 8th districts, fixed at 2,200 for the first draft.

The provost-marshal-general informs me that the drawing is already completed in the 16th, 17th, 18th, 22d, 24th, 26th, 27th, 28th, 29th, and 30th districts. In the others, except the three outstanding, the drawing will be made upon the quotas as now fixed. After the first draft, the 2d, 4th, 5th, 6th, 7th, 8th, 16th, 17th, 21st, 25th, 29th, and 31st, will be reënrolled, for the purpose and in the manner stated in my letter of the 7th inst. The same principle will be applied to the now outstanding districts when they shall come in. No part of my former letter is repudiated by reason of not being restated in this, or for any other cause.

Your obedient servant, A. LINCOLN.

The governor insisted also that the enrolment presented great inequality, and laid the following statement before the War Department:

The average ratio of enrolment to the male population in the Western States, is.....	19 per ct.
In New Jersey.....	20 "
In Pennsylvania.....	18½ "
In the New England States, it is.....	17 "
In the State of New York, it is.....	22 "
Massachusetts, with ten congressmen and a population of 1,231,066, has to furnish, under the recent call for 300,000 men.....	15,126
The first nine congressional districts of the State of New York, with a population of 1,218,949, are called upon for.....	25,166
Excess in the nine congressional districts in New York over ten congressional districts in Massachusetts.....	10,040
The quota of Vermont and New Hampshire, with a united population of 641,171, and six representatives in Congress, and four senators, is.....	7,099
The quota of two congressional districts in New York, the 4th and 6th, with a population of 283,229, is.....	7,628

The wrong was partially corrected by reducing the numbers called in those districts of New York where they were excessive, to the average number in the other districts of the State. At the same time, the Secretary appointed Wm. F. Allen, of New York, John Love, of Indiana, and Chauncey Smith, of Massachusetts, as a commission, to determine upon some fair mode of correcting these inequalities.

Meantime the draft was carried forward in the western districts of the State nearly to completion, although in the city of New York and Brooklyn it had been suspended at the time of the riots, July 13th. In preparation for resuming it the following correspondence took place:

His Excellency Horatio Seymour, Governor of the State of New York :

HEADQUARTERS, DEPARTMENT OF THE EAST, }
NEW YORK CITY, July 30th, 1863. }

SIR: As the draft under the Act of Congress of March 3d, 1863, for enrolling and calling out the national forces, will probably be resumed in this city at an early day, I am desirous of knowing whether the military power of the State may be relied on to enforce the execution of the law, in case of forcible resistance to it. I am very anxious that there should be perfect harmony of action between the Federal Government and that of the State of New York; and if under your authority to see the laws faithfully executed, I can feel assured that the act referred to will be enforced, I need not ask the War Department to put at my disposal for the purpose, troops in the service of the United States. I am the more unwilling to make such a request as they could not be withdrawn in any considerable number from the field without prolonging the war and giving aid and encouragement to the enemies of the Union, at the very moment when our successes promise, with a vigorous effort, the speedy suppression of the rebellion.

I have the honor to be, very respectfully, your obedient servant,

JOHN A. DIX, Maj.-Gen.

ALBANY, Monday, August 3d, 1863.

To Maj.-Gen. John A. Dix, Commanding Eastern Department, &c. :

SIR: I received your letter on Saturday. I have this day sent to the President of the United States a communication in relation to the draft in this State. I believe his answer will relieve you and me from the painful questions growing out of an armed enforcement of the Conscription law in this patriotic State, which has contributed so largely and freely to the support of the national cause during the existing war. When I receive the President's answer, I will write to you again upon the subject of your letter.

Truly yours, &c.,

HORATIO SEYMOUR.

On the 8th of August, Gen. Dix again addressed the governor, saying:

It is my duty now as commanding officer of the troops in the service of the United States in the department, if called on by the enrolling officers, to aid them in resisting forcible opposition to the execution of the law; and it was from an earnest desire to avoid the necessity of employing for the purpose any of my forces, which have been placed here to garrison the forts and protect the public property, that I wished to see the draft enforced by the military power of the State in case of armed and organized resistance to it. But holding such resistance to the paramount law of Congress to be disorganizing and revolutionary, leading, unless effectually suppressed, to the overthrow of the Government itself, to the success of the insurgents of the seceded States, and to universal anarchy, I designed, if your coöperation could not be relied on, to ask the General Government for a force which should be adequate to ensure the execution of the law, and to meet any emergency growing out of it.

To this letter Gov. Seymour, who had, in the meantime, failed to obtain from the President a suspension of the draft, replied on the 15th, saying:

As you state in your letter that it is your duty to enforce the act of Congress, and as you apprehend its provisions may excite popular resistance, it is proposed you should know the position which will be held by the State authorities. Of course, under no circumstances, can they perform duties expressly confided to others; nor can they undertake to relieve others from their proper responsibilities. But there can be no violations of good order or riotous proceedings, no disturbances of the public peace, which are not infractions of the laws of the State, and those laws will be

enforced under all circumstances. I shall take care that all the executive officers of this State perform their duties vigorously and thoroughly, and, if need be, the military power will be called into requisition.

As you are an officer of the General Government, and not of the State, it does not become me to make suggestions to you with regard to your action under a law of Congress. You will, of course, be governed by your instructions, and your own views of duty.

On the 18th, Gen. Dix again wrote to the governor, saying:

Not having received an answer from you, I applied to the Secretary of War on the 14th instant, for a force adequate to the object. The call was promptly responded to, and I shall be ready to meet all opposition to the draft.

Gov. Seymour replied on the 20th, stating that no notice had been sent to him when the draft would take place; neither had there been of the previous one; and that he expected some interval between the notice and the draft. He said:

You will see that no time was allowed for getting credits for volunteers, for making suggestions or preparations. I do not know that the fault rests with Col. Fry, but it is proper for me to state these facts.

The specific objections of the governor were, that New York City and Brooklyn did not get due credit for the past, and that the enrolments were excessive, as compared with other portions of the State; and that the draft, as proposed, would throw upon the eastern portion of the State, comprising less than one third of the congressional districts, more than one half of the burdens of the conscription. Figures were presented to sustain these objections. So far as related to any political comparison of the congressional districts, the judge-advocate-general said:

The nine anti-Lincoln districts are required to furnish nearly as many conscripts as the nineteen Lincoln districts, although the latter polled more than three times as many votes; as follows:

1860.					
LINCOLN DISTRICTS.			ANTI-LINCOLN DISTRICTS.		
District.	Total vote.	Cons. requir'd.	District.	Total vote.	Cons. requir'd.
12.....	22,664	2,013	1.....	19,194	2,212
13.....	19,698	2,006	2.....	17,169	4,146
15.....	25,540	2,370	3.....	19,297	2,697
16.....	17,167	1,493	4.....	17,253	5,881

The three districts to which a quota has not been assigned each gave an anti-Lincoln majority.

The whole matter was referred for investigation by the Secretary of War to the committee, above mentioned, whose report sustained the

objection of Governor Seymour as to an excess of enrolment, and the allowance of 13,000 men was promptly made by the War Department. The Legislature, at its subsequent session, passed a vote of thanks to the governor for his successful management of this matter.

The quota of New York under the draft, after deducting credits on former calls, was 68,000 men. At the time for the draft to be completed in New York and Brooklyn, the governor issued the following proclamation:

EXECUTIVE CHAMBER, ALBANY, }
Aug. 18th, 1863.

I have received information that the draft is about to be made in the cities of New York and Brooklyn, and I understand that there is danger of disorderly and riotous attacks upon those who are engaged in executing the law of Congress.

I cannot believe that any considerable number of citizens are disposed to renew the shameful and sad scenes of the past month, in which the lives of so many, as well of the innocent as of the guilty, were destroyed. Our courts are now consigning to severe punishment many of those who were then guilty of acts destructive of the lives and property of their fellow-citizens. These events should teach all that real or imaginary wrongs cannot be corrected by unlawful violence. The liberties of our country and the rights of our citizens can only be preserved by a just regard for legal obligations, and an acquiescence in the decision of judicial tribunals.

While I believe it would have been a wise and humane policy to have procured a judicial decision, with regard to the constitutionality of the Conscription Act, at an earlier day and by a summary process, yet the failure to do this in no degree justifies any violent opposition to the act of Congress. Until it is set aside by the decision of judicial tribunals, it must be obeyed like any other act of the State or National Legislature.

The following rule of duty in this respect was laid down in the farewell address of Andrew Jackson. This view has always been accepted by the friends of our Union and the upholders of our Constitution:

Unconstitutional or oppressive laws may, no doubt, be passed by Congress, either from erroneous views or the want of due consideration. If they are in reach of judicial authority, the remedy is easy and peaceful; and, if from the character of the law, it is an abuse of power not within the control of the judiciary, then free discussion and calm appeals to reason, and to the justice of the people, will not fail to redress the wrong. But until the law shall be declared void by the courts or repealed by Congress, no individual or combination of individuals can be justified in resisting its execution.

The antagonistic doctrine that men may rightfully resist laws opposed to their own ideas of right or duty has not only led to great disorders and violence, but is one of the chief causes of the destructive civil war which has wasted the blood and treasure of our people. Disregard for the sacredness of the Constitution, for the majesty of the law, and for the decisions of the judiciary, is, at this time, the greatest danger which threatens American liberty.

This spirit of disloyalty must be put down. It is inconsistent with social order and social security, destructive to the safety of persons and property, and subversive of the liberty of the citizen and the freedom of the nation. Those who fear that there are designs in any quarter to overthrow the rights of the citizen, or to obstruct the accustomed administration of our laws, or to usurp any power in violation of constitutional restraints, should bear in mind that all acts of violence, all public disorders, pave the way for these very usurpations, and that they will be regarded with satisfaction by those who, for any cause, may wish to destroy either the power or rights of our National or State Governments.

The Constitution and Statutes of the State and nation

contain ample remedies for all wrongs which may be committed either by rulers or citizens, and those who wish to preserve their rights, or to punish offenders, whether in public or in private life, should themselves carefully perform their duty, abstain from all illegal acts, generously support the Government, and then calmly and resolutely claim their rights.

I again repeat the warning which I gave to you during the riotous proceedings of the past month, that "the only opposition to the conscription which can be allowed is an appeal to the courts. The right of every citizen to make such an appeal will be maintained, and the decision of the courts must be respected and obeyed by rulers and people alike. No other course is consistent with the maintenance of the laws, the peace and order of the city, and the safety of its inhabitants. Riotous proceedings must and shall be put down. The laws of the State of New York must be enforced, its peace and order maintained, and the lives and property of all citizens protected, at any and every hazard. The rights of every citizen will be properly guarded and defended by the chief magistrate of the State."

I hereby admonish all judicial and executive officers whose duty it is to enforce the law and preserve public order, that they take vigorous and effective measures to put down any riotous or unlawful assemblages; and if they find their power insufficient for that purpose, to call upon the military in the manner pointed out by the Statutes of the State. If these measures should prove insufficient, I shall then exert the full power of the State, in order that the public order may be preserved, and the persons and properties of the citizens be fully protected.

HORATIO SEYMOUR.

The following is the force that was sent to General Dix by the Secretary of War as above stated:

United States regular infantry regiments and artillery...	12
New York cavalry and infantry regiments and artillery.	7
Ohio infantry regiments.....	5
Massachusetts infantry and artillery.....	4
Vermont infantry regiments.....	5
Connecticut battery.....	1
Delaware battery.....	1
Michigan infantry regiments.....	3
Indiana infantry regiments.....	3
Minnesota infantry.....	1
Wisconsin infantry.....	2

Total United States regiments and batteries on duty.. 44

The result of the draft in the State was as follows:

No. of conscripts examined.....	77,862
No. exempted for physical disability and other causes	53,109
No. who paid commutation.....	14,073
No. of substitutes obtained.....	6,619
No. of conscripts held to service.....	2,557

The number of volunteers obtained in the State, from January 1st, 1863, to January 5th, 1864, was as follows:

Volunteers raised by State authorities from January 1st, 1863, to this date....	25,324
Recruits sent to regiments in the field.....	1,653
Enlisted by provost-marshals.....	11,060
Reenlistments in the field (estimate).....	10,000
Substitutes (volunteers, in fact).....	6,619
Enlisted by provost-marshals since December 21st...	1,500
	56,156

The State has furnished up to December, 1863, 292,982 men. Of this number 230,442 were mustered in for three years, 30,121 for two years, 2,516 for nine months, 29,893 for three months. This ratio, applied to the loyal States, should produce an army of 1,439,500, or one soldier for every thirteen persons.

The Boards of Supervisors have made the fol-

lowing appropriations, except in ten counties, where bounties were paid by towns entirely:

1861	\$362,700 00
1862.....	2,967,871 96
1863	11,033,291 95
	\$14,263,863 91

By common councils:

1861.....	\$2,307,248 33
1862.....	1,824,032 12
1863.....	2,579,668 50
	\$6,710,948 95

By the Legislature:

1861.....	\$2,307,248 33
1862.....	1,824,032 12
1863.....	8,841,698 00
	\$13,562,497 00

Total appropriated..... \$34,637,309 86

Inquiries were made of Governor Seymour relative to the enlistment of colored troops, to which he returned the following answer:

STATE OF NEW YORK, EXECUTIVE DEPARTMENT, }
ALBANY, Nov. 24th. }

SIR: In answer to your inquiries about enlistment of blacks and the organization of regiments and companies, I have to say:

1st. That, under the State laws, the bounty is paid to all without distinction who are mustered into the service of the United States, and for whom credits are given to New York under the President's call for troops.

2d. As to new organizations, I have no power to authorize any, either blacks or whites, which will be entitled to the benefits of the bounty given by the General Government. The object at Washington is to fill up the ranks of the regiments in the field. If any new organizations for either white or black troops are made, they must be authorized by the War Department to entitle those who join them to the benefit of the money paid to volunteers. Yours, &c.,

HORATIO SEYMOUR.

To JAMES ROGERS, No. 421 Broadway, N. Y. City.

An enrolment of the militia, made in August and September, 1862, showed 589,539 men subject to draft.

At the annual elections in November a Secretary of State, Comptroller, Treasurer, Attorney General, State Engineer, and Surveyor, and a Judge of the Court of Appeals were to be chosen, besides a Legislature and local officers. Several conventions were held previous to the election. A Union, or Administration Convention, assembled in Syracuse early in September, at which Chauncey M. Depew was nominated for Secretary of State; Lucius Robinson for Comptroller; Geo. W. Schuyler, Treasurer; John Cochrane for Attorney General; State Engineer, Wm. B. Taylor. Resolutions were adopted declaring that it was the highest duty of every citizen to do all in his power to maintain the integrity of the Union and the supremacy of the Constitution over the whole national domain; that the armies should be promptly reënforced, and the conduct of all condemned who embarrassed the efforts of the Government; that no other tenders of peace should be made to the enemy than are embraced in the Constitution under which they can at any time resume their place in the Union; that the gratitude of the people is due

to the administration of Mr. Lincoln for the ability and steadfast courage with which he has prosecuted the war for the Union; the signal success of its financial ability; its preservation of peace with foreign nations, and its splendid victories; that the spirit of partisan hostility aroused against the Government was to be deplored; that thanks be tendered to the soldiers for their zeal and fortitude; approving the action of the Government in repelling every attempt at foreign intervention, &c. A resolution was also adopted approving the Emancipation Proclamation "as a war measure, thoroughly legal and justifiable."

A Constitutional Union Convention assembled on September 9th, but made no nominations. In its resolutions it refused to support for office any person in political relation or sympathy with secession, abolitionism, or fanaticism of any kind; and resolved that the independence of the revolted States would be a greater evil than war; that citizens of any revolted State on returning to their allegiance become again citizens of the Union; that the right of property in lands, personalty or slaves, is exclusively within the authority and jurisdiction of the States respectively; that the sole end for which the Government has authority to carry on this war is to suppress their insurrection, and to compel them to obey the Constitution and laws. Another resolution declares the unalterable purpose to resist in every legal manner all departures from the strict letter of the Constitution.

On the 10th of September, the Democratic or Opposition Convention assembled at Albany, and nominated Daniel B. St. John for Secretary of State; Sanford E. Church for Comptroller; Marshall B. Champlain for Attorney General; Wm. B. Lewis for Treasurer, and Van R. Richmond for State Engineer. The convention resolved to render a sincere and united support to the Government in all legitimate means to suppress the rebellion, and restore the Union; that the Government was pledged to the policy declared in the resolution of Congress of July, 1861; that illegal and unconstitutional arrests should be discontinued as a usurpation and crime; that the Government should manifest a policy of conciliation; that the doctrine of secession is equally false with the claim of the right of the Federal Government to obliterate State boundaries and State rights; that the Constitution is equally obligatory in time of war as in peace; that thanks are due to the soldiers for their promptness and bravery; that the results of the conscription should admonish the Government to rely on the voluntary action of a patriotic people; that mob violence is a crime against a people and a republican government; that the administration of Gov. Seymour meets the highest approval.

On the 3d of June a mass convention assembled in New York, in compliance with a call signed by one or more persons in each sen-

atorial district of the State. The call, after stating the results of the past efforts to restore the Union, continues thus:

In view of these results, after more than two years of continual and unceasing military conflict, we are for taking one step upon the road of peaceful effort. We are now for a vigorous prosecution of peace. And whilst we would submit to no national dismemberment, and no terms not justified by every principle of honor, we will go very far in the spirit of conciliation and concession to restore the Union as it was under the Constitution as it is. We believe that these are the prevailing sentiments of the masses.

The resolutions adopted by the convention declared fealty to the Constitution and to the sovereignty of the States and of the people; that under the Constitution there is no power to coerce the States or any of them by military force; that the war is contrary to the Constitution, and should be put an end to; that attempts to do away with the provisions of the Constitution which point out how crimes are to be punished, are high-handed violations of the solemn duties of rulers; that the claim of dictatorial and unlimited military power and trial of citizens by courts-martial are monstrous; that the dogma of unlimited submission to the Executive branch of the Government is unworthy an American citizen; that we protest against the cowardly, despotic, inhuman act of banishment of C. L. Vallandigham; and recommend the suspension of hostilities, and the holding of a convention to settle the manner of restoring the contending sections.

On the 3d of September, a Young Men's Union or Administration Convention assembled at Syracuse. The chairman stated the objects of the convention "to be to unite all loyal young men of the State in the firm and vigorous support of the National Government, and in opposition to all who are disposed to embarrass it in the suppression of this wicked rebellion, and in maintaining the majesty of the laws."

The vote of the State was cast as follows:

Administration.		Opposition.	
Depew.....	314,347	St. John.....	284,942
Robinson.....	314,236	Church.....	284,849
Cochrane.....	313,865	Champlain.....	284,762
Selden, Judge.....	313,327	Allen, Judge.....	284,086

The Legislature, of which a portion of the Senate held over, was as follows:

	Senate.	Assembly.	Total.
Administration.....	21	82	103
Opposition.....	11	46	57

In May a public meeting was held in Albany, relative to the arrest of Clement L. Vallandigham (*see* HABEAS CORPUS), at which a series of resolutions were adopted, and ordered to be sent to President Lincoln. For the correspondence relative thereto, *see* PUBLIC DOCUMENTS. An invitation was extended to Governor Seymour to attend this assemblage, to which he sent the following reply:

STATE OF NEW YORK, EXECUTIVE DEPARTMENT, }
ALBANY, May 16th, 1863. }

To Peter Caggar, Solomon F. Higgins, Erastus Corning, Jr., Committee:

I cannot attend the meeting at the capitol this evening, but I wish to state my opinion in regard to the arrest of Mr. Vallandigham.

VOL. III.—44 A

It is an act which has brought dishonor upon our country; it is full of danger to our persons and to our homes; it bears upon its front a conscious violation of law and of justice. Acting upon the evidence of detailed informers, shrinking from the light of day in the darkness of night, armed men violated the home of an American citizen, and furtively bore him away to a military trial, conducted without those safeguards known to the proceedings of our judicial tribunals.

The transaction involved a series of offences against our most sacred rights. It interfered with the freedom of speech; it violated our rights to be secure in our homes against unreasonable searches and seizures; it pronounced sentence without a trial, save one which was a mockery, which insulted as well as wronged. The perpetrators now seek to impose punishment, not for an offence against law, but for a disregard for an invalid order, put forth in an utter disregard of principles of civil liberty. If this proceeding is approved by the Government, and sanctioned by the people, it is not merely a step toward revolution, it is revolution; it will not only lead to military despotism, it establishes military despotism. In this aspect it must be accepted, or in this aspect it must be rejected.

If it is upheld, our liberties are overthrown. The safety of our persons, the security of our property, will hereafter depend upon the arbitrary wills of such military rulers as may be placed over us, while our constitutional guarantees will be broken down. Even now the Governors and the courts of some of the great Western States have sunk into insignificance before the despotic powers claimed and exercised by military men who have been sent into their borders. It is a fearful thing to increase the danger which now overhangs us, by treating the law, the judiciary, and the authorities of States with contempt. The people of this country now wait with the deepest anxiety the decisions of the Administration upon these acts. Having given it a generous support in the conduct of the war, we now pause to see what kind of Government it is for which we are asked to pour out our blood and our treasures.

The action of the Administration will determine in the minds of more than one half of the people of the loyal States, whether this war is waged to put down rebellion at the South, or to destroy free institutions at the North. We look for its decision with the most solemn solicitude.

HORATIO SEYMOUR.

For the riots in New York, *see* RIOTS, &c.

The receipts and disbursements of the New York general fund, for the year 1863, were as follows:

RECEIPTS.	
Loans State defence.....	\$2,000,000 00
Auction and salt duty.....	187,951 06
State tax.....	4,700,952 77
Canal revenue.....	200,000 00
Miscellaneous.....	22,875 00
Prisons' earnings.....	267,125 30
Sale of arms to United States.....	230,599 99
Native guard fines.....	70,101 37
Non-resident taxes.....	57,277 65
Banks.....	33,020 33
Other items.....	50,105 59

Total.....	\$7,820,009 06
On hand, 1862.....	821,612 11

PAYMENTS.	
Bounties.....	\$4,650,277 54
War expenses.....	640,114 58

State " ".....	6,181,432 97	
Total taxes (15 mills per \$1).		\$23,046,800 60

The action of the Federal Government in establishing a system of National Banks based upon public stocks exempt from taxation, excited much interest in the State, and became a subject of legislative consideration. The views entertained, and the action of that body, belong to the record of 1864.

The question of allowing the volunteers from the State to vote at election, was discussed during the year, and resulted in an amendment of the Constitution early in 1864, to secure to them that privilege.

The public schools and academies of the State exhibited a small decrease in the attendance, which was ascribed to the increased demand for the services of the youth between the ages of sixteen and twenty-one years. The aggregate attendance upon all the schools, was 984,695. The number of teachers employed, was 26,213.

The charitable and other institutions of the State manifested but little change from the previous year; but the affairs of the citizens advanced with unusual prosperity.

NICHOLS, JOHN BOWYER, an English publisher and author, born in the parish of St. Bride, Fleet street, London, July 15th, 1779, died at his residence, Ealing, Middlesex, October 19th, 1863. He was the only surviving son of Mr. John Nichols, a distinguished literary biographer of the eighteenth century, and for forty-eight years the editor of the "Gentleman's Magazine." Owing to the death of his mother during his childhood, his boyhood was spent with his grandfather and his great-uncle at Hickley, and his early education was obtained at Stoke Golding and at St. Paul's School, which he left in September, 1796, and then joined his father in business. Among his duties, from an early age, was that of assisting in the editorship of the "Gentleman's Magazine," of which, in 1833, he became sole proprietor. In 1834 he transferred a share to Mr. William Pickering, of Piccadilly, which he subsequently repurchased, and in 1856 conveyed the whole property to Mr. J. H. Parker, of Oxford. Mr. Nichols was one of the oldest members of the Linnæan Society, to which he was introduced in 1812, and was one of the few survivors of those who took part in the Sunday evening soirées of Sir Joseph Banks. He had also been from the first a supporter of the Horticultural and Zoological Societies. In 1818 he was elected a fellow of the Society of Antiquaries, to which he became printer in 1824, as his father had been at a previous

period. He was an original member of the Archæological Institute of Great Britain, of the Numismatic Society, the Royal Society of Literature, and the Athenæum Club. He served all the annual offices of the Stationers' Company, and attained that of master in 1850, as his father had done in 1804, and to the last he was a constant attendant at the meetings of its Court of Assistants. In 1836 he presented to the Court-Room a portrait of his father, by John Wood, and in 1855 supplemented by a gift of £500 consols, his father's benefaction for pensions to three poor printers, raising them thereby to £10 each. In 1821, on the resignation of his father, he succeeded to the office of one of the three Registrars of the Royal Literary Fund. To the Royal Humane Society, in the foundation of which his father was an active coadjutor, Mr. Nichols gave his services for many years as one of the committee of management. In his own neighborhood of Westminster he was a Governor of the Grey Coat and Green Coat Schools, and of St. Margaret's Hospital. His library contained large collections illustrative of English topography, consisting not only of the county histories, and other books of local history and genealogy, but also of drawings, engravings, printed papers, and rubbings of sepulchral brasses, which he arranged in parishes. Mr. Nichols was a man of noble and generous impulses, and remarkable for his equability of temper, as well as for his great industry and assiduous application both to private and public business. Though in his latter years afflicted with loss of sight, he retained remarkable power of memory and energy of purpose, and a judgment in nowise diminished from its wonted accuracy. His death resulted from congestion of the lungs, after only three days' illness. The list of his published works is large; among the most important are: "The Life and Errors of John Dunton, Citizen of London;" with the "Lives and Characters of more than a thousand Contemporary Divines, and other Persons of Literary Eminence." To which are added "Dunton's Conversation in Ireland;" "Selections from his other Genuine Works," &c.; "The Athenian Oracle Abridged," containing the most valuable Questions and Answers in the Original Works in History, Philosophy, Divinity, Law, and Marriage, published by John Dunton" (1820); "A Brief Account of the Guildhall of the City of London;" "Anecdotes of William Hogarth, written by himself, with Essays on his Life and Genius, and Criticisms on his Works, selected from Walpole, Gilpin, Ireland, Lamb, and others," to which are added a Catalogue of his Prints, lists of Paintings, Drawings, &c. (1833); "Literary Anecdotes of the Last Century;" "Historical Notices of Fonthill Abbey, Wiltshire;" "Illustrations of Her Majesty's Palace at Brighton, formerly the Pavilion," published in folio, 1838. The last literary task in which Mr. Nichols engaged was the continuation and

completion of his father's "Illustrations of the Literary History of the Eighteenth Century," the sequel of the well known "Literary Anecdotes." He arranged and edited the seventh and eighth volumes of that work, which were published in the years 1848 and 1858.

NORMANBY, CONSTANTINE HENRY PHIPPS, Marquis of, born at Mulgrave Castle, York, May 15th, 1797, died at Hamilton Lodge, South Kensington, July 28th, 1863. He was educated at Harrow School, and at Trinity College, Cambridge, at which university he took his degree as M.A. in 1818. Shortly after he attained his majority he entered parliament as member for Scarborough, where his family had great influence. His first speech in the House of Commons, made in 1819, was in favor of the Roman Catholic claims, and was considered by his political friends a decided success. He seconded Lord John Russell's resolution on reform in a speech somewhat in advance of his party, but shortly afterward resigned his seat (his opinions differing from those of his family), and retired to Italy. In 1822 he was elected member for Higham Ferrars, and shortly afterward returned home to resume his position in the House of Commons. In 1826 he was chosen representative of the borough of Malton, and gave his support to Mr. Canning's administration. He was then a Liberal, and a popular member of the Lower House. In the summer of 1832, having the previous year succeeded his father as Earl Mulgrave, he was appointed Captain-General and Governor of Jamaica, an office which he filled with much credit. On the formation of Lord Melbourne's first administration, Lord Mulgrave accepted the post of Lord Privy Seal, with a seat in the cabinet. In April, 1835, Lord Melbourne being again in office, he was selected for the important post of Lord Lieutenant of Ireland, and his reception in Dublin the following month was most enthusiastic. While occupying this position, his strict impartiality and integrity won the confidence of both political parties. In June, 1838, he was created Marquis of Normanby. In February, 1839, he succeeded Lord Glenelg as Secretary of State for the Colonies, an office he held but a few months, as he changed it in August for the Home Department, which post he held till September, 1841. In August, 1846, he was appointed ambassador at Paris, where he remained until the early part of 1852; in the latter part of that year he had a very serious illness, which so affected his general health, that he was advised to reside in Italy. His opposition to the *coup d'état* of Louis Napoleon in 1852, which the English prime minister had approved, also made his further continuance at the French Court as minister plenipotentiary unpleasant, and he resigned in the spring of 1853, and resided for some years in Florence, where he was on terms of close personal intimacy with the Grand Duke. It was while there that he accepted from Lord Aberdeen's Government in 1854 the post of minister at Tuscany. Re-

turning home in 1858, in time for the first meeting of the new Parliament of February, 1859, he denounced, in a speech delivered that night, the grounds on which it was attempted to remove the ministry of Lord Derby, and objected to any change which should place the supreme control of foreign affairs again in the hands of Lord Palmerston, whose recognition of the French republic of 1848 he entirely disapproved of. He was the author of several political pamphlets of great ability, one of which, published in 1861, on Italian affairs, created a controversy with Mr. Gladstone. He wrote also several other works of much merit; among which are: "Yes and No," "Matilda," "Clorinda," "The Contrast," and "The Prophet of St. Paul."

NORTH CAROLINA. Much dissatisfaction existed in North Carolina throughout 1863. But it does not appear to have resulted in any advantage to the Union cause. Any efforts to withdraw from the Confederacy, or to unite with the Union, if undertaken, would have been promptly suppressed. The promises held out by the secessionists had failed; the Confederate Government was drawing from the State all its military resources, while many believed that it was so administered as to destroy the rights of the States and the liberties of the citizen. The following is a statement of the causes of this dissatisfaction:

The conscription and the tithing law leave nothing to the States, but the Central Government takes our fighting men with one hand and the tenth of our substance with the other. If the first was really necessary the States themselves could have enforced it, and each State could have kept its quota of men in the field in brigades, duly officered; and if provisions were needed, and could not be purchased, the States could have furnished them by a system of purchase of their own, and taken in exchange for them the currency of the Government.

Seizures of persons and property have become as common as they are in France and Russia. Personal liberty has been made dependent on the mere will of army officers appointed by the President. Hundreds have been arrested for opinion's sake, immured in dungeons, denied trials before the civil tribunals, and released only when the military power chose to do it. Our courts, when they have interposed to protect these unfortunates and to uphold the law, have been disregarded in many instances, and their integrity reflected on in gross terms by the War Department at Richmond. The Confederate currency which is the lifeblood of the system and the emanation of plighted public faith, has been to some extent repudiated as a matter of convenience; and a portion of it in one instance has been refused by a Cabinet officer, on the same ground, in open violation of a law of Congress. Our patient, uncomplaining, heroic soldiers have been placed in the van of every battle, and in the rear of almost every retreat; and when they have fought with an ardor and steadiness which would have reflected credit on the old guard of Bonaparte itself, just praise has been denied them by journals supposed to speak for the administration, and their fathers and brothers at home who are conservatives have been held up as disloyal and unfriendly to the cause. Brigadier and major-generals from other States have been placed over them in many instances, and when such officers have been appointed from our State they have been almost invariably of the same politics with the administration. Proscription has thus been practised over

the very bones and blood of our people. Superadded to all this has been the appointment of surgeons, enrolling officers, and the like from other States over our regiments and over our people at home, until the crowning outrage was reached by the appointment of Major Bradford, of Virginia, to collect the tithes. This led to the first public meeting held in this State; and but for this and other meetings, and the earnest remonstrances of Gov. Vance, Major Bradford would still be tithing man for this State. Such are some of the causes that have roused the people of this State to a sense of their rights, and led to the meetings so much deprecated by the "Observer."

The meetings thus mentioned were held in Orange, Yadkin, Guilford, Randolph, Moore, Wake, Buncombe, and other counties. The resolutions adopted asked for peace, by negotiation, and by a suspension of hostilities. No one referred to a restoration of the Union.

Amid this state of affairs troops were sent from Richmond to arrest deserters and enforce conscription; the governor issued a proclamation to the people, and the press denounced all such persons as traitors. These proceedings led to some disturbances, which resulted in the destruction of two newspaper establishments in Raleigh. (See page 217.)

The number of troops which the State had at this time furnished to the army was 74,000 volunteers and 14,000 conscripts.

Popular disturbances took place during the year at Raleigh and Charlottesville. (See Riots.)

An election was held for members of the Congress at Richmond. Eight of the ten persons chosen were reported to be in favor of peace. The following were elected:

1st Dist., W. H. N. Smith; 2d Dist., R. R. Bridgers; 3d Dist., Dr. J. T. Leach; 4th Dist., Lieut. Thomas C. Fuller; 5th Dist., Captain Josiah Turner; 6th Dist., J. A. Gilmer; 7th Dist., S. H. Christian; 8th Dist., Dr. J. G. Ramsay; 9th Dist., B. S. Gaither; 10th Dist., Gen. G. W. Logan. The provisional governor, Stanley, appointed by President Lincoln, resigned during the year and retired.

The military operations in the State were less important than in 1862. Early in the year a considerable force was withdrawn from the department and sent to Port Royal, to co-operate with the troops there against Charleston. The enemy were advised of these movements, and made preparations for an attack on the Union positions. On March 14th a sudden attack was made on Newbern, which was repulsed with slight loss. It was intended as a feint, while the real effort was made for the capture of Washington, about thirty-six miles further north. On March 30th a force of the enemy under Gens. Hill and Pettigrew marched suddenly on that place. The Federal skirmishers sent out on their first appearance were driven back with considerable loss. As soon as the position of the enemy could be ascertained, the gunboat Com. Hull opened fire upon them, and drove them off. During the night they intrenched themselves as follows: those north of the town took position on Red Hill, an elevation about two and a half miles

distant, commanding the Federal fortifications. Those on the south of the town occupied Hill's Point, about six miles below, on which was a deserted earthwork, and placed eight field pieces in position to command the barricades in the stream, and the channel, which approaches close to the shore at this point. They were thus enabled to deliver a plunging fire on any vessel attempting to pass. Further up the river Rodman's Point was fortified, and on the same bend of the stream a second battery was placed, thus entirely commanding the channel, which from that place to the town is very narrow and crooked. Gen. Foster, then on a visit to Washington, believed himself strong enough to keep the enemy in check. This he succeeded in doing until the 15th, when he left for Newbern to hasten forward reinforcements and supplies. The passage down the river was exceedingly hazardous. When the boat, the steamer Escort, arrived within the range of the upper battery on Rodman's Point the enemy opened upon her with artillery, and, as she approached the shore, with volley upon volley of musketry, which was continued without intermission.

The channel of the river, for about four miles, between Hill's Point and Rodman's runs close in shore, where the batteries were placed, and the danger was most imminent. As soon as the upper battery on Rodman's Point had been passed the second one took up the fire, and the third, and continued it until the Escort had reached a point within range of the works at Hill's Point. Then the cannonading and musketry were terrible. Not less than eighteen solid shot and shells struck and passed through the steamer, completely riddling her upper works and partially disabling her machinery, while the bullets of the enemy's sharpshooters perforated her joiner work like a sieve.

When opposite the lower battery, on Rodman's Point, the pilot, Mr. Pederick, a native of the State, was killed at his post by one of the rebel sharpshooters. Immediately upon the fall of Pederick, Captain Wall sent for a negro who knew the channel, and compelled him to point out the course of the steamer past the blockade. The boat went on down the stream at a rapid rate, and reached and passed the lower fort and blockade without further loss of life. At Newbern some portion of the force which had been sent to Hilton Head were then arriving on their return. These were sent forward with gunboats, and the enemy compelled to raise the siege.

At Tarboro' the steamboats and one large ironclad in process of construction, a sawmill, a train of cars, one hundred bales of cotton, and large quantities of subsistence and ordnance stores were destroyed. (See ARMY OPERATIONS, page 135).

On October 28th Gen. Foster was relieved from the command of the department, and Gen. Butler assigned to it.

O

OBITUARIES, UNITED STATES.—*Dec. 31, 1862.*—SILL, Brig.-Gen. JOSHUA WOODROW, an officer of the United States army, killed in the battle of Stone river. He was born in Chillicothe, Ohio, Dec. 6th, 1831; received a thorough English and classical education, and was appointed a cadet at West Point in 1849, where he graduated third in his class. In 1854 he received an ordnance appointment, and was stationed at Watervliet arsenal, West Troy. The following year he was recalled as one of the instructors at West Point, and after serving two years in that capacity was ordered to Pittsburg arsenal, and from thence, in 1848, to Vancouver, Washington Territory, to superintend the building of an arsenal there. Finding this impracticable, in consequence of the difficulty existing about Vancouver's Island with the British Government, he returned, and soon after was ordered to Fort Leavenworth. In 1860 he resigned his position in the army, and accepted the professorship of mathematics and civil engineering in the Brooklyn Collegiate and Polytechnic Institute. Upon the outbreak of the present war he resigned his position, and upon offering his services to the Governor of Ohio, was appointed assistant adjutant-general of the State. In August, 1861, he was commissioned colonel of the 23d Ohio volunteers. He joined Gen. Nelson in his Kentucky expedition, and after his return was placed in command of a brigade, receiving the commission of brigadier-general, July 29th, 1862. Subsequently he commanded a division for a time, evincing great courage and skill, and upon the reorganization of the army, under Gen. Rosecrans, he was assigned a brigade in Gen. Sheridan's division, at the head of which he gallantly fought, and fell during the memorable Wednesday of the battle of Stone river.

Dec. 31.—GARESCHÉ, Col. JULIUS P., chief of Maj.-Gen. Rosecrans's staff, was born in Cuba of American parents in 1821. At the age of sixteen he entered West Point, and graduated in 1841. He served in the Mexican war, and during eight years previous to the secession was on duty at Washington as assistant adjutant-general. When the war broke out his patriotic nature sought active service, and he accepted the appointment of chief of staff to Gen. Rosecrans, having previously declined a commission of brigadier-general, preferring to win the honor upon the field of service. From his long experience and thorough acquaintance with military science he was eminently qualified for his duties, and rendered himself at once an invaluable aid to his commander. He was an earnest and devoted Christian, gentle and amiable in character and disposition, and was widely known for his benevolence to the poor, and sympathy for those in affliction and sorrow. He

was one of the founders of the Society of St. Vincent of Paul in Washington. His many virtues, added to his gentlemanly deportment and earnest devotion to his country, won the love of both officers and men, and his untimely death by a cannon ball, which took off his head, while on duty at the side of his commander, was alike a shock to the army and country. A few days after the battle his body was disinterred and taken to Cincinnati, from whence, after appropriate honors, it was forwarded to his family in Washington city.

Dec. 31.—ROBERTS, Col. GEORGE W., killed at the battle of Stone river, was born in Westchester county, Penn., Oct. 2d, 1833; graduated at Yale College in 1857, studied law, and practised his profession in his native county until the spring of 1859, when he removed to Chicago, Ill. The commencement of the war found him enjoying a prosperous business, but his patriotism led him to enter the army, and he began recruiting for the 42d regiment, Illinois volunteers. On the 22d of July he received his commission as major of the regiment. The following September he was elected lieutenant-colonel, and upon the death of Col. Webb, was chosen colonel. With his regiment he took part in the memorable march of Gen. Fremont to Springfield. He distinguished himself in the faithful discharge of his duty at different points, but more especially by his valuable service during a midnight expedition in spiking a number of guns at the siege of Island No. 10. An upper battery of the enemy commanded the river so effectually that no boats could pass. Col. Roberts conceived the idea of spiking the guns, and selecting a dark and stormy night for the occasion, with only forty men in five small boats, he bravely accomplished his purpose. He afterward distinguished himself at the battle of Farmington, Tennessee. At the siege of Corinth he was in the advance, and was one of the foremost in entering the fortification of the enemy. He was in command of the first brigade, first division of the army of the Mississippi, and won much honor during the campaign of 1862. At the battle of Stone river he had the advance of the 20th army corps, and drove the enemy to their breastworks. On the 31st his brigade engaged two divisions of the enemy at once, maintaining their ground until attacked by a third division. At one period of the engagement, observing a Confederate division driving some of our regiments before them, he asked permission of Gen. Sheridan to charge upon the enemy, and galloping before the 42d Illinois, he waved his cap and ordered them to fix bayonets. The men, fired by his bravery, rushed upon the foe with such force that they broke and fled in the wildest confusion. This discomfiture at such

a juncture no doubt had its effect on the final triumph of the day. While gallantly inspiring his men to action he received the fatal bullet which ended his brave career.

Dec. 31.—RAINS, Brig.-Gen. JAMES E., an officer in the Confederate service, killed at the battle of Stone river. He was a native of North Carolina, graduated at West Point in 1827, and was appointed to the 7th infantry. He took part in the Seminole war in Florida, and was brevetted major for gallant and meritorious conduct in an action with the Indians near Fort King, April 28th, 1840, on which occasion he commanded the troops, and was wounded. In 1855 he was with his regiment in Washington Territory, and was appointed brigadier-general of the Washington Territory volunteers. When the war broke out he was a lieutenant-colonel of the 5th infantry, but his sympathies being with the Confederate cause, he resigned his commission, July 31st, 1861, and, according to Gen. Sterling Price's official report of the battle of Wilson's Creek, was acting as brigadier-general of the advance guard of the army which fought the battle, August 10th. He distinguished himself at the battle of Shiloh and Perryville, and at the battle of Stone river, where he lost his life, won much credit by his skill and daring.

Dec. 31.—HANSON, Brig.-Gen. ROGER, an officer in the Confederate service, killed at the battle of Stone river. Gen. Bragg, in his official report of that battle, speaks of him in high terms.

Dec. 31.—SCHAEFFER, J. W., acting brigadier-general of the U. S. volunteer service, killed at the battle of Stone river. He was a native of Pennsylvania, but was appointed to the service from Illinois. In the official report of the battle of Stone river, Gen. Rosecrans mentions his name with honor.

Dec. 31.—TURNER, ROYAL, died in Randolph, Mass., aged 70 years. He graduated at Harvard College in 1813, and soon after engaged in mercantile pursuits. In early life he was a practical surveyor, and assisted in locating the first railroad built in this country, that leading from the stone quarries in Quincy to Neponset river. In 1815 he received a lieutenant's commission in the army, and rapidly passed through all the grades of promotion until he reached the colonelcy in 1823. In 1825 he was honorably discharged. In 1818 he was elected one of the selectmen of the town, and from 1823 to 1828 he was clerk and treasurer. In 1826 he was commissioned justice of the peace, and of the quorum in 1823, continuing in the office until his death. On the incorporation of the Randolph Bank in 1836, he was appointed cashier, and held the office until 1842, when he was elected its president, which position he occupied at the time of his death. He was director in the Bridgewater and Middleborough and Falls River railroads until their union with the Old Colony in one corporation. In all his business relations he was highly respected, not only for his en-

ergy and executive ability, but his strict integrity of character.

Dec. 31.—RUSS, HORACE P., inventor of the Russ pavement, died in Halifax, N. S., aged 42 years. He had been for some time engaged in gold mining in Nova Scotia.

Jan. 1, 1863.—RENSHAW, WILLIAM B., acting commodore of the naval squadron engaged in blockading Galveston, Texas, was killed upon his flagship, the *Westfield*. He was a native of New York, from which State he was appointed to the navy as a midshipman, Dec. 22d, 1831. In 1837, he passed the Examining Board, and received his warrant as a passed midshipman, and was attached to the North Carolina, at the New York Navy Yard. In 1841 he was promoted to a lieutenancy, and in 1861 became commander, and was ordered to the Ordnance Bureau, at Washington, on special service. He was next transferred to the command of the United States steamer *Westfield*, under Admiral Farragut, and was by him assigned to the command of that portion of the squadron which blockaded Galveston. During the recapture of Galveston, the *Westfield* got hopelessly aground, and having a large supply of ammunition and two magazines of powder on board, Commodore Renshaw determined to destroy her rather than let her fall into the hands of the enemy. Having made due arrangements, and secured the safety of his men, he staid behind to light the train before leaving; but a drunken man had, it is said, prematurely lighted the match, and the commodore, together with those in the small boats awaiting him, were involved in the general destruction. He was a faithful officer, and had spent thirty-one years in the service of his country.

Jan. 1.—WAINWRIGHT, Commander JONATHAN M., an officer in the U. S. navy, was killed upon the *Harriet Lane* during the attack upon Galveston, Texas. He was a native of New York, but a citizen of Massachusetts, from which State he was appointed to the United States navy as a midshipman, June 13th, 1837. He passed the Examining Board, June, 1843, and received his warrant as a passed midshipman on that date. He was then engaged at the naval rendezvous in New York. On the 17th of September, 1850, he was promoted to a lieutenancy, and upon the commencement of the war was advanced to be a commander, and ordered to the *Harriet Lane*. He was a son of the late Bishop Wainwright, and had been twenty-five years in the United States service.

Jan. 2.—LEA, Lieut. EDWARD, of the U. S. navy, was killed upon the *Harriet Lane* in the engagement before Galveston, Texas. He was a native of Maryland, but a resident of Tennessee, from which State he was appointed to the Naval Academy in 1851. After graduating he received an appointment to the Home squadron, and subsequently to the East India squadron. At the commencement of the war, being himself truly Union, notwithstanding his ties of relationship in the South, he was assigned to the

Harriet Lane, then fitting out to join Admiral Porter's mortar flotilla in the bombardment of Forts Jackson and St. Philip.

Jan. 3.—GWIN, Commander WILLIAM, of the United States navy, died in the hospital of his vessel, from wounds received in the action against the batteries on Haines's Bluff. He was born in Columbus, Indiana, in 1831, and entered the U. S. naval service as a midshipman in 1847, in which capacity he made one cruise off the coast of Brazil in the frigate Brandywine, flagship of the squadron, and off the coast of Africa. In June, 1853, he passed a satisfactory examination at the Naval Academy, and, with the rank of passed midshipman, was ordered to the Bainbridge, in which vessel he cruised off the coast of Brazil until 1856. On the 15th of September he was promoted to a lieutenancy. He was next ordered to the Pacific squadron, and, after a brief visit home in 1859, was assigned to the Mediterranean squadron. On the breaking out of the war he was ordered home, and assigned to the Cambridge, on blockading duty on the Atlantic coast. From this he was detached, January, 1862, and assigned to the command of the gunboat Tyler, of the Western flotilla, in which vessel he participated in the battles of Fort Henry and Fort Donelson. He also took part in the battle of Shiloh, at the time when the gunboats fired at night among the enemy, his vessel discharging one hundred and eighty-eight shells. On the 16th of July, 1862, he was made a lieutenant-commander under the late act of Congress in relation to officers in the navy. He distinguished himself in the expedition up the Yazoo river in company with the Carondelet, to meet the famous Confederate ram Arkansas; and his vessel, though sadly disabled, did not cease firing until she had passed through the entire squadron. After the explosion on the Mound City at St. Charles, by which her commander, Capt. Kelly, was so badly scalded, Lieutenant-Commander Gwin took the command of that vessel, which he held until assigned to the Benton, the largest and most powerful vessel of the river fleet. While in charge of this gunboat he participated in the attack upon Haines's Bluff, during which he was mortally wounded.

Jan. 4.—BRANCH, Hon. JOHN, ex-governor of North Carolina, died at Edgefield, N. C., in the 86th year of his age. He was a State senator from 1811 to 1817, also in 1822, and again in 1834. He was elected governor in 1817, and from 1822 to 1829 was a United States senator. In 1829 he was appointed Secretary of the Navy by President Jackson. In 1835 he was a member of the North Carolina Constitutional Convention, and in 1843 was appointed Governor of Florida. Since then he has lived in private life.

Jan. 4.—KENDALL, Hon. BENJAMIN FRANKLIN, was assassinated at Olympia, Washington Territory. He was born in Bethel, Oxford county, Maine, about 1830, and by his own exertions procured a collegiate education, gradu-

ating at Bowdoin College in 1852. After his graduation he was for a time a clerk in one of the departments at Washington, and afterward joined the expedition, sent out under the late Gen. Isaac I. Stevens, to explore a route for the Pacific railroad, as astronomer; and having terminated his labors in connection with that expedition, settled as a lawyer in Olympia, Washington Territory, where he speedily became the leading lawyer of the territory, was secretary of the Territorial Legislature, and largely engaged in lumbering and navigation. At the commencement of the war he came to the East, and finding that it was necessary that Gen. Scott and the War Department should have a more thorough knowledge of the aim and plans of the Southern leaders, and of the real condition of the South, he volunteered to go on an exploring expedition through the Southern States. His offer was accepted, and he made a tour of four months, and, returning, reported to Gen. Scott a very minute and detailed account of the condition, resources, and war material of each of the Southern States, and the plans and purposes of the leaders. For this he received the most hearty thanks of Gen. Scott and the War Department. He was, soon after his return, appointed Superintendent of Indian Affairs for Washington Territory, but having been removed, in the winter of 1862, through the influence of the delegate from the territory, returned at once to the practice of his profession. He was assassinated by a man named Howe, whose father had been implicated in the burning of some valuable buildings, and had been exposed by Mr. Kendall in the columns of a journal he edited.

Jan. 7.—WHITTLESEY, Hon. ELISHA, died in Washington, D. C., in the 80th year of his age. He was born in Connecticut, but in early manhood removed to Ohio. In the war of 1812 he was aide-de-camp to Gen. Wadsworth; was a prosecuting attorney for sixteen years, and served in the State Legislature in 1820 and 1821. He served seven terms as a representative in Congress. In 1841 he was appointed by President Harrison, Auditor of the Post Office Department and in 1849 was appointed by President Taylor, First Comptroller of the Treasury, which position he relinquished in 1857, but was reappointed by President Lincoln in 1861. His whole public career was marked by an unswerving integrity and untiring devotion to duty.

Jan. —.—CRAWFORD, RICHARD R., Judge of the Levy Court for Washington county, died at Georgetown, aged 77 years. He was born in the District of Columbia, and for many years was in public office.

Jan. —.—KIRK, Brig.-Gen. EDWARD N., an officer of volunteers in the U. S. service, died from wounds received at the battle of Stone river. He was born in Ohio, but subsequently removed to Sterling, Whiteside county, Illinois. In the autumn of 1861 he was instrumental in raising and organizing the 34th

Illinois volunteers, of which he was chosen colonel. At the battle of Shiloh he acted as brigadier-general, and was also engaged in this capacity at the siege of Corinth. At the battle of Stone river he commanded one of the brigades in Johnson's division of McCook's corps, and was mortally wounded while bravely withstanding the enemy during that fierce encounter.

Jan. 10.—BEECHER, REV. LYMAN. (*See BEECHER.*)

Jan. 11.—MCDONALD, Brig.-Gen. EMMETT, an officer in the Confederate army, was killed at the battle of Hartsville, Mo. He swore that he would neither cut his hair nor shave until the Southern Confederacy was recognized.

Jan. 12.—RENWICK, JAMES, LL.D., died in New York, in his 71st year. He was born in the city of New York, in 1792, and graduated at Columbia College, in 1809. From 1820 to 1854, he filled the Chair of Chemistry and Physics in that institution. In 1838, he was appointed one of the Commissioners for Exploring the Northeastern Boundary between the United States and New Brunswick, and the reports of that commission led to the Ashburton treaty in 1842. Prof. Renwick was passionately fond of mechanics, and of all the applications of science to mechanical improvements. He was also a chaste and vigorous writer, and contributed largely to the literature of the country, not only in his own chosen walk of scientific pursuit, but in political and belles-lettres essays. He was a frequent and valued contributor to the first "New York Review," where he was the associate of Bryant, and other eminent names in literature, and after the establishment of the "Whig Review," its pages were often enriched by his graceful articles. His published works were biographies of Robert Fulton, David Rittenhouse, and Benjamin Thompson (Count Rumford), in "Sparks's Series of American Biographies;" "Outlines of Natural Philosophy," published in 1832, the earliest extended treatise on this subject published in the United States; "A Memoir of De Witt Clinton," published in 1834; "Treatise on the Steam Engine," and another on "The Practical Applications of the Principles of Mechanics," both published in 1840; "Outlines of Geology," and other text books. Prof. Renwick was of Scotch origin, his mother having been a friend and pet of the poet Burns, who addressed to her some of his sweetest poems.

Jan. 14.—BUCHANAN, Lieut.-Com. THOMAS MCKEAN, of the U. S. navy, was killed at Bayou Teche, La. He was a native and citizen of Pennsylvania, from which State he was appointed to the Naval Academy as a cadet in October, 1851. He graduated in 1855, and was attached to the sloop Constellation, then stationed in the Mediterranean in the squadron commanded by Commodore Breese. In 1858 he was promoted to be master, and ordered to the sloop St. Mary's in the Pacific squadron. In 1860 he was made a lieutenant, and attached to the steam sloop Mis-

issippi, and, under the new act of Congress, became lieutenant-commander in 1861. He was next in command of the New London, the "black devil," of the Mississippi Sound, and subsequently of the gunboat Calhoun, on which he lost his life.

Jan. 14.—DILL, REV. JAMES HORTON, a Congregational clergyman, died on board of a vessel on his way from Louisville to Nashville, whither he was going to join his regiment, of which he was chaplain. He was born in Plymouth, Mass., Jan. 1st, 1821, studied theology in New Haven, Conn., and was ordained pastor of the First Congregational church in Winchester, Conn., Aug. 26th, 1846. In Feb. 1852, he was installed pastor of the First Congregational church in Spencerport, New York. In 1859 he removed to Chicago, and became the pastor of the South Congregational church. His devotion to his country led him to accept the chaplaincy of the 38th regiment of Illinois volunteers in the autumn of 1862. His death was hastened by his unsparing activity and devotion to the cause he had espoused.

Jan. 19.—WELLES, MARTIN, died at Martin, Ottawa county, Ohio, aged 76 years. He was born in Wethersfield, Conn., graduated at Yale College in the class of 1806, studied law in Farmington, but subsequently was admitted to the bar in the State of New York, and practised in Newburg, and afterward in New York city. His health failing, he returned to his native place, and refrained for a time from professional activity. During this period he interested himself in planning and superintending the Connecticut State Prison, in the establishing of which at Wethersfield he was the chief instrument. He was a member of the House of Representatives from 1824 to 1827 inclusive, and also in 1831 and 1832, the last two years being speaker of that body. In 1837 he was elected a member of the State Senate, and was reelected the two following years. While a senator he was a member of the corporation of Yale College. He was also an associate judge on the bench of the Hartford County Court, and during the last fifteen years of his life was successfully engaged in the practice of his profession in Hartford.

Jan. 21.—THORBURN, GRANT, died in the city of New Haven, in the 90th year of his age. He was born in Dalkeith, near Edinburgh, Scotland, of humble, but worthy parentage. In his early childhood he was delicate and sickly, but later he recovered his vigor, and became an expert in his father's business of nail making, and was said to have manufactured with his own hands, in one day, three thousand two hundred and twenty-two nails between the hours of six o'clock in the morning and nine o'clock in the evening. Though his early advantages were exceedingly limited, his mind was strong and vigorous, and in 1792 he became involved in some political movements concerning parliamentary reform, which caused him, in company with a number of his associates, to be summoned,

by an order from Edinburgh, to appear before the Lords upon a charge of treason. Being released upon bail, he subsequently concluded to try his fortune in America, and accordingly took passage for this country, arriving in New York on the 16th of June, 1794, and with but twenty shillings in his pocket. Here he entered into his former employment as a sailor, and soon after married. In 1801 he went into the grocery business for a time, and afterward engaged in the seed business at Newark, in which he was unsuccessful; but nothing daunted, he started anew, and on a more extensive scale, and in time amassed a comfortable fortune. After retiring from business he went to reside in Astoria, and subsequently removed to New Haven, Conn. He married his third wife when eighty years of age, the lady herself being about forty. He was, during his later years, a frequent contributor to the newspapers of the day, over the signature of "Laurie Todd," many of his articles being reminiscences of New York at the commencement of the present century, and possessing great interest from their quaintness and fidelity of description. The signature, "Laurie Todd," was the title of a work, published many years ago, by the novelist Galt, in which the adventures of the hero were mainly drawn from incidents in Thorburn's life. He was a liberal, genial, kind-hearted man. During the epidemics of yellow fever in New York in 1798, he and his wife did not leave the city at all, but devoted themselves to the care of those who were stricken down with the pestilence, with the utmost assiduity and tenderness. Through life his counsel and purse were at the service of those who were suffering from want; and he had bestowed in charity a much greater sum than he possessed at his death.

Jan. 23.—COIT, JOHN TOWNSEND, died in Albion, N. Y., aged 38 years. He graduated at Yale College, in the class of 1844, studied theology at Auburn, N. Y.; also at Andover, Mass., and subsequently spent two years in Halle, Germany, under the instruction of Prof. Tholuck. He afterward passed some time in Göttingen, and then made an extended tour in Europe. After his return to this country he became the settled pastor of the Presbyterian church at Albion, and at the time of his death was pastor of St. Peter's church, Rochester.

Jan. 23.—HALL, BAYNARD R., D. D., an American clergyman and author, died in Brooklyn, N. Y. He was born in Philadelphia in 1798, and was son of Dr. John Hall, a distinguished surgeon, who died when the subject of our sketch was but four years of age. By his father's will he was heir to a large fortune, but, owing to mismanagement, he never came into the possession of any great portion of it. Great attention was paid to his early education with reference to his becoming a lawyer, but upon his conversion his attention was turned toward the ministry. After passing the greater part of his college course at Princeton, he removed to Union College, where he graduated

with high honor. His theological studies were pursued at Princeton Theological Seminary, after leaving which, he commenced his labors as a missionary in the West. While there, he was pastor of a church in Bloomington, Indiana, and was also the president of the college in the same place. Leaving the West, he became the pastor of a church in Bedford, Pa., and was also the principal of a flourishing academy in that place for eight years. He was successively the principal of academic institutions in Bordentown, Trenton, N. J., and Poughkeepsie and Newburg, N. Y. In 1852 or thereabout, he removed to Brooklyn, and was for a time principal of the Park Institute. The last few years of his life were spent in preaching the gospel to the poor. He was the author of a Latin Grammar published about 1828; "The New Purchase, or Seven Years in the West," and several later works of much merit. He was a thorough scholar, a vigorous thinker, and as a writer, was said to be a "master of all styles."

Jan. 24.—STEWART, Lieut.-Col. WARREN, a cavalry officer in the U. S. service, was killed opposite Vicksburg. He first entered the United States service during the present war as captain of an independent cavalry company from Illinois, and was attached to Gen. McClelland's brigade. On the 2d of February, 1862, he was appointed acting adjutant-aid on Gen. McClelland's staff, with the rank of captain. He took an active part in the memorable battle of Fort Donelson. The several companies of cavalry connected with McClelland's brigade were next consolidated, under the title of Stewart's Independent Battalion of Cavalry, the command of which devolved upon him, with the rank of major, dating from February 1st, 1862. He was wounded at the battle of Shiloh, and was especially mentioned in his general's official report for his gallantry on that occasion. He also participated in the siege of Corinth, and subsequently was attached to the division stationed along the Memphis and Charleston railroad. On the promotion of Gen. McClelland he was made lieutenant-colonel. He was engaged in destroying the ferry boats opposite Vicksburg, when he was killed by a shot from the enemy.

Jan. 25.—MICKLE, ANDREW H., ex-mayor of New York city, died at Flushing, aged 57 years. He was a prominent merchant, and for a number of years was engaged in the tobacco business, by which he amassed a large fortune. In 1846 he was chosen mayor of New York, and was asked to accept the nomination again in 1858, but declined.

Jan. 26.—HOOKER, JOHN WORTHINGTON, M.D., died in New Haven. He was born in Norwich, Conn., July 14th, 1833, graduated in Yale College, in the class of 1854, and in 1857 from the Medical School connected with the college. For some time after the completion of his studies he was on the surgical staff in the New York City Hospital, and subsequently continued

his professional studies in Europe. In 1860, he was appointed professor of hygiene and physical education in Amherst College, which position he was compelled by ill health to resign.

Jan. 27.—ABERT, Col. JOHN J., late chief of the U. S. corps of engineers, died at Washington, D. C., aged about 73 years. He entered as a cadet of the Military Academy, in 1808, only six years after its first establishment by law. Leaving the academy in 1811, he was from then until November, 1814, employed in the War Office. While thus engaged, he volunteered as a private soldier for the defence of the capital, and his services on that occasion were acknowledged by conferring upon him a land warrant under the existing laws. He was appointed topographical engineer, with the rank of major, November 22d, 1814. At that time there was no organized corps of those officers, but they formed a part of the general staff, and served with generals in the field. After the close of the war they were employed in surveys of the seacoast and inland frontiers, reporting to the chief of engineers, and the results of their labors were collected in a topographical bureau, established in the War Department, May 5th, 1820, as a part of the engineer department, under the charge of Major Roberdeau. On the reorganization of the army, in 1816, Major Abert was retained. In 1824, he was brevetted lieutenant-colonel for ten years' faithful service in one grade; and at the death of Col. Roberdeau, February 12th, 1829, he was appointed to the charge of the Topographical Bureau. As the duties of his bureau increased in magnitude and importance, Col. Abert exerted himself to cause it to be made a distinct branch of the War Department, which he effected June 22d, 1821. At this time his corps consisted of six majors and four captains by brevet, and six civil engineers; besides which some twenty subalterns of the line of the army were detailed on topographical duty under his orders. At length, by act of Congress, approved July 7th, 1838, the present corps of topographical engineers was organized, and created one of the staff corps of the army, with the officer, to whose fostering care and judicious management it mainly owed its existence, for its colonel and chief. Col. Abert was, in fact, at the head of his corps for upward of thirty-two years, until he was honorably discharged from active duty the 11th of September, 1861, having become incapacitated by long and faithful service from further attendance at his office. As a citizen and a man, Col. Abert was remarkable for the steadiness of his friendship, for his candor and unostentatious hospitality. Equally unostentatious, but no less sincere, was the simple piety which supported his declining years, and left behind an example which the proudest soldier may not be ashamed to follow.

Jan. 27.—ROBINSON, EDWARD, D.D., LL.D. (See ROBINSON.)

Jan. 29.—TEBBETS, Rev. THEODORE, died in New York city, aged 81 years. He was born in Parsonsfield, Me., graduated at Harvard College in 1851, after which he spent several months in the Divinity School at Cambridge. From March, 1852, to July, 1853, he was teacher of the Ancient Languages in Exeter Academy. In 1855 he entered the ministry, but after preaching two Sabbaths, was attacked with typhoid fever, from which he did not fully recover for a year. Pulmonary symptoms soon made their appearance, and he was obliged to resort for a time to a southern climate; recovering in a measure, he resumed preaching, but was again prostrated, and obliged to quit the ministry altogether. His printed works were: several articles in the "Monthly Religious Magazine;" also a sermon in the same magazine for May, 1858, on "The Revival;" "A Memoir of the late Judge Tebbets of New Hampshire;" and "A Memoir of William Gibbons."

Jan. —.—DUDLEY, Mrs. BLANDINA, died at her residence in Albany, aged 80 years. She was the widow of the Hon. Charles E. Dudley, and daughter of Rutgers Bleecker, one of the most eminent of the Dutch families of that city. She was a lady of high social qualities and truly womanly virtues. In her later years she has been profuse in the expenditure of her great wealth upon religious, scientific, and benevolent objects. She contributed over \$100,000 toward the founding of the Dudley Observatory.

Jan. 31.—SIBLEY, Major GEORGE CHAMPLAIN, an officer in the U. S. regular service, died at his country seat in Elma, St. Charles county, Missouri, aged nearly eighty-one years. He was born in Great Barrington, Berkshire county, Mass., and was a son of Dr. John Sibley, a surgeon in the Revolutionary war, and grandson, on the maternal side, of Dr. Samuel Hopkins, of Newport, Rhode Island. His childhood and youth were spent in North Carolina, from whence he was appointed by President Jefferson to an office in the Indian Department, and sent to St. Louis, and subsequently was sent among the Indians as agent and factor. In this capacity he went out with a hundred Osage warriors, and explored the Grand Saline and Salt Mountain, a report of which expedition was published. Soon after he retired from the Indian Department he was appointed one of three commissioners to survey and mark out a road from Missouri to New Mexico—an undertaking requiring some treaties with the Indians, which were managed with his usual judgment and tact. He was an ardent friend of African colonization and of the slave, and the day before his death wrote and forwarded an article on slavery to the "Philadelphia Presbyterian." He was a friend and advocate of the Bible cause, having been for many years, and until his death, president of the St. Charles County Bible Society of Missouri. He was one of the trustees of the "Lindenwood College," and donated the tract of land upon which it is erected, amount-

ing to one hundred and twenty acres. He was a warm Union man, and never hesitated to announce his principles.

Feb. 6.—**BRAINARD, DYAR THROOP, M. D.**, died in New London, Conn., aged 73 years. He graduated at Yale College in 1810, studied medicine, and entered upon the practice of his profession in New London, his native place, where he spent most of his life. He was highly respected for his professional skill, and was also eminent as a botanist and chemist. He was a brother of the well-known poet, John G. C. Brainard.

Feb. 6.—**HALE, Hon. NATHAN, LL.D.**, senior editor of the "Boston Advertiser," died in Brookline, Mass. He was born in West Hampton, Mass., in 1784, and was a nephew of the famous patriot spy, after whom he was named. He graduated, in 1804, at Williams College, studied law in Troy, and became editor of the "Boston Advertiser," the first paper published in Boston, in 1814. He was one of the club which founded the "North American Review," also the "Christian Examiner." In 1825 he prepared from the original authorities a map of New England, which still possesses a standard character. He was the first president of the Boston and Worcester railway, and was also foremost among those by whose exertions the Cochituate water was introduced into Boston. He served in the Legislature and two Constitutional Conventions, and was a member of the American Academy of Arts and Sciences; also of the Massachusetts Historical Society.

Feb. 7.—**WELLS, Mrs. REBECCA**, died in Varick street, New York city, at the advanced age of 103 years. She was born in Warren street, and had never been out of the city but once during her life. She remembered distinctly the principal incidents which transpired during the Revolutionary war, and took pleasure in referring to Washington, Lafayette, and other distinguished officers who figured in that memorable struggle. Up to within a day or two previous to her death she did all her own housework, and attended divine service regularly upon the Sabbath.

Feb. —.—**CUMMING, Col. WILLIAM**, an officer of the United States army, died at Augusta, Georgia, in his 76th year. He served as colonel during the war with Great Britain, in 1812-'14, and was offered the position of major-general by President Polk, but did not accept it.

Feb. 10.—**BURLEIGH, RINALDO**, died in Plainfield, Conn., aged 89 years. Having lost an arm while a boy, he determined to obtain a liberal education, and by dint of difficult and persevering exertions, succeeded, almost unaided, in fitting himself to enter college. He graduated at Yale College in the class of 1803, and choosing teaching as his profession, acted successively as preceptor of the academies in Colchester, Woodstock, and Plainfield, Conn., where he was widely known as a popular and successful teacher. He was among the foremost to advocate the abolition of slavery, and to

help forward other social reforms. For the last sixteen years of his life he was afflicted with total blindness, arising, it was supposed, from excessive study. Four of his sons have attained considerable distinction as writers and orators, viz.: Charles C., William H., George S., and Lucien Burleigh.

Feb. 10.—**CUTLER, BENJAMIN C., D.D.** (*See CUTLER, B. C.*)

Feb. 10.—**EMBURY, Mrs. EMMA C.**, an American authoress, died in Brooklyn, N. Y. She was a daughter of Dr. James R. Manley, of New York, and was married to Mr. Daniel Embury in 1828. In the same year she published "Guido, and other Poems." She was also the author of "Glimpses of Home Life," and "Pictures of Early Life." In 1845 she prepared an illustrated gift book, entitled "Nature's Gems, or American Wild Flowers," and the following year a collection of poems, called "Love's Token." Her last work was the "Waldorf Family, or Grandfather's Legend," published in 1848, partly a translation and partly original. For some time previous to her death her health was very feeble.

Feb. 10.—**LONGWORTH, NICHOLAS.** (*See LONGWORTH, N.*)

Feb. 12.—**CAMMANN, GEORGE P., M. D.**, died in New York city. He was one of the early supporters of the Demilt Dispensary, and by his unwearied assiduity and eminent skill, largely contributed to its success and the accomplishment of its benevolent aims. He was a man of eminent worth and strong benevolent impulses.

Feb. 19.—**BALDWIN, ROGER SHERMAN, LL.D.** (*See BALDWIN.*)

Feb. 19.—**WOODHULL, Commander MAXWELL**, of the United States navy, was killed at Fort Marshall, Baltimore, aged about fifty years. He was visiting the forts around the city, in company with Gen. Butler and Gen. Schenck and staff, in whose honor a salute was fired; the gunner, supposing the whole party had passed out of range of the gun, fired a 32-pounder just as a fragment of the party came up; unfortunately Commander Woodhull received the whole charge, which caused his death in a few moments.

Feb. 22.—**GILBERT, EDWARD SMITH**, a lieutenant-colonel in the U. S. volunteer service, died of consumption at Rochester, N. Y., aged 31 years. He was born in Livingston county, N. Y., graduated at Amherst College in 1855, and became professor of mathematics in the Collegiate Institute at Rochester, N. Y. Soon after the breaking out of the war he entered the military service as second lieutenant in the 13th regiment, N. Y. volunteers. After the first battle of Bull Run he was promoted to a first lieutenancy, and a few months later to a captaincy, and transferred to the 25th regiment. During the Peninsular campaign he rose to the rank of major. In one of the "seven days' battles" he was taken prisoner, and remained in Richmond until August. On rejoin-

ing his regiment he was promoted to the rank of lieutenant-colonel. His death occurred while at home on a furlough.

Feb. 24.—TAYLOR, Miss EMMA, an actress, died in New York city. She was a great favorite in Philadelphia, but removed to New York about a year and a half since. She made her *début* here at Niblo's Garden as the Colleen Rhoad in Boucicault's "Colleen Bawn," and was afterward engaged at Laura Keane's theatre.

Feb. 25.—FOSTER, Hon. WILLIAM, died in Boston, aged 91 years. He was born in Boston, and in early life went to Europe, where he spent seventeen years in France and Spain. When he returned to Boston he had nearly forgotten the English language. He remained at home but a few months, when he returned to France, and was there through all the bloody revolution of 1790 to 1793. He was at one time the president of a Jacobin club. After his final return home he was a prominent politician in the democratic party.

Feb. 26.—TOMPKINS, Col. DANIEL D., an officer of the U. S. volunteers, died in Brooklyn, N. Y., aged 64 years. He entered the Military Academy at West Point when only fifteen years of age, and graduated in 1820 as third lieutenant in the ordnance corps. In 1821 the ordnance department was merged into the artillery, when he became second lieutenant; and in 1825 he was made first lieutenant and commissary of subsistence. In 1835 he was promoted to a captaincy, and for gallant and meritorious conduct in the battle of San Felasco, was brevetted major. In 1838 he was transferred to the quartermaster's department, and was promoted to the position of major in 1842. During the Mexican war he was intrusted with very important duties in that department, and was brevetted lieutenant-colonel for meritorious conduct. In 1856 he was promoted to a colonelcy, and in 1858 was placed in charge of the department of New York, with the rank of assistant quartermaster-general, which position he occupied until a short time before his death.

Feb. 26.—WING, M. T. C., D.D., died at Gambier, Ohio.

Feb. 28.—TISDALE, Rev. JAMES, died at Tonica, Illinois. He was born in West Taunton, Mass., Nov. 7th, 1799; graduated at Brown University in 1821, and spent the two following years as principal of the Academy of Darlington Court House, South Carolina. While there he was converted by reading the sermons of Dr. Emmons, and, upon his return north, commenced the study of theology under Rev. A. Cobb, of West Taunton. He was licensed to preach in 1825; labored four years as a missionary, and in 1830 was ordained, and settled as pastor over the churches in Guildhall and Granby, Vermont. He subsequently preached in Gilsum, N. H., and at Shutesbury, Mass. In 1857 he removed to Illinois, and became the pastor of the Free Congregational church at Jamaica, and in 1859 was settled in Lowell, of

the same State. He attended and labored in the revivals conducted by Rev. Asahel Nettleton, D.D., who labored much in New England and other parts of the country. He was deeply interested in the cause of education and loved the sciences; was very decidedly anti-slavery in his sentiments. His death was caused by a chronic disease of the liver.

Feb. —HARLAN, Hon. JAMES, died at Louisville, Ky., aged 64 years. He was a representative in Congress for several years, and was distinguished for his integrity and zeal in the public service. After retiring from Congress, he was, until his death, United States district attorney for Kentucky.

Feb. —ELLIOT, Hon. WILLIAM, died in South Carolina, aged 74 years. He was born in Beaufort, S. C., entered Harvard College at the age of eighteen, and took a high rank of scholarship in his class; his health failing him, he was obliged to return home before completing his studies, but his degree was conferred upon him in 1810, the year after his class graduated. During the nullification crisis in South Carolina, in 1832, he held the office of senator in the State Legislature, but resigned upon being instructed by his constituents to vote to nullify the tariff law. He afterward participated less frequently in public affairs, his letters against secession, signed "Agricola," and published in 1851, being among his latest expressions of opinion upon political subjects. He contributed largely to the periodical press of the South. His published works consisted of an "Address before the St. Paul's Agricultural Society" (Charleston, 1850), and "Carolina Sports by Land and Water" (1856). He was also the author of "Fiesco," a tragedy printed for the author in 1850, and of a number of poems of much merit.

March 3.—MAGINNIS, JOHN, died in New Orleans, La., aged 49 years. He was born in Dromore, County Londonderry, Ireland. He was for many years a resident of New Orleans, and connected with the press. From 1843 to 1845 he was one of the editors of the "Picayune," and subsequently, until 1849, was connected with the "Delta." During the Mexican war, being then the business manager of that paper, he contributed greatly to its success. On the 18th of November, 1849, almost unassisted, he commenced the publication of the "True Delta," and, after years of hard struggle, succeeded in making it one of the most popular, profitable, and influential journals in the city.

March 8.—GRIMKE, Hon. FREDERICK, died in Chillicothe, Ohio. He was born at Charleston, S. C., Sept. 1st, 1791, graduated at Yale College in 1810, studied law, and removed to Ohio, where for several years he was Presiding Judge of the Court of Common Pleas in one of the circuits of that State. In 1836, without any solicitation on his part, he was elected a judge of the Supreme Court, which post he held for the next seven years, discharging his duties with ability and inflexible integrity. He pub-

lished a work entitled "Considerations upon the Nature and Tendency of Free Institutions" (Cincinnati, 1848), and "An Essay on Ancient and Modern Literature." He left a fund to his executor to provide for the publication of a collection of his various writings in two volumes octavo.

March 8.—FLAGG, HENRY COLLINS, died in New Haven, Conn. He was born in the parish of St. Thomas, near Charles, S. C., January 5th, 1792; graduated at Yale College in 1811; studied law, and commenced the practice of his profession in New Haven. He took an active part in the political movements opposed to the Federalist party in Connecticut, both as a public speaker and as an editor of the "Connecticut Herald," which he had purchased. He was also clerk of the New Haven County Court. In 1824 he returned to South Carolina, where he practised law till 1833; he then again took up his residence in New Haven, in order to educate his children, and resumed his practice there until 1842, when he retired. From 1834 to 1839 he held the office of mayor. His attachment to his native State was strong, but his devotion to the Union was stronger, and, like his friend, Hon. J. L. Petigru, with whom, side by side, he withstood the nullifiers in 1832, he was true to the last.

March 9.—FANNING, Prof. JAMES, principal of the Washington Collegiate Institute, New York, died in New York city. He was an eminently successful teacher, a wise counsellor, and consistent Christian.

March 9.—PETIGRU, Hon. JAMES L. (See PETIGRU.)

March 12.—FISHER, HENRY N., M.D., died in Washington, aged 29 years. After the disasters of the peninsular campaign he volunteered as physician and surgeon, to minister to the necessities of the sick and wounded soldiers, and made several trips between Harrison's Landing and New York on one of the transports. His faithfulness and efficiency recommending him to those in authority, he received an appointment as surgeon in the army, and for several months previous to his death had charge of Eckington Hospital, in the suburbs of Washington. His devotion and untiring energy in behalf of the suffering under his care, contributed to bring on the fever which cut him off in the dawn of manhood.

March —.—BARNWELL, Rev. WM. HAZZARD WIGG, died in Germantown, Penn., aged 56 years. He was born in Beaufort, S. C., graduated at Harvard College in 1824; studied law in Litchfield, Conn., and South Carolina, and was admitted to the bar at Coosawhatchie in 1827. In 1831 he experienced a change of religious views, united himself with the Episcopal Church, and began the study of divinity. In 1834 he was ordained by Bishop Bowen, rector of the Pendleton church in South Carolina, where he remained six months. He was then called to Charleston, and was instituted rector of St. Peter's church, which was built for him, and

where he continued twenty years. He afterward resided some years in Philadelphia, and in 1857 became insane, and was removed to Germantown, where he died.

March 14.—NOELL, Hon. JOHN W., a member of Congress from Missouri, died at Washington, D. C., aged about 50 years. He was a native of Virginia, but at an early age removed to Missouri. Having studied law, and obtained license to practise his profession, he soon won a prominent position in his section of the State, and was repeatedly elected a member of the State Legislature. In the presidential campaign of 1860, he became an earnest advocate of the claims of Judge Douglas, and contributed largely of his influence toward the success of that ticket. He was a member of the Thirty-sixth and Thirty-seventh Congresses, and was reelected to the Thirty-eighth. His death was caused by an abscess in the head, and his agonies during the progress of the disease were of a most excruciating nature.

March 15.—BAIRD, ROBERT, D.D. (See BAIRD, R., D.D.).

March 19.—HOOKER, CHARLES, M.D., a professor in the medical department of Yale College, died at New Haven. He was born in Berlin, Conn., March 12th, 1799, and was a descendant of Thomas Hooker, the founder and first minister of Hartford, Conn. He graduated from Yale College in 1820, and pursued his studies in New Haven, taking his diploma in 1823, and immediately commenced the practice of his profession in that city, which he followed with constancy and success for forty years. In 1838 he was appointed professor of anatomy and physiology in Yale College, and continued to discharge the duties of that chair until his death, acting also during the whole period as dean of the medical faculty. He was also active in all public matters relating to his profession, being an efficient member of the State Medical Society, one of the founders and directors of the Connecticut State Hospital, and several times a delegate to the National Medical Association. He contributed to the leading medical journals numerous essays and narratives of cases, many of which were of great interest. Dr. Hooker was not a man of brilliant genius, but was remarkable for a clear head, sound judgment, and most indefatigable industry.

March 21.—MURRAY, SOLOMON, a colored man, died at Philadelphia, aged 117 years.

March 21.—CARLISLE, GEORGE, an old and prominent citizen of Cincinnati, died in that city of typhoid fever. He was president of the Lafayette Bank, and vice-president of the Cincinnati, Hamilton and Dayton railroad.

March —.—KELLY, Acting Master ROBERT L., of the U. S. navy, was killed during the attack upon Port Hudson. He was a native of the State of Rhode Island. During the early part of the war he performed important services in the North Atlantic squadron, after which he was transferred to the Western Gulf blockad-

ing squadron, where he was in active service on board the United States sloop Mississippi for more than a year. He held an important post as an officer of that ship, and in her last engagement fought his division nobly and courageously amid the shower of shot and shell until he fell lifeless upon the deck.

March 21.—SUMNER, Maj.-Gen. E. V. (*See SUMNER, E. V.*)

March 22.—HAWES, Hon. ROBERT T., ex-comptroller of New York city, died at his residence there. He was a man of strict integrity and great firmness of character. During the last ten years of his life he gave much time and attention to local politics, at first as a whig, and subsequently as a republican. He was a member of the Board of Aldermen for four years, and was never known to be absent from their sessions. While acting in that capacity, his enlarged mercantile experience, sound financial judgment, and honorable integrity, proved of the highest value to his constituency and the city at large. He was elected comptroller in 1860, and by his inflexible honesty and business ability succeeded in preventing the consummation of many schemes of fraud.

March 25.—WILCOX, PHINEAS BACON, died in Columbus, Ohio, aged 67 years; graduated at Yale College in 1821, studied law, and was engaged in successful practice in Columbus nearly forty years. He was the author of several important professional volumes, among them the tenth volume of the "Ohio Reports" (Columbus, 1840), and several volumes of condensed and digested "Ohio Reports." He was the author also of a brief essay entitled "A Few Thoughts by a Member of the Bar" (Columbus, 1836).

March 28.—CARLETON, Hon. HENRY, Judge of the Supreme Court of Louisiana, died in Philadelphia in his 80th year. He was born in Virginia; graduated from Yale College, Conn., in 1806; removed to Mississippi, and finally established himself in New Orleans in 1814. He served as a lieutenant of infantry under Gen. Jackson, in the campaign which terminated Jan. 8th, 1815; he then actively engaged in the profession of law, and soon after, in connection with Mr. L. Moreau, he began the translation of those portions of *Las Siete Partidas*, a celebrated Spanish code of laws, which were observed in Louisiana. In 1832 he was appointed U. S. district attorney for the Eastern District of Louisiana, and was subsequently appointed a judge of the Supreme Court of the same State, which post he resigned on account of ill health in 1839. He visited Europe several times, and travelled extensively through this country, finally locating himself in Philadelphia. He devoted much attention to biblical, theological, and metaphysical studies, and published in 1857 a volume on "Liberty and Necessity." A few days before his death he read "An Essay on the Will" before the American Philosophical Society. Notwithstanding his early life in the South, and the exposure of his proper-

ty to confiscation by the Confederates, he adhered steadily to the Constitution and the Union.

March 28.—COOPER, Brig.-Gen. JAMES, an officer of the U. S. volunteers, died at Columbus, Ohio, aged about 60 years. He was a native of Frederick county, Maryland, but removed many years ago to Pennsylvania, where he became a prominent whig politician, and was known as one of the leading advocates of the tariff of 1842. He was elected to the United States Senate, and served two terms with much ability, taking a prominent part in all the important questions that at that time agitated the country. A few years ago he took up his residence in Frederick city, Maryland, and after the breaking out of the war he was appointed the first brigadier-general; took command of all the volunteers in Maryland, and organized them into regiments. Subsequently he was appointed to the command of Camp Chase, near Columbus, Ohio, where he remained in the discharge of his duties until attacked with fatal illness.

March 30.—DUYCKINCK, GEORGE L. (*See DUYCKINCK.*)

April 7.—FRANCIS, Rev. CONVERS, D. D., died in Cambridge, Mass., aged 67 years. He was born in West Cambridge, studied at the Medford Academy, and graduated at Harvard College in the class of 1815. After graduating he studied theology in the Cambridge Divinity School, and was ordained pastor of the Unitarian church in Watertown, Mass., June 23d, 1819, where he remained twenty-three years. In 1842 he was appointed "Parkman Professor of Pulpit Eloquence and the Pastoral Care," in Harvard College, which appointment he accepted, and entered immediately upon the duties of his professorship, which he continued to the end of his life. Among his publications were: "Errors of Education," a discourse at the anniversary of the Derby Academy in Hingham (May, 1828); An Historical Sketch of Watertown from the first settlement of the Town to the close of the Second Century (1830); A Discourse at Plymouth, December 22d (1832); A Dudlean Lecture at Cambridge (1833); The Life of Rev. John Eliot, the Apostle to the Indians, in the fifth volume of Sparks's American Biography (1836); Memoir of Rev. John Allyn, D. D., of Duxbury (1836); Memoir of Dr. Gamaliel Bradford (1846); Memoir of Judge Davis (1849). The last three were published in the Collections of the Massachusetts Historical Society. He was also the author of many valuable articles in different religious papers and periodicals. In 1837 the honorary degree of Doctor of Divinity was conferred upon him by Harvard College.

April 10.—WARE, Dr. ROBERT, died in Washington, N. C., aged 29 years. He was a native of Boston, Mass., studied at the Latin school in that city, graduated at Harvard College in 1852, and studied medicine with his father, Dr. John Ware, until May, 1854, when

he went to Europe and remained until September, 1855, spending about six months of the time in Paris, studying in the French hospitals. On his return to this country he resumed his studies with his father, and graduated at the Medical School in 1856, when he began the practice of his profession in Boston. In July, 1857, he was appointed one of the district physicians of the Boston Dispensary. He was remarkably successful in his practice, which increased rapidly, as his father was intending to relinquish the profession to his son. On the breaking out of the war he was one of the first physicians to enter into the service of the Sanitary Commission, in which he continued until the close of the peninsular campaign in Virginia. Throwing his whole soul into the work of ministering to the wounded and dying, he spared himself neither night nor day. He was subsequently appointed surgeon of the 44th Massachusetts regiment, with which he left for the seat of war. On his arrival in North Carolina his arduous labors and exposures to the unhealthy climate brought on a fever, which speedily terminated his valuable life. In the eloquent language of one of the officers of the Sanitary Commission, he was "one who, through months of death and darkness, lived and worked in self-abnegation; lived in and for the sufferings of others, and finally gave himself a sacrifice for them."

April —.—MYERS, Mrs. ELIZABETH, died in Antes, Blair county, Pa., aged 109 years.

April —.—REID, DAVID BOSWELL, LL.D. died at Washington D. C.

April 12.—KIMBALL, Lieut.-Col. EDGAR A., killed at Suffolk, Va. He was born in Concord, N. H., in 1821, was educated as a printer, removed to Vermont, and became editor and proprietor of the Woodstock (Vt.) "Age," a liberal democratic newspaper. He distinguished himself in the Mexican campaign, and for his gallantry at Contreras, Churubusco, and Chapultepec, received the brevet of major. He was subsequently for a time in the office of the New York "Herald." Upon the breaking out of the war he again took the field, and received the commission of major of the 9th New York volunteers (Zouaves), May 13th, 1861, and the following August participated in a reconnoissance up the peninsula. At the battle of Roanoke Island, N. C., February 7th, 1862, Major Kimball led his Zouaves along a narrow causeway commanded by the enemy's cannon, and at great peril carried the work and planted the Federal flag over it. On the 14th of February, 1862, he was promoted to the position of lieutenant-colonel, and soon after was placed in command of the regiment, which formed a portion of the ninth army corps. He participated in the reduction of Fort Macon, and was also engaged in the battles of South Mountain, Antietam, and Fredericksburg. The regiment was next transferred to Newport News, thence to Suffolk, Va. Here he unfortunately met his death, on the 12th of April,

by a shot from General Michael Corcoran. Gen. Corcoran had occasion to pass Col. Kimball's camp on important duties connected with his command, before dawn of that day, and his right to pass being challenged by Col. Kimball, he announced his rank and position, and the urgency of his journey. By some strange perversity, Col. Kimball refused to accept his statement, and persisting in his determination not to allow him to pass, Gen. Corcoran, after giving him notice, fired upon him with fatal effect.

April 14.—SPEAR, Rev. CHARLES T., died at Washington, aged about 50. He was a man of very philanthropic disposition, and had devoted many years to prison reform, visiting the prisons, urging before the directors and legislatures the adoption of measures for the amelioration of the condition of convicts, and for facilitating their reformation. He published for a number of years a monthly periodical called "The Prisoner's Friend," and had published two or three volumes of extracts and original articles for the encouragement of those in durance. His death, at Washington, was from disease contracted in his labors in behalf of the prisoners of war.

April 14.—WELCH, BENJAMIN, late commissary general of the State of New York, died at Clifton Springs, aged 45 years. He studied law with the late Judge Mann, of Utica, N. Y., and was subsequently editor of the Utica "Democrat" and of the Buffalo "Republican." He was at one time State treasurer, and for four years commissary general of the State. In the spring of 1862 he accepted a position on General Pope's staff, and during the campaign of the following summer contracted the disease which subsequently proved fatal.

April 17.—STANSBURY, Major HOWARD, an officer of the corps of topographical engineers, died in Madison, Wisconsin. He was born in New York city, February 8th, 1806, and in early manhood entered the service of the corps of civil engineers. In October, 1828, he was placed in charge of the survey of the eastern section of a proposed canal to unite Lake Erie with the Wabash river; a survey to ascertain the practicability of uniting by a canal the waters of Lake Michigan with the Wabash river; a survey of the obstructions in Wabash river, and surveys on the White Water. In 1832 he surveyed the route of the Mad river and Lake Erie railroad. He also made surveys of the mouth of the Vermillion, Chagrin, and Cumberland rivers. In 1835 he had charge of a number of public works in Indiana, and the following year made a survey of the James river, with a view to the improvement of the harbor of Richmond. In 1837 he made a survey of the Illinois river, from its mouth to the termination of the canal, and of the Kaskaskia river, from its mouth to Vandalia. In 1838 he was engaged upon the survey for a railroad from Milwaukee to Dubuque, and charged with the construction of a road from Milwaukee, via

Madison, to the Mississippi river. In 1838 he entered the army as a first lieutenant of topographical engineers. In 1841 he was engaged under the command of the late Captain Williams, on a survey of the lakes. From 1842 to 1845 he was in command of the survey of the harbor of Portsmouth, N. H.—a work which, for minute accuracy of detail, is unsurpassed by anything of the kind ever produced in this country. In 1847 he was charged with the construction of an iron light-house on Carysfort Reef, Florida, the largest iron light-house on our coast. In 1849 he entered upon the Great Salt Lake expedition, from which he returned in 1851, and his report of which has given him a wide reputation. In 1852 he made a survey of the harbor of St. Vincent's, on Lake Ontario, and the following year was charged with the superintendence of the lake harbors from Conneaut to Sandusky. In 1856 he was assigned to the charge of the military roads in Minnesota, and in 1861 was ordered as mustering officer to Columbus, Ohio. At the time of his death he was mustering and disbursing officer at Madison, Wisconsin.

April 18.—McDERMOTT, Lieut. Com. of the U. S. gunboat Cayuga, was killed at Sabine Pass, while making a reconnoissance in company with Capt. Reed, of the gunboat New London. He was a brave man, a gallant officer, and a true patriot.

April 23.—DARLINGTON, Dr. WILLIAM, died in West Chester, Pa., aged 81 years. He was well known for his services in public life, as well as for his botanical and historical writings.

April 23.—OTEX, Right Rev. JAMES HERVEY, bishop of the Protestant Episcopal Church in the diocese of Tennessee, died at Memphis in the 64th year of his age, and the 30th of his episcopate. He was born in Virginia in 1799. He was a man who stood high in the reverence and affection of all who knew him, and throughout the South and Southwest won the title of "the good bishop." He had never mingled in partisan strife, but was thoroughly attached to his country. On the day before the passage of the secession ordinance in Tennessee, he published in the papers of Memphis a communication asserting the duty of using the "Prayer for the President of the United States." When the meeting of the Southern dioceses was held at Montgomery, Alabama, he attended, and though strongly opposed to secession, he was successfully persuaded to address his famous letter to the Secretary of State, remonstrating against any coercive measures on the part of the Federal Government. An able reply to this letter, which was published soon after, changed the views of the bishop as to his position, and he thenceforth quietly withdrew from everything which would seem like opposition to the National Government. He acted with the Northern dioceses, declined on his own part and caused the clergy and laity of his diocese to decline to attend the convention of delegates from the Confederate States held in Georgia,

and in his whole demeanor comported himself as a faithful citizen of the United States.

April 24.—ADAMS, JOHN, LL.D., died in Jacksonville, Illinois, aged 90 years. He was a son of John Adams, an officer of the Revolution, and was born in Canterbury, Conn., graduated at Yale College in 1795, and taught the academy in his native town for three years. In 1800 he was appointed rector of Plainfield Academy, and in 1803 preceptor of Bacon Academy in Colchester, Conn. In June, 1810, he was chosen principal of Phillips Academy, Andover, Mass., in which office he continued twenty-three years. In 1833 he resigned this position, and removed to Illinois, where he invested his property in the new lands. Always interested in the young, he volunteered his services to their advantage, and although more than three score and ten years of age, he organized in the State of his adoption several hundred Sabbath schools, many of which have grown into churches. He has left copious manuscripts illustrative of his views of mental management in educating and governing the young. When resident in Andover he took part in the organization of several of the great national charities of the country. The degree of LL.D. was conferred on him by his alma mater in 1854. His three sons are graduates of Yale College, and one of them, William Adams, D.D., is an eminent clergyman of New York city.

April 24.—SMITH, Rev. ALBERT, D.D., died in Monticello, Illinois, aged 59 years. He was born at Milton, Vt., and was clerk in a store at Vergennes, till he arrived at the age of majority. Finding no satisfactory opening in the mercantile business, he went to Hartford, Ct., and commenced the study of law. When about twenty-three years of age he experienced a change of religious views and turned his attention to the ministry. He graduated at Middlebury, Vt., in 1831, taught school a year in Hartford, Ct., and Medford, Mass., and in 1835 graduated at the Andover Seminary. He was ordained pastor of the Congregational church in Williamstown, Mass., in 1836, and in 1838 was elected professor of languages and belles lettres in Marshall College, at Mercersburg, Pa. In 1840 he was called to the professorship of rhetoric and English literature in Middleburg College, where he remained about four years. In May, 1845, he was installed pastor of the Congregational church in Vernon, Ct., but in 1854 was obliged to resign on account of declining health, and went to Illinois. In 1855 he was for a time in the service of the Home Missionary Society, and in the fall of that year was settled at Monticello, where he remained until his death. He received the degree of D. D. from Shurtleff College in 1860.

April 25.—BAILEY, Rev. RUFUS WILLIAM, D.D., died in Huntsville, Texas, aged 70 years. He was born in Yarmouth, Me., graduated at Dartmouth College in 1813, and after teaching the academies in Salisbury, N. H., and Blue

Hill, Me., commenced the study of law with Daniel Webster, but at the end of the first year becoming converted, he entered the Andover Theological Seminary, and upon the completion of his studies was licensed, and commenced preaching at Norwich Plain. He was at the same time professor of moral philosophy in the Military School. In 1824 he was installed pastor of the church in Pittsfield, Mass., as successor of Rev. Heman Humphrey, then elected to the presidency of Amherst College. After laboring here four years his health failed, making it necessary for him to dissolve the pastoral relation and take up his residence in a warmer climate. He subsequently taught over twenty years in North Carolina, South Carolina, and Virginia, in the latter State travelling at one time extensively as agent of the Colonization Society. In 1854 he went to Texas upon business, and was elected professor of languages in Austin College, at Huntsville. In 1858 he was elected president of the same college, and continued in that office until his death. He was the author of a series of letters on slavery, published in a newspaper, and subsequently gathered into a volume and published under the title of "The Issue;" also a volume of sermons entitled "The Family Preacher;" letters to daughters, entitled "The Mother's Request;" a "Primary Grammar," and "Manual of English Grammar," used extensively in Southern schools.

April 25.—MEEHAN, JOHN S., died in Washington, D. C., aged 73 years. He was for thirty years librarian of Congress.

April 26.—BLAKE, WILLIAM RUFUS, an American actor, died in Boston, Mass., aged 55 years. He was born in Halifax, Nova Scotia. His first appearance upon the stage was at the old Chatham Theatre in New York, in 1824, when he was very successful, and soon rose high in his profession. He was successively stage manager of the Tremont Theatre, Boston, joint manager of the Walnut street Theatre, Philadelphia, and stage manager of the Broadway Theatre, New York. As a comedian he stood without a rival in his profession.

April 26.—CHARLES, Col. EDWARD COBB, died in New York from wounds received in the battle of Glendale. At the commencement of the war he went out with the 42d New York volunteers as lieutenant-colonel. At the battle of Ball's Bluff, Col. Cogswell, the commander of the regiment, was taken prisoner, and Lieut.-Col. Charles was promoted to the position thereby left vacant. He was in all the engagements from Ball's Bluff down to the last of the seven days' battles before Richmond. In the battle of Glendale he was severely wounded by a Minié rifle ball, and left for dead on the field. He was, however, taken prisoner, and lay for many weeks in a prison hospital. He afterward came North on parole and was confined for some time. After undergoing some severe surgical operations mortification prob-

ably supervened, causing his death. His funeral took place from the City Hall, New York, and was attended by a large concourse of citizens, the old Light Guard joining in the procession.

May 1.—BLOSS, Hon. WILLIAM C., died at Rochester, N. Y., aged 69. He was a man of somewhat eccentric character, but of unflinching integrity and honesty, and possessed of a philanthropic and generous nature. He was for many years the voluntary chaplain of the Monroe County Jail, and his efforts in behalf of the prisoners were such as to endear him greatly to the citizens of Rochester. He was a member of the Assembly for 1845, 1846, and 1847, and while there was a man of mark for his irreproachable integrity and his fascinating eloquence. When the Massachusetts colony for Kansas passed through Rochester, he presented to each man a Bible and a spelling book, saying, "These two books are the foundation of liberty and all true government."

May 1.—TRACY, Brig.-Gen. R. D., an officer in the Confederate service, a native of North Carolina, who entered the Confederate army from civil life. After serving for some time as colonel of a North Carolina regiment, he was promoted to the rank of brigadier-general in 1862, and was killed at the battle of Port Gibson, Miss.

May 2.—PAXTON, Brig.-Gen. EDWARD F., an officer in the Confederate service, killed at the battle of Chancellorsville, Va. He was a native of Rockbridge county, Va., and received his military education at the Virginia Military Academy at Lexington. When "Stonewall" Jackson was made a brigadier-general he appointed young Paxton, to whom he was strongly attached, adjutant-general of his brigade, and on his own advancement promoted him adjutant-general of the division. When Jackson became commander of an army corps, he asked and obtained the appointment of Paxton as brigadier-general, and in this capacity he served at Antietam, Fredericksburg, and the beginning of the battle of Chancellorsville. He was killed on the same evening on which Jackson was mortally wounded.

May 3.—BERRY, Major-General HIRAM G. (See BERRY, HIRAM G.)

May 3.—BROWNELL, CHARLES FREDERICK, died in Providence, R. I., aged 32 years. He was a native of Rhode Island, and nephew of Bishop Brownell, of Connecticut, graduated at Brown University in the class of 1851, studied law, and was admitted to the bar in September, 1853. He commenced the practice of his profession in Providence, and was actively connected with some of the most important literary associations of that city. He was for two years clerk of the Senate of Rhode Island, and for one year a representative of the General Assembly.

May 3.—McVICAR, Lieut.-Col. DUNCAN, was killed near Spottsylvania, Va. He was born in Scotland. At the commencement of the war he was a resident of Kingston, Canada, but his

sympathies being upon the side of the Union, he came to the United States to aid in its maintenance. He first joined a company of light artillery in New York city, and proceeded to Rochester for recruits. He afterward joined the Harris Guards, and rose to the office of lieutenant-colonel. During the peninsular campaign he commanded a battalion of his regiment then in the service on the Chickahominy. He was a brave and chivalrous officer, and lost his life while making a reconnoissance with a part of his men, and bravely assailing a force of the enemy which he encountered.

May 3.—RINGOLD, Col. BENJAMIN, was killed in the fight before Suffolk, Va. He entered the army as a captain, was promoted to be major, and subsequently became colonel of the 103d New York volunteers. He commanded his regiment at South Mountain, Antietam, and Fredericksburg. At Antietam he particularly distinguished himself by his bravery and daring in driving a Georgia regiment from a strong position at the point of the bayonet, and taking the colors of the regiment. He was for a long time attached to Col. Hawkins's brigade.

May 4.—BUTLER, Rev. FRANCIS EUGENE, died from wounds received in battle at Suffolk, Va., aged 38 years. He was a native of Suffolk, Conn., and for a number of years was engaged in mercantile pursuits in New York city, where he was well known as secretary of the New York Bible Society, as one of the founders of the Young Men's Christian Association, and as an active friend of other religious institutions. When twenty-nine years old he entered Yale College with the determination of fitting himself for the ministry. He graduated in 1857, after which he spent three years in the study of theology at Princeton, and subsequently one year at Andover. Having been licensed to preach, he supplied for a time the pulpit of a church in Bedford Springs, Penn., and afterward that of the Second Presbyterian church in Cleveland, Ohio. He was next engaged as minister of the Congregational Church in Paterson, N. J. When the 25th regiment of New Jersey volunteers was organized, he accepted the post of chaplain, and accompanied the regiment to Suffolk, Va. In an engagement near that place, May 3d, learning that some men of a Connecticut regiment on the right were suffering for want of surgical assistance, he went to their relief, and in so doing, being greatly exposed, he was shot by a sharpshooter and died the next day.

May 4.—PLUMMER, JOSEPH B., a brigadier-general in the United States volunteer service, died at Corinth, aged about 44 years. He graduated at West Point in 1841, in the same class with the late Gens. Lyon, Richardson, Reynolds, and Whipple, the late Col. Garesché, and Gens. Buell and Wright of the army of the United States. After serving with distinction in Florida and Mexico, he was stationed for several years at the West. At the commencement of the present war he was a captain of the

First United States infantry, and accepted the command of a regiment of Missouri volunteers. In this capacity he participated in the battle of Springfield, and subsequently distinguished himself at the battle of Fredericktown, Mo., for which he was promoted to the rank of brigadier-general of volunteers. He participated in the campaign of the Mississippi river and distinguished himself at Island No. 10, and other engagements in that vicinity. Becoming prostrated by his severe labors in the service, he obtained leave of absence to recruit his health. After a short visit to his family, he returned to his command while yet unfit for duty, and died the day after his arrival in the camp of Gen. Rosecrans, at Corinth.

May 5.—STEVENS, Col. WILLIAM OLIVER, died from injuries received in the battle near Chancellorsville, Va., aged 36 years. He was born in Belfast, Maine, was fitted for college at Phillips Academy, Andover, and graduated at Harvard College in 1848. After leaving college he studied law with his father in Lawrence, and subsequently with Hon. Thomas Wright, of the same place, and went to Florida, where he practised his profession for a few months, but was obliged to leave on account of the debilitating effects of the climate. In 1852 he went into the practice of his profession in Dunkirk, New York. In 1859 he was elected district attorney of Chautauque county, filled the office for two years to the entire satisfaction of the people, and resigned his position for the military service of his country, in 1861. He joined the Excelsior Brigade at Staten Island, as captain of a company raised in Dunkirk, was elected major before leaving the island, and took a conspicuous part in the battles of Williamsburg, Fair Oaks, White Oak Swamp, and Malvern Hill. In October, 1862, he was commissioned colonel, dating back to September, and his regiment was attached to the third army corps under Gen. Sickles. At the battle of Chancellorsville, May 3d, his horse being shot under him early in the engagement, he led his regiment on foot, and soon after received a mortal wound and was carried to the hospital, where, after enduring the most terrible suffering with heroic fortitude, he died the following Tuesday.

May 5.—WHIPPLE, Gen. AMIEL W. died at Washington, D. C.

May 7.—HOLMES, JOHN E., died at Annapolis from the effects of confinement in a Richmond prison. He was born in Hartford county, Connecticut, in 1809, was educated in the Universalist Academy at Hamilton, N. Y., and commenced the study of law, but subsequently entered the ministry. After preaching three years he returned to the study of law, and was admitted to the bar in Illinois. In 1843 he removed to Jefferson, Wisconsin, and soon after became a member of the Territorial Council. In 1848 he was lieutenant-governor, and in 1852 was elected to the State Legislature, all of which positions he filled with honor and

usefulness. When the war broke out he felt it his duty to devote his energies to the service of his country. In August, 1862, he received a commission, and at once entered upon his duties. He was taken prisoner at Brentwood, Tennessee, March 25th, 1863, was rapidly marched to Richmond, where he was imprisoned four weeks, and died immediately after being exchanged.

May 8.—VAN DORN, Maj.-Gen. EARL, an officer in the Confederate service, was killed by Dr. Peters, of Maury county, Tennessee. He was born in Mississippi about 1823, graduated at West Point in 1842, and was appointed brevet second lieutenant United States 9th infantry; became second lieutenant in 1844, and first lieutenant in 1847, was brevetted captain for gallantry at Cerro Gordo, and major for gallantry at Contreras and Churubusco; distinguished himself at Chapultepec, and was wounded when entering the city of Mexico. From January, 1852, to June, 1855, he was treasurer of the Military Asylum at Pascagoula, Miss. He distinguished himself in three different expeditions against the Comanches in Texas, in one of which he was dangerously wounded. On the breaking out of the war he resigned his commission in the United States army, and accepting the position of colonel in the Confederate army, took command of a body of Texan volunteers and entered into an engagement to get possession of the vast amount of military stores and equipments which the United States Government had collected in Texas. In the spring of 1861, he captured the steamship *Star* of the West at Indianola, and a few days after, at the head of eight hundred men, at Saluria he received the surrender of Major C. C. Sibley and seven companies of United States infantry, and the following month, that of Lieut.-Col. Reeve and six companies of the 8th infantry. He was made brigadier-general and subsequently major-general, and took command of the trans-Mississippi district, January 19th, 1862; commanded at the battle of Pea Ridge, and was superseded by Gen. Holmes. Since the battle of Corinth, where he was unsuccessful, he had remained in comparative obscurity, but had been engaged in several attacks upon the outlying divisions of the army of the Cumberland. He had made his head-quarters for some months in Maury county, Tennessee, and while there injured the family of Dr. Peters, who, after attempting in vain to secure from him such reparation as it was in his power to make, at last took his life.

May 10.—JACKSON, Maj.-Gen. THOMAS J. (See JACKSON, T. J.)

May 11.—CUTTS, Hon. JAMES MADISON, second comptroller of the treasury, died at Washington. He was the father of Mrs. Senator Douglas, and for many years resided in Washington, where he was esteemed as an amiable and worthy citizen.

May 11.—LUTHER, SETH, died in the Insane Hospital, Brattleborough, Vt. He was one of the leaders of the "Dorr Rebellion," as it was

called, which occurred in Rhode Island in 1842, which agitation resulted in the adoption of a constitution by that State, a year or two later.

May 12.—SCHMUCKER, SAMUEL MOSHEIM, LL.D., died in Philadelphia.

May 17.—TILGHMAN, Brig.-Gen. LLOYD, an officer in the Confederate service, was killed at Champion Hill, Miss. He was a native of Maryland, graduated at West Point in July, 1836, and was appointed second lieutenant of the 1st dragoons; resigned September, 1836. He then became a division engineer of the Baltimore and Susquehanna railroad, and subsequently surveyor of the Norfolk and Wilmington canal, and the Eastern Shore railroad. During the Mexican war he was a volunteer aid to Col. Twiggs in the battle of Palo Alto and Resaca de la Palma, and commanded a volunteer partisan party in Mexico, October, 1846. He was superintendent of defences at Matamoras, January, 1847; captain of volunteer artillery in Hughes's regiment for the Mexican war from August, 1847, to July, 1848, and the principal assistant engineer of the Panama division of the Isthmus railroad in 1847. At the commencement of the war he went into the Confederate service.

May 22.—BOOMER, Acting Brig.-Gen., an officer of the U. S. volunteers, was killed at Vicksburg. He was colonel of the 25th Missouri, and commanded the second brigade of Gen. Quincy's division, Gen. McPherson's corps. While leading his brigade in the assault upon the fort, on the east side of the city, he fell by a bullet from one of the sharpshooters.

May 23.—CRIPPEN, WILLIAM G., editor of the "Cincinnati Times," died in Cincinnati, aged 43 years. At the age of sixteen he entered an apprenticeship as a printer. His first efforts as a reporter were made in a series of letters to the New York "Spirit of the Times," which were received by the public with much favor. Soon after he became connected with the establishment where he spent most of his life. As a writer, whether as a correspondent over his well-known *nom de plume* of "Invisible Green," in a reportorial capacity, or in the indicting of articles, he was forcible, logical, and entertaining; and as a journalist, he was ever animated by a desire to render strict justice to all men.

May 23.—JONES, Col. J. RICHTER, an officer of U. S. volunteers, was killed near Newbern, N. C. He was born in 1804; received his academical education at the Germantown Academy, and graduated with high honors at the University of Pennsylvania in 1821. Having studied law, he was admitted to the Philadelphia bar in 1827 and continued to practise until 1836, when he was appointed a judge of the Court of Common Pleas for the county of Philadelphia, and held the office until his term expired by limitation under the new Constitution in 1847. When the war broke out he was residing near Laporte, Sullivan co., Pa. He promptly offered his services to the War De-

partment, was commissioned colonel of a regiment he had raised, and located his camp in Roxborough. On the 8th of March, 1862, he left with his regiment, the 58th Pennsylvania volunteers, for Fortress Monroe, and was in the advance when the attack was made on Norfolk. He also performed some bold movements on the Blackwater. Subsequently he was transferred to the Department of North Carolina, and in January, 1863, his regiment was stationed near Newbern. A short time previous to his death he was in command of a brigade, in which position he evinced much ability as a military chieftain.

May 26.—BICKEL, JOHN, died in Jonestown, Lebanon county, Penn., aged 87 years. He was appointed postmaster in Jonestown under the administration of Thomas Jefferson in 1802, which position he held, through every change of administration, until 1859, a period of 57 years, when the infirmities of age compelled him to resign.

May 26.—EMERSON, RALPH, D.D., died at Rockford, Illinois, aged nearly 76 years. He was a native of New Hampshire; graduated at Yale College in 1811; studied theology at Andover, and from 1814 to 1816 held the office of tutor in Yale College. At the close of his services he was ordained and installed as pastor of the Congregational church in Norwalk, Conn., where he remained till 1829, when he was appointed professor of ecclesiastical history and pastoral theology, in the Andover Theological Seminary—an office which he retained through a period of twenty-five years. He then resided five years in Newburyport, Mass., after which he removed to Rockford, Illinois, in order to be near his children. He was a contributor to the "Bibliotheca Sacra," the "Christian Spectator," and other religious periodicals. He also published a life of his brother, Rev. Joseph Emerson, and a translation, with notes, of a work on "Augustinism and Pelagianism," by C. F. Wiggins.

May 26.—GREEN, Rev. L. W., D.D. (*See GREEN, L. W.*)

May 27.—COWLES, Col. DANIEL S., an officer of the U. S. volunteers, was killed in the assault at Port Hudson. At the commencement of the war he was engaged in the practice of law in Columbia county. He accepted the command of the 128th regiment of New York volunteers, made up, for the most part, of men of wealth and high social position. He was cool in council, brave in battle, and fell by a bayonet thrust while leading his men to the enemy's works.

May 27.—RODMAN, Lieut.-Col. WM. LOGAN, was killed in the attack on Port Hudson, Miss. He was born in New Bedford, Mass., March 7th, 1823; graduated at Harvard College in 1842, and soon after entered into mercantile business. He visited California during the gold excitement, and was absent two years, returning by way of Calcutta and the overland route through Europe. He was a member of the Common Council of New Bedford in 1852, and in 1860

and 1862 was in the Legislature. He enlisted in the service of the country, raised a company of volunteers, with whom, as their captain, he proceeded to the seat of war. His skill and bravery rapidly promoted him to the position, first, of major, and then of lieutenant-colonel, and in the assault, during which he lost his life, he bore a gallant part.

May 28.—TEMPLE, Hon. WILLIAM, died in Smyrna, Del., aged 52 years. He was governor of Delaware nearly four years, having succeeded to that office by reason of his position as speaker of the House of Representatives, on the death of Gov. Hall, who, being speaker of the senate, had become governor on the death of Gov. Stockton, and lived but a few months after. He had also acquired a high reputation as a merchant in Smyrna, and had recently been elected to the 38th Congress.

May —.—GOODHUE, Rev. JOSIAH F., died in Whitewater, Wisconsin. He was born in Westminster, Vt., in 1791; graduated at Middlebury College in 1821; studied theology at Andover, Mass., and accepted the pastorate of a church in Williston, Vt., in 1824, where he remained until 1834. He then accepted a call to the Congregational church in Shoreham, Vt., where he spent twenty-four years. His published writings are: "A Sermon on the Character of Rev. Thomas A. Merrill, D.D., of Middlebury, Vt.," and "A History of the Town of Shoreham," the scene of his last labors.

June 1.—MASSETT, Major, an officer in the U. S. volunteers, died at Memphis, Tenn. He was an Englishman by birth, but had been for the last twenty years a citizen of the United States. After the loss of a son, Col. Massett, killed at the battle of Fair Oaks, he abandoned a life of ease and comfort, and entered the army, with the rank of major of cavalry. As an officer, he was brave and active, and spared neither body nor mind in the faithful performance of his duties.

June 1.—KIRBY, Brig.-Gen. EDMUND, an officer of U. S. volunteers, died in Washington, from wounds received at the battle of Chancellorsville. He was born in Brownsville, Jefferson county, New York, graduated at West Point, and joined the army in May, 1861. He was assigned to Ricketts' battery as second lieutenant, and upon the imprisonment of Gen. Ricketts by the enemy, assumed command of the battery, which position he retained until his death. He took a prominent and active part in all the battles in which the Army of the Potomac was engaged, and was promoted to a brigadier-generalship for his bravery at Chancellorsville.

June 9.—DAVIS, Col. BENJAMIN F., of the 8th N. Y. cavalry, was killed while leading a brigade to the charge. He was a native of Mississippi, but was appointed a cadet at West Point from the State of Alabama, in the year 1850; graduated in 1854, and was appointed brevet second lieutenant of the 5th infantry, and, in 1855, was transferred to the 1st dragoons, with the full rank. He distinguished himself in the

conflict in New Mexico, June, 1857. In 1860, he was promoted to a first lieutenancy, and, continuing in the service when his State seceded, was, on the 30th of July, 1861, further promoted to a captaincy in the 1st dragoons, now 1st cavalry. At the battle of Williamsburg he so distinguished himself, that he was nominated for a brevet of lieutenant-colonel. In June, 1862, he was placed in command of the 8th regiment of New York cavalry, and soon after was brevetted and confirmed major for his gallant withdrawal of the cavalry from Harper's Ferry.

June 11.—*AYERILL, REV. JAMES*, died at La-fourche, La., aged 48 years. He was born in Griswold, Conn. He was fitted for college in the Plainfield Academy; graduated at Amherst College in 1837; pursued his theological studies at New Haven, where he graduated in 1840, and was ordained pastor of the church in Shrewsbury, Mass., June 22d, 1841. In 1848, his health being very poor, he was obliged to remit his labors, and subsequently was settled in Plymouth Hollow, Conn., October 13th, 1852. After a ministry here of ten years, he asked for a dismission, and accepted the chaplaincy of the 23d regiment of Connecticut volunteers, which he accompanied to Louisiana. After a short, but faithful service in this new field, he fell a victim to the climate, and died of intermittent fever, after an illness of two weeks. He was an ardent friend of the philanthropic and moral enterprises of the day; a staunch advocate of temperance, and a strong anti-slavery man.

June 11.—*CROCKER, FREDERICK WM.*, died in Barnstable, Mass., aged 54 years. He graduated at Harvard College in 1829, and spent the seven following years in business in Barnstable. In February, 1837, he removed to Boston, and went into the navigation and commission business, in which he continued until 1842, when he was in the book trade for a short time. Having a large property, he took a deep interest in the improvement of his native town, and identified himself with its social and literary progress. He was a frequent contributor of political and literary articles to the county journals, and the annual meetings of his college class were indebted to him for many racy and witty contributions. In 1855 he was appointed, by the Supreme Court of Massachusetts, clerk of the courts for the county of Barnstable.

June 14.—*TRAIN, REV. ASA MILTON*, died at Milford, Conn., aged 63 years. He was born in Enfield, Mass., graduated at Amherst College in the class of 1825; took his theological course at New Haven, and was ordained pastor of the Congregational church in Milford, July 16th, 1828. His pastorate continued twenty-two years, and, after its close, he preached as stated supply in Orange, Prospect, and Burlington. From 1850 to 1858 he was a member of the Connecticut House of Representatives, with the exception of two years, in one of which he was a member of the State Senate.

June 20.—*WOODS, HON. ANDREW S., LL.D.*, died at Bath, N. H. He was a native of New Hampshire, born in 1803, graduated at Dartmouth College in 1825, entered the legal profession in 1828, and was elected Justice, and subsequently Chief Justice of the Supreme Court of his native State.

June 23.—*SMITH, LIEUT.-COL. ABEL*, died at the Hotel Dieu in New Orleans. He was in command of the 2d Duryea Zouaves (165th New York volunteers) at the battle before Port Hudson, and, while fighting at the head of his regiment, received the wound of which he afterward died.

June —.—*BULLARD, TALBOT, M.D.*, died in Indianapolis, Indiana. He was a son of the late Dr. Artemas Bullard, of Sutton, Mass. His ardent patriotism and strong benevolence of character led him to assume the superintendence and care of the Indiana wounded and dying at the battle of Pittsburg Landing, and his untiring devotion at that time was such, that after every battle since, in which Indiana soldiers were engaged, Gov. Morton has called for his services, giving him unlimited discretion as it regarded doing for their comfort and relief. The disease of which he finally died, was contracted during his services at Pittsburg Landing; but as he went to administer to the suffering, he would not be restrained from his work by any bodily suffering or inconvenience, and when called upon by the governor to go to Vicksburg, he went, though contrary to the advice of his friends, accomplished his mission, and returned home to die.

June 26.—*FOOTE, ADMIRAL ANDREW HULL*. (See FOOTE, ANDREW H.)

June —.—*DODGE, REV. JOHN HENRY*, died in Wendell, Mass., aged 35 years. He was born in Wenham, Mass., and spent the first seventeen years of his life at home upon a farm. He was then apprenticed to the carpenter's trade, at which he worked until his majority, in the mean time pursuing the study of the English branches, together with Latin and Greek. In 1850 he entered the Williston Seminary, East Hampton, Mass., and in 1852 Amherst College; graduated at the Andover Seminary in 1859, was ordained, and in the fall of that year, under the appointment of the American Missionary Association, sailed for Africa. Upon his arrival he at once entered upon the study of the Sherbro dialect of the Mandingo language, and upon its reduction to writing, which had previously been commenced. Beside the care of the church and Sabbath school, he had charge of the mission home farm, and the oversight of the workmen. This multiplicity of cares and labors, together with the unhealthiness of the climate, so seriously affected him that he was obliged to return home in the spring of 1861. Becoming somewhat improved in health, he obtained permission of the Association to undertake the charge of a church in Wendell, Mass., as the war had disturbed both the finances of the board and the means

of communication with the mission. Under these circumstances, he resigned his connection with the Mission Board, though in the hope of returning to the work at some future period. His death was caused by an attack of typhoid pneumonia.

July 1.—REYNOLDS, Major-General JOHN F. (See REYNOLDS, J. F.)

July 2.—BARKSDALE, Brig.-Gen. WILLIAM, an officer in the Confederate service, was killed at the battle of Gettysburg. He was born in Rutherford co., Tenn., August 21st, 1821. His early education was obtained in the Nashville University, after which he removed to Columbus, Miss., where he studied law and was admitted to the bar before he had attained his majority, becoming a successful practitioner. He was for a time one of the editors of the Columbus "Democrat," in which he sustained the principle of State rights and the delegated powers of the General Government. During the year 1847 he participated in the Mexican war as a non-commissioned officer in the staff of the 2d Mississippi volunteers. In 1851 he was chosen a member of the State Convention to discuss the compromise measures proposed during the previous year. In 1853 he was elected to Congress on the general ticket, and became a leading member of the States rights portion of the democratic party. During one of those memorable disturbances in the House of Congress, Mr. Barksdale assisted Mr. Brooks of S. Carolina in his assault upon Hon. Charles Sumner. When the war broke out, he left his seat in Congress and joined the Confederate army. At the head of the 13th regiment of Mississippi volunteers he participated in the various campaigns in Virginia, and was promoted to the rank of brigadier-general, and placed in command of the third brigade of Major-Gen. Early's division of Lieut-Gen. Ewell's corps in Gen. Lee's army. On the second day of the battle of Gettysburg, July, 1863, he was killed while in the act of leading on his men.

July 2.—CROSS, Col. EDWARD EVERETT, was killed at Gettysburg. He was born in Lancaster, N. H., and commenced life as a journeyman printer. He was for some time connected with the press in Cincinnati, and in 1854 he canvassed the State of Ohio for the American party. He was afterward employed as agent of the St. Louis and Arizona Mining Company, in which he subsequently became a large stockholder. He made several trips across the plains, taking the first steam engine that ever crossed the Rocky Mountains. When the war commenced he organized the 5th New Hampshire regiment, and was commissioned as its colonel. Under his command the regiment distinguished itself in many important engagements, and won an enviable reputation for bravery. He had been in command of a brigade several months and was strongly recommended for a brigadier-general. He fell while gallantly fighting at the head of his

regiment in the memorable battle of Gettysburg.

July 2.—O'ROURKE, Col. PATRICK H. was killed at the battle of Gettysburg. He was a native of Ireland; was appointed a cadet to West Point from New York, and graduated in 1861, standing first in his class. He was assigned to a lieutenancy in the regular army, and placed in the engineers corps in service at Hilton Head and the works on Savannah river, where he greatly distinguished himself. When the 140th regiment was ready for the field, he was assigned to the command and soon brought it up to a high degree of discipline. He possessed military talent of a high order and was eminently prepossessing and courteous in all his ways. At the reduction of Fort Pulaski he behaved with great gallantry, and at Chancellorsville commanded a brigade with great honor to himself. At the battle of Gettysburg he mounted a rock, cheering on his men when he was struck by the fatal bullet.

July 2.—TAYLOR, Col. C. F., an officer of U. S. volunteers, was killed at the battle of Gettysburg. He was born in 1840, and was a brother of Bayard Taylor, with whom a few years ago he travelled extensively in Europe. After his return he graduated at the Michigan University. His patriotic devotion to his country led him to organize a company in Pennsylvania under the first call of the President. He received a captain's commission from the governor, and his company was attached to the Bucktail Regiment under Col. Kane. At the battle of Harrisonburg, Va., when Col. Kane was wounded, Capt. Taylor remained with that officer on the field, and they were both taken prisoners by the enemy. A few months later, he was appointed colonel of the regiment, Col. Kane having been promoted as brigadier-general. When Gen. Burnside attempted to storm the heights of Fredericksburg, he led one of the charges with great gallantry and was twice wounded. While bravely leading a charge over Roundtop Summit, at the battle of Gettysburg, a ball entered his heart as he raised his sword above his head. His last words were, "Come on, boys; we'll take them all prisoners!"

July 2.—WEED, Brig.-Gen. STEPHEN H., an officer of U. S. volunteers, was killed at the battle of Gettysburg. He was a native of New York; graduated at West Point in July, 1854, and subsequently was made first lieutenant in the 4th United States artillery. When the 5th United States artillery was organized, he was appointed captain. His ability and genius as a commanding officer, and especially as an artillerist, had long been appreciated in the corps, and his brigadier-general's commission was the reward of his gallant services at the battles near Chancellorsville. At the time of his death he was commanding the third brigade of regulars, and was fighting manfully when a bullet from the enemy struck his arm and, passing into his lung, inflicted a terrible

wound from which he died in a few hours. In trying to catch the dying commands of Gen. Weed, Lieut. Charles E. Hazlett, a young officer of the 5th artillery, was kneeling with his head bent close to that of Gen. Weed, when a bullet struck his forehead, felling him dead upon the bosom of his friend.

July 2.—ZOOK, SAMUEL KOSCIUSZKO, a brigadier-general in the U. S. volunteer service, was killed in the battle of Gettysburg. He was born in Pennsylvania about the year 1823. When quite young he entered into the telegraph business, and made several important discoveries in electrical science, which gave him a wide reputation. When about twenty-five years of age he removed to New York, and became connected with the local military organizations of the city. In 1857 he was commissioned lieutenant-colonel of the 6th New York S. M., and at the outbreak of the war, though much out of health, went with his regiment to the seat of hostilities, and was appointed military governor of Annapolis. After his return, he recruited the 57th regiment of New York State volunteers, and, having been commissioned colonel, led it to the peninsula. During that long and bloody campaign he generally held command of a brigade, though without the rank or commission properly belonging to his position. On the 29th of November, 1862, he was commissioned brigadier-general, the appointment being confirmed in March, 1863. He was placed in command of his old brigade and nobly distinguished himself at the battles of Chancellorsville and Gettysburg, on the latter field giving up his life.

July 3.—ARMISTEAD, Brig.-Gen. LEWIS A., an officer in the Confederate service, was killed at Gettysburg. He was a native of Virginia, and was appointed from that State a cadet at West Point in March, 1834. He remained in the Military Academy till October, 1836. On the 10th of July, 1839, he was appointed 2d lieutenant in the 6th infantry; he was advanced to a first lieutenancy in March, 1844; received the brevets of captain and major for gallant and meritorious conduct in the battles of Contreras, Churubusco, Molino del Rey, and Chapultepec, in 1847. In the last of these engagements he had led a storming party against the citadel. He attained a captaincy in March, 1854, and in 1859 commanded a detachment sent against the Indians from Fort Mohave, California, and attacked and routed them with great slaughter. He joined the Confederates early in the war and was appointed a brigadier-general in 1862. He was a brave officer.

July 3.—FARNSWORTH, Brig.-Gen. ELON J., an officer in the U. S. volunteer service, was killed at the battle of Gettysburg. He was born in Livingstone county, Michigan, in 1835, and was educated at the university of that State. In 1857 he went to New Mexico, and became attached to the United States commis-

sary department, and subsequently was engaged in Utah in the same capacity. When the news of the war reached him in the summer of 1861, he hastened home to join the Eighth Illinois cavalry, which his uncle, Gen. John F. Farnsworth, was then organizing. He was made battalion quartermaster, but was soon promoted to the captaincy of Company K of that regiment. During all the battles of the peninsula and in Gen. Pope's campaign he never missed a fight or skirmish in which his company was engaged. In May, 1863, he was placed upon Gen. Pleasanton's staff as aid. He was made brigadier-general only a few days before his death.

July 3.—GARNETT, Brig.-Gen. RICHARD B., an officer in the Confederate service, was killed at the battle of Gettysburg. He was a native of Virginia, entered the service of the United States army as second lieutenant of infantry, July, 1841, and was captain of the 6th infantry, May 9, 1855. When the war broke out he resigned to enter the Confederate service, and was engaged in most of the battles in Virginia. He was at first a colonel under Pegram and Floyd in Western Virginia, but soon after joining Lee's army was promoted to the command of a brigade. He had the reputation of being a brave and capable officer.

July 3.—PENDER, Major-General WILLIAM D., an officer in the Confederate service, was killed at the battle of Gettysburg. He was a native of North Carolina and appointed from that State to West Point, where he entered as a cadet in 1850 and graduated in 1854. He was appointed brevet second lieutenant in the 4th artillery in July, 1854, and second lieutenant of the 1st dragoons in March, 1855. He distinguished himself in several conflicts with the Indians in Washington Territory in September, 1858. He joined the Confederate army early in the war, and rose by successive promotions from the rank of colonel to that of major-general. He commanded a division of Gen. Hill's corps at the battle of Gettysburg.

July 3.—MARSHALL, Col. J. K., an officer in the Confederate service, was killed at Gettysburg. He was born in 1840; graduated at Lexington (Virginia) Military Institute in 1860, when he went to Edenton, North Carolina, and took charge of a private school. Upon the commencement of the war he accepted the captaincy of a volunteer company, and was subsequently elected colonel of the 52d regiment of North Carolina troops, taking the place of Col. Vance, who resigned because elected governor.

July 4.—REVERE, Col. PAUL JOSEPH, an officer of U. S. volunteers, died of wounds received in the battle of Gettysburg. He was born in Boston, September 18th, 1832, and was a grandson of Paul Revere of Revolutionary history. His early educational advantages were good, and in 1852 he graduated at Harvard College. When the war broke out, though occupying a high social position and surrounded by

everything calculated to make life pleasant, he at once volunteered his services in behalf of his country, and accepting the commission of major in the 20th regiment of volunteers, went to the seat of war. At the disastrous battle of Ball's Bluff his regiment behaved nobly, but lost heavily; he was taken prisoner and, with his colonel, was confined in a felon's cell as a hostage for the privateersmen whom the United States Court had convicted as pirates. After his exchange he participated in the campaign on the James river, and at Antietam was on General Sumner's staff, when he was complimented for his gallantry, having received a severe wound, which gave him a long winter of pain and seclusion. Upon his recovery he was promoted as colonel of the 20th regiment, and received his death wound in the first successful battle of the campaign.

July 8.—KENRICK, FRANCIS PATRICK, Arch-bishop of Baltimore. (See KENRICK, F. P.)

July 9.—HENSHAW, DANIEL, a prominent lawyer in Massachusetts, died in Boston, aged 81 years. He was born in Leicester, Mass., May 9th, 1782, graduated at Harvard College in the class of 1806, studied law, and practised his profession twenty-one years in Winchendon, Mass. In 1830 he practised in Worcester, and afterward for several years in Lynn, where he edited the "Lynn Record" until its discontinuance in 1842. On becoming an editor he gave up his professional business and continued for fourteen years in the arduous and responsible position of leading editor of a paper. He had a taste for genealogy, and read many entertaining papers before the Historic-Genealogical Society, several of which were published in Boston papers. After giving up his editorial labors he removed to Boston, where he was residing at the time of his death.

July 12.—READ, Commander ABNER, an officer of the United States navy, died from a wound received upon the Monongahela, at the batteries above Donaldsonville. He was a native of Ohio and about 42 years of age at the time of his death; was educated at the Ohio University at Athens, which institution he left in his senior year in 1839, having received a midshipman's warrant. His first voyage was on the schooner Enterprise to the South American coast, having been detached from a ship-of-war destined to the Mediterranean, on account of some little difficulty with the captain previous to the sailing of the vessel. Prior to his examination, he spent a year in reviewing his studies at the Naval School in Philadelphia and stood fifth in a class of forty-eight. He was at once detailed to the duty of acting sailing master, in which capacity he made several voyages and soon acquired the reputation of being one of the most skilful navigators in the service. At the breaking out of the Mexican war he was on the coast of Africa, but returned in time to make a cruise in the Gulf and participate in some naval operations near the close of the war. The progress of naval pro-

motion being slow, he did not reach the rank of lieutenant until 1853, and in 1855 the Navy Retiring Board consigned him to the list of retired officers, but he was not long after reinstated by the Examining Board. Soon after the commencement of the war he was ordered for service to the Wyandotte, the command of which soon devolved upon him, and it was this vessel which performed such important service in saving Fort Pickens from falling into the hands of the enemy. In May, 1862, the health of Lieutenant Read was so much impaired that he was relieved of his command for a time in order to place himself under medical treatment. A severe fit of sickness prostrated him for some weeks, and before fully recovering his strength, he asked sailing orders and was assigned to the command of the gunboat New London. Proceeding at once to Ship Island he commenced cruising in the Mississippi Sound, and in eight days captured four valuable prizes. The exploits of this vessel won for it from the enemy the appellation of the "Black Devil," and it soon succeeded in breaking up the trade between New Orleans and Mobile. The New London captured nearly thirty prizes, took a battery at Biloxi, and had several engagements with Confederate steamers on the sound. A short time previous to his death he lost his left eye in an engagement at Sabine Pass. In June of 1863 he was placed in command of the steam sloop-of-war Monongahela. He was a skilful officer and a universal favorite throughout the navy.

July 14.—GOUGE, WILLIAM M., late editor of the Philadelphia "Gazette," died in Trenton, N. J., in the 67th year of his age. He was the author of a work on Banking, and for thirty years was connected with the Treasury Department at Washington.

July 14.—O'BRIEN, Col. HENRY T., was killed by the rioters in New York city. He was a native of Ireland, but had resided for many years in New York city. Previous to the riot he had been for some time engaged in raising a three years' regiment (the 11th New York volunteers, or James T. Brady Light Infantry). Early on Monday, July 13th, he volunteered his service and those of his regiment to aid in suppressing the riot. (See RIOTS IN NEW YORK.)

July 15.—HALE, BENJAMIN, D. D., an eminent teacher and author, died at Newburyport, Mass. He was born in that town, November 23d, 1797, graduated at Bowdoin College in 1818, and soon after became principal of an academy at Saco, Me. The following year he entered the Andover Theological Seminary, and in 1822 was licensed to preach. In 1823 he became tutor in Bowdoin College, and subsequently established the institution known as the Gardiner Lyceum, of which he became principal. In 1827 he was chosen professor of chemistry and mineralogy in Dartmouth College, which position he held eight years, and while here received orders in the Protestant

Episcopal Church. He delivered, while connected with this college, several courses of valuable lectures on chemistry, pharmacy, and natural philosophy, to the classes connected with the medical department, and materially aided in the foundation of its extensive geological and mineralogical cabinet. In 1836 he was elected to the presidency of Hobart College, Geneva, N. Y., and after serving twenty years in that office, was obliged to resign on account of his health, having previously made a voyage to Europe, from which he had received no permanent benefit. About eighteen months after his resignation he removed to his native town (Newburyport), and there passed his declining years in such literary pursuits as his enfeebled health permitted. His published works are: an "Introduction to the Mechanical Principles of Carpentry" (8vo., Boston, 1827), "Scriptural Illustrations of the Liturgy" (12mo., 1835), and several sermons, addresses, and pamphlets.

July 17.—ALLEN, DAVID OLIVER, D.D., died in Lowell, aged 63 years. He was born in Barre, Mass., and spent his youth upon a farm. At the age of seventeen he taught a winter school, and at nineteen entered Williams College, from which, after two years, he removed to Amherst College, where he graduated in the class of 1823. The following year he spent at Groton, having charge of what is now called "Lawrence Academy." While here, his attention was turned to the ministry, and he entered Andover Theological Seminary in 1824, where he continued till the spring of 1827, when a most urgent call was made for reinforcements of missionaries to India. Having decided to go thither, he was ordained, and in company with his wife embarked for Calcutta, where he arrived, September, 1827. He labored in Bombay several years, in preaching and establishing schools, and subsequently was engaged in making extensive tours in Western India, preaching, distributing bibles, tracts, &c. In 1844 he took charge of the printing establishment in Bombay, employing at that time one hundred persons, mostly natives. He was the author of several very useful tracts in the Mahratta language, and superintended a revised and corrected edition of the whole Scriptures in that language. His health becoming seriously affected by his arduous labors, together with the effects of a warm climate, he was advised by his physicians to leave India, and accordingly sailed for America, arriving in Boston, June, 1853. After a year of rest, he commenced preparing the "History of India, Ancient and Modern," an octavo volume of 600 pages, published 1856. From 1856 to 1860, he preached at Wenham and other places. At the time he left India, he was a member of the "Royal Asiatic Society," and for several years previous to his death an active member of the "American Oriental Society." His labors and residence of twenty-six years in India, had broken down his naturally strong constitution,

and developed disease which terminated in congestion of the lungs.

July 18.—PUTNAM, Acting Brig.-Gen. HALDIMAND SUMNER, an officer of U. S. volunteers, was killed at the attack on Fort Wagner. He was born in Cornish, N. H., October 15th, 1835; graduated at West Point in 1857, and from that time until a few months previous to the war, was stationed at different localities on the western frontier. When the war broke out, he was summoned to Washington and intrusted with special messages of the highest importance to carry to Fort Pickens. He accomplished his mission and was returning to the North when he was seized by the military authorities at Montgomery, Alabama, and held in prison several days, but was finally released and came back to Washington. Soon after he was placed upon Gen. McDowell's staff, in which position he performed many arduous and important duties. He participated in the first battle of Bull Run, and won himself much honor by his bravery and devotion. When requested to take the command of a regiment from his native State, he at first declined, upon the ground that he was too young for so responsible a position, but upon being further urged, he finally accepted, and on the 14th of January, 1862, departed with his regiment for the seat of war. During the first year of its service, this regiment was stationed at Fort Jefferson, on Tortugas Island. Since then the command has been located at St. Augustine, Florida, Port Royal, S. C., and in the vicinity of Charleston, and though not engaged in any important action previous to the attack upon Fort Wagner, it has participated in many skirmishes and expeditions. For four or five months previous to his death, he was acting brigadier-general, and was serving in that capacity when he fell on Morris Island. His forces consisted of the 7th New Hampshire volunteers, and several other regiments from the Middle States. At the attack on Fort Wagner, he led his brigade gallantly into action, and fell while rallying his men, holding his position within the enemy's works.

July 18.—SHAW, Col. ROBERT GOULD, an officer of colored volunteers, was killed during the assault upon Fort Wagner. He was the only son of Francis G. Shaw, of Staten Island, and was born about 1836. When the war broke out he enlisted as a private in the 7th regiment N. Y. militia, and went to Washington. Before the three months' term of service expired, he sought and obtained a commission in the Massachusetts 2d, which subsequently won so much honor on many a battlefield. At the battle of Cedar Mountain his life was saved by his watch. He commanded the first regiment of colored soldiers from a free State ever mustered into the United States service, and although aware that, by the order of President Davis, he ran the risk of dying upon the gallows if taken prisoner, he went forth ready to die in any way that might prove for the benefit

of his country. He fell at the head of his regiment when standing upon the parapet of Fort Wagner, which had been carried by assault.

July 19.—**McCook**, Major **DANIEL**, an officer of U. S. volunteers, died of wounds received at the fight with Morgan's men near Buffington Island, Ohio. He was born in 1796. He was a clerk in the Pension Office at Washington for two or three years previous to the commencement of the war, and for ten months previous to his death was a paymaster in the United States army. He had eight sons, who have all been in the service except one, Col. George W. McCook, attorney-general of Ohio.

July 24.—**HILDRETH**, **SAMUEL P.**, M.D. (*See HILDRETH, S. P.*)

July 25.—**HOUSTON**, Gen. **SAM**, died at his residence in Huntersville, Texas, aged 70 years. (His death having been falsely reported in 1861, *see* **HOUSTON, SAM**, *Annual Cyclopædia*, 1861, p. 366.)

July 27.—**CRITTENDEN**, Hon. **JOHN J.** (*See CRITTENDEN.*)

July 28.—**YANCEY**, Hon. **WILLIAM L.** (*See YANCEY, Hon. W. L.*)

July 30.—**STRONG**, Brig.-Gen. **GEORGE C.**, an officer of U. S. volunteers, died from wounds received in the assault upon Fort Wagner, Charleston harbor, aged 30 years. He was born in Stockbridge, Vt. His father died when he was but eight years of age, and he was adopted in the family of his uncle, A. S. Strong, of Easthampton, Mass., under whose care he imbibed his first desire for military life. He entered West Point Academy in the class of 1857, and held the post of first captain of cadets for three years. After graduating he had charge of the Bridesburg arsenal, was thence transferred to Fortress Monroe, and thence to Mount Vernon, Alabama. He subsequently had charge of the Watervliet arsenal a short time, but on the breaking out of the war he applied for active service, and was placed on the staff of Gen. McDowell, at the battle of Bull Run, and was highly complimented for his efficiency in that battle. He was next appointed on the staff of Gen. McClellan, but shortly after was detailed as ordnance officer, by Gen. Butler, to the Department of the Gulf. He distinguished himself at Biloxi, and in the perilous adventure up the Tangipahoa river. He was a brave and skilful officer, and was honored and trusted by the men under his command. At the assault on Fort Wagner, he commanded the assaulting column, and led it with the judgment and courage of a veteran.

July —.—**NAZER**, Lieut.-Col. of the New York Mounted Rifles, died at Washington, of typhoid fever. He had acquired some distinction in the British army, having been an officer of the 90th Light Infantry. After leaving the British army, he was for some time treasurer of the Winter Garden, in New York. On the breaking out of the war, he accepted the position of lieutenant-colonel of the New York Mounted

Rifles, with which regiment he continued to serve up to the period of his death, and was on the eve of receiving the full colonelcy. He was an able officer, and his soldierly acquirements and high sense of honor won for him the respect and esteem of his whole division.

July —.—**CHILTON**, Dr. **JAMES R.**, an eminent chemist of New York, died at Yonkers. He had a wide reputation as an analytical chemist, and was employed much of his time in scientific investigations connected with judicial proceedings.

Aug. 4.—**TENBROECK**, Hon. **PETER**, died at his residence in Farmersville, Cattaraugus county, aged 73 years, 45 of which were passed in that place. He was a heavy dealer in cattle, and accumulated a large fortune thereby. In 1862 he was county judge, and agent of the Holland Land Company. In his will a provision of \$50,000 was made for building and endowing an institution of learning to be located at Franklinsville.

Aug. 5.—**HOWARD**, Rev. **BENJAMIN**, died in Reading, Penn. He had been a successful preacher of the gospel for nearly half a century, in different States and in the British provinces, having organized more than 40 churches, and baptized over 3,000 believers.

Aug. 11.—**NAUMAN**, Lieut.-Col. **GEORGE**, an officer of U. S. volunteers, died at Philadelphia, in the 61st year of his age. In 1819 he entered the Military Academy at West Point, and in 1821 was acting assistant professor of French in that institution; in 1823 he graduated, and was commissioned brevet second lieutenant in the 2d regiment of artillery, and the same year received his full second lieutenancy in the 1st regiment of artillery; was appointed assistant commissary of subsistence, in March, 1828, and was assistant instructor of French at the Military Academy, from September, 1828, to August, 1829. In May, 1832, he was promoted to first lieutenant. He served in the Florida war, where he distinguished himself, particularly in the battle of "Wahoo Swamp." He served throughout the war with Mexico under Generals Taylor and Scott, and was twice promoted for "gallant and meritorious conduct." He commanded the 1st regiment of artillery; was "Commissioner of Prizes" at Vera Cruz, at the close of the war, and conducted the evacuation of that city by the U. S. army. He commanded Fort Washington, on the Potomac, from 1848 to 1852; served on the Pacific coast, from May, 1854, to January, 1861, having been promoted major of the 3d artillery; was inspector of artillery for the Department of Oregon and California, from May, 1858, to January, 1861, and for some months conducted the Artillery School at Fort Vancouver. He was promoted to the lieutenant-colonelcy of the 1st artillery, July, 1861, and was chief of artillery at Newport News, Va, in March, 1862, during the engagement with the "Merrimac," "Yorktown," "Jamestown," and other Confederate steamers. For the last year he was stationed at

Fort Warren, in the harbor of Boston, engaged in preparing that work for a state of suitable defence. He was on the eve of promotion to a full colonelcy of artillery, and was on the way to Lancaster to visit his children, when he was attacked by sunstroke, and died in a few hours.

Aug. 12.—EMMETT, THOMAS ADDIS, son of Thomas Addis Emmett, and nephew of the famous Robert Emmett, died at Astoria, L. I., aged 65 years. He was a native of Ireland, and came to this country early in life, studied law, and pursued his researches in that line with so much earnestness and assiduity, that he soon rose to a high rank in his profession. For many years he held the position of master in chancery, an office requiring the most profound knowledge of the intricacies of law, and which he filled most honorably. Naturally of a modest and retiring disposition, he shunned political distinction, and passed through life in a quiet, unobtrusive way, leaving behind him a record worthy of his name. Within eighteen months of his death, he lost three sons in the service of the Union, and these severe bereavements, it was supposed, hastened his end.

Aug. 14.—MORRIS, Commodore HENRY W., an officer of the United States navy, died in New York city in the 58th year of his age. He was a son of the late Thomas Morris, a conspicuous member of the New York bar, and subsequently United States marshal for the southern district of that State, and grandson of the celebrated Gouverneur Morris of Revolutionary memory. The subject of this notice entered the navy as midshipman, Aug. 21st, 1819. He was first stationed at the Brooklyn Navy Yard, but in 1820 he was ordered to the corvette Cyane, from thence to the sloop-of-war Ontario, and next to the frigate Constitution, at that time cruising in the Mediterranean. From 1828 to 1833, under the commission of lieutenant, he distinguished himself in various positions. From 1839 to 1845 he was on special duty in New York city, passing through six degrees of official promotion during the term of six years. He was then appointed to the command of the storeship Southampton, at that time belonging to the African squadron. In 1846 he was again ordered to the Brooklyn Navy Yard, where for the next five years he was awaiting orders. In the mean time he was promoted to the rank of commander, and in 1851 was appointed to the command of the rendezvous in New York until 1853, when he was ordered to the sloop-of-war Germantown, belonging to the Brazilian squadron. In 1855 he was transferred to the Mediterranean station, where he served as fleet-captain under Commodore Stringham. Upon his return to America, he received in 1856 his commission as captain. Toward the close of 1861 he superintended the construction of the steam sloop-of-war Pensacola at the Washington Navy Yard. In Jan. 1862, the Pensacola, under his command, successfully passed the line of Confederate batteries on the Potomac, and after

anchoring a short time in Hampton Roads, set sail to join the blockading squadron in the Gulf of Mexico. The Pensacola took a brilliant part in all the attacks upon Forts Jackson and St. Philip, and upon the Chalmette batteries. After the capture of New Orleans, Commodore Morris was intrusted with the duty of holding the city and guarding the adjacent coasts. Under his many arduous duties his health became seriously affected, and after resisting for a time the entreaties of his friends, he was persuaded to come North to recruit his strength, but died soon after his arrival.

Aug. 14.—WELCH, Brig. Gen. BENJAMIN, JR., an officer of U. S. volunteers, died at Cincinnati of congestive fever acquired during the campaign in Mississippi. He was formerly a citizen of Ohio, but more recently of Columbia, Penn. He served during the war with Mexico, and for gallant conduct in the battle of Buena Vista was promoted to a lieutenantancy. At the commencement of the war he entered the service as lieutenant-colonel of the 45th Pennsylvania, was subsequently promoted to the colonelcy of the regiment, and during 1863 was made a brigadier-general.

Aug. 16.—BELL, Col. B. L., an officer of the regular army, died at Baltimore from debility, caused by hard service, aged 63 years. He was in the Florida and Mexican wars, and was twice brevetted for gallant services. After the termination of the latter, he served for many years on our Western frontier. He was in command as general in California, after its annexation to the United States, and while so serving, built all the forts from the western frontier of Texas to the Pacific. He served two years at Vancouver's Island, and after the war broke out, was ordered to Baltimore as mustering officer, and was subsequently placed on the retired list, in consequence of inability to perform active service. He had two sons in the Union army, and one in the Confederate service.

Aug. 17.—ROGERS, Commander GEORGE W., killed during the attack on fort Wagner.

Aug. 21.—GURLEY, Hon. JOHN A., ex-member of Congress from Ohio, died in Cincinnati, Ohio, aged about fifty years. He was first known to the public as a Universalist clergyman in Cincinnati, and editor of "The Star of the West." He retired from the ministry about 1850, and entered into secular business. In 1854 the Nebraska struggle called his attention to politics, and in 1856 he was the republican candidate for Congress in the 2d district, but was defeated. In 1858, however, he was successful, and again was elected in 1860. At the close of the late Congress, President Lincoln appointed him Governor of Arizona, and he was preparing to go thither when he was overtaken by the disease which terminated his life.

Aug. 23.—HAVEN, Mrs. ALICE B. (NEAL), a well known authoress, died at her residence in Mamaroneck, Westchester county, N. Y., aged 35 years. She was a native of Hudson, N. Y.,

her maiden name being Emily Bradley. While a young school girl she wrote several brilliant sketches, under the signature of Alice G. Lee, for "The Saturday Gazette," a Philadelphia weekly, edited by Mr. Joseph C. Neal, who subsequently became her husband, and, at his request, she substituted the name of Alice for that of Emily. Upon his death in 1847, a year after their marriage, she assumed the editorial charge of that journal; and conducted it successfully for a number of years, at the same time contributing, both in prose and verse, to some of the leading periodicals of the day. She was the author of a work entitled "Gossips of Rivertown," published in 1850; also of a large number of juveniles. She was married in 1853 to Mr. Samuel L. Haven.

Aug. 24.—BARTLETT, JOHN SHERREN, M. D., founder of "The Albion" weekly newspaper, published in New York, died at his residence in New Jersey, aged 73 years. He was a native of Dorsetshire, England, received a medical education in London, and on the recommendation of Sir Astley Cooper was appointed surgeon in the British navy in 1812. During his passage to the West Indies in the *Swallow*, he was captured by the United States frigates *President* and *Congress* under Commodore Rodgers, and was taken as prisoner of war to Boston, where he was under surveillance until his discharge in 1813. At the close of the war he married a lady of Boston, and commenced the practice of his profession in that city. He subsequently removed to New York, and in 1822 established "The Albion," widely known as an organ of English conservative politics in this country. After conducting this journal for a period of twenty-five years, he relinquished the editorship of it and established a paper of similar character in Boston, "The Anglo-Saxon." He subsequently undertook the publication at Liverpool of "The European," designed to furnish a weekly summary of foreign news for American circulation. In 1857 he was British consul in Baltimore.

Aug. 26.—FOOTE, MRS. CAROLINE AUGUSTA, widow of the late Admiral Foote, died at New Haven, Conn., in the 47th year of her age. The husband, wife, and two children have died within a year.

Aug. 27.—FLOYD, HON. JOHN B. (*See FLOYD, J. B.*)

Aug. —.—BOWEN, Major-General JOHN S., an officer in the Confederate service, died in Raymond, Miss. He was a native of Georgia; graduated at West Point in July, 1853, and was appointed brevet second lieutenant of Mounted Rifles. He resigned May, 1856. At the time of the capture of the State militia by General Lyon, at Camp Jackson, Mo., he was in command of one of the regiments, and was afterward exchanged for some of the Lexington prisoners, when he entered the Confederate service regularly.

Aug. 28.—SWORMSTEDT, LEROY, D. D., died in Cincinnati, Ohio. He was born in Mary-

land, Oct. 4th, 1798. In 1817 he was a merchant's clerk in Cincinnati, and the following year became a travelling preacher by joining the Ohio Conference. For eighteen years he traversed the large circuits and districts of the West with wonderful diligence and marked success. In 1836 he was made assistant, and in 1844, chief agent of the Methodist Episcopal Book Concern at Cincinnati, where he remained until obliged to retire from active service in 1860. He was distinguished for his rare executive ability. His preaching was methodical, and often powerful. He was scrupulously punctual to all his engagements, and in the management of the Book Concern he displayed uncommon talent and energy, and his efforts to extend its business and promote its interests were attended with the most gratifying success.

Aug. 30.—BRADISH, HON. LUTHER W. (*See BRADISH, L. W.*)

Aug. 30.—NEWCOMB, HARVEY, D. D., died in Brooklyn, aged 60 years. He was born in Thetford, Vt., and in 1818 removed to Alfred, N. Y. When less than sixteen years of age he commenced teaching school, and continued in that occupation most of the time for eight years. In the spring of 1826 he became publisher and editor of a newspaper in Westfield, N. Y., where he remained two years and then removed to Buffalo and edited the Buffalo "Patriot" nearly two years. In 1830 and 1831 he published the "Christian Herald" at Pittsburg, Pa., and a paper for children, and for nearly ten years from that period was mainly engaged in writing Sabbath school books. In 1840 he was licensed to preach the Gospel, and the following year had charge of the Congregational church at West Roxbury, Mass., and subsequently was pastor of the churches at West Needham and Grantville. In 1849 he returned for a season to editorial life, being assistant editor of the "Daily Traveler" for about a year, and of the New York "Observer" two years. In the fall of 1859, having spent several years in writing, establishing mission Sabbath schools in Brooklyn, N. Y., and preaching to the Park Street Mission church of that city, he was installed over the Congregational church in Hancock, Pa., where he continued to labor as long as his health allowed him to remain in active life. He was the author of not less than 178 volumes, a great majority of which had special reference to the wants of children and youth, and had a large circulation; among these were fourteen volumes of Church history. According to a calculation made several years ago, the circulation of his works had reached nearly sixty-five millions of pages. His largest work was the "Cyclopedia of Missions."

Aug. —.—RIPLEY, Brig.-Gen. ROSWELL SABIN, died in Charleston, S. C. He was a native of Ohio, and appointed cadet from that State in 1839; graduated 7th in his class, and was appointed brevet second lieutenant 3d artillery, July, 1843; became second lieutenant in the 2d artillery in 1846, and first lieutenant, March 3d,

1847. He was aide-de-camp to Gen. Pillow in 1847 and 1848; was brevetted captain for gallantry at Cerro Gordo, and major for gallantry at Chapultepec. In 1853 he resigned his commission and retired to private life. At the outbreak of the war he entered into the service of the Southern Confederacy; took a prominent part in the siege of Fort Sumter, and was wounded at the battle of Antietam. He was the author of "The War in Mexico" (2 vols., New York, 1849).

Sept. 4.—Greeley, Col. JOSEPH, died at his residence in Nashua, N. H., in the 80th year of his age. He was a native of Hudson, N. H., entered into trade in Nashua in 1813, and retired in 1826. He was a man of much public enterprise, was one of the projectors of the Nashua cotton mills; the Nashua, Lowell, and Wilton railroads; the Taylor's Falls Bridge; president of the Indian Head Bank, and a holder of many civil offices. He was also a founder and active member of the Unitarian church in Nashua.

Sept. 5.—UNDERWOOD, Major EDMUND, an officer in the U. S. service, died in Utica, N. Y., aged about 37 years. He served with distinction in the Mexican war; and, on the 3d of March, 1848, received a commission of second lieutenant in the 4th regular infantry. Since the close of that war he has been most of the time on duty in California and Oregon. In May, 1862, he was promoted from a captaincy to a majority in the 18th United States infantry. At the time of his death he was mustering and disbursing officer for the northern district of New York.

Sept. 9.—PURPLE, Hon. NORMAN H., formerly Judge of the Supreme Court of Illinois, died of dropsy at Chicago. He was one of the leading lawyers of the West, and was remarkable for the profound nature and extent of his judicial learning. In politics he was of the Douglas school of the democracy, and was at one time a prominent candidate for the position of United States senator.

Sept. 13.—SEYMOUR, ISAAC, president of the Bank of North America, died suddenly, while attending divine service at Trinity church, New York. He was a valuable citizen, distinguished alike for his generous liberality, his spirit of public enterprise, and his lofty patriotism. He was a prominent vestryman of Trinity church, as well as of St. Peter's church, in Peekskill, his summer residence. He was also treasurer of the Board of Missions of the Protestant Episcopal Church, and was at one time president of the Westchester County Bank.

Sept. 17.—BRODHEAD, Hon. RICHARD, ex-United States senator, died in Pennsylvania. He was born in Pike co., Pa. He was a member of the State Legislature in 1837; was a representative in Congress from 1843 to 1849, and senator from 1851 to 1857, where he occupied a prominent position.

Sept. 17.—PEASE, CALVIN, D.D. (*See PEASE, CALVIN.*)

Sept. 19.—HEG, Col. HANS C., acting brig.-gen. of United States volunteers, was killed at Chickamauga, aged 34 years. He was a Norwegian by birth, and came with his father to the United States, when but 11 years of age, and settled in Wisconsin. In 1849, during the gold excitement, he went to California by the overland route, and after a stay of two years returned, and, purchasing a piece of land near Milwaukee, engaged in farming and mercantile pursuits until 1859, when he was elected by the Republican State Convention of Wisconsin to the office of commissioner of State Prisons. In 1861 he entered into the military service of his country, as major of the 4th Wisconsin militia, and, on the 30th of September of the same year, was commissioned colonel of the 15th regiment of Wisconsin volunteer infantry, composed mostly of Scandinavians. This regiment formed part of the forces under Gen. Pope in the reduction of Island No. 10; and was afterward attached to Col. Buford's brigade, with which it participated in the surprise and capture of Union City, Tenn.; it also took a prominent part in the battle of Chaplin Hills, near Perryville, Oct. 8th, 1862. With Gen. Buell's army, Col. Heg joined in the pursuit of Gen. Bragg's forces out of the State of Kentucky, and when the former was superseded by Gen. Rosecrans, he continued his command, and participated in the contests at Stone river and Murfreesboro. On the 29th of April he was placed in command of the third brigade of Davis's division, M'Cook's (twentieth) army corps, of the army of the Cumberland. With this brigade he took part in all the movements of the twentieth corps, resulting in the evacuation of Shelbyville, Tullahoma and Chattanooga, and at Chickamauga, where he fell at the head of his forces, on the second day of the fight.

Sept. 20.—HELM, Brig.-Gen. BEN. HARDIN, an officer in the Confederate service, was killed at Chickamauga. He was a native of Kentucky, and was appointed from that State to West Point in 1849. In 1851 he was brevetted second lieutenant 2d dragoons, and resigned October, 1852. In 1861 he joined the State guards under Gen. Buckner, and afterward went over with him to the Confederate service. He served in Gen. Bragg's army as colonel at Shiloh, and was soon after promoted to the command of a brigade. He was in the battles of Perryville and Stone river, commanding a division in the latter, as he did also at Chickamauga.

Sept. 20.—HOOD, Major-Gen. JOHN B., an officer in the Confederate service, reported killed at Chickamauga. He was a native of Kentucky; was born not far from 1830; graduated at West Point in 1849, and was appointed brevet second lieutenant 4th infantry in 1853, and second lieutenant 2d cavalry in 1855. He commanded a detachment in conflict with the Comanches and Lipans near the head of San Pedro river, Texas, and was wounded. In

August, 1858, he was made first lieutenant. He was still serving in this capacity when, by the acts of the late Gen. Twiggs and some of his officers, the United States troops in Texas were handed over to the secession authorities, and was one of the officers who participated in the movement. He succeeded in raising a regiment mainly of Kentuckians for the Confederate service, and was soon after appointed brigadier-general, and commanded a brigade throughout most of the year 1862 in Gen. Johnston's, afterward Gen. Bragg's army. In the spring of 1863 he joined the army of Virginia, and when Gen. Stuart was placed in command of Stonewall Jackson's corps, he was promoted to the command of the cavalry corps, and made a major-general. At the battle of Gettysburg he commanded the largest division in Gen. Longstreet's corps, and was severely wounded; but recovering, returned to his division, which at this time had been ordered with the rest of Gen. Longstreet's corps to Georgia, and fell in the battle of Chickamauga.

Sept. 20.—JONES, Lieut.-Col. WILLIAM G., an officer of the U. S. volunteers, died at Chattanooga, from wounds received at the battle of Chickamauga, aged 28 years. He graduated at West Point in 1860, and, after the usual respite, was ordered to join his company of the 8th infantry—to which he was attached as brevet second lieutenant—then serving in Texas. He participated in several Indian skirmishes; and at San Antonio was taken prisoner. In the fall of 1860 he became second lieutenant in the 10th infantry, and in the following spring was promoted to first lieutenant. In March, 1862, he was selected as aide-de-camp to Gen. Andrew Porter, then provost marshal general of the army of the Potomac, which post he filled, with ability, until he was appointed lieutenant-colonel of the 71st Pennsylvania volunteer infantry, and, the colonel being absent, took command of the regiment. In the battles of Peach Orchard, Glendale, White Oak Swamp, and Allen's Field, the regiment under his command won itself much honor; and for his conduct on these occasions he was rewarded with the brevets of captain and major. He was subsequently aid upon the staff of Major-General Sumner, in which capacity he distinguished himself at South Mountain and at Antietam. After the death of General Sumner he was appointed to the colonelcy of the 89th Ohio infantry; and it was, while ably commanding this regiment of Crook's brigade, that he fell fighting nobly at the head of his men.

Sept. 20.—LYTLE, Brig.-Gen. WM. HAINES, an officer of U. S. volunteers, was killed at Chickamauga, Ga. He was born in Cincinnati, Ohio, Nov. 2d, 1826, and his ancestors, for several generations, were noted as military men. He graduated with distinction at Cincinnati College; studied law, and, during the Mexican war, entered the military service of his country as a lieutenant of an independent company of

foot soldiers. On the 21st of December, 1847, he was promoted to the captaincy, retaining his command until the regiment was disbanded, July, 1848. At the conclusion of the Mexican war he resumed the practice of his profession, and was soon after elected to the Ohio Legislature. Subsequently he was chosen major-general of the first division of Ohio militia, a position previously held by both his father and his grandfather. At the outbreak of the present war he accepted the colonelcy of the 10th Ohio volunteers, which, by its desperation in the fight, won the title of the "Bloody Tenth." He participated in the battle of Rich Mountain, where he won much honor. At Carnifex Ferry he commanded a brigade, and largely contributed to drive Gens. Floyd and Wise from that part of Virginia; and here he was severely wounded. When scarcely recovered, he returned to the field and first took the command of the Bardstown Camp of Instruction, and then of the 17th brigade under General O. M. Mitchel, participating in the brilliant operations along the Memphis and Chattanooga railroad. At the battle of Perryville he was again wounded, and fell into the hands of the enemy, but, after a week's captivity, was exchanged. For his gallant conduct he was made brigadier-general of volunteers, in the spring of 1863; and from that time to his death served under Gen. Rosecrans. In addition to his talents as a soldier, he was a poet of much merit, though from his extreme modesty few of his productions have found their way into print. He fell at the battle of Chickamauga, by a bullet which pierced his brain, as he was gallantly leading a charge.

Sept. 29.—GRUND, FRANCIS J., a well known author of Philadelphia, died suddenly in that city, of apoplexy, aged about 60 years. He was a native of Germany, but since arriving at the age of manhood, had resided almost entirely in the United States. He was a frequent contributor to some of the public papers of the day. In 1837 he published a work called "The Americans in their Moral, Social, and Political Relations." In 1839, appeared a work called "Aristocracy in America, from the Sketch Book of a German Nobleman," which he was understood to have written. He had a foreign appointment under President Buchanan, and when the war broke out, was consul at Havre. Soon after, he returned to this country and became editor of a new paper entitled "The Age," published in Philadelphia. A short time previous to his death, he withdrew from that establishment, as his views differed from those of his associates and the line of policy marked out for the paper. The evening previous to his death he made an able speech at the Union League in Philadelphia. His death was induced by his excitement from the supposed danger of an assault by a mob. He had gone to a police station to obtain protection when his alarm brought on an apoplectic attack, from which he died in about ten minutes.

Sept. 29.—PAGE, YELVERTON P., clerk of the United States Senate, died in Washington. He contracted the illness which terminated his life by ministering to the comfort, during the whole of a stormy night, of a regiment of soldiers who, being without shelter, had been compelled to remain upon the sidewalk in front of his house.

October 1.—EMMONS, EBENEZER, M. D. (See EMMONS, E.)

Oct. 2.—HUNT, Major E. B. (See HUNT, E. B.)

Oct. 6.—SUMNER, EDWIN V. (See SUMNER.)

Oct. 7.—HAYWARD, GEORGE, M. D., died at his residence, in Pemberton Square, Boston. He was a son of Dr. Lemuel Hayward, formerly a distinguished physician and surgeon of Boston, and was born in that city, March 9th, 1791. He was fitted for college at the Public Latin School, and graduated with distinction at Cambridge in 1809. After studying the profession of medicine, he established himself as a physician in his native city, acquired an extensive practice, and attained to an eminence equal to that of his father. In 1835 he was appointed professor of clinical surgery in the Medical School of Harvard University, which chair he held until 1849. He spent several years in Europe, and enjoyed a reputation there for skill in surgery, which reflected credit upon America. He was for several years president of the Massachusetts Medical Society, and was also a member of the American Academy of Arts and Sciences. In 1852 he was elected a member of the corporation of Harvard College, which important trust he held at the time of his death.

Oct. 14.—COOK, Brig.-Gen. HENRY F., an officer in the Confederate service, was killed at Bristow Station. He was a native of Mississippi; served in the Mexican war as first lieutenant in Jefferson Davis's regiment of Mississippi volunteers; distinguished himself in the battle of Monterey, where he was wounded, and commanded Co. C in the battle of Buena Vista. He had joined the Confederate army early in the war, and had risen by successive promotions to the rank of brigadier-general in 1863.

Oct. 14.—FLOY, JAMES, D. D. (See FLOY, JAMES.)

Oct. 16.—WAYLAND, JOHN, D. D. (See WAYLAND, JOHN.)

Oct. —.—DIMMOCK, Brig.-Gen. CHARLES, an officer in the Confederate service, died in Richmond. He was a graduate of West Point, and served in the United States army for fifteen years. At the commencement of the war he resigned and joined the Confederate army, where he filled the office of Chief of the Ordnance Department of Virginia.

Oct. 18.—RUFFIN, Col. THOMAS, an officer in the Confederate service, died at Grace Church Hospital, Washington, from wounds received at the battle of Bristow Station. He was a native of North Carolina, but for a number of

years was a citizen of Missouri, residing at Bolivar, Polk co., and was at one time State attorney for that judicial circuit. Subsequently he returned to his native State from which he was elected to Congress.

Oct. 18.—VIELE, Gen. JOHN J., an officer of the N. Y. State militia, died at Eagle Bridge, Rensselaer county, N. Y., aged 55 years. He was a lawyer by profession, and a man of much political influence throughout the county and State. His death was unexpected, and caused deep sorrow to a wide circle of friends.

Oct. 19.—HOYT, Hon. JAMES G., Judge of the Supreme Court of the 8th Judicial District of New York, died at his residence in Buffalo.

Oct. 19.—SAVAGE, Hon. JOHN, Chief Justice of the Supreme Court of the State of New York, died at Utica, aged 84 years. He held the office of chief justice for fourteen years, and had a high reputation as a jurist, while as a citizen he was honored for his integrity and personal worth.

Oct. 22.—DARCY, JOHN S., M. D., died in Newark, N. J., of paralysis, in the 76th year of his age. He was a native of Morris county, N. J., and was born in Hanover township, February 24th, 1788. His father having been for years the most eminent physician of that county, he entered upon the study of medicine with him and succeeded to his large practice, in which he met with great success. In 1832, the epoch of the first appearance of the Asiatic cholera in this country, he removed to Newark, N. J., and by his skill and promptness in the treatment of that terrible disease, and by his devotion to his patients and sympathy with their sufferings, he soon attained a practice more extensive and exacting than any other in the State, and which finally impaired his own remarkably vigorous constitution. He was very early in life a member of the State Legislature, and subsequently, before removing from Morris county, U. S. marshal for New Jersey—appointed to that office by Gen. Jackson. He continued to hold this appointment during Mr. Van Buren's administration. He exerted great influence in his party in the State, but was averse to holding office. On the incorporation of the New Jersey Railroad Company he was elected its president, and held the office till his death, a period of over thirty years. In 1849 he made an overland journey to California, merely for the improvement of his health; but, though the expedition was otherwise a success, his health was rather injured than benefited by it. He was for many years a prominent member of the masonic fraternity, and for some years held the office of grand master of the Grand Lodge of the State.

Oct. 22.—PUTNAM, Prof. JOHN N., died on board the steamer Alpha, on her passage between Halifax and Boston, aged 40 years. He graduated at Dartmouth College in 1843, and was subsequently tutor and professor of the Greek language and literature, in his alma mater. Intense application had impaired his health, and he had made a voyage to Halifax

in the hope of regaining it; but it was too late, and he succumbed to his disease, on the return voyage. He was regarded as one of the best, if not the best Greek scholar in the United States.

Oct. 29.—ELLET, Col. CHARLES RIVERS, commander of the Mississippi marine brigade, died at Bunker Hill, Illinois, aged about 22 years. He was a son of the late Col. Charles Ellet, an accomplished engineer and the originator of the ram fleet, and was born in Philadelphia. To a thorough education he had added the advantages of foreign travel and a brief residence in Paris. He had made choice of the medical profession, and at the outbreak of the war was engaged in pursuing the requisite studies, in which he had already made such progress as to fill competently the place of assistant surgeon in one of the military hospitals. Preferring to follow the fortunes of his father he accompanied him westward in the spring of 1862, and commanded one of the rams at the action of Memphis, in which the elder Ellet received the wound which soon after proved fatal. After his father's death, on the organization of the Mississippi marine brigade by his uncle, now Gen. Alfred W. Ellet, he was promoted to a colonelcy, and when his uncle was commissioned brigadier-general of land troops, he was placed in command of the marine brigade. Choosing the ram *Queen of the West* as his headquarters, he made many daring expeditions on the Mississippi. He succeeded in running the Confederate batteries at Vicksburg, and was for some time engaged in cruising between that stronghold and Port Hudson. On the 10th of February, 1863, he started upon an expedition up the Red river, during which he captured the Confederate steamer *Era* No. 5 and some other vessels, and after ascending the river for some distance with success, his vessel was run aground by the pilot, in such a position that she was disabled by the fire from a Confederate fort, and fell into the hands of the enemy; Col. Ellet, however, made his escape upon a bale of cotton and was picked up by the *De Soto*. During and after the siege of Vicksburg, Col. Ellet and his command rendered much valuable assistance to Gen. Grant, in keeping open his communications, and while engaged in these operations his health became so seriously affected by the noxious vapors of the river as to make it necessary to retire for a season to Illinois to rest. His death, which was the result of the disease he contracted, was very sudden.

Oct. 31.—BLENKER, LOUIS, brigadier-general of U. S. volunteers, died in New Jersey, aged 51 years. He was born in the city of Worms, in the Grand Duchy of Hesse Darmstadt, and in his youth was apprenticed to a jeweller, but upon his majority enlisted in the Bavarian legion which was raised to accompany the newly-elected King Otho to Greece. From a private he rose to a sergeant, and when the legion was disbanded in 1837, received with his

discharge the rank of lieutenant. With this rank he returned to Worms, whence he went to Munich to attend medical lectures with the view of becoming professor of medicine. Subsequently he changed his mind and entered into commercial pursuits. In 1849 he became a leading member of the revolutionary government in his native city, and having been appointed commander of the national guards, took an active part in the popular struggle of that period. After the revolutionary movement had been crushed he retired to Switzerland, and, being ordered to leave the country, he embarked at Havre for the United States, and settled on a farm in Rockland county, N. Y. Subsequently he removed to New York city, where he engaged in commerce until 1861. Upon the commencement of the war he raised the 8th regiment of New York volunteers, with which he marched to Washington, having been commissioned its colonel May 13th, 1861. After being encamped for some time on Meridian Hill, the regiment was incorporated with others into a brigade, of which Col. B. was appointed commander. The brigade was then attached to Gen. McDowell's army as a portion of Col. Miles's 5th division. During the battle of Bull Run this division acted as a reserve, and for his services at that time he was commissioned a brigadier-general, August 9th, 1861. He remained with the army of the Potomac, commanding a division, until the commencement of the Yorktown campaign, when he was ordered to Western Virginia. Gen. Blenker participated in the battle of Cross Keys, June 8th, 1862, but was shortly after relieved of the command and was succeeded by Gen. Sigel. He was then ordered to Washington, where he remained for some time, and on March 31st, 1863, was mustered out of service.

Nov. 6.—FITZ, HENRY, a telescope-maker, died suddenly in New York city, aged 55 years. He was born in Newburyport, Massachusetts, and commenced life as a printer, but having an inventive genius, became a locksmith, at which trade he worked for many years. In 1835 he made his first reflecting telescope, and, in the winter of 1844, invented a method of perfecting object-glasses for refracting telescopes, making the first one of the bottom of an ordinary tumbler. In the autumn of 1845 he exhibited, at the fair of the American Institute, an instrument which brought him into the favorable notice of eminent astronomers, and from that time he devoted himself exclusively to the business of telescope making with unparalleled success. Continually progressing in size, he finally succeeded in making instruments of 16 inches aperture, one of which is now in the possession of Mr. Van Duzer of Buffalo. He made two of 13 inches, one for the Dudley Observatory at Albany, and the other for an association of gentlemen at Allegany City, Pa. There is also one of his make, of 12 inches aperture, in the observatory at Ann Arbor, Michigan, and he had completed another for the Vassar Fe-

male College. Several of the size of 8 and 9 inches are scattered over the country. The British Chargé d'Affaires at Montevideo has a 9-inch glass; and a very fine instrument of 6 inches aperture was ordered by the United States Government for Lieut. Gilliss's expedition to Chili, and is now in the observatory of the Chilean Government. The methods of Mr. Fitz were entirely of his own invention, and so delicate as to detect the change in form, by expansion, of an object-glass, effected by passing the finger over it on a frosty night. When seized with his final illness, he was about to go to Europe to select a glass for a 24-inch telescope, and to procure patents for a camera, involving a new form of lenses, having all the advantages of Harrison's globe-lens at a much less cost. His death is a great loss to science.

Nov. 7.—SKINNER, ELISHA W., assistant State librarian at Albany, died in that city. He was a native of Connecticut, and was born about 1790; was a printer by trade, but subsequently edited and published a paper in Hartford, Conn. After leaving Hartford he removed to Albany, N. Y., and published in connection with Mr. Webster, the Albany "Gazette," and afterward became proprietor of "The Daily Advertiser."

Nov. 12.—LANE, Hon. GEORGE W., U. S. District Judge of Alabama, died at Louisville, Ky. He was a refugee from that State, on account of his Union principles.

Nov. 14.—KENNADAY, JOHN, D. D., a clergyman of the Methodist Episcopal Church, died in Brooklyn, N. Y. He was born in the city of New York, November 3d, 1800. In early youth he became a printer, diligently cultivating his mind, and pursuing a course of initial legal studies in his leisure hours. In 1822 he was converted, under the labors of Rev. Heman Bangs, and the following year entered the travelling ministry of the M. E. Church, by joining the New York Conference. He remained in the ministry up to the day of his death, filling many of the most important pulpits in the New York, Philadelphia, and New York East annual conferences, with very great acceptability. He was a member of two General Conferences, and was distinguished for his geniality, gentlemanly deportment, eloquence both in the pulpit and on the platform, and great purity of character.

Nov. 15.—POSEY, Brig.-Gen. CONRAD, an officer in the Confederate service, died at Charlottesville from a wound received at Gettysburg. He was a native of Mississippi, and was made a brigadier-general early in 1863. He was an officer of much military talent.

Nov. 18.—ABBOTT, Hon. CHAUNCEY M., died at his residence in Niles, Cayuga county, N. Y. He was a native of Niles, and was born in 1822. In 1857 he was elected to the Assembly, and in 1859 was re-elected. In 1861 he was chosen to the Senate, and in the session of the following year was chairman of the Committee on Poor Laws, and a member of the Committees

on Internal Affairs of Towns and Counties, Agriculture and Expenditures. He was highly respected for his integrity of character and sound judgment. His death resulted from the fatigue and exposure which he underwent during the canvass of 1863.

Nov. 20.—BRONSON, Hon. DAVID, died at the house of his son, Rev. Benjamin S. Bronson, St. Michael's parish, Talbot co., Maryland. He was a native of Maine, born in 1799, graduated at Dartmouth College in 1819, was member of Congress from the Norridgewock district from 1841 to 1843, and afterward for many years Judge of the Supreme Judicial Court of his native State.

Nov. 21.—CUSHMAN, Hon. HENRY W., died at Bernardstown, Massachusetts. He was born in that town in 1805; entered the State Legislature in 1857, and was lieutenant-governor in 1851 and 1852. He was esteemed one of the most liberal and useful citizens of the State, and was noted for his interest in the intellectual and religious progress of the age.

Nov. 21.—STEVENSON, THOMAS B., a prominent politician and distinguished editor of Kentucky, died at Maysville, Ky. His disease was softening of the brain.

Nov. 23.—RANSOM, Hon. ELIAS, died at his residence, Lockport, N. Y. He was born in Berkshire county, Mass., in 1795. While very young he removed with his father's family to Buffalo, where he remained until 1822, when he went to Lockport, and for many years was successfully engaged in the practice of law. He was successively district attorney, a member of Assembly, and county judge. His failing health obliged him to retire from public life some years since, and his last illness was long and severe. He was a man of strict integrity, and in every relation of life was honored and esteemed.

Nov. 24.—ELLIOTT, Major GILBERT MALLESON, of the 102d regiment, N. Y. volunteers, was killed at Lookout Mountain. He was born in Connecticut in 1840, and removed to New York in early childhood. In 1857 he became a member of the Free Academy, and at once took the highest stand in scholarship and deportment, receiving the gold medal at four successive commencements, and the valedictory oration at his graduation. On the completion of his studies, he was impressed with a strong desire to enter into the service of his country, and in October of that year was commissioned first lieutenant. At Antietam he won himself much honor, and soon after was appointed ordnance officer in the 2d division of the 12th army corps, where he rendered most effective service during the battles of Chancellorsville and Gettysburg. Having previously received the rank of captain, he was subsequently appointed major, and was soon after placed in actual command of his regiment, both of his superior officers having been wounded. In September, 1863, the 12th army corps was transferred from the army of the Potomac to

the army of the Cumberland, and in the storming of Lookout Mountain, his regiment held the right of Geary's division in Gen. Hooker's first line of battle. During the hottest part of the engagement Major Elliott leaped upon a rock, either to cheer his men or for purposes of observation, and immediately received a ball from a sharpshooter, causing speedy death.

Nov. 25.—SANDERS, Brig.-Gen. WILLIAM P., an officer of U. S. volunteers, died at Knoxville, Tenn., of wounds received in the battle at Campbell's Station. He was a native of Kentucky; graduated at West Point in 1856; and entered the service as brevet second lieutenant 1st dragoons, and was transferred to the 2d dragoons in May, 1857. Soon after the commencement of the war, he was made captain of a company in the 6th regular cavalry and took an active part in the peninsular campaign. He subsequently accepted the office of colonel of a volunteer regiment in Kentucky, and performed many valuable services in the West. A few months previous to his death, he was appointed brigadier general of volunteers, and was assigned to the command of the first division of cavalry in East Tennessee. He was a brilliant officer, a true patriot, and a thorough gentleman.

Nov. 26.—SHORT, LEVI, inventor of the celebrated Greek Fire, died in Philadelphia. Since the outbreak of the war he had been actively engaged in perfecting his invention and bringing it into practical use.

Nov. 26.—WELLES, CORNELIUS M., died at Big Meadow Mining district, Los Angeles co., California. He was born in Wethersfield, Conn., in 1828, and in his boyhood was a clerk in a bookstore in Hartford, Conn., and subsequently for a short time engaged in the book-selling and publishing business. In 1851 he became interested in the establishment of Ragged or Mission Schools in Hartford, and in 1852 visited California, where he acted for some time as a lay missionary in some of the mining districts. He subsequently visited Australia, and in 1855 returned to Hartford. He there soon organized a city mission school, and exerted himself with great success for the benefit of the poor, ignorant, and vicious population of that city for several years. His health failing, he made a voyage to South America, and at Buenos Ayres and Rio Janeiro organized mission schools, which he subsequently handed over to missionaries who came to those parts, and in December, 1859, returned, by way of England, to New York. Here, within two weeks after landing, he had organized a mission school among the ignorant and vicious poor of the Seventeenth Ward; and this organization, which, in a few months, under the name of the Beulah Mission, grew into a Sunday school, a free-day school, a regularly maintained religious service three times a week, and a charity for the honest but unfortunate poor, accomplished a large amount of good. In the summer of 1862 he was com-

pelled by impaired health to seek a warmer climate, and accepting an appointment as missionary to the freedmen in Washington, D. C., he established several schools for their instruction, and while directing these, gave every moment of leisure he could command to the work of visiting and ministering to the sick and wounded soldiers. In the battle of Cedar mountain, in those before Washington during Gen. Pope's campaign, at South mountain and Antietam, at Fredericksburg, Chancellorsville, and Gettysburg, he was always on the field, one of the first to care for the wounded soldier, to staunch his wounds and administer cordials and food, as well as to give spiritual solace to those who were destined to speedy death. In September, 1863, he sailed for California, and was on his way to Arizona, when he died after a very brief illness.

Nov. 27.—DEMPSTER, JOHN, D. D., a clergyman of the Methodist Episcopal Church, died at Evanston, Ill. He was born in the town of Florida, N. Y., Jan. 2d, 1794. He began life in an humble sphere, but after his conversion in 1812, he gave himself to study with great diligence. In 1816 he became an itinerant preacher by joining the Genesee Conference, and soon distinguished himself by the earnest power and ability of his preaching, and his sound judgment. After laboring several years in Western New York he went to Buenos Ayres as a missionary, where he was engaged for six years. On his return he was stationed in the city of New York, and in 1847 removed to Concord, N. H., where he became one of the founders and professors of the Biblical Institute. In 1854 he removed to Evanston, Ill., to inaugurate a Biblical Institute at that place, and was senior professor of the latter institution at the time of his death. He was a member of seven general conferences, was a hard student, a superior preacher, and a successful educator of young men.

Nov. 28.—ROTCH, Col. FRANCIS M., died at his residence in Morris, Otsego co., N. Y., aged 41 years. He received a thorough education in his youth, and, upon arriving at maturity, combined with his fondness for the quiet pursuits of agriculture a lively and intelligent interest in public affairs. He served in the Senate of 1860 and 1861 with distinction, and at the close of his senatorial term, received an appointment upon Gov. Morgan's staff. The duties imposed upon him were arduous, and in their prosecution he was often obliged to visit the regiments in the field, and while thus employed was seized with an illness, from which he never fully recovered, and which finally terminated in an attack of congestion of the brain.

Nov. —.—RAND, EDWARD SPRAGUE, a prominent citizen of Newburyport, Mass., died in that city, aged about 81 years. He was born in Newburyport, and was educated at the Dummer Academy, after leaving which he entered his father's store as a clerk. When about 18

years of age he was sent to Europe as supercargo, and before he was twenty-one, was established as a commission merchant in Amsterdam. Here he resided several years, embracing the period of the French occupation of Holland. After leaving Amsterdam he made several voyages; among others to the Canary Islands and Havana, and again to Amsterdam, where after remaining two years he returned home. He soon left again for Russia, and on his return from St. Petersburg in 1810, his vessel loaded with iron was shipwrecked on the Naze, the southern cape of Norway, and being unable to obtain a passage home, he was obliged to remain and endure the rigors of a Norwegian winter. After this he remained at home for a time and subsequent to the declaration of peace in 1815, was for many years engaged in the East India trade. In 1821 he, in connection with some others, purchased a woollen mill at Salisbury, now known as the Salisbury Mills, and of which he was for a long time president. In 1827 he withdrew from commerce, and entered more largely into manufactures. From 1827 to 1835 he was president of the Mechanics' Bank, Newburyport. He was for several years in the House of Representatives and Senate. He was a devoted member of the Episcopal Church, and often delegate to the General Episcopal Convention.

Nov. —.—DUNOAN, Brig.-Gen. JOHNSON K., an officer who died in the Confederate service. He was a native of Pennsylvania; entered West Point in 1845, and upon his graduation was appointed brevet second lieutenant 2d artillery; was transferred to the 3d artillery, Oct. 1849, as second lieutenant, and in Dec. 1853 was made first lieutenant. He resigned Jan. 31st, 1855, and upon the commencement of the war entered into the Confederate service as colonel. He was appointed brigadier-general from Louisiana, and commanded Forts Jackson and St. Philip at the time of the bombardment by Flag Officer Farragut.

Dec. 2.—PIERCE, Mrs. JANE M., wife of ex-President Pierce, died at Andover, Mass. She was born in Hampton, New Hampshire, March 12th, 1806. In 1834 she was married to Hon. Franklin Pierce, then of Hillsboro, who was serving his first term in Congress. Her fine natural endowments were developed by a careful and generous culture, which eminently fitted her for the exalted position to which she was called during her husband's administration, and her piety, chastened by affliction in the loss of all her children, was of that elevating and refining nature which exerted a powerful influence over her wide circle of friends. During the last years of her invalid life she found much physical relief, as well as enjoyment, in foreign travel, and in residence near the mountains and seashores of New England. Her death was a peaceful and fitting close to a life of uncommon purity and devotion to the happiness and good of others.

Dec. 4.—WHISTLER, Col. WILLIAM, an officer of the U. S. army, died at his residence in Cincinnati, at a very advanced age. He was a native of Maryland, but appointed to the army from the Northwest Territory, June 8th, 1801. He was the oldest army officer in the United States, with the exception of Gen. Scott, having been in service for more than 60 years. At the date of his retirement from service, October 9th, 1861, he was colonel in the 4th infantry.

Dec. 10.—INGHAM, CHARLES C., died in New York city, aged 66 years. He was one of a family who had devoted themselves to art, and for many years he and his brother, who survives him, stood in the first rank of American portrait painters. His portraits possessed the rare charm of presenting the sitter in his most characteristic position, and his happiest mood, developing hidden graces of expression only known to those who were in the most intimate relations with him.

Dec. 13.—GREEN, Gen. THOMAS J., an officer in the Confederate service, died at his residence in Warren county, N. C., aged 62 years. He was a general in the Texan war of independence, a member of the Texan Congress, the leader of the Mier expedition, one of the band of "Mier prisoners," and subsequently historian of that transaction. He was afterward a State senator in California, and major-general of the militia in that State.

Dec. 16.—BUFORD, Maj.-Gen. JOHN. (See BUFORD, JOHN.)

Dec. 17.—VAN BRUNT, Commodore GERSHOM J., of the U. S. navy, died at Dedham, Mass., aged 63 years. He was a native and a citizen of New Jersey, and entered the service November 3d, 1818. He received his commission of commodore, July 16th, 1862, was in command of the Minnesota, which sailed from Boston soon after the commencement of the war, and took an active part in the reduction of the Hatteras forts, and in the blockading service at Hampton Roads. Subsequently he was intrusted by the Government with the supervision and equipment of Gen. Banks's New Orleans expedition, and at the time of his death was acting under the orders of the War Department as inspector of transports for the New England district. He was highly esteemed in the navy for his talents as an officer as well as for his intrinsic worth.

Dec. 18.—MAY, JAMES, D. D., Professor of the Divinity School, Philadelphia, died in that city after a short illness.

Dec. 21.—BAINE, Hon. A. C., died at Clifton, Lander county, Nevada Territory. He was born at Raleigh, North Carolina, September 21st, 1810. He removed to California not far from 1849, and settled at Stockton, in which city he practised his profession of lawyer, winning the respect and esteem of the bar by his scholarship and integrity of character. Until 1857 he was a devout Presbyterian, but at that period he embraced the Catholic faith, adhering to the rigid performance of the most minute detail of the discipline and regulations of the church.

He was the author of a work entitled "Divine Faith and Natural Reason," published in 1861, and at the time of his death had nearly completed a volume entitled the "Relations of Human Liberty to Natural, Moral, and Divine Law."

Dec. 22.—CORCORAN, Brig.-Gen. MICHAEL. (See CORCORAN, MICHAEL.)

Dec. 22.—SMITH, Rev. L. WARD, died at Germantown, Penn. He was born in Rochester, N. Y., from which place he was sent to the Assembly in 1849. In 1851, he was appointed adjutant-general of the State, serving until 1853, when he assumed orders in the Episcopal Church. At the time of his death he was rector of the Episcopal church at Germantown, Penn.

Dec. 23.—TAPPAN, BENJAMIN, D. D. died at Augusta, Maine.

Dec. 25.—CHEW, Prof. SAMUEL, of the Maryland University, died at his residence in Baltimore.

Dec. 31.—VANDERBILT, Capt. GEORGE W., son of Commodore C. Vanderbilt, died at Nice, in the 25th year of his age. He graduated at West Point in the spring of 1860, and immediately entered the regular army with the rank of 2d lieutenant. He was first stationed at Fort Walla-Walla, in Washington Territory, where he remained until the war broke out, when he was ordered to Boston to take charge of the recruiting service at that place. In the spring of 1862 he received an appointment on the staff of Brig.-Gen. Tyler as assistant adjutant-general, with the rank of captain. He was regarded by his superiors as an officer of great promise. While in the discharge of his duties he contracted a disease incident to exposure in an unhealthy region, and resisting the importunities of his superior to accept a furlough for the recovery of his health, he was soon beyond the reach of medical skill. In the spring of 1863, finding himself seriously ill, he obtained a furlough, and left for Europe, where he secured the best medical advice, but too late; he continued to sink, and died the last day of the year, lamented by a large circle of relations and friends.

OBITUARIES, CANADIAN.—*Jan.* —, 1863.

—MONTCALM, GOZON, Marquis de, the grandson of the commander-in-chief of the French forces at the conquest of Canada by the British. He had watched with much interest the honor rendered in Canada to the memory of his illustrious ancestor on the occasion of the inauguration of a cenotaph in the church of the Ursulines. The intelligence of the erection of another monument, to commemorate the second battle of the Plains of Abraham, he had received with feelings of deep emotion; and in a letter written to a friend says: "Were I not so much advanced in years, it should be my wish to live and die in a country which preserves with so much veneration the memory of the heroes of France."

Jan. —.—KENNEDY, REED J. S., secretary

to the Church Society at Toronto, C. W. Died at Toronto in January, 1863.

Jan. —.—NELSON, HORACE, M. D., a son of Dr. Wolfred Nelson, of Montreal. Was a professor in McGill University.

Feb. 11.—EVANS, THOMAS C. B. This deceased general officer had served an active military career in the four quarters of the globe—in the East and West Indies, France, South and North America, Spain, Malta, and Egypt. He was military secretary to Sir Gordon Drummond during the war of 1812, and was present at many of the engagements between the British and American forces. Removing to Canada some years previous to his death, he contributed largely to some of the educational and charitable institutions of that province, and took a deep interest in the founding of Huron College, C. W.

Feb. 19.—MONDELET, Hon. DOMINIQUE, President Judge of Three Rivers, C. E. Died at Three Rivers on 19th February, 1863, at the age of 64 years.

Feb. 28.—SMITH, Hon. HOLLIS, member of the Legislative Council of Canada for the electoral division of Wellington. He was a native of New Hampshire, but resided in the Eastern Township of Canada from boyhood, and enjoyed the general respect and confidence of the community. He was one of the trustees of the University of Bishop's College, Lennoxville, C. E., and was returned to Parliament in 1856 at the first elections which took place after the passing of the bill, in the Canadian Legislature, making the Legislative Council an elective body. Died at Sherbrooke, 28th February, 1863.

March —.—KNOWLTON, Hon. PAUL HOWARD, a life member of the Legislative Council of Canada. Col. Knowlton was born in the year 1787, and was for upward of 35 years engaged in political life. He was appointed a member of the Special Council by Sir John Colborne (afterward Lord Seaton), and in 1841, on the union of the provinces, was called by Royal Mandamus to the Legislative Council. He was colonel commanding Militia District No. 10. He resided in the Eastern Township, where he took a lively interest in all questions affecting the public welfare. He had been mayor of Knowlton (a village named after him), and warden of the county of Brome.

April —.—HARWOOD, Hon. ROBERT UNWIN, was born at Sheffield, England, on the 22d of January, 1798. He came to Canada in 1821. Entering political life, he was called to the Legislative Council of Lower Canada, by Lord Aylmer, the then governor general. During the administration of Lord Sydenham, at the Union, he was appointed a member of the Special Council. He married the eldest daughter of the late Hon. M. de Lotbiniere, Seigneur of Vaudreuil, Rigaud and Lotbiniere; and for some years retired from the arena of politics. At the general election of 1857 he was returned to the Legislative Assembly for the county

of Vaudreuil, and sat for that constituency until 1860 when he was returned to the Legislative Council for the division of Rigaud. He was lieutenant-colonel of the 1st battalion Vaudreuil militia, but some months prior to his death, he threw up his commission with disgust at the policy pursued by the Canadian administration in conducting militia affairs. His death occurred in the beginning of April, 1863. He is buried in Mount Royal Cemetery, Montreal.

April 12.—FRANCHÈRE, GABRIEL. The last survivor of the founders of the colony of Astoria. Mr. Franchère was born at Montreal, in 1786. He joined the Astoria expedition under the guidance of John Jacob Astor. Washington Irving's charming book entitled *Astoria*, written at the request of the father of the expedition, contains a faithful and elegant history of the expedition and its results. Mr. Irving quotes copiously and in flattering terms from Mr. Franchère's work on the same subject. The American war of 1812 having forced Mr. Astor to give up sending recruits to his settlement, its abandonment was decided on; and Mr. Franchère on his way to Canada, in 1814, crossed the Rocky Mountains. In 1842 he was admitted as a partner in the American Fur Company; he subsequently joined the firm of Messrs. P. Chouteau & Fils, and at the time of his decease he was the senior partner of the house of G. Franchère & Cie, of Montreal. In 1858 there were but three survivors of the Astoria expedition, viz.: Alfred Seaton, vice-president of the "Sun" Mutual Insurance Co., Ramsay Crooks, a merchant, and Mr. Franchère. The two former died in 1859. Mr. Franchère's ancestor had come to Canada as assistant in a French ship. He was the uncle of Hon. Mr. Justice Laberge, of Lower Canada. His death took place at the residence of his son-in-law, Hon. John S. Prince, St. Paul, Minnesota, 12th April, 1863.

April. —BELANGER, SOLOMON, a Canadian by birth, and an old travelling companion of Sir John Franklin, the arctic explorer. Belanger had rendered Sir John a most signal service, having, as appears by the journal of that officer, succeeded on one occasion in saving his life. He died in the parish of St. Jacques de l'Archigan, C. E., toward the end of April, 1863.

May 18.—WALKER, HON. WILLIAM, D. C. L., a life member of the Legislative Council of Canada. Mr. Walker was born in Scotland, and came to Canada in the year 1815. He occupied a distinguished position as a Canadian merchant. He was a partner in the firm of Forsyth, Richardson & Co., of Montreal, and of Forsyth, Walker & Co., of Quebec. He was part owner and one of the building committee of the sea-going steamer *Royal William*, constructed at Quebec, which was the first steam vessel that crossed the Atlantic Ocean. In 1848 he retired from business, but previous to this, in 1839, he had been appointed a member of the Special Council. In 1842 he

was called to the Legislative Council by royal mandamus. He had been presented by the Earl of Durham with a commission as major in the militia for having raised and commanded the Quebec Volunteer Rifle Corps. He was the first chancellor of the University of Bishop's College, Lennoxville, C. E., which conferred upon him the honorary degree of D. C. L., first president of the Quebec and Rivière du Loup Railway Company, before its amalgamation with the Grand Trunk; president of the Quebec Board of Trade, and of the Bank of Montreal; and Deputy Master of the Trinity House. He married Margaret, the eldest daughter of the late Hon. Matthew Bell, of Three Rivers. Died at Quebec 18th May, 1863.

June 30.—BROWN, PETER, was born about 1784. In his earlier years he was a merchant in Edinburgh, Scotland, and an active politician on the liberal side during the time of the borough-reform agitation. In 1838 he emigrated with his family, and resided five years at New York. While there he was for a time on the editorial staff of the "Albion," and subsequently became editor of the "British Chronicle." He also published a work called the "Fame and Glory of England Vindicated," intended as a reply to a publication of Mr. C. E. Lester, styled "The Shame and Glory of England." In 1843, at the request of the prominent clergymen and members of the Presbyterian Church of Canada, Mr. Brown removed to Toronto, where he established the Toronto "Banner" as an independent organ of liberal Presbyterian views. This journal was edited for many years with great vigor and ability. From 1844 to 1849 Mr. Brown also contributed largely to the editorial columns of the "Globe." For a year previous to his death, he had been in feeble health, which ended in an attack of congestion of the lungs. The day previous to his death was the 79th anniversary of his birth, and the 50th of his marriage. Mr. Brown was a man of superior attainments, as a writer clear and logical, and in private life displaying qualities which gained him the esteem of a large circle of friends. He was the father of the Hon. George Brown, the Canadian publicist and statesman, and proprietor of the Toronto "Globe." His death occurred on Tuesday 30th June, 1863.

July 29.—JEFFREY, HON. ANDREW, a member of the Legislative Council of Canada, born at Foulden, in Scotland, on the 17th February, 1800. Having emigrated to Canada in 1819, he settled in Cobourg, C. W., the following year, and there resided till his death. By industry and perseverance he established a hardware business, which gradually became large and prosperous. In 1860, he obtained a seat in the Legislative Council, at the first popular election for the division of Newcastle. He was a man of considerable information, calm judgment, and strict integrity. He died at Cobourg 29th July, 1863.

August 1.—GOURLEY, ROBERT, born in Scotland in 1778. He came to Canada in the

month of July, 1817. In 1822 he published a work called a "General Introduction to a Statistical Account of Upper Canada with a view to a Grand System of Emigration." Having incurred the displeasure of the Government by his political principles, he was ordered to quit the province within six months as a seditious person. This order he refused to obey, whereupon he was arrested and lodged in Niagara jail. While awaiting his trial, he continued his vehement opposition to the executive. Being at length found guilty of refusing to obey the order, he was compelled to retire to the United States, whence he soon after proceeded to England. He died at Edinburgh, on the 1st of August, 1863, in the eighty-fifth year of his age. The *Toronto "Globe,"* in announcing his decease, said: "This is the last of an able and honest man, who once played a prominent part in Canada in defence of the right of free speech and printing, in opposition to a tyrannical faction."

August 8.—ELMSLEY, HON. JOHN, R. N., a strong supporter of the Church of Rome in Upper Canada. Captain Elmsley was a son of a former chief justice of the Western Province, from whom he inherited a large property, and nephew of the late Admiral Sir Benjamin Hallowell. He was born in Elmsley House, Toronto, in 1801, and at an early age entered the royal navy. After his retirement from the service he took a leading part in the public affairs of the province. He was called by royal mandamus to the Legislative Council, and sat as a member of that body until the union of the two provinces. On his marriage with Miss Sherwood, a Catholic lady, he renounced the faith of his family and went over to the Church of Rome. Henceforth he was a most munificent patron of Catholicism; he established the House of Providence at Toronto, and in a great measure was instrumental in founding the College of St. Michael in the same city. He also established the first Roman Catholic school in Upper Canada. Died at Toronto 8th August, 1863.

August —.—CRAIGIE, WILLIAM, M. D., born on the 11th of March, 1799, at Belnaboth, parish of Powrie, Aberdeenshire, Scotland. He came to Canada, settled at Ancaster in 1834, and removed to Hamilton in 1845. He studied for the medical profession at Mareschal College, Aberdeen, the Universities of Edinburgh and Dublin, taking degrees in all. The doctor was a ripe scholar, probably one of the first in U. C., and held a high position as a scientific authority in meteorology, botany, horticulture, and agriculture. His efforts as a meteorologist were chronicled for many months in the columns of the *Hamilton "Spectator;"* and he frequently lent assistance to a scientific journal published in connection with the Smithsonian Institute at Washington. He was a member of the Board of Arts and Manufactures of C. W., and of the *Hamilton Horticultural Society.* He died at Hamilton, C. W., in August.

Sept. 18.—FREER, CORTLAND, was born in Quebec, on the 31st of October, 1831. He was the second son of Noah Freer, for many years cashier of the Quebec Bank. He was educated at the Upper Canada College, Toronto, where he gained high honors, taking a first exhibition while under 13, and also the Wellington Scholarship. He graduated at the Toronto University, and the degree of M. A. was subsequently conferred upon him at a convocation of Bishop's College, Lennoxville, C. E. It was intended that he should follow the legal profession, but his own tastes induced him to prefer civil engineering. He was actively employed during the construction of part of the St. Lawrence and Atlantic railroad, and was afterward one of the division engineers. When this line had been transferred to the Grand Trunk, he continued in connection with the latter company, and finally became superintendent of the eastern district, between Montreal, Quebec and Rivière du Loup. He commanded a company of volunteer engineers. In 1856 he married a daughter of Mr. Justice Sicotte. The surviving issue is a daughter and two sons. He died after a short illness, on Friday, 18th September, 1863, at his residence, Point Levi.

Nov. 2.—ECCLES, HENRY, Q. C., an eminent barrister of Upper Canada. Mr. Eccles was born at Bath, England, in 1817. His father, Capt. Hugh Eccles of the 61st, who died a few years ago, was for a long time a resident of Canada, having settled there after the Peninsular war, in which he lost an arm. While his father was living at Niagara, Henry studied law in the office of Mr. James Boulton. He never attended any public school, but was educated entirely by his father, who was a gold medallist of Trinity College, Dublin. He was called to the bar in Easter term, 1842; was elected a bencher of the Law Society in 1853, and appointed Queen's counsel in 1856. He soon attained a leading position at the bar; and for a long time was engaged, as counsel, in nearly every case of importance. He appeared to great advantage before a jury. Tall, well-proportioned and erect, his personal appearance was imposing, and his voice was musical and well managed. He had a wonderful faculty of making a point clear to the comprehension of an average jury, and the simplicity of his style was one of the great sources of his success. Under his manipulation, the most complicated case became clear and easy of comprehension. He was also famous as a special pleader; and not less so for his power of extorting truth from a witness. His astute appreciation of evidence enabled him to seize upon the strong as well as the weak points, and to make the most of both. He had been in partnership with Mr. Carroll, in Toronto, since 1854. In 1842 he married Jane, fourth daughter of Capt. Francis Lelievre, A. C. G., Canada; by whom he had one son, Francis Hugh Eccles. He died at his residence in Toronto, on the 22d of November, 1863.

OBITUARIES, EUROPEAN.—*Jan. 7.*—**BIBBY, THOMAS**, called "Scholar Bibby," died at Kilkenny, Ireland, aged 64 years. He commenced his education at a grammar school in Kilkenny, entered Trinity College, Dublin, at an early age, and obtained a scholarship. When but thirteen years of age he carried off the gold medal for science at a college examination, where he had a host of competitors. His love of the classics, however, went far beyond that of science, and he became one of the best Greek scholars of the day. In his collegiate course he held a distinguished place, but the extreme eccentricity of his character proved an effectual bar to his attaining any public position. Some of his relatives placed him in a private lunatic asylum in Dublin; but he was soon released, and thenceforth passed an utterly secluded and solitary life among his books. Though possessed of a considerable income, he lived in the greatest penury, denying himself many of the common necessities of life in order to gratify his mania for book buying. From garret to cellar his house was filled with books—books on all subjects, of all ages, and all countries, many of them allowed to decay from damp, moths, and worms. Even the staircases were covered with books as well as the kitchen, scullery, and cellar. The shutters of his house were always closed, and he seldom left it, save upon the Sabbath, when he attended the noonday service at the cathedral; if by chance he slipped out, it was usually in the evening and for the purpose of attending to some book purchases. He published two dramatic poems, "Gerald of Kildare," in 1854, and "Silken Thomas," in 1859.

Jan. 17.—**VERNET, HORACE.** (*See VERNET.*)

Jan. 31.—**LANSDOWNE, Marquis of.** (*See LANSDOWNE.*)

Feb. 28.—**MAUBOURG, La Comtesse ANASTASIE DE LA TOUR**, daughter of the famous Marquis de Lafayette, died at Turin, Italy. She was born in Paris, July 1st, 1777. She shared her father's captivity in the citadel of Olmutz, and, on her return to France, married Comte de la Tour-Maubourg. Since 1848 she had lived in Turin, and occupied herself exclusively in relieving the poor.

March 13.—**HUGHES, EDWARD HUGHES BALL**, died at St. Germain. He was long a resident of that retreat, and in the days of George IV. was one of the leading dandies. He was called "Golden Ball," and figured in the best society of London, among whom his fortune and favorable personal appearance made him a welcome guest. He married the celebrated dancer of the day, Mdle. Mercandotti, and departed at once for the continent, and from that time lived in retirement.

March 15.—**DESPRETZ, CESAR M.** (*See DESPRETZ.*)

March 26.—**EGG, AUGUSTUS LEOPOLD**, an English artist, died at Algiers, Africa. He was born in London in 1817, and in 1838 made his

first exhibition of painting at the academy. In 1848 he was elected an associate. In 1844 he executed his well-known picture, "Gil Blas Exchanging Rings with Camilla." In 1850 he produced what is generally considered his best picture, "Peter the Great when he sees Catharine, his future Empress, for the first time." In 1857 he was selected to arrange the gallery of modern paintings at the Manchester Exhibition. In 1859 he exhibited at the Royal Academy a Trilogy, which was highly commended, and the same year a subject from Thackeray's "Esmond."

March 28.—**GRIMALDI, STACEY**, an English barrister, died at Herndon House, Kent. He was born at Greenwich in 1791, was educated for the law, and for upward of forty years practised in Copt-hall Court in the city of London. In 1824 he was elected a fellow of the Society of Antiquaries. In 1834 was appointed to deliver lectures on the "Public Records of the Law Institution," and in 1853 an auditor of the Incorporated Law Society. In 1828 he published his well-known work, "Origines Genealogicæ." He was also the author of several smaller works, and a frequent contributor to the "Gentleman's Magazine" from 1813 to 1861.

April 13.—**FOWLER, DR. RICHARD.** (*See FOWLER, RICHARD.*)

April 14.—**HARCOURT, Admiral.** (*See HARCOURT.*)

April 14.—**LEWIS, Sir GEORGE CORNEWALL.** (*See LEWIS, G. C.*)

April 25.—**HAGAN, Rear-Admiral Sir R.**, an officer in the British navy, died at his residence, Pembroke Road, Dublin. He entered the navy in 1807 in the Surveillance, under the command of Sir George Collier, and remained in that ship until 1813, actively engaged, principally on the north coast of Spain in coöperation with the army, and was present at the siege of St. Sebastian. From 1815 to 1819 he commanded the Princess Royal and Prince Regent, colonial tenders on the west coast of Africa. In 1823 he obtained command of the Thistle gun-brig, in which he was very successful, capturing forty slave vessels, and liberating 4,000 negroes. He was made a commander, May 15th, 1823, and served as Inspector-Commander of the Irish Coast Guard until promoted to a captain's rank in 1843.

May 4.—**HATHERTON, Lord.** (*See HATHERTON.*)

May 8.—**COUCH, RICHARD Q.** (*See COUCH, RICHARD.*)

May 21.—**EARDLEY, Sir CULLING E.** (*See EARDLEY, CULLING E.*)

May 28.—**WILMOT, Rev. ROBERT.** died at Nettlebed Oxon.

May.—**DOST MOHAMMED KHAN.** (*See DOST MOHAMMED KHAN.*)

June 3.—**RUSSELL, JOHN, D.D.**, Canon of Canterbury, and Rector of St. Botolph, Bishopsgate, London, died at the Oaks, Canterbury, aged 76 years. He was educated at Charterhouse School, where he gained the golden

medal of honor in 1801, and from thence was elected student of Christ Church, Oxford, graduating in 1806. In 1810 he was ordained priest, and the following year returned to his school as head master, where he remained for twenty-one years, directing the studies of a vast number of young men, many of whom became distinguished in after life. His character as a teacher was well portrayed by Thackeray, one of his pupils, whose "Greyfriars" is the Charterhouse. In 1827 Dr. Russell was made a Canon of Canterbury, and in 1832 was made Rector of Botolph, Bishopsgate, upon which he resigned his mastership. For thirty years he was also connected with the Clergy Orphan Corporation, and in 1849 was made its treasurer. Dr. Russell was the author of a popular English Grammar (1832); "Rudiments of Latin" (1816); "A Spital Sermon" (1813); *Concio ad Clerum* (1833); and in 1820 edited *Casaubon's Ephemerides*.

June 26.—JEBB, Maj.-Gen. Sir JOSHUA. (See JEBB, Sir JOSHUA.)

July 7.—MULREADY, WM. (See MULREADY.)

July 15.—WILLIAMS, FREDERICK SIMS, Esq., an English barrister, died, aged 51 years. He was author of "Improvements of the Jurisdiction of Equity," published in London, 1852; "Our Iron Roads, their History, Construction, and Social Influences" (8vo., 1852); "The New Practice of the Court of Chancery" (1854; "Thoughts on the Doctrine of Eternal Punishment," with Reference to the Views of the Rev. F. D. Maurice and the Neoplatonists (8vo., 1857); and "The Wonders of the Heavens" (12mo, 1861).

July 28.—NORMANBY, CONSTANTINE HENRY PHIPPS, Marquis of. (See NORMANBY.)

July 29.—CRESSWELL, Sir CRESSWELL, Judge of the Court of Probate, Divorces, and Causes Matrimonial, died at Prince's Gate, Hyde Park. He was born in 1794, educated at the Charterhouse and Emmanuel College, Cambridge, and was called to the bar at the Middle Temple in 1819. Having attained the rank of king's counsel, in 1834, and led the Northern Circuit with an ability which gave him a high reputation, he was, in 1837, returned to Parliament in the conservative interest, as member for Liverpool. In 1842 he was appointed one of the Justices of the Common Pleas, where he sat for sixteen years, and, as a judge, was universally allowed to be one of the ablest and most impartial. In 1858, on the establishment of the new court for the hearing of causes connected with matrimony, divorce, and wills, Sir Cresswell was appointed its first judge, and in that capacity successfully discharged the heavy duty of moulding the practice and procedure of an entirely new and untried jurisdiction. He was apparently in robust health when he was thrown from his horse in St. James's Park, on the 17th of July, fracturing his knee-pan. From this he was rapidly recovering when he suddenly died by disease of the heart, which had been hitherto unsuspected.

Aug. 1.—KOWER, THE MAHARANEE JENDAN. (See KOWER.)

Aug. 7.—BOTFIELD, BERIGH. (See BOTFIELD.)

Aug. 8.—GILBART, JAMES WILLIAM. (See GILBART, J. W.)

Aug. 11.—FIELD, JOSHUA, Esq., an English civil engineer, died at Balham, Hill-house, Surrey, aged 76 years. His attention had been especially directed to the marine engine and to steam navigation, since the year 1816, and he was one of the well known firm of Messrs. Maudslay, Sons and Field, of Lambeth. This establishment took a very prominent part in the prosecution of steam navigation, and engaged to construct engines of adequate power to propel a vessel across the Atlantic, of the necessary size to carry sufficient fuel for the voyage, at a time when many competent authorities doubted its practicability, and the first constructors of the day declined to undertake it. The engines were completed and fitted on board the "Great Western" in 1838, at Bristol, and the vessel reached New York in 13 days and 10 hours, thus exceeding the most sanguine expectations of the promoters. In 1817 Mr. Field was one of six young men who founded the Institution of Civil Engineers, of which he was elected president, January, 1848, after having served for some time as vice-president.

Aug. 13.—DELA-CROIX, EUGENE. (See DELA-CROIX.)

Aug. 14.—HARCOURT, ADMIRAL OCTAVIUS VERNON. (See HARCOURT, O. V.)

Aug. 14.—CLYDE, Rt. Hon. COLIN CAMPBELL, Lord. (See CLYDE, Lord.)

Aug. 27.—MILLAR, ALEXANDER, died at Montrose, aged 16 years. He was a native of Arbroath. When a mere child his power of mental calculation was such as to astonish all with whom he came in contact. One of his favorite amusements was in calculating how many seconds any person had lived. His power as a mental arithmetician grew with his growth, and enabled him to carry off the highest prizes at the schools he attended. He was also a very ready rhymester, and was accustomed to relate any ordinary event in rhyme. As his mind increased in vigor his bodily health declined, until he early fell a victim to an overwrought brain.

Aug. —.—ARMELLINI, CARLO, formerly one of the Roman triumvirate, died at Brussels, aged 87 years. Pius IX., soon after his accession to the papacy, in June, 1846, intrusted to Armellini the preparation of the reforms which were effected between 1846 and 1848. When the Pope fled to Gaeta he was fixed on as one of the members of the triumvirate, and on the subversion of the Roman Republic he withdrew from Italy to Belgium, where he spent the remainder of his days.

Sept. 7.—READ, SAMUEL, Esq., member of the late School of Naval Architecture, died at Walthamstow, aged 67 years. In early life he distinguished himself by his scientific attain-

ments, and was honored by being made a member of the Committee of Reference, the Council of Science, and other like committees instituted by successive Governments for the improvement of naval architecture. He assisted materially in the establishment of the Institution of Naval Architects, to the "Transactions" of which he contributed several valuable papers, and, as an acknowledgment of his services, was recently elected to the honorary membership of the society. His published writings upon the higher branches of his profession were numerous and of a very high order, and in particular, the "Reports on Naval Construction" have taken their place amongst the standard works of the shipbuilding profession.

Sept. 8.—BEAUCHAMP, Earl. (See BEAUCHAMP.)

Sept. 14.—GWILT, JOSEPH. (See GWILT, JOS.)

Sept. 16.—KILVERT, Rev. FRANCIS. (See KILVERT, FRANCIS.)

Sept. 17.—COCKERELL, CHARLES ROBERT. (See COCKERELL, C. R.)

Sept. 20.—GRIMM, JAKOB. (See GRIMM, JAKOB.)

Sept. 23.—HOPE, Admiral Sir HENRY. (See HOPE, HENRY.)

Sept. 28.—CHITTY, EDWARD, Esq., an English barrister, died at Waltham-green, aged 59 years. He was called to the bar by the Society of Lincoln's Inn, July 7th, 1829. He was the author of "New Orders of the Court of Chancery," 1831; "Index to Equity and Bankruptcy Cases," 1837; and a portion of a "Digested Index to all the Common Law Reports relative to Conveyancing and Bankruptcy," 1851.

Sept. 30.—BUCKLE, WILLIAM, Esq., vice-president of the Society of Mechanical Engineers, died at his residence, Royal Mint, London, aged 69 years. He was the builder of the first locomotive engine which made the journey from Liverpool to Manchester, and was the contemporary and friend of Watt and Stephenson. He superintended the arrangements of the visit of George IV. to Ireland. Subsequently he became connected with the Soho Works of Messrs. Boulton and Watt, at Birmingham, where he held a responsible post till 1851, in which year he was appointed by Sir John Herschel to an important office in the coining department of the royal mint.

Oct. 8.—WHATELY, Right Hon. RICHARD. (See WHATELY, RICHARD.)

Oct. 12.—LYNDHURST, Lord. (See LYNDHURST.)

Oct. 13.—BILLAULT, AUGUSTE ADOLPHE M. (See BILLAULT.)

Oct. 18.—HOPE, G. W. (See HOPE.)

Oct. 19.—NICHOLS, JOHN BOWYER. (See NICHOLS J. B.)

Nov. 2.—BUNNING, J. B., Esq., an English architect, died at his house in Gloucester Terrace, aged 61 years. His professional training was obtained mostly in the office of his

father, a surveyor, in London. In 1835 his design for the City of London School was selected in a competition, and the building erected under his superintendence was opened in 1837. In the same year he was appointed surveyor to the London Cemetery Co., and subsequently laid out the Nunhead Cemetery, with all the roads and approaches. At this time he was surveyor to the Haberdashers' Company and attended to the erection of a large number of buildings on the Company's estate. In 1841 or thereabouts he was appointed surveyor to the London and County Bank, erecting buildings in Canterbury, Chatham, Brighton, &c. He was surveyor of the Thames Tunnel, Victoria Life Office, and architect of the Bethnal Green Union Workhouse, Chelsea Waterworks, and a mansion in Regent's Park, for the late Baron Vaughan. In 1843 he was elected to the office of clerk of the "City's Works," and in 1847 the designation was changed to that of architect, which important position he occupied for twenty years. He carried into effect many valuable street improvements. In 1849 he completed the Coal Exchange. In 1852 the City Prison, Holloway. In 1853 Billingsgate Market, and in the following year the Freemasons' Orphan Schools, at Brixton; in 1855, the Metropolitan Cattle Market in Copenhagen Fields. In 1858 was commenced the entire reconstruction of Newgate Gaol, and in the same year Rogers's Alms-houses in Brixton. He designed the decorations of the annual banquets of the Lord Mayor, also for the entertainment of the Emperor and Empress of the French, the King of Sardinia, of the same year, and the International Exhibition Ball, July, 1862; also the decorations of the city at the reception of the Princess of Wales—which were unsurpassed by that of any capital in Europe. His death was probably the result of the exposures in superintending these preparations during unfavorable weather.

Nov. 12.—DUNCAN, PHILIP BURY. (See DUNCAN, P. B.)

Nov. 13.—COMONFORT, YGNACIO. (See COMONFORT.)

Nov. 15.—FREDERICK VII., King of Denmark. (See FREDERICK VII.)

Nov. 20.—CONINGTON, FRANCIS THIRKILL, M.A., fellow of Corpus Christi College, Oxford, died at Boston, aged 35 years. He had held the office of scientific examiner in the University, and for some years had been a contributor to periodicals. He was the author of the "Handbook of Chemical Analysis," published in 1858, which has taken its place among the text-books of the subject.

Nov. 20.—ELGIN, Lord. (See ELGIN, Lord.)

Dec. 4.—HARDING, DUFFIELD J., an English artist, died at Barnes, Surrey, aged 65 years. He was a native of Deptford, was apprenticed to an engraver, but studied for an artist, and at the age of 18 received the silver medal from the Society of Arts. He was one of the first to work on stone with a brush instead of a crayon, whereby greater facility in labor was

ensured. He was the author of a work entitled "Sketches at Home and Abroad," published in 1836, and was one of the principal members of the Old Society of Painters in water colors.

Dec. 13.—GREEN, JOSEPH HENRY, F. R. S., a distinguished English surgeon, died at Hadley. He was born in 1791, and received his professional education at St. Thomas's Hospital, was admitted a member of the Royal College of Surgeons in 1815, and in 1818 joined Sir Astley Cooper as joint lecturer on anatomy and physiology. In 1820 he became a surgeon to St. Thomas's Hospital, and delivered lectures on surgery and pathology. He was remarkable for his skill in operating, especially for lithotomy. In 1830 he was appointed to the professorship of surgery in King's College, and the following year wrote a pamphlet called "Distinction Without Separation," addressed to the president of the Royal College of Surgeons, proving that the distinction usually recognized between physician and surgeon does not really exist. In 1855, on the death of Mr. Lynn, surgeon to the Westminster Hospital, and a member of the Council of the College, Mr. Green was unanimously elected to the chair, and in 1840 was requested by his colleagues to deliver the annual Hunterian oration, afterward published at their suggestion under the title "Vital Dynamics," and again, in 1847, he became Hunterian orator, and published the lectures under the name of "Mental Dynamics." In 1846, on the resignation of Sir Benjamin Brodie, he was elected a member of the Court of Examiners, and in 1849 obtained the honor of the president's gown. At the time of his death he was president of the Council of Medical Education and Registration of the United Kingdom.

Dec. 24.—THACKERAY, WILLIAM M. (*See THACKERAY.*)

OHIO. Quite an excitement of a political nature existed in Ohio during a portion of the year. It was occasioned by the arrest of Clement L. Vallandigham. (*See HABEAS CORPUS.*) The Democratic State Convention, which assembled at Columbus, on June 11th, nominated him for Governor, and George E. Pugh for Lieutenant-Governor. It also adopted a series of resolutions, declaring in the preamble that the Democratic party has ever been and still is a law-abiding party, and asks nothing but its rights under the Constitution and laws; it neither resorts to nor countenances a violation of either; it claims all the guarantees of public and private liberty, and the right to discuss public measures, and to propose and advocate that policy which it deems best for the nation, and to have its policy passed upon by the people at an untrammelled election, &c. It then resolved that the foundation of all free government is the will of the people, to give effect to which, free thought, free speech, and a free press are absolutely indispensable; that it is an inherent and constitutional right of the people to discuss

all measures of the Government, and to approve or disapprove of them; that these are their rights in time of war as well as of peace, and that they will not surrender these rights nor submit to their forcible violation; that there is a manifest difference between the Administration of the Government and the Government itself: the one consists of civil and political institutions created under the Constitution, the other consists of the agents of the people subject to their approval or condemnation; that they protest against the emancipation proclamation as unwise, unconstitutional and void, and are also opposed to compensation out of the Federal Treasury; that the powers recently assumed by the President under the guise of military necessity, relative to martial law and the suspension of the writ of habeas corpus, are unwarranted by the Constitution; that they will hail with pleasure and delight any manifestations of a desire to return to the Union by the seceded States; that the warmest thanks of the nation are due to the soldiers; that Ohio will adhere to the Constitution and the Union as the best, and it may be the last hope of human freedom; that they hail with pleasure the manifestations of conservative sentiments among the people of the Northern States exhibited in the elections; that a convention should be held to amend the constitution as soon as practicable, and that they will earnestly support every Constitutional measure tending to preserve the Union. They further resolved:

That the arrest, imprisonment, pretended trial, and actual banishment of Clement L. Vallandigham, a citizen of the State of Ohio, not belonging to the land or naval forces of the United States, nor to the militia in active service, by alleged military authorities, for no other pretended crime than that of uttering words of legitimate criticism upon the conduct of the Administration in power, and of appealing to the ballot box for a change of policy (said arrest and military trial taking place where the courts of law are open and unobstructed and,) for no act done within the sphere of active military operations in carrying on the war, we regard as a palpable violation of the following provisions of the Constitution of the United States:

1. "Congress shall make no law * * * abridging the freedom of speech or of the press, or the right of the people peaceably to assemble, and to petition the Government for a redress of grievances.

2. "The right of the people to be secure in their persons, houses, papers, and effects against unreasonable searches and seizures, shall not be violated, and no warrant shall issue but upon probable cause, supported by oath or affirmation, and particularly describing the place to be searched and the persons or things to be seized.

3. "No person shall be held to answer for a capital or otherwise infamous crime, unless in a presentment or indictment of a grand jury, except in cases arising in the land or naval forces, or in the militia when in actual service in time of war or public danger.

4. "In all criminal prosecutions, the accused shall enjoy the right to a speedy and public trial by an impartial jury of the State and district wherein the crime shall have been committed, which district shall have been previously ascertained by law."

And we furthermore denounce said arrest, trial, and banishment as a direct insult offered to the sovereignty of the people of Ohio, by whose organic law it is declared that "no person shall be transported out of the State for any offence committed within the same."

That Clement L. Vallandigham was at the time of his arrest a prominent candidate for nomination by the Democratic party of Ohio for the office of Governor of the State; that the Democratic party was fully competent to decide whether he was a fit man for that nomination, and that the attempt to deprive them of that right by his arrest and banishment, was an unmerited imputation upon their intelligence and loyalty, as well as a violation of the Constitution.

The further resolutions request the President to restore Mr. Vallandigham to his home; and tender thanks to Gov. Seymour, of New York, for his letter relative to the arrest. (*See NEW YORK*)

That the establishment of a military government over the loyal States, where war does not exist, to supersede the civil authorities and suppress the freedom of speech and of the press, and to interfere with the elective franchise, is not only subversive of the Constitution and the sovereignty of the States, but the actual inauguration of revolution.

That it is the sworn duty of the Governor of the State to protect her citizens in the enjoyment and exercise of all their Constitutional rights; and we have beheld with deep humiliation and regret, not only the failure of David Todd, Governor of Ohio, to perform that duty, but what is still worse, his active participations in the violation of those rights.

That we denounce as traitors to the country the Abolition Jacobins who are seeking to bring about civil war in the loyal States, with the view of turning, if possible, the bayonets of the army against the breasts of the fathers, brothers, and friends of the soldiers, and subjecting those States to a military surveillance and dominion.

A committee was appointed by the convention to correspond with President Lincoln relative to the arrest of Mr. Vallandigham. (*See PUBLIC DOCUMENTS.*)

The Republican Union Convention assembled at the same place, and nominated John Brough for Governor, and Charles Anderson for Lieutenant-Governor, and adopted a series of resolutions declaring that the calamities of the present rebellion were brought on by nullification and secession, which they denounce as incompatible with the unity, integrity, power, and glory of the republic; that the war should go on with the utmost vigor until the authority of the Government is reestablished, and the old flag floats triumphantly over every State; that they lay aside personal preferences and prejudices, and draw no party line except with those opposed to the Government; that, confiding in the honesty, patriotism and good sense of the President, they pledge themselves to support him to put down the rebellion; that gratitude is due to the soldiers; that they sympathize with the army in its hardships, and that all lovers of the Union will stand by it and support the disabled and the families of those who fall fighting for their country.

The election took place on the 13th of October, and resulted as follows in the citizens' vote:

Brough.....	247,190
Vallandigham	185,274

Majority on the citizens' vote..... 61,916

Polls were opened, under a law of the State, in the camps where the soldiers were stationed.

The soldiers' vote was chiefly for Brough. It seems that in the camps at Chattanooga each soldier was required to write his name on the ticket he voted, of which a correspondent of the "Cincinnati Commercial" gives the following account:

The election for State and county officers of Ohio, came off yesterday in the camps of Ohio soldiers, according to the provisions of the Soldiers' Voting Law. Its results are creditable to the patriotism and intelligence of the gallant men from the Buckeye State, who enjoy a full share of the deathless renown of Stone river and Chickamauga. The full returns were not in last evening. Brough had received about 8,000; Vallandigham, 240.

It is a fact worthy of mention in relation to the election, that while out of the large vote cast for Brough, there was not a man who could not write his own name on his ticket, quite a percentage of the Vallandighamers had to make their marks. The 59th, that cast the largest Vallandigham vote, displayed by far the greatest number of illiterate men in its ranks. This fact will be substantiated by a glance at the ballots.

The total vote of the soldiers was as follows:

Brough.....	41,467
Vallandigham.....	2,288

39,179

Add citizens' majority.....	61,920
-----------------------------	--------

Total majority for Brough.....101,099

The total vote of the citizens was 432,464. The total vote of the State in 1862, was 363,087; do. in 1861, 358,791; do. in 1860, 442,441.

The Legislature was divided as follows:

	Senate.	House.
Union.....	29.....	73
Democrat.....	5.....	24

The military force furnished by the State to the army up to December 31st, 1863, was one hundred and twenty-nine regiments of infantry, two companies of guards, eight companies of sharpshooters, twelve regiments of cavalry, one squadron of cavalry, two battalions of six months' cavalry, one regiment and twenty-six batteries of light artillery, and two regiments of heavy artillery. Total, 200,452 men. About 8,000 white and colored soldiers have been recruited in the State for other States.

The State was invaded, during the year, by a force of the enemy under Gen. Morgan. (*See ARMY OPERATIONS.*)

The balance in the Treasury at the close of the year, was \$423,786. During the year, \$676,752 of the public debt was paid off, and the sum of \$153,436 advanced as military expenses to the Federal Government.

The Commissioner of Statistics states the mortgage debt of the citizens for several years past to have been as follows:

1859.....	\$30,747,033	1862.....	\$22,759,253
1860.....	28,738,936	1863.....	19,973,171
1861.....	29,734,966		

The average length of a mortgage is a little over two years. By adding together the amounts of two years before the war, and two years since, it shows that sixteen millions of mortgage debt have been paid off in the last two years, thus:

In 1859 and 1860, mortgage debt.....\$59,485,969
In 1862 and 1863, " " 42,732,421

Decrease of mortgage debt.....\$16,753,545

The same general fact of the diminution of debt is proved by the reduction of suits and judgments at law. This class of statistics is presented in the following table :

Years.	Suits.	Judgments.
1857.....	29,720	17,500
1858.....		18,080
1859.....		17,057
1860.....	25,147	19,938
1861.....	22,604	19,222
1862.....	21,183	18,187
1863.....	13,346	10,912

It thus appears that since 1860, the suits at law have diminished 12,000, or nearly half, and the judgments 9,000, also nearly half.

The following is a statement of the condition of the banks of issue in Ohio at the periods of 1855, 1860, and 1863. Thus:

	No.	Capital.	Circulation.
1855.....	60	\$5,675,740	\$9,151,340
1860.....	55	5,861,364	8,534,887
1863.....	56	5,052,940	6,652,311

	No.	Deposits.	Discount.	Specie.
1855.....	60	\$4,849,209	\$13,079,685	\$1,934,492
1860.....	55	5,210,403	12,247,501	2,000,219
1863.....	56	11,405,439	11,366,451	1,828,591

The general movement from 1860 to 1862 (the period of the war) is as follows:

Decrease of capital..... \$800,424
" of circulation..... 1,832,576
" of discounts..... 831,050
" of specie..... 172,628
Increase of deposits..... 6,195,036

The annual profits of the State in the last ten years, by the construction of her public works, are estimated at \$20,000,000 on the carriage alone, aside from the stimulus given to all kinds of industry. Ohio has more miles of canals and railroads than any other State of the Union, having a route of railroad to every thirteen square miles, while New York has one to every seventeen square miles, and Illinois one to every twenty. The only State equalling Ohio in the production of grain is Illinois, but this State has 16,000 square miles more than Ohio. In the production of animals, of which there were in 1860 8,240,067, Ohio is actually the first. The total value of agricultural products, including grains, wool, hay, and animals, at Cincinnati prices, is estimated at \$136,000,000. Of this amount, more than one half is surplus, so that the value of agricultural exports amounts to \$80,000,000, as ascertained at shipping points of lake, river, canal, and railroads. The wealth of Ohio has doubled in the last ten years. In 1850, it was assessed at \$504,000,000, and in 1860, at \$1,193,898,000, showing an increase of \$600,000,000 in ten years. Twenty years ago the taxes of the State were \$1,890,000, now they amount to \$8,000,000—more than fourfold. This is not an increase of the ratio of taxation, but of taxable property; the valuation of property twenty

years ago being only one ninth of what it is now. The commissioner estimated that Ohio would pay \$16,000,000 of the internal revenue, which, if the other States paid in proportion, would bring the internal revenue up to \$160,000,000 per annum.

Details of the local institutions of the State, will be found in the ANNUAL CYCLOPÆDIA, 1862.

OPELOUSAS, the capital of St. Landry parish, or county, in Louisiana, is situated 50 miles in direct line west of Baton Rouge, and seven miles from the head of navigation on the Courtableau. It is the seat of Franklin College, and contained a court house and other public buildings. It was occupied by Gen. Banks on the 20th of April, 1863.

ORDNANCE. The improvement made in the manufacture of ordnance and projectiles since the spring of 1861, in the United States and in Europe, has been so considerable as to be deserving of record. At the commencement of the civil war, the amount of ordnance in the country was not large, though sufficient for all emergencies which had thus far occurred. The Secretary of War reports that there were in the possession of the United States, at the beginning of the war, 1,052 pieces of siege and sea-coast artillery of all calibers, and 231 pieces of field artillery. These were of a great variety of sizes, and some of them in unfit condition for service. The larger sea-coast artillery were mostly columbiads, or, as they are called in Europe, Paixhan guns—smooth-bore cast iron guns, cast solid and bored. A few were Rodman guns, smooth bores, cast hollow, and with a water core which gave the inner surface of the cannon the character of chilled iron. The smaller guns were of a great variety of patterns and material—cast iron, bronze, and brass, and their projectiles ranging from three to forty-eight pounds. The whole field artillery actively organized consisted of seven batteries, each of four guns, smooth bore, six and twelve pounder howitzers. There was not at that time a single rifled cannon in the United States service. The Navy Department had on hand, on the 4th of March, 1861, 2,966 guns of all calibers. Of these, 1,872, or nearly two thirds, were thirty-two pounders, of six different patterns; 107 were twelve pounders, of two patterns; 29 were twenty-four pounders; 575 were eight-inch guns, of four different patterns; 27 were ten-inch guns; 305 were nine-inch Dahlgrens; 19, ten-inch Dahlgrens, and 32, eleven-inch Dahlgrens. Nearly or quite one half of these guns were captured by the enemy or destroyed, at the burning of the navy yard at Portsmouth, Va. Only 555 in all were on board ships, and of these nearly one fourth were on the ships destroyed at that time. Of the army artillery, it is doubtful if there were 500 pieces in serviceable condition at the command of the Government at the beginning of the war, and in the navy the amount of all calibers did not exceed 1,000. Some of the States, and some private individuals, possessed a few

pieces, usually of small caliber. There had been for some years before the public, several inventions for the purpose of applying the principle of *rifling*, which had been so successful in small arms, to cannon, but none of these had been adopted by the Government, or were in use in the field batteries or forts under the control of the War Department, or in the vessels of the navy. The adaptation of the system of rifling invented by Charles T. James for small arms, was proposed, and repeated experiments were made with it, but it was found to require material modifications, and the death of the inventor by the explosion of his own cannon, in October, 1862, caused the abandonment of the efforts at improvement of that gun. Capt. R. P. Parrott, of the West Point foundry, had invented just previous to the war, a rifled cannon, which, with some improvements in the projectiles and the method of rifling, has proved the most successful of the numerous attempts at producing rifled cannon in this country. It is a muzzle loader (the breech-loading cannon having proved objectionable), and consists of a cast-iron gun, much lighter than ordinary, but having a "reinforce" or cylindrical jacket of wrought iron shrunk around the breech at the seat of the charge. His method of shrinking this cylinder on the cast-iron gun is peculiar. The gun is laid nearly horizontally with its axis, the muzzle being slightly depressed, and when the cylinder is heated and slipped on, a stream of cold water is forced continuously into the bore of the gun, and from its slight depression flows out constantly. By this means the inner surface of the cylinder is cooled soonest, and contracts closely on the gun, drawing the outer surface around it. Six calibers of these guns are made by order of the Government, viz.: 10, 20, 30, 100, 200, and 300 pounders. The following table gives the diameters and length of bore, the weight and relative caliber, of each of the smooth bores:

Size.	Diameter of bore.	Length of bore.	Weight of gun.	Caliber.
10-pdr.....	2.90 in.	70. in.	890 lbs.	3 pdr. sm'th br.
20 ".....	3.67 " "	79. " "	1,750 " "	6 " " "
30 " army..	4.20 " "	120. " "	4,200 " "	9 " " "
30 " navy..	4.20 " "	96.8 " "	3,550 " "	9 " " "
100 ".....	6.40 " "	130. " "	9,700 " "	32 " " "
200 ".....	8.00 " "	136. " "	16,500 " "	8-inch " "
300 ".....		...	26,000 " "	

We give below the ranges of each of the first four sizes at different elevations.

TEN-POUNDER GUN. BORE 2.9 INCHES.				
Ranges with charge of one lb. of mortar powder.				
Elevation.	Projectile.	Range, yards.	Time of flight.	
1°	Case shot, 10½ lbs.	600		
2°	" " "	930	3"	
2½°	Shell, 9½ lbs.	1,100	3½"	
3½°	" " "	1,460	4½"	
4½°	" " "	1,680	5½"	
5°	" " "	2,000	6½"	
6°	" " "	2,250	7½"	
7°	" " "	2,600	8½"	
10°	" " "	3,200	10½"	
12°	" " "	3,600	12½"	
15°	" " "	4,200	16"	
20°	" " "	5,000	21"	

Mortar powder should always be used with this and the next two sizes.

TWENTY-POUNDER GUN. BORE, 3.67 INCHES.			
Ranges with charge of two lbs. of mortar powder.			
Elevation.	Projectiles.	Range, yards.	Time of flight.
1°	Case shot, 19½ lbs.	620	1½"
2°	" " "	950	3½"
3½°	Shell, 18½ lbs.	1,500	4½"
5°	" " "	2,100	6½"
10°	" " "	3,350	11½"
15°	" " "	4,400	17½"

THIRTY-POUNDER SIEGE GUN. BORE, 4.2 INCHES.			
Ranges with ¾ lbs. mortar powder.			
Elevation.	Projectile.	Range, yards.	Time of flight.
3½°	Shell, 29 lbs.	1,500	4½"
5°	" " "	2,200	6½"
10°	" " "	3,500	12½"
15°	" " "	4,800	17½"
20°	" " "	5,700	21½"
25°	" " "	6,700	27"

ONE HUNDRED-POUNDER GUN. BORE, 6.40 INCHES.			
Charge, ten lbs.; number 7 powder.			
Elevation.	Projectile.	Range, yards.	Time of flight.
3½°	Long shell.	1,450	4½"
5°	Long shell.	2,100	6½"
5°	Solid shot.	2,200	6½"
10°	Long shell.	3,520	13"
10°	Solid shot.	3,810	13"
15°	Long shell.	4,790	18"
15°	Solid shot.	5,030	18½"
15°	Hollow shot.	5,190	19"
20°	Long shell.	5,853	21½"
20°	Solid shot.	6,125	22½"
20°	Hollow shot.	6,333	23"
25°	Long shell.	6,820	28"
25°	Solid shot.	6,910	29"
25°	Hollow shot.	7,180	29½"
30°	Short shell.	7,810	32½"
30°	Hollow shot.	7,988	32½"
35°	Hollow shot.	8,453	36½"

The charge for the 8-inch or 200-pounder gun, is 16 lbs. The projectiles weigh about 150 lbs., and the ranges as ascertained in the siege of Charleston, are somewhat greater than those of the 100-pounder. At the greatest elevation the range attained exceeded five miles. The 300-pounder weighs 26,000 lbs., uses a charge of 25 lbs., and a projectile weighing 250 lbs. At an elevation of 35° it has thrown this formidable missile over five and one fourth miles.

The Parrott projectile was designed expressly for the gun. The groove, the twist, the caliber, and the heavy charge for each caliber, are all founded upon the proper adaptation of the projectile to the gun. The length of the shell is equal to three calibers, and is cylindro-conical in form. A brass ring is fitted around the contraction of the base, making it cylindrical. The gas entering between the iron and the brass, forces the latter into the groove, by which the rotary motion is communicated to the projectile. The ring is prevented from slipping off the shell by having the two surfaces in contact corrugated, and by some projections on the upper edge of the ring, which are jagged into the metal of the shell. Great simplicity, accuracy, and strength are the crowning merits of this gun.

For siege purposes, for attacks on fortifications by vessels of the Monitor type, and for naval conflicts requiring great weight of metal, the Government have adopted the Rodman guns of 8, 10, 13, 15 and 20-inch caliber, and the Dahlgren of 9, 10 and 11-inch caliber, the latter exclusively for the navy. Both these guns are smooth bores, though a very few of the Dahlgrens have been rifled. The Rodman gun, named after Major Rodman of the regular army, who is the inventor and superintendent of its manufacture, is of iron, cast hollow, and the core is kept cool during the casting by a constant stream of cold water passing through it.

The following table shows the weight of each size, the service charge, and the weight of the solid shot thrown by each:

Size of gun.	Weight.	Service charge.	Weight of solid shot.
Eight-inch.....	9,240 lbs.	10 lbs.	65 lbs.
Ten-inch.....	15,400 "	18 "	128 "
Thirteen-inch.	38,000 "	30 "	294 "
Fifteen-inch...	49,000 "	50 "	430 "
Twenty-inch...	116,000 "	100 "	1,000 "

Of the 9, 10 and 11-inch Dahlgren guns, 804 had been made since the war commenced, to Nov. 1st, 1863, and about 200 more were to be furnished by the close of the year. Of the Rodman guns, the number has been over 2,000. The first of the 20-inch guns was cast in Pittsburg, on the 11th of February, 1864, after many months of preparation for its casting and finishing. The Rodman and Dahlgren guns are all cast at Pittsburg, and the Parrotts at West Point.

For field service the ten and twenty-pound Parrott, the brass twelve-pounders (Napoleons, as they are generally called), and for light artillery the steel cannon manufactured by Krupp, of Prussia, and the Wiard guns, are all in use, though the preference is given to the first three. The Wiard gun is a breech loader, with a long and slender barrel, except at the breech, which is very bulky, and composed of successive layers of hard and soft metals.

Mortars of larger size than had ever before been used for siege purposes on this continent, have been tried during the existing war, and from floating carriages—mortar schooners. They lack precision when thus employed, and though they accomplished some good purposes in the various instances in which they were employed on the Mississippi river, they effect so much less than the cannon of the same caliber, that they are not likely to be very generally employed in the future. Two sizes were adopted, 10-inch and 13-inch, requiring service charges of 10 and 20 pounds of powder, and throwing a projectile weighing 100 and 200 lbs. respectively. The 10-inch mortars weighed 9,500 lbs., and the 13-inch 17,000 lbs. Of the latter 200 had been cast previous to November 1st, 1863.

The Confederates have introduced a new rifled gun into their service, invented by Capt.

Brooke, one of their artillery officers. It seems to bear a strong resemblance to the Blakely (English) and Treadwell guns, and is hooped with iron or steel bands closely adherent to the cannon, not merely at the seat of the charge, but along its whole length. Dr. Girard, a French writer formerly resident in this country, and who has, since the war, visited Charleston, describes it as follows: "An attentive observer would not fail to remark the circular bands closely united to the piece, and which are destined to give a better resisting force. With regard to its rifling it is on the system of inclined planes instead of grooves. The projectiles are of forged (wrought) iron. Those I had an opportunity of examining were adapted to 7-inch guns. Their form is elongated, cylindrical nearly their entire length, with the exception of the front part, which is slightly conical and rounded off at its periphery. The two extremities are vertical. The hinder part which presents itself to the breech of the piece bears on its circumference a bell-mouthed groove, and receives a copper ring whose ends nearly meet at the end of the projectile. The projectile has bands of copper running round it, one about four inches from the front, and the other close to the hinder part. These bands alone are destined to take the rifling of the piece. The mean length of these projectiles is 12 inches, their posterior diameter $6\frac{9}{10}$, their anterior diameter $6\frac{3}{10}$, and their weight from 116 to 120 lbs. At a distance of 260 yards, and with a charge of 12 lbs. of powder, they penetrated four iron plates of two inches each, backed with 18 inches of oak, the whole fixed against a clayey cliff."

The form and material of the projectiles for rifled ordnance have been a matter of profound study and research with numerous inventors. The Government, after a great number of careful and thorough trials, has given the preference to the inventions of four manufacturers, viz.: the Parrott, Shenkl, Hotchkiss and Sawyer projectiles, while a fifth, the Roberts shot, shell, and musket cartridge, is receiving examination with a fair prospect of being introduced into the service. The Parrott projectile, whether shell or shot, is long, pointed at the anterior extremity; and of smaller circumference in the centre than at either extremity. The base alone fits closely to the bore of the cannon, and has a ring of soft brass or a cup of the same metal, which by the expansive force of the gas of the projecting charge, is driven into the grooves to an extent sufficient to give it the rotary motion, and the extensive range of the rifle. The Hotchkiss and Sawyer projectiles use a metallic alloy of lead and antimony as a jacket to be forced into the grooves of the rifled ordnance, and the Shenkl missile applies papier maché to the same purpose. In all three, the softer material is driven upon the tapering spindle of the iron which forms the body of the projectile, from its posterior portion, by the force of the expansion produced

by the ignition of the powder, and held there by shoulders projecting from the iron itself, and the rotary motion is thus imparted nearer the centre of gravity than in the Parrott projectile. The Roberts projectile has a core of iron tapering to a point at the posterior end, with a shoulder near the anterior extremity, and the soft metal (lead and antimony) which forms the jacket is in sufficient quantity to render the projectile cylindrical in form, and is forced forward by the action of the gas so as to check all windage and make the anterior portion of the projectile heaviest. The inventor claims for it better range, less deflection, no danger of stripping, and economy of cost of the missile itself, and of wear or injury to the gun. His shell projectile, constructed externally in the same way, is a percussion shell, for which he claims safety from accidental explosion, and certainty of explosion at the moment of impact.

The attention of inventors has also been directed to the adaptation of ordnance to firing under water either from ships or from submarine batteries, thus destroying the immunity which war vessels were supposed to enjoy from injuries by shot striking them far below the water line. Experiments have been made on this subject both in England and the United States, and it seems to be demonstrated that a ship of war could carry her entire armament below the water-line, and by firing under water speedily sink any war vessel now afloat. As yet no vessel has been constructed to do this, but two submarine batteries, destined to be navigated under water, and to make their attacks upon ships of war without becoming visible themselves, have been commenced in this country, though neither is yet completed. One of these was planned, and partly finished, by the late Major E. B. Hunt, and it was from the effect of the gases generated by firing under water that he fell and met with the injuries which resulted in his death.

In Great Britain, the rifled ordnance most in favor has been the Armstrong gun, Whitworth's gun, and the Blakely gun. Other inventors, especially Mr. Bashley Britten, Mr. Lynall Thomas, Mr. Jeffrey, Mr. Hadden, Commander Scott, of the Royal Navy, and Mr. Westley Richards (the celebrated rifle manufacturer), have taken out patents for projectiles. The Armstrong gun, though adopted by the War Department in 1858, and being, to the present time, with slight exceptions, the only rifled cannon in either the army or navy service, is not at all satisfactory, and will probably be discarded before long. The gun is built up by a welded coil of iron, either with or without an inner tube of steel, and hoops of coiled iron are shrunk over this coil. It is a breech loader, and the vent pieces are separate and must be lifted out or slid on one side after each discharge. This vent piece is very liable to get out of order, as its adaptation to its place is a very delicate operation, and it, as well as the breech screws, is often blown out

or injured by the discharge of the gas at the breech of the gun. The inventor has endeavored to obviate the objections to this by furnishing two extra vent pieces to every gun; but these prove insufficient. There is considerable emission of gas at the breech, and this is sometimes attended with danger. The mode of rifling is what is called the fluted bore; the number of grooves varying from eight in the three-pounders, to seventy-six in the hundred-pounder or seven-inch gun. The projectile, which after almost innumerable experiments, he has adopted, is nearly a plain cylinder with almost flat or slightly rounded ends, coated with lead, which in firing enables it to take the form of the grooves, and thus prevent windage. Nearly 3,000 of his guns have been manufactured by the British Government since 1858, at an expense of about 13 millions of dollars, and in spite of his numerous improvements and changes in them, his friend and assistant, Mr. Anderson, now the superintendent of the Government Ordnance Works at Woolwich, states that "they are still very bad in many particulars." The objections to them are that they are weak and will not bear a heavy charge of powder, that their range is not as long as that of other guns, and their initial velocity less; that they are not superior, if equal, to the old smooth-bore guns of even smaller caliber in their power of penetrating iron plates at short range, and that the projectile strips off its lead almost at the moment of leaving the gun, thus endangering in many instances the troops engaged near it. These objections have proved so serious, that Sir William Armstrong has recently invented a new gun on the shunt principle of rifling, that is, with two sets of grooves, one for the admission of the projectile (his new gun is a muzzle-loader), and the other those by which, being rammed home, it must pass out when the gun is discharged, the latter fitting closely, and having a shorter "turn" than his previous gun, and the projectile being entirely of wrought iron. This gun, of which he has great hopes, has not yet been introduced into the service. Sir William Armstrong has also invented a shell built up of a great number of segments of cast iron cemented together with lead, and containing a bursting charge, which has been highly extolled, but is said in practice to be liable to burst prematurely. Whitworth's gun is in all respects the most original and ingenious application of the scientific principles of gunnery to the construction of ordnance yet attempted. He had become distinguished as early as 1854 for the adaptation of a new principle to the construction of the rifle and its projectile; and in 1857 commenced applying the same principle to ordnance, though in a desultory way, as he had no intention at that time of becoming a manufacturer of cannon. The principles which he applied to ordnance construction were the hexagonal form of the bore, and the rapid turn of the rifling (one revolution in ten inches in his

larger pieces). The term hexagonal as applied to the bore, though nearly, is not absolutely accurate, as the angles were a little rounded. The projectiles which he invented were also peculiar in form and character. They were of steel or "homogeneous iron," which is a mild steel, and is extensively used by Krupp, of Prussia, for cannon. In form they were hexagonal, with a twist corresponding to the turn of the bore; at first the anterior end was oval or rounded at its extremity, but when the penetration of iron plates with ordnance projectiles began to be recognized as a necessity, he made the head or front flat, with the edge a little raised and sharp. The hexagonal surfaces were slightly hollowed to give the projectile more steadiness of motion. At a later period he still further improved both its steadiness and range very greatly by making it taper toward the posterior end, giving it lines somewhat resembling those of a ship of the new model. These projectiles have sometimes made as many as 60,000 rotations per minute. We have said that Mr. Whitworth did not at first intend to become a manufacturer of cannon. At the instance of some of the ordnance officers he made several brass pieces on his principle, the brass blocks being furnished to him by the department, and subsequently some pieces from cast-iron blocks, which, however, burst after a few trials, cast-iron cannon made by boring proving too weak for the severe strain required from rifled pieces. The Ordnance Department having committed themselves fully to Sir William Armstrong's guns, refused, with some rudeness, to have anything more to do with Mr. Whitworth's rifled ordnance; and as he believed that he had hit upon the best principles for the construction of rifled guns, he resolved to go into their manufacture, and eventually convince the Government of the error they had made. The question of what was the best material for ordnance was the first to be decided, and having tested in his previous experiments brass and cast iron, neither of which seemed to him to possess the requisite tenacity and strength, he fixed upon "homogeneous iron," a mild steel, as combining the two qualities of hardness and toughness in the requisite proportion, and at the same time permitting the gun to be much lighter than if made of cast iron. His guns were hooped with steel through their whole length, the hoops being forced on cold by hydraulic pressure; back of the trunnions were three layers of hoops. Recognizing the advantages of breech-loading, he constructed his guns to load equally well from the breech or muzzle, but without any chamber at the breech for the expansion of the gases, which was not needful, as his projectile did not change size or form from firing. The bore was of the same size throughout. The construction of the breech was very simple, and there was no necessity for a separate vent piece, as in the Armstrong gun. The range and accuracy of these guns have never been sur-

passed; the three-pounder, in the experiment at Southport, having thrown its shot, at an angle of 35° , to a distance of 9,688 yards, and his twelve-pounder, a projectile 10,300 yards or nearly six miles. The Whitworth shell has, however, proved the *chef d'œuvre* of his inventions in connection with firearms. The power of his projectiles to penetrate iron plates of four and a half or five and a half inches, when fired from his seven-inch gun even at a distance of 800 yards, was fully demonstrated; but it was objected that they could only punch a round hole through the walls of the iron-clad vessels which could easily be plugged. Thereupon Mr. Whitworth demonstrated that this cylindrical flat-fronted projectile could be fired through the water without deflection or such obstruction of its velocity as to prevent its penetrating the hull of any ship far below the water line. He also undertook, what other inventors pronounced impossible, to make a shell which should penetrate five or six inches of iron armor, and then explode inside the vessel. For this purpose he made his shell of the same material as his shot (homogeneous iron), with a heavy flat front, and in the cavity placed his charge of powder or other explosive material, wrapped in several folds of flannel. No percussion cap or fuse was required, the impact of the shell upon the iron plating producing a condensation of the iron, accompanied with such disengagement of heat as was sufficient to explode the shell, while the flannel acted as a time fuse to delay the explosion till the shell had passed into the vessel. The advantage of this method of making shells, if it could be accomplished without impairing their formidable qualities, was obvious, for they could be transported without danger, and the numerous serious disasters resulting from their accidental explosion could be avoided. In a succession of experiments made upon the Warrior target at Shoeburyness, this shell accomplished all that its inventor promised, penetrating the target with its wooden backings, and when by experiment the requisite number of piles of flannel for enveloping the charge was determined, exploding with terrific force behind the target.

The Blakely gun has a steel tube for its core, thickest about the centre of the gun, tapering externally toward the butt and muzzle, and upon this hoops of iron in successive layers are driven. The form of his projectiles we have not seen, but they are said to be constructed on mathematical principles, and their rotation, like that of the Whitworth projectile, is very rapid. These guns have been constructed of very large caliber, and a considerable number of them have been imported by the Confederates, with whom, however, they are not now in favor, owing to their liability to burst. The British Government ordered from the inventor, in Jan., 1864, an 800-pounder cannon which is to be tested to destruction, and four others are to be manufactured on his plans at Woolwich.

The French *canons rayées* or rifle guns are not of large caliber, nor have they so extended a range as our Parrott guns or the Whitworth cannon. Both their field and siege guns are made of brass and have six grooves, each $\frac{63}{100}$ of an inch wide, by $\frac{2}{10}$ of an inch deep. The projectile has twelve buttons, six at the shoulder, and six at the base, one of each sliding in each groove. The gun is muzzle-loading. The initial velocity of the rifled gun is 1,213 feet per second, and that of the smooth-bore 12-pounder Napoleon 1,476 feet per second, but at 656 yards the velocity of the projectile from the rifle exceeds that from the smooth-bore gun. The following table gives some interesting particulars concerning each class of the French rifled cannon.

	Mountain.	Field.	Siege.
Caliber.....	3.4 in.	3.4 in.	4.76 in.
Length of bore.....	31.59 "	55.12 "	71.46 "
Length in calibers....	9.53 "	16.57 "	15.25 "
Total length.....	37.8 "	63. "	78.62 "
Weight	221 lbs.	728 lbs.	1,368 lbs.
Preponderance.....	33 "	97 "	176 "
Diameter of projectile	3.33 in.	3.33 in.	4.69 in.
Weight of shell empty	8.16 lbs.	8.16 lbs.	
Weight of shell full...	8.82 "	8.82 "	25.8 lbs.
Charge.....	1.21 "	1.21 "	2.65 "
Point-blank range....	547 yds.	547 yds.	547 yds.
Extreme range.....	4,374 "		6,562 "

Thus their largest siege gun is about equivalent to our Parrott 30-pounder, though considerably lighter than that gun. The ironclads of the first class have 100-pounder pivot guns, but their officers say that these cannot be fired in a rough sea, and are a failure.

The use of gun cotton instead of gunpowder for rifled ordnance is receiving considerable attention, both on the continent of Europe and in Great Britain. It has been adopted in Austria, and a commission of scientific experts in England have been investigating its comparative value for two years past, and have made partial reports. Its advantages are said to be, that it produces no smoke; that it does not foul the gun; that its explosion can, by the mechanical arrangement or plaiting of its fibres, be regulated and adjusted to any required velocity, from one foot per second to one thousand feet per second; that it occupies far less space than gunpowder, 100 lbs. occupying only four cubic feet, while the same weight of gunpowder occupies 1,981 cubic feet; that the

same weight produces more than three times the number of cubic feet of gas, and consequently an equivalent charge need be but one third of the weight. The recoil is also stated to be reduced in the proportion of 263. The manipulation of gun cotton requires more scientific skill, and more care than gunpowder, and, in inexperienced hands, it is more dangerous. If these objections can be obviated, it will come into more general use. A new substitute for gunpowder has been recently brought forward, which promises fairly. It is composed of starch treated with acids, in much the same way as for producing gun cotton.

OREGON is bounded on the north by Washington Territory, from which it is separated by the Columbia river and the 46th parallel of north latitude; east by a line from the mouth of the Owyhee river, due south to the parallel of 42° north; south along said parallel to the Pacific Ocean; west by the Pacific Ocean. Its area is about 102,606 square miles, or 120,320,000 acres. The capital is Salem. Population estimated at 55,000.

The following measurement of rains was taken at Fort Umpqua, in the southern portion of Oregon, in the months of the respective years: the snow which fell is included, and the amounts are expressed in inches and hundredths:

MONTHS.	1857-58	1858-59	1859-60	1860-61	1861-92
October.....	2.10	7.05	2.90	5.95	3.93
November...	6.46	8.17	8.55	11.09	18.05
December...	12.60	14.69	4.75	8.73	18.95
January.....	11.70	9.08	7.65	11.50	8.21
February....	10.40	15.35	5.77	10.49	6.02
March.....	7.80	14.45	4.20	7.40	16.39
Totals.....	51.06	68.79	33.82	55.16	71.60

The following table shows the number of rainy days during the twelve months ending March 31st, 1863. It includes all rainy days, whether it rained all of the day, or only a part, and also all days on which snow fell:

April	1862.....13	November,	1862..... 3
May,	" 16	December,	" 22
June,	" 11	January,	1863.....24
July	" 9	February,	" 24
August,	" 6	March,	" 13
September,	" 5		
October,	" 6	Total.....	149

For the condition of the local institutions of the State, see ANNUAL CYCLOPÆDIA, 1862.

P

PEASE, CALVIN, D.D., an American clergyman, born in Canaan, Litchfield county, Conn., August 12th, 1813; died at Burlington, Vt., Sept. 17th, 1863. His parents were both of Puritan stock, and his early training was judicious and eminently calculated to lay the foundation of the purity of character which marked his maturer years. In November, 1826, his family removed to Charlotte, Vt., where he was occupied upon his father's farm until 1832, when he entered Hinesburgh Acad-

emy, to fit for college, and at the expiration of a year entered the University of Vermont, at Burlington. Here he at once took a high position, which he maintained to the end of his college course. He graduated in 1838, and from that time until 1842 was employed as principal in the academy at Montpelier. In 1841 he delivered the master's oration at Burlington, and received the degree of A. M. In 1842 he delivered the annual address before the associate literary societies of the University,

and the same year was elected to the professorship of the Greek and Latin languages in that institution. He continued in this position until December, 1855, when he was elected to succeed Dr. Worthington Smith, as president. Late in the period of his professorship he was licensed to preach the Gospel, by the Winooski Association. Though he had not made theology a systematic study, yet he was urged to this step by his friends, who knew his rare ability as a writer and speaker, and his eminent qualifications, spiritual and intellectual, for usefulness in the pulpit. At the commencement, in 1856, he was inaugurated as president of the University, and a few weeks later received the degree of Doctor of Divinity from Middlebury College, Vt. During his presidency he received various marks of appreciation and regard, among which were his appointment as a member of the Vermont Board of Education, at its organization in 1856, and his election to the presidency of the Vermont Teachers' Association the same year, both of which offices he held until he left the State, and by his activity and usefulness in these positions had a leading part in shaping the present highly successful educational policy of that State. In November, 1861, he received a call to the pastorate of the First Presbyterian church in Rochester, New York, which, in consideration of the demands of his health, and the claims of his family, he deemed it his duty to accept. He entered upon his ministry in Rochester in January, 1862, and in May was installed as pastor of the church. The period of his ministry here, though short, was eminently successful and happy, embracing the most interesting portion of his life. Within these few months he did his greatest and best work, for which all his previous life, labor and experience were but the preparation, and it was their fitting crown and reward. During the last year of his life he was elected a member of the American Philosophical Society of Philadelphia. Dr. Pease left many valuable manuscripts and sermons, but published only a few. His earliest published work was a "Discourse on the Import and Value of the Popular Lecturing of the Day," delivered before the literary societies of the University of Vermont (1842). Subsequently he published in the *Bibliotheca Sacra* "Classical Studies" (July, 1852); "The Distinctive Idea of Preaching" (1853); "Characteristics of the Eloquence of the Pulpit," delivered as an address before the Rhetorical Society of Auburn Theological Seminary (1838); "The Idea of the New England College and its Power of Culture," delivered at his inauguration as president of the University (1856); Address before the Medical Department of the University (1856); Baccalaureate Sermons, 1856, 1857, 1859, 1860; and a number of occasional sermons.

PENNSYLVANIA. For the details of the invasion of Pennsylvania by the Confederate army, *see* ARMY OPERATIONS.

The entire force which Pennsylvania has contributed to the Federal armies is as follows:

Under the call of April 15th, 1861, twenty-five regiments, consisting of 20,979 men, for three months. They were mustered out of service at the expiration of their time.

Under the act of Congress of July 22d, 1861, four independent regiments of 4,711 officers and men, for three years.

Under an act of the Legislature of the State of May 15th, 1861, the "reserve volunteer corps," comprising thirteen regiments of infantry, one of cavalry and one of artillery, consisting of 15,856 men, and called into the service of the United States by requisition of the Federal Government, July 22d, 1861.

Seventy-three regiments, containing 89,048 men, raised on requisitions of the President under the act of Congress of July 22d, 1861, together with organizations authorized by the War Department to be raised by individuals in the State, all for three years.

Under the call of July 7th, 1862, forty-six regiments, including eighteen nine-months regiments, the others being for three years, containing in total 40,383 men.

Recruits forwarded to the three-years regiments, 9,259 men. Enlistments in organizations of other States and in the regular army estimated at 5,000 men.

Fifteen regiments organized under the draft ordered by the President from the militia, August 4th, 1862, and containing 15,100 men, for nine months, when they were mustered out of service. Thus the total force furnished to Dec. 31st, 1862, was 200,336.

During the year 1863 the only fully organized regiment for three years put into service from the State was the 19th cavalry. To regiments in service 4,458 recruits have been forwarded. All other regiments and commands have gone into service for a shorter period, and were engaged in the new military departments into which the State was divided on June 9th, 1863.

In the department of Monongahela five regiments of ninety-days militia and one company of artillery and one of cavalry were organized, containing 3,750 officers and men. Four commands, containing 1,416 officers and men, were also organized for six-months United States service.

In the department of the Susquehanna twenty-three regiments and one battalion of three-months militia, one battalion of cavalry, and four batteries, with several unattached companies, comprising 21,292 officers and men, were raised. For United States six-months service commands, containing 3,068 officers and men, were organized. A force of "emergency" militia was also organized, containing 7,062 officers and men. Thus the force raised in the department of Monongahela was 5,166; and in the Susquehanna, 31,422.

Five regiments of colored troops have been recruited in the State. They compose the 3d, 6th, 8th, 22d and 25th United States regulars.

The revenue and expenditure of the State for the year 1863, were as follows:

REVENUE.	
Ordinary receipts.....	\$3,959,438 61
Miscellaneous.....	330,013 04
Total.....	\$4,289,451 65
On hand November, 1862.....	2,172,844 10

EXPENSES.	
Expenses.....	\$3,139,121 08
Military.....	208,074 44
Other.....	967,768 53
Total.....	\$4,314,964 05
November, 1863.....	2,147,331 70

The excess of expenditure for the year was made up from the balance on hand. The State debt was as follows, on Dec. 1st, 1863:

Funded debt, viz.:	
6 per cent. loans, ordinary..\$	400,630 00
5 " " " " 35,709,986 45	
4½ " " " " 268,200 00	
	\$36,378,816 45
Unfunded debt, viz.:	
Relief notes in circulation..	\$97,251 00
Int. certificates outstanding	15,356 63
" " unclaimed..	4,448 38
Domestic credit'rs' certifi's	724 32
	117,780 33
	\$36,496,596 78
Military loan, per act of May 15th, 1861.....	3,000,000 00
Public debt, December 1st, 1863.....	\$39,496,596 78
Public debt December 1st, 1862.....	\$40,448,213 82
Deduct amount redeemed at the State treasury during the fiscal year ending Nov. 30, '63, viz.:	
5 per cent. stocks.....	\$888,499 78
4½ per cent. stocks.....	63,000 00
Relief notes.....	109 00
Domestic credit'rs' certifi's	8 26
	951,617 04
Public debt December 1st, 1863.....	\$39,496,596 78

The redemption of \$951,617 04 by the commissioner of the military fund was in currency, and gave rise to great complaints, particularly on the part of the foreign holders who had loaned specie and got back not more than two thirds of that value. The commissioner had, however, no option under the law.

The interest on the debt of Pennsylvania is paid in specie. But the funds are derived from the banks, which are required by law to pay into the treasury their ratable proportion of such premium on gold as is required to meet the interest. By the act of January 30th, 1863, the banks were required to exchange a sufficient amount of coin for currency, receiving in return treasury certificates pledging the State faith to return coin before March, 1864, with 2½ per cent. interest. \$1,968,904 coin was so obtained, and there is \$41,040 interest due the banks. The State had to pay \$1,013,986 premium on the coin to return it. In the years 1837-'39, the State was forced to suspend the payment of her interest or pay in paper. When the difficulty passed, the State, by the act of June 12th, 1840, appropriated a sufficient sum to reimburse her loanholders for the difference in value between specie and the currency in which they had been previously paid, and then declared "that hereafter the interest falling due on Pennsylvania stocks

shall always be paid in specie or its equivalent." This is the law at present. The taxable property of Pennsylvania is as follows:

Real and personal estate.....	\$595,591,994
Tax assessment.....	\$1,545,643 94
½ mill tax.....	294,859 72
	\$1,840,503 66

Population.....	2,921,046
Population taxable.....	642,468

An election was held in the State on the second Tuesday of October, for the choice of a governor, one third of the Senate and the Assembly of the Legislature, and a judge of the Supreme Court.

The Democratic Convention assembled at Harrisburg, on July 1st, and nominated George W. Woodward for governor, and Walter W. Lowrie for judge of the Supreme Court. The convention adopted a series of resolutions, in which they declare that they again renew their fidelity to the Constitution, and inasmuch as it embodies the only guarantee for public liberty and private right, the man who sneers at the "Constitution as it is," proves himself deficient in the first elements of patriotism, and any officer who violates it, is unworthy of public confidence; that among the rights provided by the Constitution, that of security in life, liberty, and property, is so plainly written down, that any one who can misunderstand it, has not fit mental capacity for any public station; that they have heard with alarm and indignation of the power claimed for the President to arrest citizens for the expression of honest opinions, and that he delegates this power to others, a large proportion of whom must, in the nature of things, be incapable of wielding it honestly or wisely; that those who attempt to suppress books and newspapers by violence, are the enemies of a free Government; that thanks are tendered to the democracy of Ohio for the vindication they have given to the Constitution; that it is the duty of the chief magistrate of the State to protect the State and the people from violence, come from whatever quarter it may; that the democracy of Pennsylvania have been true to the cause of the Union; that they will exercise the right to consider, discuss, ascertain, and urge such measures as will be most likely to keep the whole Union together under one Government; that the Administration, in departing from the resolution of Congress, has totally changed the grounds of the war, and greatly delayed a just hope of an honorable peace.

The Republican or Union Convention assembled at Pittsburg, on the 5th of August, and nominated Governor Andrew Curtin for reelection, and Daniel Agnew for judge. The resolutions adopted declare their inflexible purpose to be to maintain the Union by every necessary effort, service, and sacrifice; that the rebellion was without cause, and is stained with every crime; that there can be but two parties, one which supports, and the other which cripples the constituted authorities; that all en-

gaged in the rebellion are worthy only of patriotic hatred, and those who tolerate treason in loyal States are doubly recreant; that President Lincoln has won for himself the affection and regard of the whole American people; that the Constitution should be so amended that soldiers can vote; thanks are tendered to the sons of the State in the army and navy; and that the governor, by his eminent services, has achieved proud eminence among the loyal States.

The election was held on the 13th of October, on which day the following letter appeared in a Philadelphia paper:

ORANGE, N. J., October 12th, 1863.

Hon. Charles J. Biddle:

DEAR SIR: My attention has been called to an article in the Philadelphia "Press," asserting that I had written to the managers of a democratic meeting at Allentown, disapproving the objects of the meeting, and that if I voted and spoke it would be in favor of Governor Curtin. I am informed that similar assertions have been made throughout the State.

It has been my earnest endeavor heretofore to avoid participation in party politics, and I had determined to adhere to this course, but it is obvious that I cannot longer maintain silence under such misrepresentations.

I therefore request you to deny that I have written any such letter or entertained any such views as those attributed to me in the Philadelphia "Press," and I desire to state clearly and distinctly that, having some few days ago had a full conversation with Judge Woodward, I find that our views agree, and I regard his election as governor of Pennsylvania called for by the interests of the nation.

I understand Judge Woodward to be in favor of the prosecution of the war with all the means at the command of the loyal States, until the military power of the rebellion is destroyed. I understand him to be of the opinion that, while the war is urged with all possible decision and energy, the policy directing it should be in consonance with the principles of humanity and civilization, working no injury to private rights and property, not demanded by military necessity, and recognized by military law among civilized nations; and, finally, I understand him to agree with me in the opinion that the sole great objects of this war are the restoration of the unity of the nation, the preservation of the Constitution, and the supremacy of the laws of the country.

Believing our opinions entirely agree upon these points, I would, were it in my power, give to Judge Woodward my voice and my vote.

I am, very respectfully, yours,

GEORGE B. McCLELLAN.

The votes were given as follows:

Curtin	269,496
Woodward	254,171

Majority 15,325

David Agnew was also elected judge.

The Legislature was divided as follows:

	Senate.	House.
Republican	17	52
Democrat	16	48

Some small disturbances occurred in different parts of the State in consequence of opposition to the officers making the enrolment preparatory to the draft. Also in the Lehigh county, at the coal mines, much dissatisfaction existed for a short period in November. The public institutions of the State were well sustained during the year.

A large amount of claims appear to have grown out of the raids of the enemy on the borders of the State. In May and June, 1861, Gen. Patterson took possession of considerable land and tenements in Franklin county, for the use of his troops. The Federal Government had not paid these claims, and the subject was brought before the Legislature. Another class of claims arose in September, 1862, when Gen. Longstreet occupied Hagerstown, Md., and threatened the Pennsylvania border. Horses, forage, and merchandise were then impressed by Gen. Reynolds for the service of his troops. These claims were reported to the Legislature. Another class arose from the raid of Gen. Stuart, in October, 1862. In his course, he passed in the vicinity of Mercersburg, Bridgeport, St. Thomas, Chambersburg, Fayetteville, and Greenwood, in Franklin county, and through Cashtown, Fairfield, and other places in Adams county, seizing and destroying property along the line of his advance and retreat. Supposing the charges would not be paid by the Federal Government, the Legislature, in April, ordered the Dauphin County Court to appoint appraisers to ascertain the amount of the different claims. The appraisers reported an aggregate of \$118,871 of damages.

Other claims have arisen since those above mentioned; some for the purchase of horses for the army of Gen. McClellan, after the battle of Antietam, for which imperfect vouchers had been given; others, from the advance of Gen. Lee's army, covering the counties of Franklin, Somerset, Bedford, Fulton, Adams, Cumberland, and York. The amount is estimated at millions, and if payment is not made by the United States, it will be urged upon the State.

PETIGRU, JAMES LOUIS, an American lawyer and statesman, born in Abbeville District, S. C., in the early part of 1789, died in Charleston, S. C., March 3d, 1863. On his father's side he was of mixed Scotch and Irish descent, and his maternal ancestors formed part of the Huguenot colony which in 1695 sought refuge in Carolina from religious persecution in France. His temperament exhibited blended traits of these two sources of origin, the Celtic element, however, predominating. His education was completed at the University of South Carolina, where he was graduated in 1809, with the first honors, in a class distinguished for scholarship, and of which many members subsequently gained eminence in political and professional life. A few years later he was admitted to the bar of his native district, and commenced practice as a country lawyer. His rising eminence soon led him into the larger field of the metropolis, and in a few years he became the leader of the Charleston bar. In 1822 he succeeded Robert Y. Hayne as Attorney General of the State, which office he held until 1830, when he was in turn succeeded by Hugh S. Legaré, afterward U. S. Secretary of State under President Tyler.

Until this period no popularity could have

been more decided or grateful than that of Mr. Petigru; but the two succeeding years brought strife and discord into the social circles of South Carolina, in consequence of her political relations with the General Government, and the prospects he might have entertained of reaching the highest honors of the State were seriously injured, if not destroyed. It was during the nullification troubles of 1830-'32 that he first showed that strong attachment to the Federal Union, which became the controlling principle of his political life, and from which, in the darkest hours of the national crisis, he never deviated. The people of South Carolina were then divided into two parties, of which the larger, under the leadership of Calhoun, McDuffie, and Hayne, insisted upon the constitutional right and the necessity of applying the State veto to the protective tariff bills of Congress. Mr. Petigru took sides against this doctrine, and became one of the leaders of the "Union and State Rights Party," in company with William Drayton, Daniel E. Huger, Henry E. Dessaussure, and other distinguished lawyers, representing various sections of the State. This latter organization, while sympathizing with the nullifiers in their dislike of the protective system, and in some of their opinions on the subject of State rights, joined issue with them on the proposed remedy of nullification by the State veto. In this conflict of opinion and doctrine the two parties were more than once on the eve of civil war. But the nullifiers triumphed; the State vetoed, by ordinance, the obnoxious tariff bill; and the compromise bill of Mr. Clay soon after restored quiet to the country.

During the controversy, Mr. Petigru showed himself an earnest and resolute worker. He wrote and spoke with vigor and eloquence throughout the campaign, and in periods of great popular excitement, when the passions of men could with difficulty be restrained, he was always to be found in the midst of the excitement, and fearless of danger. In the subsequent calm which followed, and the restoration of a more pacific temper to society, he was probably one of the last to be forgiven by the triumphant party, his views being considered antagonistic to the recognition of the sovereignty of the State, and identical with measures of Federal usurpation. But though politically suspected, his talents and virtues, his ability as an advocate, and his high social position sufficed to keep him honored in the community, and he still remained without a rival at the bar. Subsequently he served in the State Legislature; held for a brief period the office of District Attorney of the United States, at a time when such a position subjected him to popular odium; and during the last few years of his life was one of the commissioners for codifying the laws and statutes of South Carolina.

The secession of South Carolina from the Federal Union in December, 1860, found him too advanced in years to take an active part in

public or political controversies; but with no less energy than he had combated the heresies of the nullifiers thirty years previous, did he declare his opinions against the dissolution of the Union; and this, so far as can now be ascertained, in opposition to every other individual of any note in the State. Amidst such unanimity of opinion as then prevailed in South Carolina, another person in the position of Mr. Petigru might have fared badly; but his political "wrong-headedness," as it was mildly called, was pardoned in one whose character was so deeply respected, and he remained in Charleston until his death, abating in no degree the opinions he had originally formed, and tolerated in the expression of those opinions. Of his unwavering devotion to the Union, even after the bombardment of Fort Sumter, a remarkable and affecting illustration is afforded in a recently published letter from him to the Hon. Reverdy Johnson, of Maryland, dated April 16th, 1861. "I came in," he says, "with the Constitution, which went into operation only a few weeks before I saw the light: and I have ever devoutly believed that Union is our greatest interest. Unfortunately for me, my countrymen have, in the course of the last fifty years, taken up the idea that it was a mistake, and that cotton is our greatest interest. The universality of the cotton doctrine, by which I am surrounded, had no sort of influence over my way of thinking, and I have the misfortune of witnessing, day by day, manifestations of enthusiasm in which I have not the slightest participation. You may be sure, then, of my ready and hearty concurrence in your able and lucid argument against the right of secession; for the Union would be but a precarious possession if it stood upon the mutable ground of the popular opinion of expediency from day to day. In fact, if it had been authoritatively proclaimed at the time of its adoption that it was only binding as long as it received the voluntary adhesion of the several States, it would never have been adopted at all; for the people would have justly said that it was no improvement on the Confederacy. For the Confederacy would have answered all its purposes if it could have been sure of the voluntary adherence of the several States to the duties that were submitted to their free arbitrament. There is no doubt the men of 1787 did undertake a new thing in attempting to divide the civil power between the Nation and the State, so as to leave each of them sovereign within their several spheres. But our secessionists pretend that they did not mean it. * * * * *

"What is to be the end of all this seems to me inscrutable. But even if the Gulf States and South Carolina do flake off forever, I will never cease to witness with joy whatever increases the prosperity and honor of the United States."

There is no evidence that during the last two years of his life he modified in any degree the views herein expressed.

POLAND.—At the outbreak of the Polish revolution on January 22d, 1863, the Kingdom of Poland, properly so called, constituted a part of the dominions of the emperor of Russia, containing 2,331 geographical square miles, with a population (according to the census of 1859) of 4,764,446 inhabitants. It was divided into the following five governments (provinces):

	Geographical Sq. Miles.	Inhabitants in 1859.
Warsaw	668,29	1,699,461
Lublin	548,61	952,224
Radom	454,45	932,603
Augustovo	341,69	623,010
Plotzk	313,22	552,148

The largest cities of the kingdom were Warsaw, with a population of 162,777 inhabitants (in 1861), Lodz, 29,617, Lublin, 18,304. The total number of towns was 453, with 1,164,487 inhabitants. The great majority of the inhabitants belonged to the Roman Catholic Church, which numbers 3,657,140; 4,856 were orthodox Greeks, 215,967 United Greeks, 274,707 Protestants of the Augsburg Confession (Lutherans), 4,189 Reformed, 1,581 Menonites, 1,451 Moravians, 599,875 Israelites.

The Polish Nationality extends far beyond the limits of the Kingdom of Poland. The number of Poles, according to Schaffarik, one of the standard writers on the Slavic races, amounts to about 10½ millions, of whom 2,159,648 are at present within the limits of Austria, 1,950,199 within those of Prussia, and the rest in Russia, where they inhabit, besides the Kingdom of Poland, the western provinces of Russia Proper.

The insurrection of the Poles against the Russian rule, forms one of the most important events in the political history of Europe during the past year. It not only maintained itself, in spite of the utmost efforts of the Russian Government to suppress it, but it gave rise to the gravest diplomatic complications which Europe has seen for many years. At the end of the year the Polish question not only remained unsolved, but it had become the general opinion of the political world, that Europe would continue to be exposed to the greatest danger until a satisfactory and permanent solution of it might be found. It had existed for many years, and if the insurrection should be quelled, the difficulty will still survive. In order to explain fully the character of the present insurrection and the grave diplomatic complication which has thus arisen, it will be necessary to give in brief a general history of this Polish question.

Poland, until the year 1772, was one of the most powerful European empires, having an area of about 13,000 geographical square miles and 13,000,000 inhabitants. In 1772, Austria, Prussia, and Russia agreed upon the First Partition of that country, in consequence of which Prussia received 631 (geogr.) square miles, with 416,000 inhabitants, Austria 1,280 square miles, with 2,700,000 inhabitants, and Russia 1,975 square miles, with 1,800,000 inhabitants. Thus Poland lost in all, in consequence of the First

Partition, 2,886 square miles, with about 5,000,000 inhabitants. Russia henceforth exercised a controlling influence upon the destinies of the nation. In order to escape the approaching doom of their nationality, the Polish Diet undertook to reform their constitution. They were encouraged in their efforts by the king of Prussia; and a new liberal constitution, which gave to the towns and to the peasants a representation at the Diet, was proclaimed on May 3d, 1791. It was approved by Prussia, and eulogized by Fox and Burke. The Government of Russia protested against the right of Poland to adopt a new constitution, and made it the pretext for commencing war. Austria and Prussia were appealed to, in vain, for help; both censured Poland for having changed her constitution without their formal consent, took sides with Russia, and with the latter, arranged the Second Partition of Poland (1793), which gave to Russia 4,553 geographical square miles, with 3,000,000 of inhabitants, and to Prussia 1,060 square miles, with 1,100,000 inhabitants. The Diet was again compelled to ratify this dismemberment of the country. The remainder of the Polish Empire, about 3,861 square miles, with 3½ millions of inhabitants, was entirely under Russian influence. In 1794, the patriotic party made the first attempt to reëstablish the Empire within its ancient limits. The insurrection broke out in March, 1794, Kosciuszko was proclaimed dictator, and succeeded in raising a National army of 70,000 men. The Poles, from March to November, fought with the utmost bravery against the combined forces of Prussia, Russia and Austria, but the defeat at Praga, on Nov. 4th, decided the fate of Poland; and a Third Partition, October, 1795, put an end to her independence. Russia at this time received 2,030 square miles, with about 1,200,000 inhabitants, Prussia 997 square miles, with about 1,000,000 inhabitants, Austria 834 square miles, with more than one million inhabitants. In all, Russia had received, by the three partitions, above 8,500 square miles with 4,600,000 inhabitants; Austria more than 2,100 square miles with 5 million inhabitants, and Prussia, about 2,700 square miles with 2,550,000 inhabitants. Napoleon restored to a part of the former Polish Empire a national independence by establishing, in 1807, the Duchy of Warsaw, which was enlarged, October, 1809, by the Treaty of Vienna. But the hopes of the Poles, for a reëstablishment of their entire empire through Napoleon were doomed to disappointment, and, in consequence of the destruction of the French army in Russia (1812), the Duchy of Warsaw ceased to exist.

At the Congress of Vienna, which remodelled the whole map of Europe, and placed the European state system upon an entirely new basis, the Polish question was found by the assembled diplomats to be one of the most difficult to solve. The final stipulations of the Congress with regard to Poland are still regarded by

the European Powers generally as conclusive, and it is on the ground of the violation of them by Russia that some of these Powers at present justify their diplomatic interference. In every subsequent attempt to settle the Polish question diplomatically, the provisions of the Congress of Vienna must necessarily have a very considerable, if not decisive, influence, and an acquaintance with them is indispensable to understand the negotiations to which this question will yet undoubtedly give rise. The following is a translation of the Article of the Treaty of Vienna (art. i.) relating to Poland:

"The Duchy of Warsaw, with the exception of the provinces and districts, otherwise disposed of in the following articles, is reunited with the Kingdom of Poland. It shall be irrevocably connected with that empire by its Constitution, to be possessed by his Majesty the Emperor of all the Russias, his heirs and successors, in perpetuity. His Imperial Majesty reserves to himself the right to give to this state, enjoying a distinct administration, such interior extension as he shall judge proper. He will, in addition to his other titles, assume that of Czar, King of Poland, in conformity with the protocol, used and hallowed by the titles attached to his other possessions.

"The Poles who are respectively subjects of Russia, Austria and Prussia, shall obtain a representation and national institutions regulated according to that mode of political existence which each of the Governments to which they belong, shall deem useful and proper to grant."

The Constitution which the Emperor Alexander I. gave to the Kingdom of Poland on Nov. 27th, 1815, promised to the Poles a national representation in two Chambers, freedom of the press, independence of the courts, responsibility of the Ministers, and an independent administration, which during the absence of the Czar was to be conducted by a Viceroy. But soon the Russian Government began to restrict this Constitution. In 1819, the censorship of the press was again introduced; in 1825, the biennial representation and the publicity of the proceedings were abolished. On Nov. 29th, 1830, a revolution broke out against the Russian rule. But the insurgents were from the beginning divided into two parties: an aristocratic one, under the leadership of Czartoryski, Lubeczki, Chlopicki, Michael Radzivill, etc., and a democratic one, under the leadership of Lelewel, etc. The former made an attempt at a reconciliation with the Czar, which, however, failed, as the Czar demanded an unconditional surrender. On Jan. 25th, 1831, the Diet excluded the House of Manow forever from the Polish throne. The insurrection was virtually suppressed Sept. 8th, 1831, by the surrender of the City of Warsaw. The Russian Government maintained that the Poles by their insurrection had forfeited those rights which the Congress of Vienna had stipulated for them, and consequently by a ukase of Feb. 26th, 1832, abolished the Constitution of

Nov. 27th, 1815. In the place of the Constitution the Organic Statute of 14 (26) February, 1832, was issued. By it Poland was declared a Russian province, the National Polish Army dissolved, and the Polish recruits divided among the Russian divisions; a Council of State, whose members need not be Poles, and were appointed by the Emperor, was substituted for the Diet; the taxes were not used for Poland alone, but paid into the treasury of Russia; religious and personal freedom was again guaranteed. England and France protested against this measure of the Russian Government, as an infraction of the spirit, if not of the letter, of the treaties of Vienna.

The legislation which was inaugurated in 1832, continued substantially until 1861. Alexander II., who from the beginning of his reign had shown a disposition to mitigate the rigorous treatment Poland had received during the reign of Nicholas I., tried to allay the excitement which showed itself in the beginning of the year 1861, by issuing a ukase, on 14th (26th) March, 1861, which, beside conceding other reforms, reëstablished the Council of State for the Kingdom of Poland, and ordered all future official acts to be in the name of the Emperor as King of Poland. This was followed by another ukase, of the 1st (13th) of January, 1862, which suppressed the special department in the Council of the Emperor for the affairs of Poland as being superfluous, since the reëstablishment of the Council of State for the Kingdom Poland. Other reforms followed in the course of the year. The Russian Government seemed to enter fully into the plan of the Polish Marquis Wielopolski, who in 1831 had been one of the heads of the insurrection, but had since completely changed his views, and for many years devoted his great talents wholly to bringing about a reconciliation between Russia and Poland. He had come to the conclusion, that not a severance from Russia could lead to a restoration of a Polish nationality, but that the only way to attain this result was to gain the sympathy and coöperation of Russia for uniting all the formerly Polish provinces into one kingdom under the supremacy of Russia. The Archduke Constantine, in particular, a warm partisan of all measures of Panslavic tendency, became the patron of this project, and was on May 27th (June 8th), 1862, appointed Namiestnik (Administrator) of the kingdom, to attempt a practical execution of the plan. In order to enlist, if possible, the Roman Catholic clergy in the scheme, the director of the Roman Catholic Seminary of St. Petersburg, Felinski, who was regarded as staunchly loyal to the Imperial Government, was appointed Archbishop of Warsaw. Yet, all these efforts remained fruitless. But few of the influential Poles could be gained over to this plan. On the contrary, the national, anti-Russian party displayed new strength. A large number of the Polish noblemen expressed their views on the reforms introduced by Russia, in an address to Count

Zamoiski, their leader. They demanded the restoration of the ancient rights of the nation. "We do not keep aloof," they said, "from making use of the institutions recently conceded to us, but we deem it a duty to declare, that the policy hitherto adopted has brought the country into a condition, in which neither military power, nor martial law, dungeons and exile, nor even sentences of death can quiet it; on the contrary, all such measures would only increase the excitement, and force the country upon a way equally disastrous to the Government and to the people. As Poles, we confidently support the Government only, when the Government shall be a national, Polish one, and when all the provinces of our country shall be united under free laws." Count Zamoiski was summoned to St. Petersburg, for having called forth this address, and as his defence was considered unsatisfactory, sent into exile. This and other measures neutralized all the effects, that some of the reforms of the Government might otherwise have produced. A revolutionary party extended its ramifications throughout the country, having its movement conducted by a Central Committee in Warsaw. The excitement ran to a fearful height, several attempts were made against the lives of Grand Duke Constantine and Marquis Wielopolski, and the year 1862 closed with forebodings of serious disturbances.

The agitation was not confined to the Kingdom of Poland, but extended to the Old Polish Provinces. In order to prevent patriotic manifestations, the Government interdicted or postponed the triennial assemblies of the nobility in these provinces. An exception was made in favor of that of Minsk, which was opened on November 22d, 1862. Never had a meeting of the nobility been more fully attended, the members considering this attendance a duty to their country. An address to the Emperor setting forth the wishes and wants of the country, was unanimously agreed upon. When the Governor forbade the sending of an address, it was resolved to insert the proposition for it in the minutes. The assembly renewed its former declarations in favor of the equality of all classes and all creeds, freedom of conscience, and institutions founded upon the spirit of the nation.

January, 1863, was inaugurated by the attempt of the Government to enforce a very rigorous conscription law in the towns, which were regarded as the seat of the revolutionary agitation. In Warsaw, the recruiting began in the night of January 14th. According to the Polish accounts, those indicated by the managers of the conscription were torn from their beds, and dragged to the citadel under a guard of Cossacks, gendarmes, and other armed men. When those for whom they were in search were not found, they seized married men, fathers of large families, and held them as hostages for their surrender. In a similar way, the conscription was enforced in the

country towns. Large numbers of the conscripts and other disaffected people assembled in the forests, in several parts of the kingdom, with the object of preparing for an insurrection. On January 16th, the Central Committee issued a proclamation stating that they had taken all the measures in their power to prevent the recruiting, but that they had been taken by surprise, and their calculations were upset by unforeseen circumstances, especially by the hostility of the French Government, which had retarded the introduction of arms into Poland. The committee proclaimed the whole country in an exceptional state, and declared the Marquis Wielopolski and his son, and all those who had taken part in the recruiting, to be outlaws. They also gave orders that the youth should quit the city to hide in the woods, in the neighborhood of Warsaw. A large number of secret societies met, on January 18th, at Perotsk, in the neighborhood of Warsaw, but they were dispersed by the military, who arrested about 50 persons. On the night of January 22d, several attacks were made upon the soldiers at Warsaw, and about 30 Russians killed, and three times that number wounded. The loss of the insurgents was very great. Simultaneously, serious conflicts took place at Block, Plonz, Radzin, Siedlic, and other places. Railway and telegraphic communication was interrupted at several points. The lower and middle classes, working men, and the proprietors of small estates, equally took part in the movement, while the great landed proprietors and the peasants kept aloof. On January 25th, the whole kingdom was placed under martial law.

At the beginning of February, several large bodies of insurgents had already been formed. The main body, consisting of about 5,000 men, was under the command of Langiewicz; and posted in the mountains of Krzyz. A second division, commanded by Count Jyskiewicz, took up a position near Rawa, on the river Rawka, in the district of Warsaw. The third division, commanded by Frankviski, was posted in the district of Lublin. The insurgents soon took possession of several towns, as Olkusz, on Feb. 1st; of Lodz, an important manufacturing town in the district of Masovia, where they took from the branch establishment of the bank, 18,000 rubles, and from the post office, 31,000 rubles. Skirmishes between the insurgents and the Russians were now of frequent occurrence. In some the Russians were defeated, and numbers of them fled into Prussian territory.

The Russian Government at once sent heavy reinforcements of troops into Poland; at the same time, the conscription was stopped, and the Council of the Empire received orders from the Emperor, to propose several bills having for their object the introduction of reforms into the government of Poland. The Prussian Government showed its sympathy with Russia, by escorting back the Russian

troops that had fled to Prussian territory, with military honors. Austria preserved an entire neutrality, and protested against occasional violation of the Austrian territory by Russian troops, in pursuit of the Poles.

On February 8th, a convention was concluded between the Governments of Prussia and Russia, by which Prussia engaged to prevent the insurgents from receiving reinforcements and arms, or from taking refuge on the Prussian territory, and, if called upon, to accord to Russia all the facilities possible for crushing the insurrection. Additional articles regulated the mutual relations between the Prussian and the Russian armies in case of an armed intervention. This convention was severely and unanimously rebuked throughout Europe, and led to a coalition of France, England, and Austria. The Second Chamber of the Prussian Parliament, on February 28th, adopted by 246 to 57 votes, a motion of the deputies Hoverbeck and Carlowitz, recommending neutrality in the Polish question, and asking that both Russian soldiers and Polish insurgents entering Prussian territory should be disarmed.

No attempt was made at provoking an insurrection in the Prussian and Austrian portions of Poland; on the contrary, the Provisional Government of Warsaw expressly warned the inhabitants of those provinces against any revolutionary outbreak. This view was shared by nearly all the Polish exiles, and Gen. Dembinski, among others, declared him to be an enemy of Poland, who would seek to cause an insurrectionary outbreak in Austrian Poland. Still the warmest sympathy with the insurrection was generally manifested in the Polish provinces of Prussia and Austria. With the success of the insurrection, notwithstanding the strict guard of the frontiers, thousands of volunteers rushed to the seat of war. In the Kingdom of Poland, the movement became in the beginning of March a national one, in the fullest sense of the word. Even those classes, which had opposed and even strongly condemned the insurrectionary outbreak, regarded it to be their duty to show their sympathy with the cause of Polish independence, and to indorse the principal demands of the National party. In Warsaw, most of the members of the Council of State who were independent of the Government, tendered their resignation. The same was done by the Municipality. Even the Archbishop of Warsaw, Felinski, whom the Russian Government had looked upon as their most unflinching partisan, tendered his resignation as member of the Council of State. Subsequently, he even addressed a letter to the Emperor, advocating the claims of the Polish nation, in consequence of which he was exiled to the interior of Russia. In the eight provinces of Russia, which had formerly been parts of the Polish Empire, the national movement likewise showed itself. In Lithuania, all the marshals of the corpora-

tions, all the judges and judicial officers, and all the independent public functionaries sent in their resignations *en masse*, basing these resignations upon a resolution not to receive any communication from the Government in the Russian language. The sympathy with the insurrection was not confined to the Polish inhabitants of these provinces, who form only a small minority of the total population (1,027,000 out of 9,849,000), but extended to the Lithuanians (1,645,000), who for centuries had been united with the Poles, and to a part of the Ruthenians, who had formerly belonged to the United Greek Church, and had been forced, in 1839, against their will, into a union with the Russian State Church. Corps of insurgents were formed in several of these provinces, especially in that of Grodno, though they never became so numerous and efficient as in the provinces of Poland Proper.

Among the Russians, the insurrection did not find as many friends as some of its leaders had expected. Alexander Herzen, Bakunin, and other chiefs of the revolutionary Russian party, openly took sides with the Poles; and through their influence a few Russian officers were induced to join the Polish insurgents; but the majority of the Russians regarded the struggle as a sacred cause of the Russian nationality, and not only supported but goaded on the Government.

The hereditary fault of the Poles, internal dissensions, showed itself among the commanders of the national forces immediately upon the outbreak of the insurrection. On February 19th, Gen. Mieroslavski, well known to the people, from the prominent part he had taken in former revolutionary plots in Poland, and in the European revolution of 1848, informed the insurgents that the Provisional National Government had appointed him commander-in-chief of all the insurrectionary forces. He began his operations on the frontier of the governments of Ploetz and Kalish, but was signally unsuccessful. Soon after he had assumed the commandership-in-chief, his corps was dispersed, and he himself disappeared altogether from the seat of war.

Marian Langiewicz was more successful, and for some time was expected to become the Garibaldi of Poland. He was born on August 5th, 1827, at Krotoshin, in the grand duchy of Posen. He studied, in 1848, mathematics at the university of Breslau, and for some time the Slavic languages at the university of Prague. Being without means of subsistence, he for two years acted as a private teacher in the family of a Polish nobleman, after which he entered the Prussian army. In 1859 he was an officer of the artillery when, believing the prospects for a Polish revolution to be brightening, he resigned, and went to Paris, where Mieroslavski appointed him teacher at his new military school. This place he resigned, in order to join Garibaldi, upon his famous expedition for the annexation of Naples

and Sicily to the kingdom of Sardinia. After the conclusion of this campaign, he was appointed teacher of the artillery scholars at the Polish military school at Cuneo. When this school was suppressed, he spent some time at Warsaw, in organizing the secret societies of the revolutionary party; from there toward the close of the year 1862, he went to London. After the outbreak of the insurrection, he at once appeared upon the seat of war, and soon became the most distinguished of the insurrectionary leaders.

The scene of the operations of Langiewicz, was the governments of Radom and Lublin, in the southern part of the kingdom, and on the frontier of Galicia. There, in a short time, he organized the largest of any insurgent corps, consisting of more than 6,000 men, and provided with six cannon. By skilful marches and manœuvres he several times surprised the enemy, and several times eluded their vigilance, when they expected to encircle him by overwhelming numbers. Polish accounts claim that he gained signal successes over the Russians at Malogaszewes, on February 26th, and March 4th at Skala.

On March 10th, shortly after the Provisional Government had appointed him general, Langiewicz assumed the dictatorship by the following proclamation:

Countrymen,—In the name of the Most High, the most patriotic sons of Poland have commenced a struggle caused by terrible abuses, and directed against the eternal enemies of liberty and civilization. Notwithstanding the extremely unfavorable circumstances in which the enemy, by a great increase of oppression, hastened the armed conflict, the struggle commenced by an unarmed people has already lasted two months, gains strength, and develops itself with energy.

In presence of this war to the death, of the massacres, the pillage, and the conflagrations which mark the progress of the enemy, Poland feels painfully the absence of a visible central power, capable of directing the forces engaged in the struggle and of summoning new assistance to the field.

Although the nation possesses more capable and worthy citizens than I, and although thoroughly conscious of the heavy duties of the office and the weight of responsibility which it involves, the gravity and necessity of the moment have decided me, after consulting with the Provisional Government, to assume the supreme power of Dictator, which I shall surrender to the representatives of the nation as soon as the yoke of the Muscovite is shaken off.

While retaining the immediate direction of military operations in my own hands, I recognize the necessity of establishing a civil government whose functions will be regulated by a special ordinance continuing the work of the Provisional Government.

I confirm the principle of liberty and equality to all citizens, granting land to the peasants, with indemnity to the proprietors.

Poles of all provinces beneath the Muscovite yoke, I summon you to the struggle against the domination of Russian barbarism. The concord of all citizens, irrespective of difference of classes and religious community, of sacrifices and unity of strength, will render our now scattered forces terrible to the enemy, and insure the independence of our country.

To arms for the liberty and independence of our fatherland. (Signed) LANGIEWICZ.

This proclamation produced a great sensation. Gen. Wyszczynski at the same time was

appointed his military coadjutor, while the direction of the civil administration was intrusted to Bentkowsky, member of the Second Prussian Chamber. Langiewicz appointed the insurgent leaders Jezioranski and Waligorski generals, and accredited foreign agents to all foreign governments, to protect the interests of the insurrectionary government. On March 13th, the Dictator published a decree constituting the Civil Court of Poland, by the nomination of four directors and two secretaries.

The dictatorship of Langiewicz called forth a protest from Mieroslawski, dated March 11th, 1863. Mieroslawski claimed to have previously been invited to take the dictatorship, by the following act of the National Provisional Government: "The National Provisional Government, considering the insurrection of Poland, invites General Louis Mieroslawski to take the dictatorship and chief command of the insurrection. Warsaw, Jan. 23d, 1863." Mieroslawski further states that he had ordered a proclamation to be published, in order to be distributed at the proper time, but that from prudential reasons the authorities only and the leaders of the insurgent detachments were informed of it. He charged Langiewicz with having "taken advantage in the most unjustifiable manner" of his prudence, seizing upon the moment when a serious attack of illness compelled him to seek a quiet refuge, to proclaim himself second dictator of the Polish nation, over some thousand square miles of territory. Ladislav Danilovski, and Ladislav Jeska, by declaration of March 15th, certified that they, conjointly with Ladislav Janovski, had, as commissioners of the Central National Committee, taken to Paris the invitation to Mieroslawski to assume the dictatorship, and they, therefore, in common with Mieroslawski, protested "against the iniquitous attempt" of Langiewicz.

This internal dissension was soon followed by a fatal blow to the national cause. The Russians moved with overwhelming numbers against Langiewicz. On March 17th, they overtook him at Chrobrze, on the river Nida. The left wing and the centre of the insurgents fought bravely, and even gained some advantages; but the right wing, mostly consisting of raw recruits, was thrown into disorder. Russian cavalry seized the wagons in the rear of the Poles, who found it necessary to retreat across the Nida. On March 18th, the retreat was continued, and the bridge across the Nida destroyed by order of Gen. Langiewicz. But this delayed the Russians, who were commanded by Prince Schachovskoi, but little; and the insurgents were again defeated at Zagoscie and Novemiasto. On May 19th, a fresh detachment of Russian troops advanced from Kielce; the Poles were attacked at Busk, from four sides, and were totally routed and dispersed. Langiewicz, together with three female adjutants, Misses Postorojtoy, Voichiehovska, and Krasinska, the cavalry general Czapski, and

several officers crossed the Vistula, on the night of March 19th, at Uscie-Yesnickie, and escaped into Galicia. He was captured and brought first to Tarnov, from there to Cracow, and subsequently to Moravia. His female companions were at once set at liberty. The Poles lost about four hundred in killed, but all the rest of their army were dispersed. This was the end of the only large body of troops which the Poles, during the year 1863, were able to organize. Henceforth they had to confine themselves exclusively to guerilla warfare, which presented but few interesting incidents.

The Central Committee of Warsaw, on March 21st, declared the power of Dictator Langiewicz to have ceased, and resumed the supreme direction of the insurrection. Mieroslawski, who returned from Paris to Cracow, seemed to have fallen into discredit. It was even reported that he had been outlawed, and that one of the two indorsers of his protest had been hanged.

On April 12th, the Emperor issued an offer of an amnesty to the Poles. In this document the instigators of the insurrection are designated as "individuals who, by long years of an unsteady life abroad, have become accustomed to instigate disturbances and violence, and to plot in secret. The task of the present age," the Emperor said, "is to establish the prosperity of the country, not by streams of blood, but by peaceable legislation." He offered a complete amnesty to all Poles who had taken part in the insurrection, if they were not guilty of desertion from the army or of other crimes, and if they returned to their allegiance by the 1st (13th) of May. He again assured them of his wish to open a new era in the political life of Poland, by gradually developing national institutions.

The Central Committee of Warsaw replied to this amnesty by a declaration that the Poles would not lay down their arms until the independence of the country had been secured. Another act of the Central Committee forbade the inhabitants of Poland henceforth to pay taxes to the Russian officials, and ordered all Poles serving in the Russian army to join the insurrectionary force. The Committee also divided the kingdom into twenty-three districts, each one of which was to furnish, without delay, four hundred men to the insurgent army. Each place was also to pay a certain amount of taxes to the National Government. For each district, branch committees were established, to attend to the recruiting, the levying of taxes, and the enforcement of the penal laws.

The secret government which, on May 1st (13th), adopted formally the style and title of the "Polish National Government," was represented by no less than six secret journals, all secretly printed and almost publicly distributed in Warsaw, and from Warsaw transmitted to every part of the kingdom. The *Movement (Ruch)* was the national official or-

gan, and the edicts and the laws which it published claimed obligatory force throughout the whole country. The others were semi-official publications to which the orders of the government were from time to time communicated, or independent prints supporting the government, and containing news of the insurrection, and of the general position of the Polish question at home and abroad.

The National Government continued issuing decrees during the whole of the year, and endeavored to enforce their execution by threatening with the severest penalties all who should refuse obedience. In July it ordered a general conscription of all men from eighteen to forty-five years of age, appointed the places for their rendezvous, and issued minute instructions for carrying on the war. It also published a municipal law for Poland Proper, for Lithuania and Ruthenia, established three supreme courts, and again forbade all Poles to pay taxes to the Russians. On July 17th, it decreed a new forced loan of twenty-one millions of Polish florins, to be paid in three equal instalments, and on July 25th it appointed "citizen" Ladislav Czaratoryski diplomatic agent-general for Paris and London. It also published a financial report, according to which it had at its disposal thirty-seven millions of rubles.

Though it was for the interest of the Polish cause to magnify as much as possible the power of the National Government, the latter often showed its secret influence by daring acts. Thus, by its order, 3,700,000 rubles were, on June 9th, abstracted from the Treasury of Warsaw, the inspector and the clerks yielding to the demand of the National Government, and disappearing from Warsaw as soon as the money had been secured. In September it prevailed upon a large number of Polish officers, who were still in the employ of the Russian Government, to resign, and caused all the printers of Warsaw to refuse printing the Government journals. In November and December, however, the Russian Government succeeded in arresting to some extent the operations of the National Government, as some of its presses and secret journals were discovered and seized. In November a new forced loan of 40 millions of Polish florins was decreed, but it seemed that the exhausted country was no longer able to furnish it. There were indications that dissension between an aristocratic and a democratic party in the National Government continued throughout the year; but the statements concerning this point are vague and contradictory.

The history of the insurrectionary movements during the last months of the year is monotonous, and presents hardly any notable features. The Poles did not undertake to organize any considerable army, but confined themselves to the guerilla warfare. Most of their prominent leaders perished in the unequal struggle; thus the Italian Nullo (on May

5th), and the Poles Cieszowski (April 4th), Czachowski, Lelewel (Sept. 6th). Most of their reinforcements were received from Galicia, but during the last months of the year the Russians were well informed by their spies of the expeditions fitted out in Galicia; and most of them were dispersed as soon as they crossed the frontier of the kingdom. A naval expedition, fitted out in England, under the command of Lapinski, in June, failed, as well as another which tried to penetrate into Russia from Moldavia. A large portion of the rural population both in the Kingdom of Poland and in the old Polish provinces continued to withhold from the insurrection not only its coöperation but its sympathy. Yet the Russians entirely failed to put a stop to the war. The guerillas were in November and December as active as ever. Gen. Kruk, one of the five chief commanders (one for each province), whom the National Government had appointed, claimed to have defeated the Russians at Chelm, in the government of Lublin, on Nov. 9th, and on Nov. 18th, the Polish General Bozack surprised and defeated the Russians at the town of Opatov, in the government of Radom.

Many exaggerated reports were spread by the Polish papers relative to the extent of the insurrection and the number of the National troops. Lithuania was represented by them as unanimous in favor of the insurrection of Poland Proper, and even so distant governments as Witebsk, Smolensk, the Ukraine, were said to have risen against the Russian authority. These reports were not confirmed, and it appears very doubtful whether in any government outside of Poland Proper, a majority of the population felt any sympathy with the insurrection. As to the number of guerillas, all accounts assert the impossibility of stating it with any degree of accuracy. It was probably most of the time between 10,000 and 30,000.

The outbreak of the insurrection, of course, arrested the reformatory policy which the Grand Duke Constantine and Marquis Wielopolski intended to pursue. During the first days after the beginning of the war, the Russian Government held out the promise of some further reforms; but when this, as well as the offer of an amnesty, failed to produce any effect, the utmost rigor was used for the suppression of the rebellion. Gen. Berg, who in March was appointed commanding General at Warsaw, and Gen. Mouravieff, who was appointed Military Governor of the governments of Kovno, Vilna, Witebsk, Minsk and Grodno, to which later the government of Augustovo,* in Poland Proper, was added, ruled with an iron hand. Mouravieff, in particular, by a degree of cruelty which has no parallel in modern

history, incurred the general condemnation of the civilized world. Toward the close of the year, Grand Duke Constantine was temporarily relieved from his post as Administrator of the Kingdom and Chief Commander of the Army; some time before, Marquis Wielopolski had left Warsaw on a furlough of several months.

The convention concluded on February 8th, between Russia and Prussia, was deemed, at least by France, to be such an interposition of the latter in behalf of the former, in her contest with her revolted subjects, as to be a matter of international concern.

On Feb. 17th, M. Drouyn de l'Huys addressed a note to M. de Talleyrand, the French Minister at Berlin, in which he expressed a regret that Prussia had departed from her neutrality, and enumerated as inconveniences likely to result from that step, that the Polish question had thereby acquired European importance; that the idea of unity between the different populations of the ancient Kingdom of Poland had been revived; that a really national insurrection had been brought about; that the Prussian Government had by this means cast itself into serious embarrassments; and that it had created a political situation of grave uneasiness, and likely to prove the source of future complications for the Cabinet.

Another despatch from M. Drouyn de l'Huys to the Duc de Montebello, French Minister at St. Petersburg, February 18th, 1863, states that the Polish question excites in France the sympathy of all classes, and that the representatives of the European Powers, assembled at the Congress of Vienna, were actuated by the same sentiments when, seeking to repair the misfortunes of Poland, which was one of the principal objects of their solicitude, they placed at the head of the general act, destined to serve as the basis of the new political system of Europe, the stipulations which connected Poland with that system. He recapitulates a conversation with the Baron de Reichberg, from whom, he says, he had not concealed that "even despite of us, events may grow more and more embarrassing, and the pressure of public opinion become greater as the gravity of the circumstances increases." He comments upon the hopes aroused upon the accession of the Emperor Alexander to the throne, and considers that if they should not be realized, Russia would create embarrassment for herself, and place France in a disagreeable position. He concludes by requesting the Duc de Montebello to lay the question in this shape before the Prince Gortschakoff.

In a despatch to the Duke of Grammont, French Minister at Vienna, dated Feb. 19th, gratification was expressed by M. Drouyn de l'Huys that "the Court of Austria had protected herself against the fault into which the Cabinet of Berlin had fallen in signing the convention of St. Petersburg." The despatch goes on to say that "it is notorious that, in the different phases which the Polish question has

* The report that the government of Augustovo had been detached from the Kingdom of Poland, and attached to Russia Proper, proved to be erroneous. It was only detached from the Military Administration of Gen. Berg, and placed under that of Gen. Mouravieff.

assumed during the last century, the attitude of the Cabinet of Vienna has not been identical with that of Russia and Prussia." This difference, it is said, has not escaped the Polish population, and has not been without influence in their dispositions toward Austria. In a despatch to Baron de Gros, the French Minister at London, dated Feb. 21st, 1863, M. Drouyn de l'Huys expresses the expectation that the British Minister at Berlin has received instructions perfectly coinciding with those of the French Minister. He suggests, however, whether it would not be advisable to give to the manifestation of the opinion of the two Governments "a more permanent and a more determined form;" whether, for example, they could not "combine the terms of an identical communication, to be delivered simultaneously to the Berlin Cabinet, and then brought to the cognizance of the St. Petersburg Cabinet?" It also appeared to M. Drouyn de l'Huys, that "a step of this nature would obtain the adhesion of the Austrian Government," as there was reason to believe that the Vienna Cabinet took the same view as England and France of the convention between Prussia and Russia. In order to give the English Cabinet some idea of the views of France, a copy of a draft of a note was inclosed, in which, however, as M. Drouyn de l'Huys stated, France was willing to admit all reasonable alterations.

A circular despatch from M. Drouyn de l'Huys to the French diplomatic agents abroad, dated March 1st, stated that "the Government of Her Britannic Majesty had not adhered to the step which France was disposed to take; that Austria, on her part, while adopting the view of France, had not thought herself justified in officially discountenancing a convention with which she had from the first declined solidarity; that France in this state of things had no means with which to pursue further a proposition which supposed an agreement.

The view taken by Great Britain of the Polish question may be inferred from the note of Earl Russell of the 5th of March, 1863, addressed to the Powers that signed the Treaty of Vienna. It differs from the French in referring to the proclamation of the Emperor Alexander, which formed no part of the final act, instead of invoking the treaties. The following were the demands proposed to be made of Russia: 1st. An immediate amnesty in favor of the Polish insurgents. 2d. The realization of the promises made by the Emperor Alexander to the Poles in his celebrated proclamation of November, 1815. 3d. The immediate convocation of the Polish Diet.

On April 17th, the representatives of Austria, France and England, at St. Petersburg, presented to the Russian Cabinet notes of their Governments concerning the Polish question. The notes of France and England are dated April 10th, that of Austria is dated April 11th.

The French note says what characterizes the disturbances in Poland—what gives them

an exceptional importance—is the fact that they are not the effects of a temporary crisis. Effects which are almost invariably reproduced with each generation cannot be attributed to purely accidental causes. These convulsions, which have become periodical, are the symptom of an inveterate evil; they are so many proofs of the impotency of all plans hitherto designed to reconcile Poland with the position hitherto conceded to it. On the other hand, these too frequent disturbances are a source of anxiety and alarm. Poland, occupying a central position on the continent, cannot be disturbed without the other states touching upon her frontier suffering a shock which reverberates through the whole of Europe. This has always been the case whenever the Poles have taken up arms. These conflicts do not only create anxiety in the public mind, but, if they are prolonged, may disturb the relations between the cabinets, and cause most lamentable complications. It is the common interest of all the powers to see that these incessantly recurring dangers are stopped. The French Government feels confident that the Court of Russia will show that it is animated by those liberal views of which the reign of the Emperor Alexander has already given such striking proofs; and that it will take measures to place Poland under the conditions of a durable peace.

The English note takes the ground that the general sympathy which is felt for the Polish nation might, of itself, justify her Majesty's Government in making, in favor of the Polish race, an appeal to the generous and benevolent feelings of his Imperial Majesty; but that the Government of Great Britain has a peculiar right to make its opinions known to that of Russia, because Great Britain having, in common with other European Powers, been a party to the Treaty of Vienna, her Majesty's Government should interpose with regard to any matter which may appear to constitute a departure from the provisions and stipulations of that treaty. The English Government regrets to be obliged to say that, although the union of the kingdom to the empire has been meditated in accordance with the stipulations of the Treaty of Vienna, the conditions upon which that union was distinctly made to depend have not been fulfilled by the Russian Government. The Emperor Alexander, in execution of the engagements contracted by the Treaty of Vienna, established in the Kingdom of Poland a national representation and national institutions, corresponding with the stipulations of the treaties. But upon the suppression of the revolt, in 1830, those arrangements were swept away. Prince Gortschakoff, like his predecessors, argues that the suppression of that revolt cancelled all the engagements of Russia in the Treaty of Vienna with regard to the Kingdom of Poland; but the English Government cannot acquiesce in a doctrine which it deems so contrary to

good faith, so destructive of the obligations of treaties, and so fatal to all the international ties which bind together the communities of European States and Powers. Such an assertion might have been made if the Emperor of Russia had held Poland as part of the original dominions of his crown, or if he had acquired it by the unassisted success of his arms, or unsanctioned by the consent of any other Power. But the Emperor of Russia held Poland by the solemn stipulation of a treaty made by him with Great Britain, Austria, France, Prussia, Portugal, Spain and Sweden, and the revolt of the Poles could not release him from the engagements so contracted, nor obliterate the signatures by which his plenipotentiaries had concluded, and he himself had ratified, those engagements. These engagements, in the opinion of the English Government, have not been, nor are they now, faithfully carried into execution by the Russian Government. The English Government forbears to dwell upon that long course of action, civil, national, and military, carried on by the Russian Government within the Kingdom of Poland, of which the Poles so loudly complain; it would rather advert to the much desired termination of their lamentable troubles. It is evident that even if Poland shall be reduced to subjection, the remembrance of the events of the struggle will long continue to make it the bitter enemy of Russia, and a source of weakness and of danger, instead of being an element of security and of strength. The English Government would beg, moreover, to submit to the Imperial Government that, besides the obligations of treaties, Russia, as a member of the community of European States, has duties of comity toward other nations to fulfil. The conditions of things which has now for a long course of time existed in Poland, is a source of danger, not to Russia alone, but also to the general peace of Europe. The disturbances which are perpetually breaking out among the Polish subjects of his Imperial Majesty necessarily produce a serious agitation of opinion in other countries of Europe, tending to excite much anxiety in the minds of their Governments, and which might, under possible circumstances, produce complications of the most serious nature.

A second English despatch of the same date (April 10th), gives an account of an important conversation between Earl Russell and Baron Brunnow. The baron asked whether the communication which her Majesty's Government was about to make to St. Petersburg would be of a pacific nature. Earl Russell replied that it would be, but that, as he did not wish to mislead Baron Brunnow, he must say something more. Her Majesty's Government had no intentions that were otherwise than pacific, still less any concert with other Powers for any but pacific purposes. But the state of things might change. The present overtures might be rejected, and the insurrection continue to assume larger di-

mensions; if, in that case, the Emperor of Russia should take no conciliatory steps, dangers and complications might arise not at present in contemplation. Baron Brunnow, in reply, stated that there were projects afloat for altering the map of Europe, that in these projects compensations to Russia were concluded, that Russia entered into none of these projects, and trusted Great Britain would do likewise. Earl Russell said it was the wish of her Majesty's Government to do so; but Russia had herself, in some cases, been active in proposing and carrying into effect territorial changes. But England trusted that the Emperor of Russia, by granting an amnesty and the benefit of free institutions to Poland, would put an end to this insurrection.

The Austrian note, of April 11th, directs the attention of the Russian Government to the pernicious influence of the Polish insurrection upon the Austrian provinces. Grave embarrassments are thus occasioned to the Austrian Government, which is therefore bound to attach peculiar importance to prevent their recurrence. By replacing the Polish provinces subject to Russia in the conditions of a durable peace, Russia would avert consequences disastrous to all Europe, but peculiarly to the countries which are more frequently affected by conflicts that inevitably result in agitating public opinion to a degree alarming for the various Governments, and calculated, moreover, to bring about serious complications.

The replies of Russia to the Three Great Powers are dated April 26th, and were published by the *Journal de St. Petersburg*, of May 3d. In his reply to England Prince Gortschakoff subdivides the English despatch into two portions: the first relating to what may be considered as the legal bearings of the Polish question; and the second to the expediency of reëstablishing peace in Poland upon a durable basis. In regard to its legal obligations, the Russian Minister thinks that his Government can thoroughly vindicate its conduct. He corrects the mistake into which he alleges that Earl Russell had fallen when he stated in his despatch that it was provided by that treaty that the Duchy of Varsovia should be converted into a Polish kingdom and joined to the Russian empire under certain conditions. On the contrary, he points out, it was merely provided that the subjects of Russian, Austrian and Prussian Poland respectively should obtain "a representation and national institutions regulated after the mode of political existence which each of the Governments to which they appertained should judge it convenient to accord to them." Prince Gortschakoff goes on to say that Alexander I. gave a constitution to Poland at the close of the year 1815, but this act was purely spontaneous on his part, and, so far from constituting an irrevocable engagement toward the foreign Powers, was, in fact, never communicated to them. The revolt of 1830, he says, had the effect of annulling the

constitution granted in conformity with the Treaty of Vienna, and when in that year the Russian Government succeeded in reestablishing its supremacy in Poland, it was by the virtue, as it were, of re-conquest entirely absolved from all precedent obligations. Coming to the second branch of the question, he says, it is the object of the Czar, as it is the desire of her Majesty's Government, that a practical solution of the Polish question should be arrived at. The only difference of opinion which exists between the two cabinets is due to the fact that the English Government continues to maintain that a restoration of the Constitution of 1815 is the "sole panacea" for the troubles of Poland.

Prince Gortschakoff goes on to say: "But the English Government and nation can hardly assert that there is only one form of government possible for all peoples, whatever may be their history and development. There are many degrees to pass through, and each nation must proceed in this path according to its own instincts. It is just and natural that a sovereign, animated by the most benevolent intentions, should calculate the bearing and extension of institutions destined to place his subjects in the most favorable conditions of existence." Prince Gortschakoff then appeals to the liberal measures which the present Czar has inaugurated in Russia, and remarks that a similar "solicitude" has been brought to bear upon Poland. He says that foreign states misapprehend the real nature of Polish institutions. They are, in truth, most liberal, although distance and "the chimerical passions of a hostile party" have prevented strangers from appreciating them. The system inaugurated by the present Emperor contains "a germ which time and experience must develop." It will one day end in becoming "a species of self-government, established on the basis of those provincial and municipal institutions which have in England secured the greatness and prosperity of that country." They have hitherto been prevented from bearing their full fruit by "the party of disorder," and "it has been impossible to show how they work, or how far they respond to the real necessities and to the degree of maturity of the country. It is only when this experiment shall have been made that it will be possible to pass a judgment upon this work, and to complete it.

"Russia is too directly interested in the tranquillity of Poland not to understand the duties of her position toward other nations. It would be difficult to assert that she has met, in this respect, with scrupulous reciprocity. The continual conspiracy which is being organized and armed abroad to keep up disorder in the kingdom is a fact of public notoriety, the inconvenience of which principally consists in the moral effects which the favorers of the insurrection deduce from it, in order to lead astray the peaceable population, by gaining credit for the belief in direct assistance from abroad.

"If the Government of her Britannic Majesty lays stress upon (*releve*) the reaction which the troubles of Poland exercise on the peace of Europe, we must be still more struck with the influence which the agitations of Europe have in all times had the power to exercise on the tranquillity of Poland. Since 1815 this country has witnessed the development of a material welfare unknown until then in her annals, while other states have in the interval undergone many interior crises. This repose was only troubled, in 1830, by the consequences of commotions coming from abroad; 18 years later, in 1848, while almost the whole of Europe was convulsed by the revolution, the Kingdom of Poland was able to preserve its tranquillity. We are persuaded that it would be the same at present, were it not for the continual instigations of the party of cosmopolitan revolution. If this party, everywhere devoted to the overthrow of order, at present concentrates all its activity upon Poland, a grave error would be committed in supposing that its aspirations will stop short at that limit. What it seeks there is a lever to overturn the rest of Europe. Those cabinets which attach importance to seeing the Kingdom of Poland return a moment earlier to the conditions of a durable peace, cannot therefore more certainly ensure the realization of this desire than by laboring on their side, to appease the moral and material disorder which it is sought to propagate in Europe, and thus to exhaust the main source of the agitations at which their foresight is alarmed."

With reference to this despatch, Lord Russell, writing on May 2d, to Lord Napier, English Minister at St. Petersburg, says: "Baron Brunnow came to me this morning, and, before giving me a copy of the despatch of his Government in answer to mine to your Excellency, of the 10th of April, said to me, in substance, what follows: 'You have declared to me that the step which Lord Napier was instructed to take was taken with a pacific intention. The Imperial Cabinet has received your despatch in a similar spirit of peace and of conciliation. You have told me that the representation you have made is founded upon the basis of the stipulations of the Treaty of Vienna of 1815. The Imperial Cabinet on its part accepts the basis. The Imperial Cabinet is ready to enter upon an exchange of ideas upon the ground and within the limits of the treaties of 1815.'"

The reply to France is a much less elaborate document than the despatch sent to England. Prince Gortschakoff states that the wishes expressed in the name of the Emperor Napoleon harmonize with those of the Emperor of Russia. The Emperor Alexander admits the just interest which the powers bordering on Poland, and those who coöperated in settling the state of Europe, must naturally take in all the complications of a nature to disturb its harmony. The Emperor Napoleon, in pointing out to Russia the opportunity for taking measures to

place Poland in the condition of durable peace, responds entirely to the wishes of the Emperor Alexander. But it is upon the selection of the measures conducive to this end, that it would be desirable to come to an understanding. The French Minister of Foreign Affairs points out the insufficiency of the combinations, hitherto conceived to reconcile Poland with the position granted to her. This is an additional motive not to recommence experiments which have been a source of misfortune to Poland as well as to Russia—a cause of troubles to Europe, and which in all probability would lead to the same results. The evils from which the kingdom is actually suffering are the revolutionary tendencies, the curse of our age, which are now concentrated in Poland. The Governments whose duty it is to cure this evil, cannot devote too much attention to it. The Emperor Napoleon can best accelerate the realization of the wish he expresses to Russia in the name of humanity, and in that of the permanent interests of Europe, by aiding in putting down the cosmopolitan revolution. The Russian Government hopes that, appreciating the question in a high point of view, with all the difficulties it implies, and all the allowances it requires, the Emperor Napoleon will not refuse the moral support which may depend upon him, so as to facilitate to the Emperor of Russia the task pointed out to him by his solicitude for the Kingdom of Poland, his duties toward Russia, and his international relations with his neighbors and with the great Powers of Europe.

In his reply to Austria, Prince Gortschakoff refers to his replies to England and France as containing a full exposé of the views of the Russian Government. He then goes on to state, that the Emperor Alexander understands the preoccupations produced in the Cabinet of Vienna by the deplorable events which are taking place in the immediate neighborhood of the Austrian frontier, and the value which it must attach to seeing them brought to an end. But the return of Poland to the condition of peace does not depend solely upon the measures which may be applied. The source of the agitation in Poland is the cosmopolite revolutionary party. Foreign Governments which take an interest in the tranquillity of Poland, on account of the influence which the state of that country must have on the peace of Europe, can greatly contribute to remove this cause of disorder, the reaction of which would at last affect themselves. The Russian Government has the firm conviction that the Cabinet of Vienna will neglect nothing in its power to oppose the dangerous manœuvres of the revolutionary party.

In compliance with an invitation of the Emperor of France, most of the second-rate Powers of Europe also addressed notes to the Russian Government with regard to the Polish question; thus Sweden on April 7th, Spain on March 21st, Italy on April 23d, Holland on April 28th, Denmark on May 8th, and Portugal, to all

of which notes Russia replied. But neither the notes nor the replies contained anything noteworthy. Belgium, Switzerland, and the United States of America declined the invitation of France to address Russia. The opinion of the Government of the United States is expressed in a note of the Secretary of State to Mr. Dayton, American Minister at Paris, dated Washington, May 11th, 1863. Mr. Seward informs Mr. Dayton that M. Mercier had read to him a despatch, dated April 23d, in which M. Drouyn de l'Huys, the French Minister of Foreign Affairs, states that the Emperor, appreciating the value of the traditional sympathy of the United States for Poland on the one hand, and their evident friendship for Russia on the other, would be happy to obtain the coöperation of the United States in this important question. Secretary Seward goes on to say that "the American Government is profoundly and agreeably impressed with the consideration which the Emperor has manifested toward the United States, by inviting their concurrence in a proceeding having for its object the double interests of public order and humanity. Nor is it less favorably impressed with the sentiments and the prudential considerations which the Emperor has in so becoming a manner expressed to the Court of St. Petersburg," as they are such only "as appeal to the just emotions and best sympathies of mankind." He feels assured by the enlightened and humane character of the Emperor of Russia that this appeal will be accepted, and that it will meet at St. Petersburg with all the favor compatible with the general well-being of the vast states which the Emperor of Russia governs with so much wisdom and moderation. Nevertheless, notwithstanding the so favorable reception which the United States Government is disposed to give to the suggestion of the Emperor of the French, the American Government finds in its traditional neutral policy an insurmountable difficulty in associating itself, by an active coöperation, with the Cabinets of Paris, London, and Vienna, as it is requested. This note was very well received in St. Petersburg. Prince Gortschakoff at once addressed a note to the American ambassador at St. Petersburg expressing, in the name of the Emperor, the satisfaction and the gratitude which the heart of his Majesty has felt by seeing the imperial policy and intentions so well appreciated by the American people.

The Governments of France, England, and Austria were entirely dissatisfied with the Russian replies. New negotiations led to the determination to address new and identical notes to St. Petersburg, designating the points which, in the opinion of the three Governments, the Government of Russia ought to grant to the Poles, as the basis of pacification. These "six points" were as follows: 1. Complete and general amnesty. 2. National representation, with powers similar to those which are fixed by the charter of the 15th (27th) November, 1815. 3. Poles to be named to public

offices in such a manner as to form a distinct national administration, having the confidence of the country. 4. Full and entire liberty of conscience; repeal of the restrictions imposed on Catholic worship. 5. The Polish language recognized in the kingdom as the official language, and used as such in the administration of the law and in education. 6. The establishment of a regular and legal system of recruiting. Earl Russell, in submitting to Prince Gortschakoff these six points, stated it to be the opinion of her Majesty's Government that the Poles would not be satisfied by mere declarations of good intentions.

The French note to the Russian Cabinet respecting Polish affairs recommends, in the same terms as the English and Austrian notes, the acceptance of the "six points" as a basis for the pacification of Poland. M. Drouyn de l'Huys does not suggest that the Russian Government will object to these proposals, or hesitate to accept them as bases for negotiations. He thinks "that there is room to anticipate a provisional pacification, founded upon the maintenance of the military *status quo*, which it would be the duty of the Emperor of Russia to proclaim, and which the Poles should on their side observe on their own responsibility." Polish affairs may then be submitted to the consideration of a conference of the eight Powers which signed the Treaty of Vienna. Thus if, as the French Cabinet hopes, Russia accepts the bases of negotiation proposed to her, "this question, withdrawn from the decision of force, which might cut it once more without solving it, would henceforth enter on the path of friendly discussion, the only way to prepare a solution vainly sought up to the present day, and which would be worthy alike of the enlightenment of the epoch and of the generous sentiments by which all the cabinets are animated."

The despatch of Count Rechberg is dated Vienna, June 18th, and addressed to the Austrian Minister at St. Petersburg. After a retrospective introduction of a very friendly character, Count Rechberg says, respecting the replies of Russia to the former notes of the three Powers: "They have appeared to us to correspond with what we expected from the wisdom and liberal intentions of the Emperor Alexander. The Cabinet of St. Petersburg appeared, in fact, to display a desire to proceed to an interchange of ideas on the means the most calculated to attain the common object of our desires. Austria, France, and Great Britain found themselves, therefore, in a manner invited to express their views in a more precise way, and to explain them amicably to the Russian Government. Animated by the spirit of conciliation which actuated our first step, we have not hesitated to follow the path indicated to us. We have consequently examined what are the conditions by which, in our opinion, tranquillity and peace could be restored to the Kingdom of Poland; and we have

succeeded in expressing these conditions in the following six points which we recommend to the consideration of the Cabinet of St. Petersburg. Like England and France the Government of Austria is in favor of calling a conference of the Powers which signed the Treaty of Vienna." Count Rechberg remarks on this subject: "To judge from a passage of Prince Gortschakoff's despatch to Baron Brunnow, the Cabinet of St. Petersburg seems to admit the interest which all the Powers who signed the general Act of the Congress of Vienna have in participating in deliberations concerning the country designated in that Act as the Duchy of Warsaw. We should have no objection for our part to such a form of negotiations, and we should be ready to accept preliminary negotiations or conferences between the eight Powers signing the general Act of the Congress of Vienna, if Russia recognized the expediency of such conferences, in order to discuss the development and application of the programme which we have drawn up above."

Prince Gortschakoff replied to these notes on July 22d. In polite but determined language, Russia declined either to accept the six points, or to agree to the proposed Congress. In point of ability, this reply is one of the most remarkable documents issued on the Polish question. At the outset, Prince Gortschakoff says: "We have pleasure in learning that Lord Russell admits with us the barren nature of a prolonged controversy relative to the signification of the 1st article of the Treaty of Vienna; and that with us, likewise, he desires to place the question upon ground which should offer more opportunities for arriving at a practical solution. Before taking our stand upon this ground, we deem it useful to put in a clear light our positions respectively. The Imperial Cabinet admits the principle that every Power signing a treaty has a right to interpret the sense thereof from its own point of view, provided always that that interpretation remains within the limits of the meaning that is possible to be put upon it according to the text itself. In virtue of this principle, the Imperial Cabinet does not dispute this right in any one of the eight Powers which have concurred in the general proceedings of Vienna in 1815. Experience has, it is true, demonstrated that the exercise of such right issues in no practical result. The experiments made already in 1831 have had no issue but to place on record the divergence of opinions. Nevertheless this right exists. It extends as far as the limits which I have indicated above, and is incapable of obtaining a wider range but with the express consent of the contracting party most directly interested. Accordingly it depended upon the Imperial Cabinet to maintain the strict application of this principle, observing the line of action taken in the course of the month of April last, with respect to events which occurred in the Kingdom of Poland. If, in reply to that appeal, it went further into the subject, it was entirely owing

to its perfect readiness to seek to conciliate, and in order to reply with courtesy to an appeal which bore a similar character. The Russian Cabinet is still ready to enter upon an exchange of views upon the basis and within the limits of the treaties of 1815.

"The Russian Government subscribes to the principle laid down by Earl Russell, that the basis of government is in every case the confidence which it inspires in the governed; but the indispensable corollary of this principle is respect for authority, and no government can allow that a fraction of the people be vested with the right of seeking elsewhere than under the legitimately constituted authority, by armed rebellion, supported by hostile or foreign parties, the well-being and the prosperity which they might declare that they could not realize without the aid of inspirations from abroad."

Coming to the six points, Prince Gortschakoff refers to his former despatch to show that the Emperor has already either decreed or prepared the greater part of the measures which they include. But Russia is unable to share the hope, without certain reserves, that an adoption of the six points would lead to a complete and permanent pacification of the Kingdom of Poland. In the opinion of the Russian Government, reorganization of the kingdom must in all cases be preceded by the reestablishment of order in the country. That result is dependent upon the stoppage of the material assistance and moral encouragement obtained from abroad by the insurrectionists. We must presume that the sources of information from which the English Government have formed their judgment of the state of affairs in Poland, are not of an impartial origin. If Earl Russell were exactly informed of the occurrences in Poland, he would know that the masses of the people have kept aloof from it, that the rural population have even evinced hostility to it, that the insurrection sustains itself alone by a terrorism unprecedented in history, and that the insurgent bands are principally recruited from elements foreign to the country. The principle of action of the directing committees from without is to keep up agitation at all cost, in order to furnish an occasion and a pretext for a diplomatic intervention which should lead to military action. As long as this situation lasts, the measures which Earl Russell recommends would with difficulty find application practically. The same causes would again produce the same effects. The presence of armed bands, the terrorism of the Central Committee, and the appearance of an immediate pressure from without, would moreover take from these measures the fitness of time, the dignity and the effectiveness which the Russian Government could expect from their spontaneous adoption. The instigators of the rebellion would not accept the adoption of the six points as a solution of the Polish question. They demand neither an amnesty, nor an autonomy, nor a representation either more or less

complete. The absolute independence of the kingdom even would be for them only a means for arriving at the final object of their aspirations. This object is dominion over provinces where the immense majority are Russian by race or by religion; in a word, it is Poland extended to the two seas, which would inevitably bring about a claim to the Polish provinces belonging to other neighboring powers. The final result would be a general conflagration, and the subversion of the peace and the equilibrium of Europe.

The project of Alexander I. to combine the Duchy of Warsaw "with the Polish provinces anciently dismembered into a kingdom under the sovereignty of Russia, with an administration in accordance with the wishes of the people, was a passing inclination of that sovereign and must be excluded, even in an exchange of ideas made within the limits of the treaties of 1815. The proposal of an armistice is rejected. The Emperor of Russia, it is said, owes it to his army, to the peaceable majority of the Poles, and to Russia to take energetic measures to crush the insurrection. The proposal of a conference of the eight Powers which signed the Treaty of Vienna for the purpose of discussing the six points is also rejected. If the measures were to be submitted to ulterior deliberation, there would result a direct interference of foreign Powers in the most intimate details of the administration, an interference that no great Power could admit." It would also "further increase the pretensions and illusions of the Polish agitators." The only conference which Russia will accept is a conference with Austria and Prussia, between which "the traditions of history" and immediate neighborhood establish a certain community and reciprocity of interests. On this point Prince Gortschakoff says: "All the arrangements destined to regulate the interior administration and the mutual relations of the Polish territories placed, since the Congress of Vienna, under their respective dominions, have been laid down in treaties concluded directly between these three Courts on April 21st (May 3d), 1815. They have been successfully completed by a series of special conventions whenever circumstances have required it. The general principles mentioned in these treaties, and which could interest Europe, have alone been inserted in the Act of the Congress of Vienna, signed on May 27th (June 9th), by all the Powers invited to concur in it. At present it is not a question of these general principles, but the administrative details and ulterior arrangements would furnish useful matter for discussion by the three Courts in order to place the respective position of their Polish possessions, to which the stipulations of the treaties of 1815 extend, in harmony with present necessities and the progress of time." In conclusion, Prince Gortschakoff expresses the hope that the great Powers, by clear and categorical language, would contribute to dissipate the illu-

sions of the insurgents, and to thwart the calculations which they found upon an active intervention in favor of their exaggerated aspirations. Thus they would bring nearer the moment when the Emperor of Russia could execute and develop the reformatory measures which he designs to adopt for Poland.

His reply to France agrees in substance with the one addressed to England. It emphatically insists on the moral solidarity of the great Powers in presence of the evident action of the revolutionary elements of all countries concentrating at present in Poland, stating that this gives the question a European character. Prince Gortschakoff says that Russia is the more compelled to call the attention of the French Government to this fact, since one of the principal focuses of the agitation which exists is Paris itself. The Polish emigrants, profiting by their social relations, have organized a vast conspiracy, destined to mislead public opinion in France by a system of misrepresentation and calumny, and to keep alive disorder in the Kingdom of Poland by assisting it with material by the terror of a secret committee, and, above all, by propagating the conviction that active foreign intervention will take place in favor of the most senseless aspirations of the insurrection. "We have pleasure," says Prince Gortschakoff, in conclusion, "in believing that the French Government will not permit its name to be abused for the advantage of the revolution in Poland and in Europe."

The reply to Austria, dated July 15th, did not present any new points of importance. In the concluding passage of this despatch, Prince Gortschakoff says: "As to the substance of our propositions, we believe that if appreciated in the spirit which has dictated them, and if honestly applied, they may lead to a rational and practical solution which would at once give satisfaction to the rights and interests of the three neighboring Powers, to the stipulations of the treaty of 1815, on which the general equilibrium reposes, to the reasonable wishes of the Poles, and the solicitude which Europe has manifested on behalf of the tranquillity of these countries. We can therefore only regret the different impression which the directions addressed by Count Rechberg to the Austrian ambassadors at London and Paris lead us to anticipate." The publication of the Russian note in the official Vienna journal was accompanied with the remark, that immediately after the receipt of the Russian reply, a note was addressed to the Austrian ambassadors at the Courts of London and Paris, that Austria would not separate herself from the alliance, and she would not negotiate separately with Russia, as demanded by the latter. The Austrian Government was of the opinion that the note of Prince Gortschakoff might be interpreted as indicating some secret negotiations between the Courts of Vienna and St. Petersburg; and Count Rechberg, in a note to the Austrian Minister at St. Petersburg, dated July

19th, called the attention of Prince Gortschakoff to this point. In reply, Prince Gortschakoff, in a note of July 27th, expressed surprise to find that Count Rechberg had hinted the possibility of Russia entertaining a reservation. He then proceeds: "If this view of the subject has been put forward by Count Rechberg from a desire to remove all idea of a separate agreement, which might be judged incompatible with the engagement contracted by Austria with the point of departure by which she connects her measures, let us hasten to bear witness that no agreement whatever has taken place between her and ourselves upon the subject of the late overtures. We have deduced no approbation from the Austrian note of the 18th June, and have anticipated her refusal of a conference between Russia, Prussia, and Austria. We have not dreamt of establishing any assimilation between Galicia and Poland; but tradition, precedents, and the assistance received by the insurgents from Galicia, attest their common interests, and show the necessity of an understanding between the three Northern Courts. The proposition for a conference was conceived in a friendly spirit, in conformity with the relations and interests of the two Courts, and we should regret any different interpretation." The despatch terminates with an expression of Prince Gortschakoff's regret that the note of Count Rechberg presages a different impression.

England and France declared the reply of Russia to be entirely unsatisfactory, and M. Drouyn de l'Huys, in a new note, designated it as a refusal to grant the six points. Prince Gortschakoff protested against this view. In another despatch, addressed to the Russian ambassador at Paris, he says that the greater part of the measures indicated in the six points had been granted, but that, far from pacifying the kingdom, they were the starting point of the insurrection. The agitators made reforms a pretext for raising the country. Having conceived the hope of complete independence by the aid of foreign intervention, they could not appear satisfied with the liberal institutions, the basis of which was being carried out by the Government. Prince Gortschakoff further deprecates any intention to represent the French Government as an accomplice of the revolutionary party. "We adhere," he says, "to our observations concerning the suspension of hostilities. It is necessary that the rebels should lay down their arms or the Government abdicate all authority. It is impossible to otherwise understand the question of dignity and public order. Our despatch contained neither irony nor provocation, but a feeling of wounded dignity might have manifested itself in the expression of our ideas."

Earl Russell replied again to Prince Gortschakoff in a note of August 11th. He insists that the Russian Government, not the Poles, bears the chief responsibility for a continuation of the war. "Her Majesty's Government have

no hesitation in declaring their conviction that the principal obstacle to the reëstablishment of order in Poland is not the assistance obtained by the insurgents from abroad, but the conduct of the Russian Government itself. The Empress Catherine in 1772 promised to the Poles the maintenance of their religion. The Emperor Alexander I. in 1815 promised to the Poles national representation and national administration. These promises have not been fulfilled. During many years the religion of the Poles was attacked, and to the present hour they are not in possession of the political rights assured to them by the treaty of 1815, and the constitution of the same year. The violation of these solemn engagements on the part of the Russian Government produced disaffection, and the sudden invasion of the homes of Warsaw, in a night of January last, was the immediate cause of the present insurrection. Unless the general feeling in Poland had been estranged from Russia, the moral and material assistance afforded from abroad would have availed the insurgents little. It is true, however, that lively sympathy has been excited in Europe in favor of the Poles. In every considerable state where there exists a national representation—in England, in France, in Austria, in Prussia, in Italy, in Spain, in Portugal, in Sweden, in Denmark,—that sympathy has been manifested. Wherever there is a national administration the administration has shared, though with prudence and reserve in expression, the feelings of the legislature and the nation. Russia ought to take into account these sympathies, and profit by the lesson which they teach." His despatches conclude as follows: "In communicating their views to Prince Gortschakoff, it remains to her Majesty's Government to discharge an imperative duty. It is to call his Excellency's most serious attention to the gravity of the situation, and the responsibility which it imposes upon Russia. Great Britain, Austria, and France have pointed out the urgent necessity of putting an end to a deplorable state of things which is full of danger to Europe. They have at the same time indicated the means which, in their opinion, ought to be employed to arrive at this termination, and they have offered their coöperation in order to attain it with more certainty. If Russia does not perform all that depends upon her to further the moderate and conciliatory views of the three Powers, if she does not enter upon the path which is open to her by friendly counsels, she makes herself responsible for the serious consequences which the prolongation of the troubles of Poland may produce."

The French note, which was simultaneously addressed to Prince Gortschakoff, was accompanied with a note, in which M. Drouyn de l'Huys explains the European character of the stipulations which were accepted by Russia, Austria, and Prussia at the Congress of 1815. The French Minister recalls "1. That Russia has entered into an engagement to bestow on

the Kingdom of Poland a distinct constitutional régime. 2. That Russia, in making the reservation to approximate the Polish institutions to those of Russia, could only allude to the Polish provinces without the Kingdom of Poland Proper. The Powers have a direct and positive right to claim for Poland a faithful execution of the treaties." The note of Austria to Russia expresses great regret that Russia has not given a more satisfactory reply to the notes of the Great Powers. The note then proceeds to state that the interest of Europe demands an early fulfilment of the work of conciliation in Poland. "Foreign influences," it says, "are not the only cause of the insurrection. Poland would be tranquil if Russia had fulfilled the political and religious engagements which she had contracted. The proposed conference of the great Powers ought certainly to be acceptable to Russia." In conclusion, Prince Gortschakoff is requested to give his most serious attention to the present state of things, for the consequences of which Austria declares Russia alone will be responsible.

The replies of Prince Gortschakoff to these three notes are dated Sept. 7th (old style, August 26th). Prince Gortschakoff regrets that the expectations, based upon the diplomatic discussions and their results, had not been fulfilled, and that the differences of opinion had not been removed. He, therefore, thinks that a further extension of these discussions appears superfluous. He finally states that Russia assumes the full responsibility of her acts. In the reply to France, Prince Gortschakoff moreover emphatically declines any discussion on the Polish provinces of Russia Proper. He says: "We will draw attention to only one point in the despatch of M. Drouyn de l'Huys, because we are anxious to remove beforehand every fresh subject of misunderstanding. I refer to the allusion made by the French Minister of Foreign Affairs, several times and under various forms, to the western provinces of Russia, as participating to a certain extent in the international stipulations which determined in 1815 the position of the Duchy of Warsaw. The Imperial Cabinet cannot in any way admit this point of view even to the slightest extent, and your Excellency is requested to reiterate to M. Drouyn de l'Huys the declaration already made in my previous despatch, that his Majesty the Emperor, always ready to scrupulously fulfil his obligations toward all the Powers, must peremptorily exclude, even from an interchange of friendly opinions, any allusions to parts of his empire to which no international stipulations of any kind whatever apply." These notes were accompanied by a memorandum of considerable length. This document treats the question exclusively in an international point of view. It gives an historical sketch from the Congress of Vienna. It thoroughly examines the extent Russia is bound by those treaties, and dwells at considerable length upon the congress itself. It endeavors

to prove that the autonomy already decreed for the Kingdom of Poland, and the application of which has not been suspended, but obstructed, by the revolution, satisfies the obligations contracted by Russia toward Europe. It concludes with asserting that the Emperor of Russia is decided to maintain the engagements of 1815 in all their extent.

Thus ended one of the most memorable diplomatic negotiations of modern times. The most prominent part in it was taken by the Government of France, which induced all the second-rate Powers of Europe to participate. Throughout the progress of the negotiation, and, especially, after the last reply of Russia, declining any further discussion of the subject, the semi-official press of France were crying for war, and most of the other papers were joining in this cry. But England refused positively to make any warlike demonstration, and Austria associated herself with England. Thus left alone, the French Emperor deemed it inexpedient to pursue any longer a warlike policy. He gave, quite unexpectedly, a new turn to the whole negotiation, by proposing, on the opening of the French Chambers on November 7th, the assembling of a European Congress for settling not only the Polish but all national complications. (*See CONGRESS, EUROPEAN.*)

PRESBYTERIANS. The statistics of the Old School Presbyterian Church, in 1863, were reported as follows: synods in connection with the General Assembly, 35; presbyteries, 172; licentiates, 288; candidates for the ministry, 399; ministers, 2,205; churches, 2,541; licensures, 82; ordinations, 91; installations, 100; pastoral relations dissolved, 94; churches organized, 29; ministers received from other denominations, 10; ministers dismissed to other denominations, 11; churches received from other denominations, 6; churches dismissed to other denominations, 8; ministers deceased, 27; churches dissolved, 13; members added on examination, 8,781; members added on certificate, 6,535; total number of communicants reported, 227,575; adults baptized, 2,165; infants baptized, 10,194; amount contributed for congregational purposes, \$1,294,785; amount contributed for the boards, \$346,448; amount contributed for disabled ministers' fund, \$10,973; amount contributed for miscellaneous purposes, \$150,444; whole amount contributed, \$1,802,650. The large decrease in these statistics, as compared with those of the preceding year, arises from the circumstance, that the Presbyterians of the Southern States, who in December, 1861, formed an independent church organization, were, last year, for the first time omitted from the statistical records of the Church. The General Assembly of the Church met at Peoria, Illinois, on May 21st. An animated debate sprung up in this meeting, on a motion to hoist the national flag on the church in which it held its sessions. A large portion of the Assembly were opposed to this demonstration, as being

of a political character, but a motion to lay the proposed resolution on the table was rejected: yeas, 90; nays, 130. As the trustees of the church, on the ensuing Sunday, had, of their own accord, hoisted the flag on the church, the Assembly disposed of the question on the next day, by adopting the report of the committee, which, while making strong avowals of loyalty, recommended no further action upon the resolution, together with an amendment, offered by Dr. Delancy, stating that "the trustees of this church concur in the desire expressed by many members of this Assembly to have displayed from this edifice the American flag, the beautiful symbol of national protection, unity, and liberty." The vote on this motion was 176 ayes, and 20 noes.

An important resolution was passed upon a request from the Presbytery of Saline, that the General Assembly reaffirm the testimony of the Assembly of 1818 in regard to slavery. In accordance with the report of the committee, the following declaration was adopted:

The Assembly has from the first uttered its sentiments on the subject of slavery, in substantially the same language. The action of 1818 was taken with more care, and made more clear, full and explicit, and was adopted unanimously. It has since remained that true and scriptural deliverance on this important subject by which our Church is determined to abide. It has never been repealed, amended, or modified, but has frequently been referred to and reiterated in subsequent assemblies; and when some persons fancied that the action of 1845 in some way interfered with it, the Assembly of 1846 declared, with much unanimity, that the action of 1845 was not intended to deny or rescind the testimony on this subject previously uttered by General Assemblies; and by these deliverances we still abide.

An amendment proposed by Dr. Humphrey to insert before the words, "these deliverances," the word "all," was laid on the table.

The attitude which the General Assemblies of 1861, 1862, and 1863, had assumed, with regard to loyalty and the slavery question, produced a great dissatisfaction among a portion of the Kentucky Presbyterians, who entertained different views on slavery. The organ of this portion of the Church, the "True Presbyterian," of Louisville, expressed itself as follows on the Assembly of 1863:

We are free to say that our chief comfort in reading them has arisen from the reflection that, in this Assembly, the Presbyterian Church must have reached her lowest point of humiliation, and therefore it may be expected that from this time she must begin to ascend to higher and more Scriptural views—that is, if the Lord in his anger has not given her over to irredeemable apostasy.

In December, 1862, Rev. Dr. McPheeters, pastor of the Pine street Presbyterian church, in St. Louis, was removed from his duties by the provost-marshal. The following letter from President Lincoln refers to it:

EXECUTIVE MANSION, WASHINGTON, }
Dec. 23d, 1863. }

I have just looked over a petition signed by some three dozen citizens of St. Louis, and their accompanying letters, one by yourself, one by a Mr. Nathan Ran-

ney, and by a Mr. John D. Coalter—the whole relating to the Rev. Dr. McPheeters. The petition prays in the name of justice and mercy, that I will restore Dr. McPheeters to all his ecclesiastical rights.

This gives no intimation as to what ecclesiastical rights are withdrawn. Your letter states that Provost-marshal Dick, about a year ago, ordered the arrest of Dr. McPheeters, pastor of the Pine street church, prohibited him from officiating, and placed the management of the church out of the control of its chosen trustees; and near the close you state that a certain course "would insure his release." Mr. Ranney's letter says: "Dr. Samuel McPheeters is enjoying all the rights of a civilian, but cannot preach the Gospel." Mr. Coalter, in his letter, asks: "Is it not a strange illustration of the condition of things, that the question of who shall be allowed to preach in a church in St. Louis shall be decided by the President of the United States?"

Now, all this sounds very strangely; and withal a little as if you gentlemen making the application do not understand the case alike, one affirming that the Doctor is enjoying all the rights of a civilian, and another pointing out to me what will secure his release! On the 2d of January I wrote to General Curtis in relation to Mr. Dick's order upon Doctor McPheeters; and as I suppose the Doctor is enjoying all the rights of a civilian, I only quote that part of my letter which relates to the church. It is as follows: "But I must add that the United States Government must not, as by this order, undertake to run the Churches. When an individual, in a church, or out of it, becomes dangerous to the public interest, he must be checked, but the Churches as such must take care of themselves. It will not do for the United States to appoint trustees, supervisors, or other agents, for the Churches."

This letter going to General Curtis, then in command, I supposed, of course, it was obeyed, especially as I heard no further complaint from Doctor McPheeters or his friends for nearly an entire year. I have never interfered, nor thought of interfering, as to who shall or who shall not preach in any church; nor have I knowingly or believingly tolerated any one else to interfere by my authority. If any one is so interfering by color of my authority, I would like to have it specifically made known to me.

If, after all, what is now sought is to have me put Doctor McPheeters back, over the heads of a majority of his own congregation, that, too, will be declined. I will not have control of any church or any side.

Yours, respectfully, A. LINCOLN.

There was a general desire in this church to reconnect the congregations in the States re-occupied, with the General Assembly, but no further progress was made in this direction than the authorization of the Board of Domestic Missions, by the General Assembly, to aid the Second Presbyterian church of Nashville, Tenn., which had resumed its connection with the General Assembly, to the amount of one thousand dollars per annum.

The minutes of the General Assembly of the New School Presbyterian Church for 1863, present the following statistics: synods 22, same as last year; presbyteries 106, a gain of two; ministers 1,616, a gain of 61; licentiates 162, a gain of 11; churches 1,454, a loss of 12; added on examination 4,744, and on certificate 4,079; communicants 135,894, a gain of 440; adults baptized, 1,556; infants baptized, 3,191; contributions for expenses of General Assembly \$6,263.06, \$1,125 more than last year; contributions to domestic missions \$122,407.39, \$30,486 more than last year; to foreign missions \$80,528.97, an advance of over \$11,000;

to education \$49,362.78, an advance of over \$2,100; to publication \$40,560.04, an advance of over \$1,400. The whole amount of contributions reported is within a fraction of \$300,000, an advance of 20 per cent. upon the amount reported last year.

The N. S. Presbyterian General Assembly met on May 21st, 1863, in Philadelphia, and elected Prof. H. B. Smith, moderator. The committee on the state of the country submitted nine resolutions, which were received with applause and adopted without a dissenting vote. The resolutions declare that—

The Administration duly placed in power is the Government, and the present Administration is the Government of the United States, and the most uncompromising support to the President and cabinet is religiously the duty of all good citizens. While we deprecate the losses of the war, it must be prosecuted vigorously to the end in order that the rebellion may be subdued, and that the flag of our country shall float over every foot of our land. The Government is founded on the great principles of human rights. The rebellion is based upon treason, and is offensive against heaven. It evinces depravity in its blind support of human bondage. Loyalty, firm and reserved, rising above all questions of party politics, should be the expression of this assembly as a Christian obligation. The system of human bondage, as practised in the South, is in direct violation of human rights and the teachings of our better natures. The strongest support is, therefore, given to the President in his proclamation of freedom to the colored people of the South. Prayers that wisdom be endowed by the Almighty upon the President and his cabinet are warmly recommended. All ministers are exhorted to sustain the Government in every way possible and proper, and to honor and obey religiously all civil and military officers throughout all future troubles. We condole sincerely with those whose children and brothers have fallen in the cause, but earnestly urge a continued support to the Government from the people.

In relation to an application from the Reformed Dutch Church for a correspondence between the two bodies, a report was read by a special committee recommending that the application be declined, inasmuch as it had cast imputations upon the orthodoxy of the General Assembly; but the assembly finally adopted an amendment to the report of the committee, that a correspondence be opened with the synod on terms according to those existing with other bodies, and the appointment of a commissioner to carry on this correspondence.

The General Assembly of the Cumberland Presbyterian church met on May 21st, 1863, at Alton, Illinois. A memorial having come up from the Ohio synod, respecting the subject of slavery and secession, a committee was appointed of one commissioner from each synod. The committee submitted the following report, which was adopted by all but two votes:

Resolved, That this General Assembly look with censure and disapprobation upon attempts from any quarter to dissolve this Union, and would regard the success of any such movement as exceedingly hazardous to the cause of religion, as well as civil liberty. And this General Assembly would strongly recommend to all Christians to make it a subject of prayer to Almighty God, to avert from our beloved country a catastrophe so direful and disastrous.

On the subject of American slavery, your committee submit that we should not view it as if it were about to be introduced, but as already in existence. We do not hesitate to declare that the introduction of slavery was an enormous crime—surpassed by few crimes that have disgraced the history of the world; and that there are at present great evils connected with it, and that we believe will more or less be connected with it while it exists. As to the remedy for these, the greatest and best minds of our country and the world have greatly differed, and been much perplexed, therefore we would recommend to those who, in the providence of God, have been placed in connection with this institution, to continue prayerfully to study the word of God, to determine their duty in regard to their slaves and slavery; and to those who are not thus situated, that they exercise forbearance toward their brethren who are connected with slavery.

The General Assembly also appointed boards or committees on publication, on missions, and on education, in place of those in Tennessee, and appointed some members to go to Nashville to get what could be had that belonged to these boards. The new board of publication is located at Pittsburg; that on missions at Alton; that on education at Owensboro', Kentucky.

The minutes of the General Assembly of the United Presbyterian Church present the following statistics for 1863: synods 7, presbyteries 45, pastors 361, ministers without charges 109, 29 missionaries in the foreign field, congregations 682, families 24,880, communicants 54,758, increase by examination and profession 2,787, increase by certificate 2,093, decrease by death 997, decrease by removal 2,218, infant baptisms 3,752, adult baptisms 237, contributed to home missions \$12,085, contributed to foreign missions \$16,039; total of contributions to the various funds of the Church, including salaries of pastors, \$305,032, being an average of \$5.57 per member. The General Assembly, in reply to a communication from the Reformed Presbyterian Church to coöperate with the latter for the purpose of obtaining an amendment to the Constitution of the United States that shall expressly recognize our national allegiance to God, and the supremacy of His law as revealed in the Holy Scriptures, adopted the following resolutions:

Resolved, That we lament that there is not a more distinct recognition of the existence of God and of the supremacy of his law, as revealed in the Scriptures, than it contains; that an amendment, introducing a becoming recognition of God into at least the preamble or adopting clause of the Constitution, is much to be desired; and that we instruct our people that it is their duty, as Christian citizens, to favor and coöperate with every legitimate effort to secure this end.

The general synod of the Reformed Presbyterian Church met in Cedarville, Ohio, on May 20th, 1863, and elected Rev. Dr. Crawford moderator. Resolutions were unanimously passed to memorialize Congress to take constitutional steps to have the Constitution so amended as to make specific mention of the authority of God, and free it from all "ambiguity" on the subject of slavery, in accordance with the intention of the framers and its own spirit.

The General Assembly of the Presbyterian

Church of the Confederate States met on May 28th, 1863, at Columbia, South Carolina. A charter or act of incorporation, passed by the Legislature of the State of Tennessee, on March 19th, 1863, was presented to the Assembly, and at once accepted. Columbia Theological Seminary was transferred by the synods of South Carolina, Georgia, and Alabama to the control and management of the General Assembly. A general statement of the property of the seminary was submitted, showing that the entire amount was \$277,940. A report "on the subject of slavery and the duties growing out of this relation" was presented by the Rev. Dr. Lyon. The report takes ground against the re-opening of the slave trade, and in favor of the amelioration of the condition of the slave. One of the fundamental propositions is in the following words: "Slavery ceases to be a justified relation when the advantages growing out of it are not mutual. We must give unto our servants that which is just and equal." To carry out this proposition the report makes the following recommendations: 1. That whites and blacks worship together in churches and families. 2. That slaves be never left to the uncontrolled management of hirelings. 3. That greater protection be given by the laws to the lives of slaves, and that the testimony of slaves in cases relating to themselves, be taken at least as "circumstantial evidence." 4. That the marriage relation between slaves be sanctioned and protected by the laws of the State. 5. That the masters everywhere be instructed that an obligation rests upon them to give religious instruction to their slaves. The report was ordered to be printed and circulated, and the consideration of its various propositions referred to a special committee, to report to the next Assembly.

The subject of a union between the Presbyterian bodies of the South also received favorable notice. A committee was appointed to confer with a similar committee from the United Synod of the Presbyterian Church, concerning the terms of a union between the two bodies. Negotiations are also in progress with the Associated Reformed Synod of the South for a union, and intimations having been received of a desire of the Independent Presbyterian Church to unite with the Assembly, the Synod of South Carolina was directed to do what was expedient and right in the matter.

The conference of the committees appointed by the General Assembly and the United Synod, to agree upon a basis of union, met in September, at Lynchburg, Virginia. It consisted, on the part of the Assembly, of the Rev. Drs. Palmer, Ramsey, and Dabney, and on the part of the United Synod of the Rev. Drs. Moschelle, Read, and Ross. The conference was entirely successful, the two committees agreeing upon a doctrinal basis, and upon a proposition for uniting the synods, presbyteries, and churches of the two denominations.

In the Old and New School Presbyterian

Churches of the United States the idea of a union made likewise considerable progress. Several presbyteries of the two denominations not only declared in favor of a union of the two bodies, but also—as far as in them lay—consummated it by holding joint sessions. The General Assembly of each body unanimously passed resolutions to appoint commissioners to represent them at the session of the other body—the first time since the great schism in the Presbyterian Church that this civility was interchanged.

The General Assemblies of the Free and the Established Churches of Scotland met on May 31st. The most important topic discussed by the former was on the overtures for union from the United Presbyterian Church. Upon the motion of Dr. Buchanan it was unanimously resolved to appoint a committee to take into consideration the whole subject of union among the non-established churches in Scotland, and to authorize them to act with the committee on union appointed by the Synod of the United Presbyterian Church, as well as with representatives of any of the other churches named or indicated by the overtures, should occasion or opportunity arise; the committee to report upon the whole subject to the General Assembly of next year.

On the 17th of June the committees of the two bodies held their first joint meeting, and appointed a joint sub-committee, to report as to the authoritative documents which serve to define the principles and position of the two churches. The first meetings of the joint committee were very harmonious, but toward the close of the year a great difficulty was experienced to harmonize the differing views of the churches as to the relation of the State governments to the church.

The Reformed Presbyterian Church of Scotland has been for some time agitated by the question whether the position of the church in regard to the exercise of the elective franchise and the taking the oath of allegiance by her members should be changed. Last year the dissension ripened into a disruption of the church. The majority of the synod, which was held, in May, in Glasgow, agreed that the time had gone past for visiting with excommunication those members who take the oath of allegiance to the queen. In consequence of this decision, the minority withdrew from the church, and declared themselves to be the proper Reformed Presbyterian Church.

PRISONERS, EXCHANGE OF. The commencement of 1863 found the cartel agreed upon by Gens. Dix and Hill in the preceding July, in full force and operation. The preponderance of prisoners on either side was not great, and notwithstanding certain acrimonious correspondence and retaliatory proclamations of the previous year, exchanges proceeded regularly at City Point on the James river, the chief place appointed for that purpose, to the mutual relief and advantage of the hostile parties.

The first indication of approaching complica-

tions was afforded by the message of Jefferson Davis to the Confederate Congress on Jan. 14th, in which he used the following language:

So far as regards the action of the Government on such criminals as may attempt its execution [referring to President Lincoln's emancipation proclamation of Jan. 1st, 1863], I confine myself to informing you that I shall, unless in your wisdom you deem some other course more expedient, deliver to the several State authorities all commissioned officers of the United States that may hereafter be captured by our forces in any of the States embraced in the proclamation, that they may be dealt with in accordance with the laws of those States providing for the punishment of criminals engaged in exciting servile insurrection.

On May 1st, the Congress, after mature deliberation, passed a series of resolutions in conformity with these views. (*See CONFEDERATE CONGRESS*, p. 227.)

Previous to the adoption of these resolutions the following letter, which may possibly have led to the stringent measures which they embody, was sent by Gen. Hunter, commanding the Department of the South, to Jefferson Davis:

HEADQUARTERS OF THE SOUTH, HILTON HEAD, }
PORT ROYAL, April 23d, 1863. }

Jefferson Davis, Richmond, Va.:

The United States flag must protect all its defenders, white, black, or yellow. Several negroes in the employ of the Government in the Western Department, have been cruelly murdered by your authorities and others sold into slavery. Every outrage of this kind against the laws of humanity which may take place in this Department, shall be followed by the immediate execution of the rebel of highest rank in my possession, man for man. These executions will certainly take place for every one murdered, or sold into a slavery worse than death. On your authorities will rest the responsibility of their barbarous policy, and you will be held responsible in the world to come for all the blood thus shed.

In the month of August last, you declared all those engaged in arming the negroes to fight for their country, to be felons and directed the immediate execution of all such as should be captured. I have given you long enough to reflect on your folly.

I now give you notice that unless this order is immediately revoked I will at once cause the execution of every rebel officer and every rebel slaveholder in my possession. The poor negro is fighting for liberty in its truest sense. Mr. Jefferson has beautifully said, "In such a man there is no attribute of the Almighty which will induce him to fight on the side of the oppressor." You say you are fighting for liberty. Yes, you are fighting for liberty,—liberty to keep four millions of your fellow beings in ignorance and degradation; liberty to separate parents and children, husband and wife, brother and sister; liberty to steal the products of their labor, exacted with many a cruel lash and bitter tear; liberty to seduce their wives and daughters and to sell your own children into bondage; liberty to kill these children with impunity when the murder cannot be proven by one of pure white blood. This is the kind of liberty—the liberty to do wrong which Satan, chief of the fallen angels, was contending for when he was cast into hell. I have the honor to be, very respectfully, your most obedient servant,

D. HUNTER, Maj.-Gen'l Commanding.

The effect of the resolutions was to withhold from exchange, if captured, a certain class of soldiers of the United States army, who were not regarded by the enemy as prisoners of war. As no colored soldiers had up to this time fallen into their hands, notwithstanding a large number of colored persons employed as

ambulance and wagon drivers, laborers, servants, and in other capacities, had been captured by them and never accounted for, no direct issue seemed to be raised, and it remained for future events to develop one. The cartel was in reality interrupted when the resolutions became the law of the Confederacy, but its operation was not practically stopped until several months afterward, and then for reasons only partially connected with the position taken by the rebel authorities on this point.

The cartel of July, 1862, had been so arranged that a correct return of prisoners could be kept by both sides, in order that a balance sheet might at any time be struck between them. For this purpose City Point and Vicksburg were selected as points of exchange. But under a liberal interpretation of the cartel it became the practice for the commanders of opposing armies to parole and exchange prisoners at will, without the formality of sending them to the rear for transportation to the points of exchange, or designating such points. In consequence of this course it became impossible to determine with accuracy the balances between the contending parties; and the United States Government, for the purpose, among other things, of making its generals conform strictly to the regulations of the cartel in the matter of paroles, issued, on May 22d, a code of instructions compiled by Dr. Francis Lieber, and known as general orders, No. 100, in which it was provided that captures, to be valid, "must be reduced to possession," and that when the Government did not approve of a parole, the officer or man paroled must return to captivity. This was sent to Robert Ould, the Confederate agent of exchange at City Point, on May 22d, accompanied by a note from Col. Ludlow, the Federal agent at Fortress Monroe, in which he stated that, together with the cartel, it would govern the U. S. army. He added:

I would invite your special attention to article seven of the cartel, which provides that all prisoners of war shall be sent to places of delivery therein specified. The execution of this article will obviate much discussion and difficulty growing out of the mode, time, and place of giving paroles. No paroles or exchanges will be considered binding except those under the stipulations of said article, permitting commanders of two opposing armies to exchange or release or parole at other points mutually agreed on by said commanders.

The following order in relation to the same subject expresses more fully the views of the Government:

WAR DEPARTMENT, ADJUTANT GENERAL'S OFFICE, }
WASHINGTON, July 3d, 1863. }

GENERAL ORDERS, No. 207.—1. The attention of all persons in the military service of the United States is called to article seven of the cartel agreed upon July 22d, 1862, and published in General Orders, No. 142, Sept. 25th, 1862. According to the terms of this cartel all captures must be reduced to actual possession, and all prisoners of war must be delivered at the places designated, there to be exchanged, or paroled until exchange can be effected. The only exception allowed is the case of commanders of two opposing armies, who were authorized to exchange prisoners, or to release them on parole at other points mutually agreed upon by said commanders.

2. It is understood that captured officers and men have been paroled and released in the field by others than commanders of opposing armies, and that the sick and wounded in hospitals have been so paroled and released, in order to avoid guarding and removing them, which, in many cases, would have been impossible. Such paroles are in violation of general orders and the stipulations of the cartel, and are null and void. They are not regarded by the enemy, and will not be respected in the armies of the United States. Any officer or soldier who gives such parole will be returned to duty without exchange, and moreover will be punished for disobedience of orders. It is the duty of the captor to guard his prisoners, and if through necessity or choice he fails to do this, it is the duty of the prisoner to return to the service of his government. He cannot avoid this duty by giving an authorized military parole.

3. A military parole not to serve till exchanged must not be confounded with a parole of honor, to do or not to do a particular thing not inconsistent with the duty of a soldier; thus a prisoner of war actually held by the enemy may, in order to obtain exemption from a close guard or confinement, pledge his parole of honor that he will make no attempt to escape. Such pledges are binding upon the individuals giving them, but they should seldom be given or received, for it is the duty of a prisoner to escape, if able to do so. Any pledge or parole of honor extorted from a prisoner by ill usage or cruelty is not binding.

4. The obligations imposed by the general law and usages of law upon the combatant inhabitants of a section of country passed over by an invading army, cease when the military occupation ceases, and any pledge or parole given by such persons in regard to future service, is null and of no effect.

By order of the Secretary of War,

E. D. TOWNSEND, Assistant Adj't-Gen.

This order was also sent to Mr. Ould, with the following remarks in explanation of the course the United States Government would pursue:

It is understood that officers of the United States and Confederate officers have, at various times and places, paroled and released prisoners of war, not in accordance with the cartel.

The Government of the United States will not recognize, and will not expect the Confederate authorities to recognize, such unauthorized paroles. Prisoners released on parole not authorized by the cartel, after my notice to you of the 22d of May, will not be regarded as prisoners of war, and will not be exchanged.

Where prisoners of war have been released without the delivery specified in the cartel, since the 22d of May last, such release will be regarded as unconditional, and the prisoners released as subject to orders without exchange, the same as if they had never been captured.

On July 3d, the very day of the promulgation of general orders, No. 207, General Lee received his final repulse at Gettysburg and on the 4th he retreated toward the Potomac. A number of prisoners taken by him during the battles of the three previous days still remained upon his hands, and being unable to take these with him into Virginia he paroled and released them on the spot. Gen. Meade at once disavowed these paroles as having been made in violation not only of order No. 207; but also of a liberal interpretation of the cartel, which required prisoners, when exchanged or paroled at a distance from either of the points of exchange, to be so exchanged or paroled at a point mutually agreed upon by the commanders of the opposing armies. (See EXCHANGE OF

PRISONERS, Vol. II., page 714.) In the present case nothing of the kind had been attempted, and the enemy, by showing his inability to remove his prisoners, failed to prove that he had reduced them to actual possession. Hence the Federal Government not only held these paroles to be invalidated, but ordered the officers and men to return to duty. The rebels complained bitterly of this proceeding, maintaining that the Federal Government had undertaken to supplement the cartel by its general orders, Nos. 100 and 207, by which the basis of exchanges had been affected without previous agreement. Mr. Ould even urged that, in accordance with general orders, No. 100, the paroled prisoners of Gettysburg, if their paroles were not approved, should return into captivity; and he charged unfair dealing upon the Government in framing its general order, No. 207 for the purpose of relieving them from this liability. To this it was replied that neither of the above orders was intended to be in violation of the cartel, but were designed to promote its complete and faithful operation; that if in any respect they were in violation of it, they were to that extent inoperative; and that, as Gen. Lee's paroles were not made in accordance with the cartel, they were necessarily void.

The battle of Gettysburg was followed by the unconditional surrender of Vicksburg and Port Hudson, by which the number of prisoners falling into the Federal hands was enormously increased. In both instances the commanders of the opposing armies, acting under the authority of the cartel, mutually agreed upon a place for the delivery of the prisoners on parole. The Port Hudson prisoners were accordingly sent to Mobile. Mr. Ould nevertheless undertook to release these men from their obligations, ostensibly because they were not exchanged at City Point or Vicksburg, the two places specially mentioned in the cartel (although that instrument provided for other arrangements, which in this instance were literally fulfilled), but really as a retaliatory measure to offset the disavowal of the Gettysburg paroles, and also, there is good reason to believe, for the purpose of filling up the depleted ranks of the rebel army. Other prisoners, to the number of several thousands, were for similar reasons subsequently absolved from their paroles. The proceedings above related involved no slight amount of acrimonious correspondence, extending over a considerable period, but cannot be said to have permanently interrupted the system of exchanges then in operation.

On May 15th, T. P. Graw and William Corbin, having been found guilty by a court-martial of recruiting for the rebel army within the Union lines, were executed at Johnson's Island, in Lake Erie, by order of Gen. Burnside. In retaliation for this act Captains H. W. Sawyer and John Flynn were selected by lot from among the Union prisoners in Richmond and ordered into close confinement under sentence of death. This proceeding coming to the

knowledge of the Federal Government, Gen. W. H. Lee and Captain Winder were ordered into close confinement as hostages to await the fate of the Union officers. If the latter should be executed the rebel officers were also to be hung, and Col. Ludlow was directed to assure Mr. Ould "that the Government of the United States would proceed to retaliate for every similar barbarous violation of the laws of civilized war." This energetic action had the effect of restraining the Confederate Government from carrying their threat into execution, and early in 1864 the four officers were mutually exchanged.

Previous to July no engagement had occurred in which colored troops had fallen into the hands of the enemy. But the capture of a number of the 54th Massachusetts (colored) regiment, at the assault on Fort Wagner in Charleston harbor, showed that the enemy were determined to carry out literally the provisions of the resolutions of May 1st. To protect this class of soldiers from these harsh measures, the following sections were inserted in the general order, No. 100, already referred to:

57. So soon as a man is armed by a sovereign Government, and takes the soldier's oath of fidelity, he is a belligerent; his killing, wounding, or other warlike acts are not individual crimes or offences. No belligerent has a right to declare that enemies of a certain class, color, or condition, when properly organized as soldiers, will not be treated by him as public enemies.

58. The law of nations knows no distinction of color, and if an enemy of the United States should enslave and sell any captured persons of their army, it would be a case for the severest retaliation, if not redressed upon complaint. The United States cannot retaliate by enslavement; therefore death must be the retaliation for this crime against the law of nations.

But it having been suggested that these provisions were not generally known, and were not likely to impress the enemy with a proper sense of what the United States Government would do under the circumstances, the following retaliatory order was issued by the President:

EXECUTIVE MANSION, WASHINGTON, *July 30th.*

It is the duty of every Government to give protection to its citizens of whatever class, color or condition, and especially to those who are duly organized as soldiers in the public service. The law of nations and the usages and customs of war, as carried on by civilized powers, permit no distinction as to color in the treatment of prisoners of war as public enemies. To sell or enslave any captured person, on account of his color, and for no offence against the laws of war, is a relapse into barbarism and a crime against the civilization of the age. The Government of the United States will give the same protection to all its soldiers, and if the enemy shall sell or enslave any one because of his color, the offence shall be punished by retaliation upon the enemy's prisoners in our hands.

It is therefore ordered that for every soldier of the United States killed in violation of the laws of war, a rebel soldier shall be executed, and for every one enslaved by the enemy or sold into slavery, a rebel soldier shall be placed at hard labor on the public works, and continue at such labor until the other shall be released and receive the treatment due a prisoner of war.

ABRAHAM LINCOLN.

By order of the Secretary of War.

E. D. TOWNSEND, Ass't Adj.-Gen.

Of the fate of the negroes captured at Fort Wagner no certain intelligence reached the Federal Government for several weeks, the rebels maintaining a strict silence on the subject; but Secretary Stanton, ascertaining soon after that three colored men captured on board the gunboat *Isaac Smith* in the Stono river, had been placed in close confinement, ordered three rebel prisoners of South Carolina to be held as hostages for them, and directed this fact to be communicated to the Confederate Government. The comments of the Richmond papers show how this proceeding was regarded in the rebellious States:

It is not, said the "Examiner," merely the insolent pretensions of a regular Government affecting to deal with "rebels," but it is a deadly stab which they are aiming at our institutions themselves—because they know that if we were insane enough to yield this point, to treat black men as the equals of white, and insurgent slaves as equivalent to our brave soldiers, the very foundation of slavery would be fatally wounded.

* * * * *

Under these circumstances what hope is there of the arrangement of the cartel upon a footing of equality? Will Lincoln's Government renounce that audacious pretension to treat us as criminals? Or will it, after deliberately enlisting our runaway negroes into its military service, consent to give them up to be dealt with by our State laws as insurgents? We know very well what these questions all tend to. We have long perceived that the time is at hand when no more prisoners will be exchanged, and no more prisoners will be taken. Our people and our troops are entitled at the hands of their Government to such protection as a Government can afford them. Our soldiers entered the Confederate service as the soldiers of a regular Government, and they cannot afford to meet the enemy in the character of malefactors. If there is to be no exchange on equal terms, better there should be no exchange at all—better that the enemy should understand there will be no quarter asked nor given; and then at least there will be equality.

Holding views like these, the rebels were not likely to yield their point readily, and during the whole year not a single instance has occurred of a negro soldier or a commissioned officer of a negro regiment being exchanged, or recognized as a prisoner of war. On the other hand no instance has come to light of the execution by the Confederate authorities of the death penalty upon prisoners of this class, and there is reason to hope that the firm attitude taken by the Federal Government may avert the horrors which such an act would promote. The complications, however, which the action of the enemy has caused in the general subject of exchanges, will be presently seen.

In August, Gen. S. A. Meredith was appointed to succeed Col. Ludlow as United States agent for exchanges at Fortress Monroe. With the arrival of this officer at his post commences a voluminous correspondence between him and the Confederate agent, in which occur so many radical contradictions of matters of fact that it is difficult to arrive at an exact statement of the controversy between them. It appears from the principal communication of Gen. Meredith that, while his predecessor, Col. Ludlow, was on duty at Fortress Monroe, Mr.

Ould at one time made a declaration of exchange not in exact accordance with the cartel, and that he invited Col. Ludlow to a corresponding declaration of equivalents. The latter acceded to the proposition in this specific case, and was thus, according to Gen. Meredith, "without anticipating the magnitude of the evil which now appears as the result of that departure from the cartel," enticed into the establishment of a precedent whereby exchanges were declared without designating the persons exchanged by name or descriptive list. The evil effects of this loose method of procedure became apparent when Mr. Ould, on September 12th, declared a large part of the officers and men captured at Vicksburg, and a great number also who had been delivered at City Point, to be duly exchanged. This declaration, covering an indeterminate number of troops, designated by commands, but not enumerated, sent nearly 30,000 men back to the rebel service, according to Gen. Meredith, and, as he claims, with only a partial equivalent of Federal prisoners returned to him. He also charged that proper lists of Federal prisoners had not been furnished him. To this Mr. Ould rejoined that he had furnished a "tabular statement," covering all the Federal prisoners whose paroles were cancelled by the declaration of September 12th. But the persons enumerated in this document included, according to Gen. Hitchcock, the chief commissioner of Exchanges at Washington, upward of 18,000 men, of whom a considerable portion "were undoubtedly captured by guerilla parties, and were not soldiers, but, for the most part, peaceable citizens of the country, probably known as friends to the Union, who, for that reason, were seized and compelled to make an oath not to take up arms against the Southern Confederacy; and this class of persons Mr. Ould expects us to accept in exchange for rebel troops, captured mostly at Vicksburg, who, having been paroled in the South, were "declared" exchanged by Mr. Ould, without any conference or understanding with our agent, in violation of the provisions of the cartel, and in violation of the usages of war." He adds:

I do not mean to deny, in the reference just made to the tabular statement prepared by Mr. Ould, but that there were some men included in that statement who had been legitimately made prisoners of war, though not delivered according to the cartel; but, for the most part, the prisoners included in that tabular statement were not set down as having been captured upon any known battle-field, or as having been taken from or with any known Federal commander; nor are they reported as having been delivered to any Federal commander; but they are set down as having been captured at large in the State of Kentucky, nobody knows where; or in the State of Tennessee, or in other States of the West and South; whilst, in no less than four instances, they are reported as having been captured in "Kentucky and Tennessee"—the two States being thus coupled together—making it impossible, from the tabular statement itself, to determine where they were captured, or whether, indeed, any military captures whatever were made, except of a few at Chickamauga, and possibly a few at one or two other places.

In the belief that the declaration of Mr. Ould was made for the purpose of sending paroled men to the assistance of Gen. Bragg in Georgia, Gen. Meredith, on September 24th, declared all officers and men of the United States army, captured and paroled previous to September 1st, 1863, to be duly exchanged. The correspondence between the two agents thenceforth increased in acerbity, and amidst the assertions on the one side and the flat denials on the other, it is more difficult than ever to arrive at the facts. In justice to Mr. Ould, however, it should be stated that, in reply to Gen. Meredith's insinuation that the declaration of September 12th was made "as if for the express purpose of increasing the force of Gen. Bragg against Gen. Rosecrans," he declared that "not one of the officers and men named in that declaration of exchange was on the battle field of Chickamauga."

On October 2d Mr. Ould wrote to Gen. Meredith that thenceforth "the Confederate authorities will consider themselves entirely at liberty to pursue any course as to exchange or paroles which they may deem right and proper under all the circumstances of the case. At the same time, I am directed to express their entire willingness to adopt any fair, just, and reciprocal rule in relation to those subjects without any delay."

On the 20th of the same month Mr. Ould proposed "that all officers and men, on both sides, be released in conformity with the provisions of the cartel, the excess on the one side or the other to be on parole." This proposition was rejected by Gen. Meredith for the reason, among others, that the officers and privates of the Federal colored regiments, not being recognized by the rebels as prisoners of war, would not be delivered by them with the other prisoners. Another reason was the distrust entertained of the good faith of the Confederates with respect to the paroled prisoners held by the Federal authorities in excess of Confederate prisoners. On this subject General Hitchcock speaks as follows:

It has been supposed, even in many parts of the North, that the proposition of Mr. Ould, of the 20th October, for an exchange of prisoners is fair, and ought to be accepted; but it does not appear to be considered that Mr. Ould has not proposed to yield to us a certain number of prisoners of war and receive a like number in return, which would be a most happy consummation that would be at once accepted by this Government. But his proposition is that we shall deliver to him all of the prisoners in our possession, amounting now to about 40,000 men, and receive in return about 13,000 men, leaving about 27,000 men, who might, for a few days, be considered on parole not to take arms unless duly exchanged. And then what would Mr. Ould do with those men? Judging by what he has actually recently done, he would undoubtedly assume to discharge those men from all obligation under their parole, and put them into the field to fight against national troops, standing under an unstained flag—the very troops who gallantly captured those men upon bloody battle fields within the past few months.

From the 29th of October, the date of Gen. Meredith's reply to this last proposition, all

exchanges for a time ceased; but for the purpose of releasing the Union prisoners from the hardships of Confederate prisons, Gen. Meredith proposed in November to send Mr. Ould 12,000 or more Confederate prisoners (as many as he might hold of Federals), and receive in return an equal number of the latter. Mr. Ould refused to accept this proposition, but offered to agree to a general exchange. As the effect of this, however, would be to cancel the excess of prisoners in the hands of the Federal authorities by a delivery of 40,000 men for about 13,000, and to leave to the mercy of the rebel authorities such colored troops and their white officers as they then held, the offer was rejected. Subsequently an offer was made to Mr. Ould to receive all of the prisoners from Richmond under a solemn pledge that they should not be allowed to take arms unless duly exchanged with the consent of the rebel authorities, without reference to existing difficulties on the subject of exchange; and that the Federal Government would pledge itself to both feed and clothe all rebel prisoners in its hands. This proposition also was rejected.

In December Gen. Butler assumed command of the Department of Virginia and North Carolina, and, in accordance with his earnest request, was appointed agent of exchanges at Fortress Monroe. In the hope of resuming the exchange of prisoners he sent on the 25th of the month 520 prisoners to City Point, whom he offered to exchange for an equal number of Union prisoners, leaving all controverted questions between the Confederate authorities and his Government in abeyance. He received in return an equal number of men, but was notified that no more would be sent until a general exchange, as previously demanded, should be agreed upon. He was also notified that the Confederate Government would thenceforth hold no communication with him on this or any other subject. With this proceeding negotiations ended for the year.

The report of the Commissary-General of Prisoners, accompanying the Secretary of War's annual report, shows that the number of Confederate officers and men captured by the Federals since the beginning of the war, is: 1 lieutenant-general, 5 major-generals, 25 brigadier-generals, 186 colonels, 146 lieutenant-colonels, 244 majors, 2,497 captains, 5,811 lieutenants, 16,563 non-commissioned officers, 121,156 privates, and 5,800 citizens. Of these, the Federals had on hand at the date of the report, 29,229 officers and men, among whom were 1 major-general and 7 brigadiers. There have been 121,937 Confederates exchanged, against 110,866 Federal soldiers returned. The exchanges of officers on both sides are computed at their exchangeable value in privates.

Of the treatment of Federal prisoners by the rebel authorities it is sufficient to say, that the accounts of exchanged surgeons, officers, and men, generally concur in describing it as bad. Many have even denounced it as unneces-

sarily cruel. The enemy, in palliation of these complaints, allege that the Union prisoners are placed on an equality, as respects rations and clothing, with their own soldiers, and that they do not receive the comforts which might be reasonably expected, simply because it is not in the power of the Confederate authorities to give them. This, in the opinion of several exchanged surgeons, who were in the habit of making daily visits to the prison hospitals in Richmond, will not account for the dreadful mortality in those buildings, averaging, at certain periods, upward of 50 persons a day. Toward the close of the year, the Federal Government was permitted to send supplies of food and clothing to these prisoners; but charges of misappropriation of them having been made, the permission was, in December, revoked.

A somewhat remarkable episode in the history of the year, was the plot set on foot by the rebel authorities to liberate 2,500 of their officers confined on Johnson's Island, in Lake Erie, and in connection with this act to burn or destroy Buffalo and other lake cities. The expedition intended for this purpose was to rendezvous in Canada, surprise the Federal garrison on Johnson's Island, liberate the prisoners, convey them to Canada in vessels provided for that purpose, and forward them by Halifax to Nassau or Bermuda; the greater part of the funds being specially devoted to paying their passage to one of these points.

These facts coming to the knowledge of the American consul-general in Montreal, he at once laid them before the governor-general of Canada. The Canadian authorities gave the subject immediate attention, and, by November 11th, enough had been discovered of the plans of the rebels to authorize the governor-general to inform Lord Lyons, the British minister at Washington, by telegraph, of the existence of the plot. Lord Lyons at once communicated his despatch to the United States Government, and at midnight of the 11th the following despatch was sent by Secretary Stanton to the mayors of Detroit, Buffalo, and other Western cities:

The British minister, Lord Lyons, has to-night officially informed the Government that, from telegraphic information received from the governor-general of Canada, there is reason to believe that a plot is on foot by persons hostile to the United States, who have found an asylum in Canada, to invade the United States and destroy the city of Buffalo; that they propose to take possession of some of the steamboats on Lake Erie, to surprise Johnson's Island and liberate the prisoners of war confined there, and to proceed with them to attack Buffalo. This Government will employ all the means in its power to suppress any hostile attack from Canada; but, as other towns and cities on the shore of the lakes are exposed to the same danger, it is deemed proper to communicate this information to you, in order that any precautions, which the circumstances of the case permit, may be taken.

The governor-general suggests that steamboats should be watched, and that any steamboat or other vessel giving cause for suspicion, by the number or character of the persons on board, be overhauled.

You will please acknowledge the receipt of this tele-

gram, and communicate to this department any information you may now or hereafter have on this subject.
(Signed) EDWIN M. STANTON, Sec'y of War.

The prompt movement of troops to the scene of danger, and the precautions taken by the local authorities in the lake cities, had the effect of averting the threatened catastrophe, and in a few days tranquillity was restored.

PRIZE, any property captured at sea in virtue of the rights of war. During the existing war between the United States and the States in insurrection, calling themselves the "Confederate States of America," the law of prize, as an established branch of the law of nations, has been administered by the courts of the United States in reference to the questions of blockade and of contraband of war. On the 19th of April, 1861, President Lincoln, by proclamation, announced a blockade, "in pursuance of the laws of the United States and of the laws of nations," of the ports within the States of South Carolina, Georgia, Alabama, Florida, Mississippi, Louisiana, and Texas. The proclamation contained the following language: "For this purpose a competent force will be posted so as to prevent entrance and exit of vessels from the ports aforesaid. If, therefore, with a view to violate such blockade, a vessel shall approach or shall attempt to leave any of the said ports, she will be duly warned by the commander of one of the blockading vessels, who will endorse on her register the fact and date of such warning; and if the same vessel shall again attempt to enter or leave the blockaded port, she will be captured and sent to the nearest convenient port, for such proceedings against her and her cargo, as prize, as may be deemed advisable." A like blockade of the ports of Virginia and North Carolina was announced by proclamation of President Lincoln, issued on the 27th of April, 1861. In the progress of the war, captures soon began to be made, by the cruisers of the United States, of enemy vessels and neutral vessels, engaged in breaking the blockade, and in carrying contraband of war to the enemy. Several important questions in regard to the blockade soon came before the district courts of the United States, where the proceedings in prize were instituted, and were decided in favor of the United States. From these decisions appeals were taken, and the cases came before the Supreme Court of the United States in December term, 1862. It was decided by that court: 1st, that the President had a right to institute a blockade of ports in possession of persons in armed rebellion against the Government, on the principles of international law, as known and acknowledged among civilized States; 2d, that the property of persons domiciled or residing within the States in rebellion, was a proper subject of capture on the sea, as enemy property, without regard to the question whether such persons were personally loyal or disloyal to the United States. It was also decided by that court, in those cases, that the warning and endorsement

on the register of a vessel, provided for in the proclamation of blockade, were unnecessary, where it appeared that the offending vessel had full previous knowledge of the existence of the blockade, and that it was being maintained by a blockading force. Upon the principles thus settled, the law of prize, as established by courts of admiralty under the law of nations, has been applied to captures made during the present war, it being for such purposes regarded as a public war, with all the consequences, with respect to blockades and trading with the enemy in contraband of war, and with respect to enemy property captured at sea, which are applicable in the case of a war between two recognized powers. The business of the courts of the United States in prize cases during the present war has, therefore, been, as a general thing, simply the application of the rules of prize law to the facts of the cases which have arisen. Some questions however of peculiar interest have been decided by the district courts of the United States in New York and in Florida, involving the rights of neutral vessels. The first case of the kind in New York was that of the *Stephen Hart*, a schooner which sailed from London, November 19th, 1861, on an ostensible voyage to Cardenas, in Cuba. She was captured by a United States vessel of war, on the 29th of January, 1862, off the southern coast of Florida, about twenty-five miles from Key West. Her cargo consisted entirely of arms and munitions of war, such as rifles, sabres, cannon, cartridges, percussion caps, powder, blankets, &c. The vessel and cargo were claimed as the property of English subjects. The principles decided by the court in the case were: that the question whether or not the property laden on board of the vessel was being transported in the business of lawful commerce, was not to be decided by merely deciding the question as to whether the vessel was documented for and sailing upon a voyage from London to Cardenas; that the commerce was in the destination and intended use of the property laden on board of the vessel, and not in the incidental, ancillary and temporary voyage of the vessel, which might be but one of many carriers through which the property was to reach its true and original destination; that neither was the unlawfulness of the transportation of contraband goods determined by deciding the question as to whether their immediate destination was to a port of the enemy; that the proper test to be applied was, whether the contraband goods were intended for sale or consumption in a neutral market, or whether the direct and intended object of their transportation was to supply the enemy with them; that, to justify the capture, it was enough that the immediate object of the voyage was to supply the enemy, and that the contraband property was certainly destined to his immediate use; that if the contraband cargo of the vessel had been destined for the use of the fleet of the enemy lying in the harbor of

Cardenas, there could be no doubt that it might lawfully have been captured as prize of war, on its way to Cardenas; that if the contraband cargo was really destined, when it left its port of departure in England, for the use of the enemy, in the country of the enemy, and not for sale or consumption in the neutral port, no principle of the law of nations, and no consideration of the rights and interests of lawful neutral commerce, could require that the mere touching at the neutral port, either for the purpose of making it a new point of departure for the vessel to a port of the enemy, or for the purpose of transshipping the contraband cargo into another vessel, which might carry it to the destination which was intended for it when it left its port of departure, should exempt the vessel or the contraband cargo from capture as prize of war; that if it was the intention of the owner of the vessel, or of the owners of her cargo having the control of the movements of the vessel, that she should simply touch at Cardenas, and should proceed thence to Charleston or some other port of the enemy, her voyage was not a voyage prosecuted by a neutral vessel from one neutral port to another neutral port, but a voyage which was, at the time of her seizure, in course of prosecution to a port of the enemy, although she had not as yet reached Cardenas, and although her regular papers documented her for a voyage from London to Cuba; that such a voyage was one begun and carried on in violation of the belligerent right of the United States to blockade the ports of the enemy, and to prevent the introduction into those ports of arms and munitions of war; that the division of the continuous transportation of contraband goods into several intermediate transportations, by means of intermediate voyages by different vessels carrying such goods, could not make the transportation, which was, in fact, a unit, to become several transportations, although, to effect the entire transportation of the goods, required several voyages by different vessels, each of which might, in a certain sense, and for certain purposes, be said to have its own voyage, and although each of such voyages, except the last one in the circuit, might be between neutral ports; that such a transaction could not make any of the parts of the entire transportation of the contraband cargo a lawful transportation, when the transportation would not have been lawful if it had not been thus divided; that if the guilty intention that the contraband goods should reach a port of the enemy existed when such goods left their English port, that guilty intention could not be obliterated by the innocent intention of stopping at a neutral port on the way; that if there was, in stopping at such port, no intention of transshipping the cargo, and if it was to proceed to the enemy's country in the same vessel in which it came from England, there could, of course, be no purpose of lawful neutral commerce at the neutral port, by the sale or use of the cargo in

the market there, and that the sole purpose of stopping at the neutral port must merely have been to have upon the papers of the vessel an ostensible neutral terminus for the voyage; that if, on the other hand, the object of stopping at the neutral port was to transship the cargo to another vessel, to be transported to a port of the enemy, while the vessel in which it was brought from England did not proceed to the port of the enemy, there was equally an absence of all lawful neutral commerce at the neutral port, and the only commerce carried on in the case was that of the transportation of the contraband cargo from the English port to the port of the enemy, as was intended when it left the English port; that, in all such cases, the transportation or voyage of the contraband goods was to be considered as a unit, from the port of lading to the port of delivery in the enemy's country; that if any part of such voyage or transportation was unlawful, it was unlawful throughout; and that the vessel and her cargo were subject to capture, as well before their arrival at the first neutral port at which the vessel touched after her departure from England, as on the voyage or transportation by sea from such neutral port to the port of the enemy. These doctrines were enforced by the court, by citations from recognized English authorities on international law, including judgments of Sir William Scott, the eminent English admiralty judge, in several cases. Applying these principles to the case of the *Stephen Hart* upon the evidence disclosed in the case, the court came to the conclusion that, beyond any reasonable doubt, the cargo of the vessel was intended, on its departure from England, to be carried into the enemy's country, for the use of the enemy, by a violation of the blockade of some one of the enemy's ports, either in that vessel, or in another vessel into which the cargo was to be transhipped for the purpose of being transported by sea to the enemy's country; and that, being contraband of war, the cargo must be condemned as lawful prize. The vessel was also condemned. The material points of the evidence, leading to the condemnation of the vessel and cargo, were, that the mate of the vessel had been employed by reason of his being a citizen of the United States, familiar with the enemy's country, and qualified to conduct the vessel into one of the blockaded ports; that the vessel was captured in a position convenient for running the blockade; that the cargo was entirely of a military character; that no manifest or bills of lading, or invoices, or charter-party, were found on board of the vessel; that the master attempted to suppress a letter of instructions to himself from the claimants of the cargo, and a letter from one of those claimants to a person at Havana, in Cuba, who was the agent of the enemy at that place; that the mate attempted to conceal letters which showed that the design was that the vessel should, under his guidance, enter a blockaded port of the enemy, and which also

contained specific directions for entering the harbor of Charleston; that no instructions were found from the claimant of the vessel to her master; and that the control of the vessel had been surrendered entirely by her claimant to the loaders of the cargo and to the master as their agent; that the flag of the enemy was found on board of the vessel, and was thrown overboard at the time of the capture; that charts of many of the blockaded ports of the enemy were found on board; that the consignee of the entire cargo was the agent of the enemy in Cuba, and that the cargo was laden on board by the agent of the enemy in London; and that there was positive testimony that the actual destination of the cargo was the country of the enemy. These considerations were held to outweigh the facts, that the clearance of the vessel at London was for Cuba, and that her log-book described her voyage as one from London to Cardenas, Cuba. The doctrine contended for by the claimants in the case was, 1st, that the transportation of all articles, including arms and munitions of war, between neutral ports, in a neutral vessel, was lawful in time of war; and, 2d, that if a neutral vessel, with a cargo belonging to neutrals, was, in fact, on a voyage from one neutral port to another, she could not be seized and condemned as lawful prize, although she were laden with contraband of war, unless it was determined that she was actually destined to a port of the enemy upon the voyage on which she was seized, or unless she was taken in the act of violating a blockade.

The next case which arose in New York was that of the bark *Springbok*, captured on the 3d of February, 1863, by a United States steamer, from 150 to 200 miles east of the port of Nassau, N. P. The claimants of this vessel and cargo were all of them British subjects. Her log-book, bills of lading, manifest, clearance, and other official papers, spoke of her voyage as one from London to Nassau. She cleared from London, December 8th, 1862. The court, in its judgment in the case, reaffirmed the principles decided in the case of the *Stephen Hart*. There were on board of the *Springbok* some goods contraband of war. The whole cargo was claimed by the same owners. The court found, from the evidence, that the contraband articles were destined for the country of the enemy; that the cargo was intended to be delivered in the enemy's country, by transshipment at Nassau into a vessel in which it should be carried through the blockade, and that such was the intended destination of the cargo on its departure from England; that the papers found on board of the vessel, so far as they represented Nassau as the ultimate destination of the cargo, were false and simulated; that there was no *bona fide* intention of landing the cargo at Nassau, for sale or consumption there, so that it might be incorporated at Nassau into the common stock in that market, but that, if it was to be landed there at all, it was only to be

so landed for the purpose of being transshipped in bulk into another vessel, in pursuance of the original destination of the cargo to the enemy's country; and that the port of Nassau was to be used only as a port of transshipment of the cargo. The material points of the evidence, leading to these conclusions, were: that there was no mention, in the bills of lading, of the contents of any of the packages composing the cargo, except some tea, coffee, and spices; that the manifest made no mention of the contents of any of the packages; that there were no invoices of the cargo found on board; and that, besides army blankets, army clothing, cavalry swords, bayonets, army brogans, navy boots, tin plates, rope, saltpetre, and drugs, there were found on board fifty thousand navy buttons stamped with the initials C. S. N., meaning "Confederate States Navy," and eighty thousand army buttons, some stamped with the initial "I," some with "C," and some with "A," representing severally the words "Infantry," "Cavalry," and "Artillery," all of the buttons being stamped with the name and place of business in London of the claimants of the cargo. The non-contraband articles on board were condemned on the ground that they belonged to the owners of the contraband articles, upon the well settled principle, that where contraband goods destined for the use of the enemy are found on board of a vessel belonging to the owner of the contraband articles, even those goods which are innocent must share the fate of the contraband goods. The vessel was also condemned, upon the ground that, under all the circumstances disclosed in the case, she was employed in carrying on the unlawful enterprise of transporting contraband articles on their way to the enemy's country, to be there introduced by a violation of the blockade; and that she was so employed under such a state of facts as made her owners responsible for the unlawful transportation of contraband articles, and for the acts of the master in relation to such transportation, to such an extent as to justify the condemnation of the vessel. The material points of the evidence, leading to the condemnation of the vessel, as distinct from the cargo, were: that the charterer of the vessel was one of the owners of the cargo; that the agents in London of the charterer were the agents of the co-owners of the cargo; that the master of the vessel was the son of one of its three joint owners; that the master signed the bills of lading for the packages on board, to be transported in time of war ostensibly to Nassau, the principal port of call and transshipment for vessels and cargoes destined to the ports of the enemy by a breach of blockade; that the bills of lading and manifest were defective, and the invoices wholly wanting; that the master was appointed to the command of the vessel by her owners; that the only instructions he carried were instructions from the agents of the charterer to proceed to Nassau and report himself

to a person there, and receive orders from that person as to the delivery of the cargo; that he knew that there were invoices of the cargo, and failed to carry them; and that he declared, in his testimony, his ignorance of the contents of the cargo, or that there were contraband goods on board. The case was regarded as one of the carrying of contraband articles under a false destination, and with false papers, making the owners of the vessel responsible for the acts of the master in so doing.

The third case in New York was that of the steamer *Peterhoff*, which was captured by a United States vessel on the 25th of February, 1863, off the island of St. Thomas. Upon her bills of lading, she was bound "for off the Rio Grande, Gulf of Mexico, for Matamoras." Her clearance was from London to Matamoras. The court, in its judgment in the case, reaffirmed the principles laid down in the two cases already referred to. The vessel left London early in January, 1863. Her registered owner was an English subject. Her cargo was laden by a large number of shippers, all of them British subjects, with the exception of one, who was a citizen of the United States, and a resident of Texas at the breaking out of the war, and was a passenger on the vessel. The shippers of the cargo were twenty-six in number. There were thirty-nine bills of lading, of which eighteen were endorsed to passengers, and three to the master of the vessel. Of the remaining eighteen bills, nine were endorsed in blank, and were found in the possession of the master or of some of the passengers, two of the nine being shipments by one of the passengers, and two others of them being shipments by the owner of the vessel. There were, in addition, one bill of lading, not endorsed, of goods shipped by the master, and eight bills of lading, not endorsed, of which no duplicates were found, and which were in the possession of the master or of some of the passengers. Duplicates were found of thirty of the bills, and of one of them (being one of a shipment by one of the passengers, endorsed in blank), there were four sets found. The value of the cargo represented by the passengers and master was a very large proportion of the value of the entire cargo, the portion represented by the passenger who was a citizen of the United States being in value more than one half of the whole. No one of the thirty-nine bills, which covered in all 4,472 packages, contained the name of any consignee, with the exception of one for 52 packages addressed to a firm at Matamoras. All the other bills declared the merchandise to be deliverable to the order of the shippers. The master testified that the entire cargo, except the 52 packages, was represented by himself and the three passengers. The same kinds of articles were covered by the bills of lading endorsed to the master and to the three passengers. Those articles comprised gray blankets, blucher boots, rope, horse equipments, quinine, chloroform, morphine, opium, and other drugs, and a cotton press. There were also on board a

number of sets of artillery harness, with their accompaniments, and a large quantity of horse-shoes of a large size, together with anvils and blacksmith's bellows, tin, zinc, iron, steel, artillery-boots, waist-belts, and ball-bags. The conclusion of the court upon the evidence was, that the vessel, when captured, although ostensibly upon a voyage from London to neutral waters at the mouth of the Rio Grande, was laden with a cargo composed largely of articles contraband of war, which were not designed, on their departure from England, to be sold or disposed of in the neutral market of Matamoras, but were designed to be delivered, either directly, or indirectly by transshipment, in the country of the enemy, and for the use of the enemy. The material points of the evidence, leading to this conclusion, were: that the cargo, in the character and quantity of the articles composing it, had very little adaptation to the Mexican market, or to the small port of Matamoras, so far as any legitimate use or sale or consumption of it in Mexico, was concerned; that it was admirably adapted, in every particular, to the market of the enemy; that large quantities of the articles composing it were those for which there was a very urgent demand, to supply the present wants of the enemy; that the master of the vessel, when she was boarded, twice refused to go with his papers on board of the capturing cruiser; that papers on board of the vessel were destroyed by orders of her master, at the time of her capture, some by being burned and some by being thrown overboard; that the master, on his first examination, denied that any papers were destroyed, and then, after other witnesses had testified to such destruction, invented a false story as to the contents of the package which was thrown overboard; that the manifest of the cargo did not disclose its contents, except in a few unimportant instances; that the invoices found on board were in the possession of the passengers and not of the master; that there were no invoices of the artillery harness or its accompaniments, or of the drugs forming a portion of the packages addressed to the firm at Matamoras; and that the bills of lading failed to disclose the truth as to the contraband articles on board of the vessel. The conviction of the court, upon the entire evidence, was, that notwithstanding the ostensible destination of the vessel to neutral waters at the mouth of the Rio Grande, the actual hostile destination of the cargo was established. The evidence showed, that it was intended that the vessel should bring home a cargo of cotton from the Rio Grande, and, among the articles on board were two hundred pairs of "negro brogans" so called in the invoice of them. As all the claimants of the vessel and cargo had on board contraband articles which were destined to be delivered either directly, or indirectly by transshipment, into the enemy's country, for the use of the enemy, and not for sale or disposition in the neutral market of Mexico, and as all the cargo was under the

control of the master and the three passengers, the court held, that not only were the contraband articles subject to capture, but that the other articles represented by the master and the claimants of the vessel and cargo, embracing the entire cargo, and also the vessel herself, were subject to capture, notwithstanding the ostensible destination of the vessel.

The cases above mentioned as having arisen in the court in Florida, were those of the steamer *Dolphin* and the steamer *Pearl*. These vessels were both of them, when captured, ostensibly bound from Liverpool to Nassau. The former had on board some rifles and some cavalry swords, all of them classed in the freight list as hardware. The principles laid down by the court in those cases were: that a vessel bound on a voyage from Liverpool to Nassau, with an intention of touching only at the latter port, and proceeding thence to a blockaded port of the enemy, was engaged in an attempt to violate the blockade, which subjected her to capture before arriving at Nassau, as well as after having left that port; and that, if an owner sends his vessel to a neutral port, with a settled intention to commence from such a port a series of voyages to a blockaded port, he thereby commences to violate the blockade, and subjects his vessel to capture, notwithstanding he may also intend to unlade the vessel at the neutral port, discharge the crew, and give all other external manifestations of an intention to end the voyage at such port. The court held, in both of the cases, that the testimony was clear, that an intention existed, at the time of the capture of the vessels, that they should proceed to a blockaded port of the enemy of the United States.

An interesting question of prize law has been decided by the vice-admiralty court at Halifax in Nova Scotia, in the case of the steamer *Chesapeake*, during the present war. The *Chesapeake* was a steamer plying between New York and Portland, in Maine. She left New York, bound for Portland, with a cargo, in December, 1863. During the voyage, some of the passengers rose against the officers and crew, and took possession of the vessel, and navigated her into a port in Nova Scotia. The persons who seized the vessel claimed that they acted under the authority of the rebel States. Proceedings were instituted in the name of the Queen against the vessel and cargo, in the vice-admiralty court at Halifax, and the vessel and cargo were arrested as having been piratically taken on the high seas from their lawful owners. The parties who made the seizure did not appear in the proceedings, but suffered judgment by default. The owners of the vessel and cargo appeared and claimed their restoration. The court decreed such restoration, on the ground that the bringing of the vessel and her cargo into a port of Nova Scotia was an offence against Great Britain, subjecting them to forfeiture; and that their restoration to their original owners was an act of justice to the offended dignity of the crown of Great Britain.

PROVISIONAL COURT FOR LOUISIANA.—This Court was established by an order of the President of the United States in the following terms:

EXECUTIVE MANSION, WASHINGTON, Oct. 20, 1862.

The insurrection which has for some time prevailed in several of the States of this Union, including Louisiana, having temporarily subverted and swept away the civil institutions of that State, including the judiciary and the judicial authorities of the Union, so that it has become necessary to hold the State in military occupation; and it being indispensably necessary that there shall be some judicial tribunal existing there capable of administering justice, I have, therefore, thought it proper to appoint, and I do hereby constitute a Provisional Court, which shall be a Court of Record for the State of Louisiana, and I do hereby appoint Charles A. Peabody, of New York, to be a Provisional Judge to hold said Court, with authority to hear, try, and determine all causes, civil and criminal, including causes in law, equity, revenue, and admiralty, and particularly all such powers and jurisdiction as belong to the District and Circuit Courts of the United States, conforming his proceedings, so far as possible, to the course of proceedings and practice which has been customary in the Courts of the United States and Louisiana—his judgment to be final and conclusive. And I do hereby authorize and empower the said Judge to make and establish such rules and regulations as may be necessary for the exercise of his jurisdiction, and to appoint a Prosecuting Attorney, Marshal, and Clerk, of the said Court, who shall perform the functions of Attorney, Marshal, and Clerk, according to such proceedings and practice as before mentioned, and such rules and regulations as may be made and established by said Judge. These appointments are to continue during the pleasure of the President, not extending beyond the military occupation of the city of New Orleans, or the restoration of the civil authority in that city, and in the State of Louisiana. These officers shall be paid out of the contingent fund of the War Department, and compensation shall be as follows: * * Such compensations to be certified by the Secretary of War. A copy of this order, certified by the Secretary of War, and delivered to such Judge, shall be deemed and held to be a sufficient commission. Let the seal of the United States be hereunto affixed.

ABRAHAM LINCOLN.

By the President,

WILLIAM H. SEWARD, Secretary of State.

WAR DEPARTMENT, WASHINGTON, October 23d, 1862.

I hereby certify that the foregoing is a true copy, duly examined and compared with the original of the executive order of the President of the United States, constituting a Provisional Court for the State of Louisiana.

Witness my hand and the seal of the War Department.

EDWIN M. STANTON, Secretary of War.

Attest,

JOHN BOTTS, Chief Clerk.

This order seems to confer on Judge Peabody judicial power of every kind in all classes of cases. "To try and determine all causes, civil and criminal, including causes in law, equity, revenue, and admiralty," is a jurisdiction as comprehensive as sovereignty itself has, and can confer, and it thus appears that the President intended to delegate to this court all the judicial powers which he, as a conqueror of that State, and occupying it by the armies of the United States, possessed and had power to give. As the Executive order recites, the insurrection had "subverted and swept away the civil institutions, including the judiciary, and it was indispensably necessary that there should be

some judicial tribunal capable of administering justice." Not only was the class of cases in which this court should have jurisdiction very extensive and almost without limit, but the laws of the land as theretofore existing having in like manner, as the courts by which they had been administered, "been subverted and swept away," the rules or laws by which the court should be guided were to be fixed upon and adopted by the new governing power, and in the absence of all other enactment on the subject were to be instituted by the court itself. This territory thus held by the arms of the United States must be governed, wrongs must be redressed, and controversies decided, peace preserved, and the weak protected against the strong; but the rules by which the conqueror should be guided in his government were prescribed by no code of laws or even of morals. He was therefore at liberty to select them himself, and by the endowment of this court in terms so general, that power was delegated to the judge of the court.

The range of judicial powers of Judge Peabody, therefore, was not broader than the field from which he might select the system of rules or laws by which he would be guided in the exercise of those powers. He was simply to administer justice, and as to the code of laws or rules by which he would administer it, that was left for him to decide.

The decisions of this court are by the terms of the order made final, and are not subject to review by any other tribunal, the language on the subject being, "his judgments to be final and conclusive." This language is clear, and leaves no doubt that the decisions of the provisional judge are not subject to review save by the judge himself.

Without any provision on the subject, there is no doubt that an appeal would, in the nature of things, lie to the President himself from a judgment of this court, and even with this express provision against any appeal, there is no doubt that the President might, in a particular case, or any number of cases, entertain appeals just as he might unsay what he had said, and either modify or wholly do away with that provision of the order at his pleasure. He has, however, in saying that the judgment of the judge thereby constituted should "be final and conclusive," said in effect, that he, the President himself, would not entertain appeals from the decisions of this court. Its jurisdiction embraces, it seems, every possible case that can become the subject of judicial action. The powers of the judge are to decide each case according to his opinion of justice and propriety, adopting as the rule of his action such laws or rules as he may approve. The decisions he shall make are final, and conclude the rights of the parties in all cases. This court, therefore, appears to be the alpha and omega, the beginning and end of justice for Louisiana.

The change of administration of the Department of the Gulf, which took place in De-

ember, 1862, by the transfer of the command from Major-General Butler to Major-General Banks, delayed somewhat the organization and opening of the court. Its establishment was announced in a proclamation by the military governor in the following form:

STATE OF LOUISIANA, EXECUTIVE DEPARTMENT, }
New Orleans, December 29th, 1862. }

By an executive order, dated on the 20th day of October, A. D., 1862, Abraham Lincoln, President of the United States, has constituted an "United States Provisional Court for the State of Louisiana," and appointed the Hon. Charles A. Peabody to be a Provisional Judge to hold said Court.

By the terms of this order he is invested "with authority to hear, try, and determine all causes, civil and criminal, including causes in law, equity, revenue and admiralty, and particularly to exercise all such powers and jurisdiction as belong to the District and Circuit Courts, conforming his proceedings, as far as possible, to the course of proceedings and practice which has been customary in the Courts of the United States and Louisiana. His judgments to be final and conclusive."

The said Judge is further authorized and empowered to make and establish such rules and regulations as may be necessary for the exercise of his jurisdiction, and to appoint a prosecuting attorney, marshal, and clerk of the said Court.

In the exercise of the authority conferred by this order, the said Judge has appointed George D. Lamont, prosecuting attorney, Augustus de B. Hughes, clerk of said Court, and Isaac Edwards Clark, marshal.

Official notice is hereby given of the organization of said Court, and of the appointment of the said Charles A. Peabody, as Judge, and of the officers of the Court by him appointed.

All judgments, decisions, and decrees of said Court, and all acts of said officers by them done under the authority of said order, are to be respected and obeyed accordingly.

GEORGE F. SHEPLEY,
 Military Governor of Louisiana.

It went into operation in January following, and was at once fully occupied with business of the first magnitude, in the various departments of civil and criminal justice. One of the first duties of the judge was to determine and announce, so far as practicable, the rules or laws by which he would administer justice under his commission. The bar who appeared before him naturally started as they had been accustomed to do before under the civil law of the State of Louisiana, but it became apparent very soon, and probably in the very first case tried, that this law was more desirable to one of the parties than to the other, and the party to whom, in the particular case, it seemed less favorable, of course objected to the application of it, and insisted that the court was not bound by it, while the other insisted that he ought to be. The court considered the purpose of the Government to be, to govern the country held by its armies in a manner consistent with its own dignity and best interests, and the condition of things brought about by the war in which it was engaged; but in doing this it would always, for the sake of its own dignity, as well as for the sake of the people held in subjection, have respect to the interests of those to be governed, that in selecting the system of laws by which transactions between individuals should be governed and controversies decided, the interests of the people of the locality

would be chiefly consulted; the Government itself having but little interest, except to deal justly, preserve quiet, cultivate contentment, and give the people the system best suited to their wants under all the circumstances of the case. In looking to ascertain what code or system would be most beneficent, the Government looked first to the system it found in operation there at the time when, by the conquest of the country, the government of it was transferred from its own local authorities to the Federal power.

That system had been selected and introduced there by the wisdom of the country, represented by the legislative bodies, as best suited to the wants and interests of the community, best adapted to its habits and pursuits, agricultural, commercial and generally, and it was reasonable to suppose that the selection had been discreet and wise, with a view to the interests of the country, and this circumstance would commend it to the favorable consideration of the Government. That system had, moreover, been in force previously, and the contracts and transactions which would be the subjects of consideration in the court, had most of them been entered into while that system of laws had been in force, and as might fairly be presumed with reference to it, as the system by which they would be construed and carried into effect; and consequently that system (other things being equal) would be most just and beneficial in its operation in those cases, and not less so than any new system in respect to cases more recently arisen or thereafter to arise. The court theretofore declared, that as far as the altered condition of things would permit, the system of laws therefore in force in Louisiana, would be adopted as the guide and rule of the court in the administration of justice.

The orders of the General in command of the department, of course, were binding as laws, and would be respected as of paramount authority by the court. Those orders made numerous modifications of the law adopted as the basis of the system, and indicated the policy of the Government in the many matters to which they related. They were the express or written laws ordained by the power dominant in the land, and corresponded in most respects with statutes enacted by the legislative power in a country under a civil administration of government. All the powers of the Government being in the military arm of the power holding the country in subjection, it followed that that arm had the power to dictate laws according to which justice should be administered, as well as to erect courts by which to administer it.

For reasons similar to those which led the court to adopt the laws of Louisiana in matters pecuniary and civil in their nature, the criminal laws of Louisiana were adopted as the rule of administration of criminal justice. "These laws," said the court, in a charge to a grand jury, "framed by the legislative wisdom of the State, with an enlightened regard for and ap-

preciation of the wants and interests of the community here, will be found best adapted to the government of this country, and will be your guide and rule in your deliberations and actions generally in the performance of your duties as grand jurors."

The laws of the State, he said, in criminal even less than civil matters, would be adhered to inflexibly in the new condition of things. There were great changes in circumstances which must be taken into account in administering criminal justice. These changes and the modifications they should work were subjects to be considered by the court in particular cases, and not generally matters that could be arranged in classes, and about which rules of general application could be adopted.

It was natural that certain crimes should become frequent in a state of society broken and chaotic, where the general feeling of obligation was relaxed, and the temptations to crime growing out of impoverishment, absence of productive employment, and increased wants and privations, and punishments must be graduated accordingly. In most cases when a departure from former laws would become expedient, it would be in the direction of mercy and greater mildness in punishment. In some cases, however, a deviation in the opposite direction might be required by the necessities of the case. A similar rule was adopted as to cases which would have been cognizable by the Federal courts. In those cases the same law was applied as would have been administered in the Federal courts, in the respective departments of civil and criminal, legal and equitable, admiralty and maritime jurisdiction.

This court was created in October, as the order shows, but subsequently a change in the administration of the department was resolved on, and the practical organization of the court was delayed until that change should be effected.

The court, with the officers contemplated in the order, sailed from New York with the Banks' expedition, on the 4th December, 1862. This expedition, the largest ever fitted out in the country, was gotten up with the utmost secrecy as to its destination. This was unknown, not only to the public generally, but even to every one of those connected with it (except the Government, General Banks, and Judge Peabody), down to the hour of its sailing. Not a member of the staff of General Banks knew its destination, it is said, until it had arrived in the Gulf of Mexico, and was approaching one of the mouths of the Mississippi. The speculations in the public prints respecting it, after it had sailed, were constant and various. Some thought it bound to Fortress Monroe and North Carolina, some to Hilton Head and Charleston, some to Mobile, some few to New Orleans, and many more to Texas, while some papers of great intelligence insisted that it was bound to Florida. The mystery as to its destination increased rather than diminished

after its departure, and nothing was known or generally accepted as reliable on the subject, until tidings of its actual disembarkation were received on the Atlantic coast, and New Orleans was less frequently suspected than almost any other place named.

As soon as the court was ready for business, a large amount was commenced in it of the various kinds to which the habits and pursuits of the country give rise in times of peace; and many questions which arose out of the peculiar circumstances of the times, the previous occupation by the Confederate authorities, acts governmental and personal during that time, and the change of rule by the occupation by the Federal forces.

The court was always governed by the rules and principles of law, adhering to all the rules and forms of civil tribunals, and avoiding everything like a military administration of justice. In criminal matters it summoned a grand jury, and submitted to it all charges for examination. After indictment found, the cases were tried before a jury, with all the usual forms of law, and all the rules theretofore in use which were not inconsistent with the existing condition of things. Several capital cases were tried and convictions were obtained. Three cases were tried in one week, in two of which convictions of murder were had, and in the other a conviction of manslaughter—such a coincidence as in that country had, perhaps, never occurred before. These crimes against the person and life had seldom before been punished at all, and hence this administration of justice commanded the notice and the approbation of all who valued the maintenance of order and good morals, and thought them likely to be advanced by its prompt and firm administration.

As has been said, the first court established there, after the occupation by the Federal forces, was the Provost Court of the army, at first performing only the duties of a military court, then those of a general criminal court. In addition to those duties, and in the absence of other courts, the Provost Court from time to time entertained and tried civil suits, and those not only of the usual character arising out of controversies between man and man, but those of an ecclesiastical character, such as successions, the administration of the estates of deceased persons, the custody and guardianship of minors and their estates, and cases of divorce not only *a mensa et thoro*, but also *a vinculo matrimonii*.

In that court the pleadings were always oral, the witnesses were examined rapidly, no notes of evidence were taken, and the decision usually followed immediately on the closing of the evidence or arguments of counsel, in cases where arguments were heard. That court had been doing business some months when the Provisional Court went into operation, and the questions growing out of the action of that court were among the most novel and eccentric that came before the Provisional Court.

The operations of that court had been most beneficent, and it was safe to assume that justice and the best interests of the public would be advanced by sustaining its acts as being within its powers, and valid, so far as circumstances would permit, and the Provisional Court, therefore, always inclined to sustain its jurisdiction, and usually found it easy to do it on general legal principles. Where, for instance, a divorce *a mensa et thoro* had been adjudged by that court, on the application of the wife, and more than a year had elapsed without a reconciliation of the parties, the law of Louisiana, in such a case, giving the plaintiff, after the expiration of the year a right to a complete divorce *a vinculo matrimonii* and half of the property acquired during coverture; the Provisional Court was asked to make the final decree and distribute the property between the parties. The Provisional Court sustained the jurisdiction of the Provost Court, affirmed its decision, and ordered judgment of divorce dissolving the bonds of matrimony, and dividing the property of the marriage, and awarding the custody and support of the children. *De Bare vs. De Bare*.

A sugar planter, named Millandon, of large estate, having two plantations with crops nearly ready to be gathered, and finding himself at that season of the year destitute of labor by reason of the desertion of his slaves, contracted with a gentleman named Smith, who seemed to have the power to procure labor, to take off his crop and make the sugar; agreeing to pay for the labor furnished and to support the laborers, and bear all expenses, and give to Smith one half of the crop or proceeds. The contractor agreed to furnish the labor and superintend the work. The business went on very well for a while, but the laborers becoming demoralized, and the contractor seeming to be unable to fulfil his contract by controlling the present force or procuring a new one, the planter wished to terminate the contract. Mr. Millandon went before General Butler at a time fixed and presented his case. The General made the following order:

Mr. Smith having failed to present himself when called before me upon the subject of this contract, after hearing, it is ordered that this contract be set aside for working the negroes upon Millandon's plantation by said Smith, and that the plantation and laborers be turned over to Mr. Weed, the Government Agent, to be worked for the benefit of the claimant.

B. F. BUTLER, Maj.-Gen. Commd'g.

A tenth or a twentieth part of the sugar had been made at this time, and the value of the share the contractor would have received if all had gone on well would have been very large. Smith brought an action against Millandon to recover the value of that share as the damage he had sustained by the refusal of Millandon to allow him to perform and take the benefit of his contract. What were the rights of Smith against Millandon on these facts?

After the capture of New Orleans, wood became very scarce, and the New Orleans and Carrollton Railroad Company, seeing their stock running low and all further supplies suspended, and that the owners of land near the city, from hostility to the Government or some other cause declined to furnish it or to allow others to cut it and supply the market, applied to Gen. Butler for permission to cut wood for their use in the Swamp Lands near the city and Lake Pontchartrain. He gave them permission in the following terms:

NEW ORLEANS, November 6th, 1863.

To Maj.-Gen. Butler, commanding Gulf Department:

SIR: The Government and regular trains of the N. O. & C. R. R. Co. are now consuming, upon an average, ten cords of wood as a motive power per diem, and we are now out of fuel, with the exception of a few cords of pine wood that we use for kindling, the swamp timber in the lake swamp being our only resource for a supply, you will confer a favor upon the undersigned by authorizing Mr. A. Wire to cut wood in said swamp for the use of the New Orleans and Carrollton Railroad Company.

G. CUNIE DUNCAN, President.

On the back of this note was indorsed the following characteristic reply:

Permitted.

B. F. BUTLER,

Maj.-Gen. Commanding.

The Railroad Company then made a bargain with Wire to receive from him and pay for wood he should deliver them to a certain amount at a certain rate. Wire and his men went into the Lake Swamp and cut wood to a large amount and delivered it to the Railroad Company under the contract and received payment pursuant to the contract. After the organization of this Court suit was brought by the owners of the land against Wire and the men employed by him and also against the Railroad Company to recover damages for the wood cut and removed from their land. The questions were:

First. Whether the order of General Butler, giving permission to the Railroad Company was valid and effectual in itself as an act within the scope of his powers and would afford protection to the defendants.

Second. If it was valid and effectual as a protection, to what extent was it so? 1st, was it merely authority to enter the lands and take the wood, paying or remaining liable to pay a reasonable price for the same, and in that way a protection against consequences which would have followed from the tortiousness of the act, leaving the party liable for the value of the thing taken or despoiled? or 2d, was it authority to take the wood and dispose of it, free of all pecuniary responsibility on the part of the person acting under it, either for the wrongful act, or for the value of the thing taken?

A Mr. Emerson, during the rule of the Confederate authority, held a mortgage on the property of one Guillontet. He proceeded to foreclose it, and had obtained an order for the

sale of the property. He directed the sheriff to receive in payment of his mortgage only gold and silver. Guillontet wished to pay it in Confederate notes. These, Emerson refused to receive. Shortly afterward Emerson was arrested by order of a Confederate provost marshal and carried before him and questioned as to his refusal to receive Confederate notes in payment. He said that he had refused, and further said that as to debts like the mortgage, arising out of contracts made prior to the Confederate rule, when the currency was specie or its equivalent, and in which he had paid or loaned specie, he should insist on payment in specie and should decline to receive Confederate notes. The provost marshal ordered him to be committed to the Parish Prison, telling him that he would discharge him whenever he would consent to receive Confederate notes in payment of all sums due him. Being an old man and infirm, he could not remain there without great danger to his life, and he soon yielded to the entreaties of his wife and friends, and gave a written promise to the provost marshal that he would receive those notes in payment of all sums due him, and was discharged. Shortly afterward, the mortgage was paid off by Guillontet in Confederate notes, and was cancelled of record. Soon after the Provisional Court was opened, Emerson brought a suit to have the cancellation of the mortgage rescinded, and the mortgage restored to its condition as a lien on the premises, and offered to return the Confederate notes to Guillontet. Since the cancellation of the mortgage Guillontet had procured from another person named Samory, having no knowledge of the manner in which the cancellation of Emerson's mortgage had been effected, another loan, and had given another mortgage on the same property. The holder of this mortgage was also made defendant in Emerson's suit, and the lien of his mortgage was sought to be cut off or postponed to that of Emerson. The court ordered the cancellation to be vacated, and Emerson's mortgage to be restored as a lien on the property, but declined to vacate or postpone the lien of the subsequent mortgage, and excepted that from the operation of Emerson's lien, and established it as prior to that of Emerson's mortgage.

Crowell & Hallet were ship chandlers in New Orleans in the early days of the rebellion. An order was made by the President of the Confederacy, that all Northern people should, within a certain time, leave the Confederacy. They, being northern men, felt it necessary to leave, and prior to leaving attempted to dispose of their goods and credits, and all property belonging to the firm by sale. After some attempts to sell, which were unsuccessful, they finally made a bargain with the defendant, Mr. Field, by which he agreed to buy the fixtures, lease of store, bills receivable and stock, for twelve hundred dollars. No inventory or account of the goods, or fixtures, or

debts due the firm, or of the other assets was made, and no price was fixed or named for any part of the property sold. The price of twelve hundred dollars was paid in cash at the time of the sale. The evidence further showed that the property sold was worth three or four times the price paid; that Crowell, who made the sale, and was the only member of the firm at that time in New Orleans, continued afterward to stop at the store and give some attention to the business as long as he remained in the city; that the business afterward went on much as it had done before the sale, under the care of the same clerk who had previously been in the employment of Crowell & Hallet, and who continued to conduct it under the employment of the purchaser. That the vendors and the purchaser had been old friends, and after the sale the purchaser in answer to inquiries by letters how the business was progressing, gave the sellers such general information as he had from time to time. It further appeared that the money paid by Field on the purchase, found its way that evening or the next back to the hands of his wife. Crowell & Hallet brought suit in the Provisional Court to recover the money realized by Field for the property transferred to him, alleging that the apparent sale was a mere pretence, and that the transaction was a feigned sale to enable the sellers to avoid seizure and confiscation by the so-called Confederate Government, and that it was the understanding of the parties at the time that Field should receive the goods and sell them for their account, and account to them for the proceeds. The court decided that the sale by Crowell & Hallet was simulated and not real; that the motive for it was to enable the plaintiffs to avoid the confiscation of their property by the so-called Confederate Government; that such a transaction was not contrary to law, or public policy, or good morals; that the resort to stratagem, in order to keep the goods from spoliation by a body having no other right than that which comes from the possession of physical force, was not prohibited by law or good morals; and that the party to it was not prohibited from impeaching such a transaction, and showing its falsity, and setting up and enforcing the real contract.

Ribas, a gentleman of large means located in New Orleans, for many years had resided in Paris. Avandano Brothers, a firm of New Orleans, had been his agents and collected his rents and income. During the days of the Confederate rule in New Orleans, some of the time there was no other currency than the Confederate notes, and no other could be obtained by Avandano Brothers in payment of the rents of Ribas's houses. Having a discretion to receive payments in such sums and in such currency as they thought best, they accepted it in Confederate notes. At that time, and for some time afterward, the port was blockaded, and communication with Paris was suspended, and no notice was given to Ribas that they had

collected these rents, and of course none that they were collected in Confederate notes. Avandano Brothers, prior to the receipt of these rents, had loaned Ribas on them, and in anticipation of them, several thousand dollars, which remained unpaid, and for which they claimed a right to hold the rents or pay themselves out of them. At the time the Confederate notes were received they were worth about eighty per cent. of their face. At the time this suit was commenced and tried, they were worth nothing. The authority of Avandano Brothers to receive these notes for Ribas was not questioned, but was substantially conceded. Ribas sued Avandano Brothers for the money they had collected for him. Avandano Brothers answered that they had collected for him only Confederate notes; that they had of these many thousand dollars belonging to Ribas, but that they held them as security for a loan they had made him on the faith of the rents to be collected, before the collection was made. Plaintiff claimed that defendants were bound to remit to him at Paris the amount of the collections, as they had general instructions to do, or they were at least bound to give him notice that the collections had been made that he might convert the notes while they retained their value. That under all the circumstances, the defendants, having received these notes at par on a debt due him, were bound to receive them in payment of the debt due them from him for money loaned. That they were bound to receive them at par in such payment, or, if not at par, that they were bound, at any rate, to receive them at the price or rate they were worth when they received them in payment of rents due Ribas. Defendants, on the other hand, contended that the notes were received in lieu of money for the benefit of the plaintiff alone; that they were not bound to remit because of instructions to that effect; that if they would otherwise be bound to do so, the blockade in force at that time prevented and excused them. That they were not bound to give notice of the collection, but that plaintiff was bound to take notice of it, or, at least, to make inquiry of them; that if they would have been bound to give notice ordinarily, the blockade at that time prevented it and excused the omission. That the loan by them to the plaintiff was a matter wholly independent of the other transaction, and was a debt to be paid in full in the legal currency of the day; that the fact that they had received that currency for plaintiff in payment of debts due to him, gave him no right against them to claim they should receive it on any terms, and much less at par; that it was received at his risk and had been held so ever since, and that its depreciation or extinction of the value of it was not a matter for which they were at all responsible, and that the loss was not to be borne by them; that they were no more responsible for the loss on the sum that it would have taken to pay the debt due them for money loaned,

than they were for the depreciation on the rest of the sum. In short, that their debt was to be paid them in full, and that he was only entitled to receive from them the Confederate money they had received for him, acting in their discretion in lieu of money, or an amount equivalent.

Among the cases in which the action of the court was early invoked, were many of a public character on behalf of the Government by its officers. Of these some of the most interesting were those of maritime prize, and those arising under the confiscation acts of 1862. Numbers of these were presented for consideration at an early day. The court immediately decided that it had not jurisdiction in cases of prize, holding that, although such questions would ordinarily be embraced by the terms used in the order constituting the court, still that in the very nature of the court, deriving its powers and existence, not from the Constitution or laws of the United States, but from the chief executive officer and military head of that Government, exercising powers conferred on him as such officer by the law of nations, and constituted for and holding its sessions in territory held in military occupation by the forces of the United States, and over which his powers of government were derived from the conquest and military occupation of it by forces under his command, and from the necessities arising from that condition of things, it had not jurisdiction for such purposes, and it declined to entertain them.

A considerable number of suits were also brought on behalf of the United States to enforce the laws of 1862 for the confiscation of the property of those who had taken active part in the rebellion, and property to a large amount was seized by the marshal of the court. In answer to these proceedings it was insisted that the court had not jurisdiction in cases of this class, and very able and elaborate arguments were heard. Mr. George S. Lacey, Mr. William H. Hunt, and Mr. C. Roselius (each one an eminent member of the bar of New Orleans), appearing for the claimants, and Mr. Lamont, the prosecuting attorney of the court appearing for the Government. This argument occupied several days, and at the close of it the court took time for consideration. While this question remained undecided, the Constitutional Courts of the United States for that district were organized and opened, and all business of the kind was transferred, with the approbation of both courts, to the District Court, that being the court in which, by the law itself, questions arising under it were directed to be tried. The question of jurisdiction so ably argued was never decided, and was in effect by subsequent events withdrawn from consideration. It was understood, however, and probably with the assent of the judge himself, that he had great doubts of his jurisdiction, and inclined to the opinion that he had none; that he thought that the question was

governed by the same rule as that of jurisdiction in cases of prize, in which he had already decided that he had not jurisdiction. If, however, the court had originally had jurisdiction in these cases in the absence of the Federal court, on which the jurisdiction had been expressly by the act itself conferred, he was quite of the opinion that it did not retain it after the organization of that court, but was thereby divested of it. In cases of prize the court declined jurisdiction, and in cases of confiscation it doubted its jurisdiction or inclined against it. In no other class of cases was the jurisdiction of the court ever questioned. So convincing is the argument of necessity to persons present and witnessing its illustrations, that no one was there found to doubt that the military power of the United States, holding that country in military occupation, had *ex necessitate rei* the right to establish such a tribunal. It was considered that all other powers being suspended by a conquest, it followed that whatever of government the country should have must come from that source. That it should have government from some source no sane man could doubt. That it could in the existing condition of things have it from any other, was plainly impossible. It must, therefore, have it from that, and to refuse it would be not merely a breach of duty in the conqueror, but a violation of one of the first principles and plainest duties of humanity. On these principles the court was established. Its judgments and mandates were of course to be executed. They would be executed by the same power by which the court was constituted. To this end the military and naval forces were pledged. With this understood, and with the forces known to be at hand, and to be ample for the pursuit, nothing like resistance or a hesitation has ever been for a moment experienced.

PRUSSIA, a kingdom in Northern Europe. The present king is William I., born 22d of March, 1797. He is a son of King Frederic William III., was appointed Prince Regent of Prussia on the 9th of October, 1858; succeeded his brother King Frederic William IV., on the 2d of January, 1861, and was crowned as king of Prussia on the 18th of October, 1861. He was married on the 11th of June, 1829, to Mary Louise Auguste Catherine, daughter of the late Grand Duke Charles Frederic of Saxe-Weimar. His eldest son and heir to the throne (crown-prince) is Frederick William Nicholas Charles, born 18th of October, 1831, and married 25th of January, 1858, to Victoria, Princess Royal of Great Britain.

The area of Prussia is 24,465 English square miles; the population, according to the census of 1861, amounted to 18,491,220, an increase over the population in 1858 of 4.23 per cent. Two of the eight provinces of this kingdom, Prussia and Posen, together with a population of 4,352,416, do not belong to the German Confederacy, although a majority of the inhabitants of the former, and nearly one half of the inhab-

itants of the latter, are Germans. The total number of the non-German population amounts to 2,480,609, and consists of 1,950,199 Poles, 233,379 Mazures, 7,652 Kassubes, 82,232 Wends, 10,324 Bohemians, 48,504 Moravians, 136,990 Lets, 414 Courlanders, 10,502 Walloons, and 363 Hollanders. As to the religious denominations of the inhabitants, 11,298,294 were members of the Evangelical Church, 6,906,988 Roman Catholics, 13,716 Mennonites, 16,233 members of Free Congregations and German Catholics, 254,785 Israelites, 1,202 Greek Catholics. The Prussian army in 1863 was composed as follows:

	Peace footing.	War footing.
Regular troops.....	191,033	356,532
First levy of the Landwehr.....		123,923
Troops in garrison.....	8,265	153,966
	199,298	634,421
To these must be added:		
Officers.....	8,000	10,000
Gendarmes.....		
Two divisions of the school of under officers.....	2,250	2,250
Company of the under officers of the guard.....	980	980
Feldjager.....	70	70
Invalids.....	77	77
	1,103	
Total	211,778	647,793
If a second levy of the Landwehr is raised, there must be added.....		95,496
Total.....		743,294

The navy consisted, in 1863, of 31 steamers, with an aggregate of 125 guns; 8 sailing vessels, with 150 guns; and 40 vessels with oars (of which 36 are gunboats), with an aggregate of 76 guns. Four screw corvettes, with an aggregate of 45 guns, were in the course of construction. The total of all the Prussian vessels afloat and in the course of construction amounted, therefore, to 83 vessels, with an aggregate of 441 guns. The personnel of the marine consisted of one admiral, three sea-captains, five captains of corvettes, fifty lieutenants of the first and second class, twenty ensigns, forty cadets, sixty deck-officers of the first and second class, 1,022 subaltern officers and sailors, and 436 men of the wharf division. The marine troops consisted of one lieutenant-colonel; four companies of infantry with four captains, four lieutenants, 13 second lieutenants, 611 subaltern officers and privates; two companies of artillery, with two captains, two lieutenants, four second lieutenants, and 304 subaltern officers and privates.

The arrivals and departures at the Prussian ports, in 1862, were as follows:

	Vessels.	Measurement.
Arrivals.....	11,963	2,009,816 tons
Departures.....	12,138	1,583,398 "
Total.....	24,101	3,593,214 "

The merchant navy, in 1862, consisted of 1,043 sea-going vessels of 336,832 tons, and 10,251 men, and 715 coasting vessels of 18,223 tons, and 1,749 men.

Prussia is a constitutional monarchy, with two Chambers, a House of Lords, and a Chamber of Deputies.

PUBLIC DOCUMENTS.—*Message of President LINCOLN, at the First Session of the Thirty-eighth United States Congress, December 8th, 1863:*

Fellow Citizens of the Senate and House of Representatives:

Another year of health, and of sufficiently abundant harvests, has passed. For these, and especially for the improved condition of our national affairs, our renewed and profoundest gratitude to God is due.

We remain in peace and friendship with foreign Powers. The efforts of disloyal citizens of the United States to involve us in foreign wars, to aid an inexcusable insurrection, have been unavailing. Her Britannic Majesty's Government, as was justly expected, have exercised their authority to prevent the departure of new hostile expeditions from British ports. The Emperor of France has, by a like proceeding, promptly vindicated the neutrality which he proclaimed at the beginning of the contest. Questions of great intricacy and importance have arisen out of the blockade, and other belligerent operations, between the Government and several of the maritime Powers, but they have been discussed, and, as far as was possible, accommodated in a spirit of frankness, justice, and mutual good will. It is especially gratifying that our prize courts, by the impartiality of their adjudications, have commanded the respect and confidence of maritime Powers.

The supplementary treaty between the United States and Great Britain for the suppression of the African slave trade, made on the 17th day of February last, has been duly ratified, and carried into execution. It is believed that, so far as American ports and American citizens are concerned, that inhuman and odious traffic has been brought to an end.

I shall submit for the consideration of the Senate a convention for the adjustment of possessory claims in Washington Territory, arising out of the treaty of the 15th of June, 1846, between the United States and Great Britain, and which have been the source of some disquiet among the citizens of that now rapidly improving part of the country.

A novel and important question, involving the extent of the maritime jurisdiction of Spain in the waters which surround the island of Cuba, has been debated without reaching an agreement, and it is proposed, in an amicable spirit, to refer it to the arbitration of a friendly Power. A convention for that purpose will be submitted to the Senate.

I have thought it proper, subject to the approval of the Senate, to concur with the interested commercial Powers in an arrangement for the liquidation of the Scheldt dues upon the principles which have been heretofore adopted in regard to the imposts upon navigation in the waters of Denmark.

The long-pending controversy between this Government and that of Chili, touching the seizure at Sitania, in Peru, by Chilean officers, of a large amount of treasure belonging to citizens of the United States, has been brought to a close by the award of his Majesty the King of the Belgians, to whose arbitration the question was referred by the parties. The subject was thoroughly and patiently examined by that justly respected magistrate, and, although the sum awarded to the claimants may not have been as large as was expected, there is no reason to distrust the wisdom of his Majesty's decision. That decision was promptly complied with by Chili, when the intelligence in regard to it reached that country.

The joint commission, under the act of the last session, for carrying into effect the convention with Peru on the subject of claims, has been organized at Lima, and is engaged in the business intrusted to it.

Difficulties concerning interoceanic transit through Nicaragua are in course of amicable adjustment.

In conformity with principles set forth in my last annual message, I have received a representative from the United States of Colombia, and have accredited a minister to that republic.

Incidents occurring in the progress of our civil war have forced upon my attention the uncertain state of

international questions touching the rights of foreigners in this country and of United States citizens abroad. In regard to some Governments these rights are at least partially defined by treaties. In no instance, however, is it expressly stipulated that, in the event of a civil war, a foreigner residing in this country, within the lines of the insurgents, is to be exempted from the rule which classes him as a belligerent, in whose behalf the Government of his country cannot expect any privileges or immunities distinct from that character. I regret to say, however, that such claims have been put forward, and, in some instances, in behalf of foreigners who have lived in the United States for the greater part of their lives.

There is reason to believe that many persons born in foreign countries, who have declared their intention to become citizens, or who have been fully naturalized, have evaded the military duty required of them by denying the fact, and thereby throwing upon the Government the burden of proof. It has been found difficult or impracticable to obtain this proof, from the want of guides to the proper sources of information. These might be supplied by requiring clerks of courts, where declarations of intention may be made or naturalizations effected, to send periodically lists of the names of the persons naturalized or declaring their intention to become citizens, to the Secretary of the Interior, in whose department those names might be arranged and printed for general information.

There is also reason to believe that foreigners frequently become citizens of the United States for the sole purpose of evading duties imposed by the laws of their native countries, to which, on becoming naturalized here, they at once repair, and, though never returning to the United States, they still claim the interposition of this Government as citizens. Many alterations and great prejudices have heretofore arisen out of this abuse. It is, therefore, submitted to your serious consideration. It might be advisable to fix a limit beyond which no citizen of the United States residing abroad may claim the interposition of the Government.

The right of suffrage has often been assumed and exercised by aliens, under pretences of naturalization, which they have disavowed when drafted into the military service. I submit the expediency of such an amendment of the law as will make the fact of voting an estoppel against any plea of exemption from military service, or other civil obligation, on the ground of alienage.

In common with other Western Powers, our relations with Japan have been brought into serious jeopardy, through the perverse opposition of the hereditary aristocracy of the empire to the enlightened and liberal policy of the Tycoon, designed to bring the country into the society of nations. It is hoped, although not with entire confidence, that these difficulties may be peacefully overcome. I ask your attention to the claim of the minister residing there for the damages he sustained in the destruction by fire of the residence of the legation at Yedo.

Satisfactory arrangements have been made with the Emperor of Russia, which it is believed will result in effecting a continuous line of telegraph through that empire from our Pacific coast.

I recommend to your favorable consideration the subject of an international telegraph across the Atlantic ocean; and also of a telegraph between this capital and the national forts along the Atlantic seaboard and the Gulf of Mexico. Such communications, established with any reasonable outlay, would be economical as well as effective aids to the diplomatic, military, and naval service.

The consular system of the United States, under the enactments of the last Congress, begins to be self-sustaining; and there is reason to hope that it may become entirely so, with the increase of trade which will ensue whenever peace is restored. Our ministers abroad have been faithful in defending American rights. In protecting commercial interests, our consuls have necessarily had to encounter increased labors and responsi-

bilities, growing out of the war. These they have, for the most part, met and discharged with zeal and efficiency. This acknowledgment justly includes those consuls who, residing in Morocco, Egypt, Turkey, Japan, China, and other oriental countries, are charged with complex functions and extraordinary powers.

The condition of the several organized Territories is generally satisfactory, although Indian disturbances in New Mexico have not been entirely suppressed. The mineral resources of Colorado, Nevada, Idaho, New Mexico, and Arizona are proving far richer than has been heretofore understood. I lay before you a communication on this subject from the Governor of New Mexico.

I again submit to your consideration the expediency of establishing a system for the encouragement of immigration. Although this source of national wealth and strength is again flowing with greater freedom than for several years before the insurrection occurred, there is still a great deficiency of laborers in every field of industry, especially in agriculture and in our mines, as well of iron and coal as of the precious metals. While the demand for labor is thus increased here, tens of thousands of persons, destitute of remunerative occupation, are thronging our foreign consulates, and offering to emigrate to the United States, if essential, but very cheap, assistance can be afforded them. It is easy to see that, under the sharp discipline of civil war, the nation is beginning a new life. This noble effort demands the aid, and ought to receive the attention and support of the Government.

Injuries, unforeseen by the Government and unintended, may, in some cases, have been inflicted upon the subjects or citizens of foreign countries, both at sea and on land, by persons in the service of the United States. As this Government expects redress from other Powers when similar injuries are inflicted by persons in their service upon citizens of the United States, we must be prepared to do justice to foreigners. If the existing judicial tribunals are inadequate to this purpose, a special court may be authorized, with power to hear and decide such claims of the character referred to as may have arisen under treaties and the public law. Conventions for adjusting these claims by joint commission have been proposed to some Governments, but no definitive answer to the proposition has yet been received from any.

In the course of the session I shall probably have occasion to request you to provide indemnification to claimants where decrees of restitution have been rendered and damages awarded by admiralty courts; and in other cases, where this Government may be acknowledged to be liable in principle, and where the amount of that liability has been ascertained by an informal arbitration.

The proper officers of the Treasury have deemed themselves required, by the law of the United States upon the subject, to demand a tax upon the incomes of foreign consuls in this country. While such a demand may not in strictness be in derogation of public law, or perhaps of any existing treaty between the United States and a foreign country, the expediency of so far modifying the act as to exempt from tax the income of such consuls as are not citizens of the United States, derived from the emoluments of their office, or from property not situated in the United States, is submitted to your serious consideration. I make this suggestion upon the ground that a comity which ought to be reciprocated exempts our consuls, in all other countries, from taxation to the extent thus indicated. The United States, I think, ought not to be exceptionally illiberal to international trade and commerce.

The operations of the Treasury during the last year have been successfully conducted. The enactment by Congress of a national banking law has proved a valuable support of public credit; and the general legislation in relation to loans has fully answered the expectations of its favorers. Some amendments may be required to perfect existing laws; but no change in their principles or general scope is believed to be needed.

Since these measures have been in operation, all demands on the Treasury, including the pay of the army and navy, have been promptly met and fully satisfied. No considerable body of troops, it is believed, were ever more amply provided, and more liberally and punctually paid; and it may be added, that by no people were the burdens incident to a great war ever more cheerfully borne.

The receipts during the year from all sources, including loans and the balance in the Treasury at its commencement, were \$901,125,674.86, and the aggregate disbursements \$895,796,630.65, leaving a balance on the 1st July, 1863, of \$5,329,044.21. Of the receipts there were derived from customs, \$69,059,642.40; from internal revenue, \$37,640,787.95; from direct tax, \$1,485,103.61; from lands, \$167,617.17; from miscellaneous sources, \$3,046,615.35; and from loans, \$776,682,361.57; making the aggregate, \$901,125,674.86.

Of the disbursements there were for the civil service, \$23,253,922.08; pensions and Indians, \$4,216,520.79; for interest on public debt, \$24,729,846.51; for the War Department, \$599,298,600.83; for the Navy Department, \$63,211,105.27; for payment of funded and temporary debt, \$181,086,635.07; making the aggregate, \$895,796,630.65; and leaving the balance of \$5,329,044.21.

But the payment of funded and temporary debt having been made from moneys borrowed during the year, must be regarded as merely nominal payments, and the moneys borrowed to make them as merely nominal receipts; and their amount, \$181,086,635.07, should therefore be deducted both from receipts and disbursements. This being done, there remains as actual receipts, \$720,039,039.79; and the actual disbursements, \$714,709,995.58, leaving the balance as already stated.

The actual receipts and disbursements for the first quarter, and the estimated receipts and disbursements for the remaining three quarters of the current fiscal year 1864, will be shown in detail by the report of the Secretary of the Treasury, to which I invite your attention. It is sufficient to say here that it is not believed that actual results will exhibit a state of finances less favorable to the country than the estimates of that officer heretofore submitted; whilst it is confidently expected that at the close of the year both disbursements and debt will be found very considerably less than has been anticipated.

The report of the Secretary of War is a document of great interest. It consists of—

1. The military operations of the year, detailed in the report of the General-in-Chief.
2. The organization of colored persons into the war service.
3. The exchange of prisoners, fully set forth in the letter of Gen. Hitchcock.
4. The operations under the act for enrolling and calling out the national forces, detailed in the report of the Provost-Marshal General.
5. The organization of the invalid corps; and,
6. The operation of the several departments of the Quartermaster-General, Commissary-General, Paymaster-General, Chief of Engineers, Chief of Ordnance, and Surgeon-General.

It has appeared impossible to make a valuable summary of this report, except such as would be too extended for this place, and hence I content myself by asking your careful attention to the report itself.

The duties devolving on the naval branch of the service during the year, and throughout the whole of this unhappy contest, have been discharged with fidelity and eminent success. The extensive blockade has been constantly increasing in efficiency as the navy has expanded; yet on so long a line it has so far been impossible to entirely suppress the illicit trade.

From returns received at the Navy Department, it appears that more than one thousand vessels have been captured since the blockade was instituted, and that the value of prizes already sent in for adjudication amounts to over thirteen millions of dollars.

The naval force of the United States consists at this

time of five hundred and eighty-eight vessels, completed and in the course of completion, and of these seventy-five are ironclad or armored steamers. The events of the war give an increased interest and importance to the navy, which will probably extend beyond the war itself.

The armored vessels in our navy completed and in service, or which are under contract or approaching completion, are believed to exceed in number those of any other Power. But, while these may be relied upon for harbor defence and coast service, others of greater strength and capacity will be necessary for cruising purposes, and to maintain our rightful position on the ocean.

The change that has taken place in naval vessels and naval warfare since the introduction of steam as a motive power for ships of war, demands either a corresponding change in some of our existing navy yards or the establishment of new ones for the construction and necessary repair of modern naval vessels. No inconsiderable embarrassment, delay, and public injury have been experienced from the want of such Governmental establishments. The necessity of such a navy yard, so furnished, at some suitable place upon the Atlantic seaboard, has on repeated occasions been brought to the attention of Congress by the Navy Department, and is again presented in the report of the Secretary which accompanies this communication.

I think it my duty to invite your special attention to this subject, and also to that of establishing a yard and depot for naval purposes upon one of the Western rivers. A naval force has been created on those interior waters, and under many disadvantages, within little more than two years, exceeding in numbers the whole naval force of the country at the commencement of the present Administration. Satisfactory and important as have been the performance of the heroic men of the navy at this interesting period, they are scarcely more wonderful than the success of our mechanics and artisans in the production of war vessels, which has created a new form of naval power.

Our country has advantages superior to any other nation in our resources of iron and timber, with inexhaustible quantities of fuel in the immediate vicinity of both, and all available and in close proximity to navigable waters. Without the advantage of public works, the resources of the nation have been developed and its power displayed in the construction of a navy of such magnitude, which has, at the very period of its creation, rendered signal service to the Union.

The increase of the number of seamen in the public service, from seven thousand five hundred men in the spring of 1861, to about thirty-four thousand at the present time, has been accomplished without special legislation, or extraordinary bounties to promote that increase. It has been found, however, that the operation of the draft, with the high bounties paid for army recruits, is beginning to affect injuriously the naval service, and will, if not corrected, be likely to impair its efficiency by detaching seamen from their proper vocation, and inducing them to enter the army. I therefore respectfully suggest that Congress might aid both the army and naval services by a definite provision on the subject, which would at the same time be equitable to the communities more especially interested.

I commend to your consideration the suggestions of the Secretary of the Navy in regard to the policy of fostering and training seamen, and also the education of officers and engineers for the naval service. The Naval Academy is rendering signal service in preparing midshipmen for the highly responsible duties which in after life they will be required to perform. In order that the country should not be deprived of the proper quota of educated officers, for which legal provision has been made at the Naval School, the vacancies caused by the neglect or omission to make nominations from the States in insurrection have been filled by the Secretary of the Navy. The school is now more full and complete than at any former period, and in every respect entitled to the favorable consideration of Congress.

During the past fiscal year the financial condition of the Post Office Department has been one of increasing prosperity, and I am gratified in being able to state that the actual postal revenue has nearly equalled the entire expenditures, the latter amounting to \$11,314,206.84, and the former to \$11,163,789.59, leaving a deficiency of but \$150,417.25. In 1860, the year immediately preceding the rebellion, the deficiency amounted to \$5,656,705.49, the postal receipts of that year being \$2,645,722.19 less than those of 1863.

The decrease since 1860 in the annual amount of transportation has been only about twenty-five per cent., but the annual expenditure on account of the same has been reduced thirty-five per cent. It is manifest, therefore, that the Post Office Department may become self-sustaining in a few years, even with the restoration of the whole service.

The international conference of postal delegates from the principal countries of Europe and America, which was called at the suggestion of the Postmaster-General, met at Paris on the 11th of May last, and concluded its deliberations on the 8th of June. The principles established by the conference as best adapted to facilitate postal intercourse between nations, and as the basis of future postal conventions, inaugurate a general system of uniform international charges, at reduced rates of postage, and cannot fail to produce beneficial results.

I refer you to the report of the Secretary of the Interior, which is herewith laid before you, for useful and varied information in relation to the public lands, Indian affairs, patents, pensions, and other matters of public concern pertaining to his Department.

The quantity of land disposed of during the last and the first quarter of the present fiscal year was three million eight hundred and forty-one thousand five hundred and forty-nine acres, of which one hundred and sixty-one thousand nine hundred and eleven acres were sold for cash, one million four hundred and fifty-six thousand five hundred and fourteen acres were taken up under the homestead law, and the residue disposed of under laws granting lands for military bounties, for railroad, and other purposes. It also appears that the sale of the public lands is largely on the increase.

It has long been a cherished opinion of some of our wisest statesmen that the people of the United States had a higher and more enduring interest in the early settlement and substantial cultivation of the public lands than in the amount of direct revenue to be derived from the sale of them. This opinion has had a controlling influence in shaping legislation upon the subject of our national domain.

I may cite, as evidence of this, the liberal measures adopted in reference to actual settlers; the grant to the States of the overflowed land within their limits, in order to their being reclaimed and rendered fit for cultivation; the grants to railway companies of alternate sections of land upon the contemplated lines of their roads, which, when completed, will so largely multiply the facilities for reaching our distant possessions. This policy has received its most signal and beneficent illustration in the recent enactment granting homesteads to actual settlers.

Since the first day of January last the before-mentioned quantity of one million four hundred and fifty-six thousand five hundred and fourteen acres of land have been taken up under its provisions. This fact and the amount of sales furnish gratifying evidence of increasing settlement upon the public lands, notwithstanding the great struggle in which the energies of the nation have been engaged, and which has required so large a withdrawal of our citizens from their accustomed pursuits.

I cordially concur in the recommendation of the Secretary of the Interior, suggesting a modification of the act in favor of those engaged in the military and naval service of the United States. I doubt not that Congress will cheerfully adopt such measures as will, without essentially changing the general features of the system, secure, to the greatest practicable extent,

its benefits to those who have left their homes in the defence of the country in this arduous crisis.

I invite your attention to the views of the Secretary as to the propriety of raising, by appropriate legislation, a revenue from the mineral lands of the United States.

The measures provided at your last session for the removal of certain Indian tribes have been carried into effect. Sundry treaties have been negotiated, which will in due time be submitted for the constitutional action of the Senate. They contain stipulations for extinguishing the possessory rights of the Indians to large and valuable tracts of land.

It is hoped that the effect of these treaties will result in the establishment of permanent friendly relations with such of these tribes as have been brought into frequent and bloody collision with our outlying settlements and emigrants. Sound policy and our imperative duty to these wards of the Government demand our anxious and constant attention to their material well-being, to their progress in the arts of civilization, and, above all, to that moral training which, under the blessing of Divine Providence, will confer upon them the elevated and sanctifying influences, the hopes and consolations of the Christian faith.

I suggested in my last annual message the propriety of remodelling our Indian system. Subsequent events have satisfied me of its necessity. The details set forth in the report of the Secretary evince the urgent need for immediate legislative action.

I commend the benevolent institutions, established or patronized by the Government in this District, to your generous and fostering care.

The attention of Congress, during the last session, was engaged to some extent with the proposition for enlarging the water communication between the Mississippi river and the northern seaboard; which proposition, however, failed for the time. Since then, upon a call of the greatest respectability, a convention has been held at Chicago upon the same subject, a summary of whose views is contained in a memorial addressed to the President and Congress, and which I now have the honor to lay before you. That this interest is one which, ere long, will force its own way, I do not entertain a doubt, while it is submitted entirely to your wisdom as to what can be done now. Augmented interest is given to this subject by the actual commencement of work upon the Pacific Railroad, under auspices so favorable to rapid progress and completion. The enlarged navigation becomes a palpable need to the great road.

I transmit the second annual report of the Commissioner of the Department of Agriculture, asking your attention to the developments in that vital interest of the nation.

When Congress assembled a year ago, the war had already lasted nearly twenty months, and there had been many conflicts on both land and sea, with varying results. The rebellion had been pressed back into reduced limits; yet the tone of public feeling and opinion, at home and abroad, was not satisfactory. With other signs, the popular elections, then just past, indicated uneasiness among ourselves, while, amid much that was cold and menacing, the kindest words coming from Europe were uttered in accents of pity that we were too blind to surrender a hopeless cause. Our commerce was suffering greatly by a few armed vessels built upon and furnished from foreign shores, and we were threatened with such additions from the same quarter as would sweep our trade from the sea and raise our blockade. We had failed to elicit from European Governments anything hopeful upon this subject. The preliminary emancipation proclamation, issued in September, was running its assigned period to the beginning of the new year. A month later the final proclamation came, including the announcement that colored men of suitable condition would be received into the war service. The policy of emancipation and of employing black soldiers gave to the future a new aspect, about which hope, and fear, and doubt contended in uncertain conflict. According to our polit-

ical system, as a matter of civil administration, the General Government had no lawful power to effect emancipation in any State, and for a long time it had been hoped that the rebellion could be suppressed without resorting to it as a military measure. It was all the while deemed possible that the necessity for it might come, and that, if it should, the crisis of the contest would then be presented. It came, and, as we anticipated, it was followed by dark and doubtful days.

Eleven months having now passed, we are permitted to take another review. The rebel hordes are pressed still farther back, and, by the complete opening of the Mississippi, the country dominated by the rebellion is divided into distinct parts, with no practical communication between them. Tennessee and Arkansas have been substantially cleared of insurgent control, and influential citizens in each, owners of slaves and advocates of slavery at the beginning of the rebellion, now declare openly for emancipation in their respective States. Of those States not included in the emancipation proclamation, Maryland and Missouri, neither of which, three years ago, would tolerate any restraint upon the extension of slavery into new Territories, only dispute now as to the best mode of removing it within their own limits. Of those who were slaves at the beginning of the rebellion, full one hundred thousand are now in the United States military service, about one half of which number actually bear arms in the ranks; thus giving the double advantage of taking so much labor from the insurgent cause, and supplying the places which otherwise must be filled with so many white men. So far as tested, it is difficult to say they are not as good soldiers as any. No servile insurrection, or tendency to violence or cruelty, has marked the measures of emancipation or arming the blacks. These measures have been much discussed in foreign countries, and contemporary with such discussion the tone of public sentiment there is much improved. At home the same measures have been fully discussed, supported, criticized, and denounced, and the annual elections following are highly encouraging to those whose official duty it is to bear the country through this great trial. Thus we have the new reckoning. The crisis which threatened to divide the friends of the Union is past.

Looking now to the present and future, and with reference to a resumption of the national authority within the States wherein that authority has been suspended, I have thought fit to issue a proclamation, a copy of which is herewith transmitted.

On examination of this proclamation it will appear, as is believed, that nothing is attempted beyond what is amply justified by the Constitution. True, the form of an oath is given, but no man is coerced to take it. The man is only promised a pardon in case he voluntarily takes the oath. The Constitution authorizes the executive to grant or withhold the pardon at his own absolute discretion; and this includes the power to grant on terms, as is fully established by judicial and other authorities. It is also proffered that if, in any of the States named, a State Government shall be, in the mode prescribed, set up, such Government shall be recognized and guaranteed by the United States, and that under it the State shall, on the constitutional conditions, be protected against invasion and domestic violence. The constitutional obligation of the United States to guarantee to every State in the Union a republican form of government, and to protect the State in the case stated, is explicit and full.

But why tender the benefits of this provision only to State Government set up in this particular way? This section of the Constitution contemplates a case wherein the element within a State, favorable to republican government, in the Union, may be too feeble for an opposite and hostile element external to or even within the State; and such are precisely the cases with which we are now dealing. An attempt to guarantee and protect a revived State Government, constructed in whole or in preponderating part from the very element against whose hostility and violence it is to be

protected, is simply absurd. There must be a test by which to separate the opposing elements, so as to build only from the sound; and that test is a sufficiently liberal one which accepts as sound whoever will make a sworn recantation of his former unsoundness.

But if it be proper to require, as a test of admission to the political body, an oath of allegiance to the Constitution of the United States and to the Union under it, why also to the laws and proclamations in regard to slavery? Those laws and proclamations were enacted and put forth for the purpose of aiding in the suppression of the rebellion. To give them their fullest effect, there had to be a pledge for their maintenance. In my judgment they have aided, and will further aid, the cause for which they were intended. To now abandon them would be not only to relinquish a lever of power, but would also be a cruel and astounding breach of faith.

I may add at this point, that while I remain in my present position I shall not attempt to retract or modify the emancipation proclamation; nor shall I return to slavery any person who is free by the terms of that proclamation, or by any of the acts of Congress. For these and other reasons it is thought best that the support of these measures shall be included in the oath; and it is believed the executive may lawfully claim it in return for pardon and restoration of forfeited rights, which he has clear constitutional power to withhold altogether, or grant upon the terms which he shall deem wisest for the public interest. It should be observed also that this part of the oath is subject to the modifying and abrogating power of legislation and supreme judicial decision.

The proposed acquiescence of the national executive in any reasonable temporary State arrangement for the freed people is made with the view of possibly modifying the confusion and destitution which must, at best, attend all classes by a total revolution of labor throughout whole States. It is hoped that the already deeply afflicted people of those States may be somewhat more ready to give up the cause of their affliction, if, to this extent, this vital matter be left to themselves; while no power of the national executive to prevent an abuse is abridged by the proposition.

The suggestion in the proclamation as to maintaining the political framework of the States on what is called reconstruction, is made in the hope that it may do good without danger of harm. It will save labor and avoid great confusion.

But why any proclamation now upon this subject? This question is beset with the conflicting views that the step might be delayed too long or be taken too soon. In some States the elements for resumption seem ready for action, but remain inactive, apparently for want of a rallying point—a plan of action. Why shall A adopt the plan of B, rather than B that of A? And if A and B should agree, how can they know but that the General Government here will reject their plan? By the proclamation a plan is presented which may be accepted by them as a rallying point, and which they are assured in advance will not be rejected here. This may bring them to act sooner than they otherwise would.

The objections to a premature presentation of a plan by the national executive consist in the danger of committals on points which could be more safely left to further developments. Care has been taken to so shape the document as to avoid embarrassments from this source. Saying that, on certain terms, certain classes will be pardoned, with rights restored, it is not said that other classes, or other terms, will never be included. Saying that reconstruction will be accepted if presented in a specified way, it is not said it will never be accepted in any other way.

The movements, by State action, for emancipation in several of the States, not included in the emancipation proclamation, are matters of profound gratulation. And while I do not repeat in detail what I have heretofore so earnestly urged upon this subject, my general views and feelings remain unchanged; and I trust that Congress will omit no fair opportunity of aiding these important steps to a great consummation.

In the midst of other cares, however important, we must not lose sight of the fact that the war power is still our main reliance. To that power alone can we look, yet for a time, to give confidence to the people in the contested regions, that the insurgent power will not again overrun them.

Until that confidence shall be established, little can be done anywhere for what is called reconstruction. Hence our chiefest care must still be directed to the army and navy, who have thus far borne their harder part so nobly and well. And it may be esteemed fortunate that, in giving the greatest efficiency to these indispensable arms, we do also honorably recognize the gallant men, from commander to sentinel, who compose them, and to whom, more than to others, the world must stand indebted for the home of freedom disenthralled, regenerated, enlarged, and perpetuated.

ABRAHAM LINCOLN.

December 8th, 1863.

PROCLAMATION.

Whereas, in and by the Constitution of the United States, it is provided that the President "shall have power to grant reprieves and pardons for offences against the United States, except in cases of impeachment;"

And whereas a rebellion now exists whereby the loyal State Governments of several of the States have for a long time been subverted, and many persons have committed and are now guilty of treason against the United States;

And whereas, with reference to said rebellion and treason, laws have been enacted by Congress, declaring forfeitures and confiscation of property and liberation of slaves, all upon terms and conditions therein stated, and also declaring that the President was thereby authorized at any time thereafter, by proclamation, to extend to the persons who may have participated in the existing rebellion, in any State or part thereof, pardon and amnesty, with such exceptions and at such times and on such conditions as he may deem expedient for the public welfare;

And whereas, the Congressional declaration for limited and conditional pardon accords with well-established judicial exposition of the pardoning power;

And whereas, with reference to said rebellion, the President of the United States has issued several proclamations, with provisions in regard to the liberation of slaves;

And whereas, it is now desired by some persons heretofore engaged in said rebellion to resume their allegiance to the United States, and to reinaugurate loyal State Governments within and for their respective States:

Therefore, I, ABRAHAM LINCOLN, President of the United States, do proclaim, declare, and make known to all persons who have, directly or by implication, participated in the existing rebellion, except as hereinafter excepted, that a full pardon is hereby granted to them and each of them, with restoration of all rights of property, except as to slaves, and in property cases where rights of third parties shall have intervened, and upon the condition that every such person shall take and subscribe an oath, and thenceforward keep and maintain said oath inviolate; and which oath shall be registered for permanent preservation, and shall be of the tenor and effect following, to wit:

I, ———, do solemnly swear, in presence of Almighty God, that I will henceforth faithfully support, protect, and defend the Constitution of the United States and the Union of the States thereunder; and that I will, in like manner, abide by and faithfully support all acts of Congress passed during the existing rebellion with reference to slaves, so long and so far as not repealed, modified, or held void by Congress, or by decision of the Supreme Court; and that I will, in like manner, abide by, and faithfully support all proclamations of the President, made during the existing rebellion, having reference to slaves, so long and so far as not modified or declared void by decision of the Supreme Court. So help me God.

The persons excepted from the benefits of the foregoing provisions are all who are or shall have been

civil or diplomatic officers or agents of the so-called Confederate Government; all who have left judicial stations under the United States to aid the rebellion; all who are or shall have been military or naval officers of said so-called Confederate Government above the rank of colonel in the army or lieutenant in the navy; all who left seats in the United States Congress to aid the rebellion; all who resigned commissions in the army or navy of the United States and afterward aided the rebellion; and all who have engaged in any way in treating colored persons, or white persons in charge of such, otherwise than lawfully as prisoners of war, and which persons may have been found in the United States service as soldiers, seamen, or in any other capacity.

And I do further proclaim, declare, and make known that whenever, in any of the States of Arkansas, Texas, Louisiana, Mississippi, Tennessee, Alabama, Georgia, Florida, South Carolina, and North Carolina, a number of persons, not less than one-tenth in number of the votes cast in such State at the Presidential election of the year of our Lord one thousand eight hundred and sixty, each having taken the oath aforesaid, and not having since violated it, and being a qualified voter by the election laws of the State existing immediately before the so-called act of secession, and excluding all others, shall reestablish a State Government which shall be republican, and in nowise contravening said oath, such shall be recognized as the true Government of the State, and the State shall receive thereunder the benefits of the constitutional provision which declares that "the United States shall guarantee to every State in this Union a republican form of government, and shall protect each of them against invasion; and, on application of the Legislature, or the executive (when the Legislature cannot be convened), against domestic violence."

And I do further proclaim, declare, and make known, that any provision which may be adopted by such State Government in relation to the freed people of such State, which shall recognize and declare their permanent freedom, provide for their education, and which may yet be consistent as a temporary arrangement with their present condition as a laboring, landless, homeless class, will not be objected to by the national executive.

And it is suggested as not improper that, in constructing a loyal State Government in any State, the name of the State, the boundary, the subdivisions, the constitution, and the general code of laws, as before the rebellion, be maintained, subject only to the modifications made necessary by the conditions hereinbefore stated, and such others, if any, not contravening said conditions, and which may be deemed expedient by those framing the new State Government.

To avoid misunderstanding, it may be proper to say that this proclamation, so far as it relates to State Governments, has no reference to States wherein loyal State Governments have all the while been maintained. And, for the same reason, it may be proper to further say, that whether members sent to Congress from any State shall be admitted to seats constitutionally, rests exclusively with the respective Houses, and not to any extent with the executive. And still further, that this proclamation is intended to present the people of the States wherein the national authority has been suspended, and loyal State Governments have been subverted, a mode in and by which the national authority and loyal State Governments may be reestablished within said States, or in any of them; and, while the mode presented is the best the executive can suggest, with his present impressions, it must not be understood that no other possible mode would be acceptable.

Given under my hand, at the City of Washington, the eighth day of December, A. D. one thousand eight hundred and sixty-three, and of the Independence of the United States of America the eighty-eighth.

ABRAHAM LINCOLN.

By the President:

WILLIAM H. SEWARD, Secretary of State.

Message of JEFFERSON DAVIS at the Session of the Confederate Congress commencing in January, 1863.

To the Senate and House of Representatives of the Confederate States:

At the date of your last adjournment the preparations of the enemy for further hostilities had assumed so menacing an aspect as to excite in some minds apprehension of our ability to meet them with sufficient promptness to avoid serious reverses. These preparations were completed shortly after your departure from the seat of government, and the armies of the United States made simultaneous advances on our frontiers, on the Western rivers, and on the Atlantic coast, in masses so great as to evince their hope of overbearing all resistance by mere weight of numbers. This hope, however, like those previously entertained by our foes, vanished.

In Virginia, their fourth attempt at invasion by armies whose assured success was confidently predicted, has met with decisive repulse. Our noble defenders, under the consummate leadership of their General, have again, at Fredericksburg, inflicted on the forces under Gen. Burnside the like disastrous overthrow as had been previously suffered by the successive invading armies commanded by Gens. McDowell, McClellan, and Pope.

In the West, obstinate battles have been fought with varied fortunes, marked by frightful carnage on both sides; but the enemy's hopes of decisive results have again been baffled, while at Vicksburg another formidable expedition has been repulsed, with inconsiderable loss on our side and severe damage to the assailing forces.

On the Atlantic coast the enemy has been unable to gain a footing beyond the protecting shelter of his fleets, and the city of Galveston has just been recovered by our forces, which succeeded not only in the capture of the garrison, but of one of the enemy's vessels of war, which was carried by boarding parties from merchant river steamers.

Our fortified positions have everywhere been much strengthened and improved, affording assurance of our ability to meet with success the utmost efforts of our enemies, in spite of the magnitude of their preparations for attack. A review of our history of the two years of our national existence affords ample cause for congratulation, and demands the most fervent expression of our thankfulness to the Almighty Father who has blessed our cause. We are justified in asserting, with a pride surely not unbecoming, that these Confederate States have added another to the lessons taught by history for the instruction of man, that they have afforded another example of the impossibility of subjugating a people determined to be free, and have demonstrated that no superiority of numbers or available resources can overcome the resistance offered by such valor in combat, such constancy under suffering, and such cheerful endurance of privation as have been conspicuously displayed by this people in the defence of their rights and liberties. The anticipations with which we entered into the contest have now ripened into a conviction, which is not only shared with us by the common opinion of neutral nations, but is evidently forcing itself upon our enemies themselves. If we but mark the history of the present year by resolute perseverance in the path we have hitherto pursued, by vigorous effort in the development of all our resources for defence, and by the continued exhibition of the same unfaltering courage in our soldiers and able conduct in their leaders, as have distinguished the past, we have every reason to expect that this will be the closing year of the war.

The war, which in its inception was waged for forcing us back into the Union, having failed to accomplish that purpose, passed into a second stage, in which it was attempted to conquer and rule these States as dependent provinces. Defeated in this second design, our enemies have evidently entered upon another, which can have no other purpose than revenge,

and thirst for blood and plunder of private property. But, however implacable they may be, they can have neither the spirit nor the resources required for a fourth year of a struggle uncheered by any hope of success, kept alive solely for the indulgence of mercenary and wicked passions, and demanding so exhausting an expenditure of blood and money as has hitherto been imposed on their people. The advent of peace will be hailed with joy; our desire for it has never been concealed; our efforts to avoid the war, forced on us as it was by the lust of conquest and the insane passions of our foes, are known to mankind. But, earnest as has been our wish for peace, and great as have been our sacrifices and sufferings during the war, the determination of this people has, with each succeeding month, become more unalterably fixed to endure any sufferings and continue any sacrifices, however prolonged, until their right to self-government and the sovereignty and independence of these States shall have been triumphantly vindicated and firmly established.

In this connection the occasion seems not unsuitable for some reference to the relations between the confederacy and the neutral Powers of Europe since the separation of these States from the former Union. Four of the States now members of the confederacy were recognized by name as independent sovereignties in a treaty of peace concluded in the year 1783, with one of the two great maritime Powers of Western Europe, and had been prior to that period allies in war of the other. In the year 1778 they formed a union with nine other States under Articles of Confederation. Dissatisfied with that Union, three of them—Virginia, Carolina, and Georgia—together with eight of the States now members of the United States, seceded from it in 1789, and these eleven seceding States formed a second Union, although by the terms of the Articles of Confederation express provision was made that the first Union should be perpetual. Their right to secede, notwithstanding this provision, was never contested by the States from which they separated, nor made the subject of discussion with any third Power. When, at the later period, North Carolina acceded to that second Union, and when, still later, the other seven States, now members of this confederacy, became also members of the same Union, it was upon the recognized footing of equal and independent sovereignties; nor had it then entered into the minds of men that sovereign States could be compelled by force to remain members of a confederation into which they had entered of their own free will, if at a subsequent period the defence of their safety and honor should, in their judgment, justify withdrawal.

The experience of the past had evinced the futility of any renunciation of such inherent rights, and accordingly the provision for perpetuity contained in the Articles of Confederation of 1778 was emitted to the Constitution of 1789. When, therefore, in 1861, eleven of the States again thought proper, for reasons satisfactory to themselves, to secede from the second Union, and to form a third one, under an amended constitution, they exercised a right which, being inherent, required no justification to foreign nations, and which international law did not permit them to question. The usages of intercourse between nations do, however, require, that official communication be made to friendly Powers of all organic changes in the constitution of States, and there was obvious propriety in giving prompt assurance of our desire to continue amicable relations with all mankind.

It was under the influence of these considerations that your predecessors, the Provisional Government, took early measures for sending to Europe commissioners charged with the duty of visiting the capitals of the different Powers, and making arrangements for the opening of more formal diplomatic intercourse. Prior, however, to the arrival abroad of these commissioners, the United States had commenced hostilities against the confederacy by despatching a secret expedition for the reinforcement of Fort Sumter, after an express promise to the contrary, and with a duplicity

which has been fully unveiled in a former message. They had also addressed communications to the different cabinets of Europe, in which they assumed the attitude of being sovereign over this confederacy, alleging that these independent States were in rebellion against the remaining States of the Union, and threatening Europe with manifestations of their displeasure if it should treat the Confederate States as having an independent existence. It soon became known that these pretensions were not considered abroad to be as absurd as they were known to be at home, nor had Europe yet learned what reliance was to be placed in the official statements of the cabinet at Washington. The delegation of power granted by these States to the Federal Government to represent them in foreign intercourse, had led Europe into the grave error of supposing that their separate sovereignty and independence had been merged into one common sovereignty, and had ceased to have a distinct existence. Under the influence of this error, which all appeals to reason and historical fact were vainly used to dispel, our commissioners were met by the declaration that foreign Governments could not assume to judge between the conflicting representations of the two parties as to the true nature of their previous mutual relations. The Governments of Great Britain and France accordingly signified their determination to confine themselves to recognizing the self-evident fact of the existence of a war, and to maintaining a strict neutrality during its progress. Some of the other Powers of Europe pursued the same course of policy, and it became apparent that by some understanding, express or tacit, Europe had decided to leave the initiative in all action touching the contest on this continent to the two Powers just named, who were recognized to have the largest interests involved both by reason of proximity and of the extent and intimacy of their commercial relations with the States engaged in the war.

It is manifest that the course of action adopted by Europe, while based on an apparent refusal to determine the question, or to side with either party, was in point of fact an actual decision against our rights, and in favor of the groundless pretensions of the United States. It was a refusal to treat us as an independent government. If we were independent States, the refusal to entertain with us the same international intercourse as was maintained with our enemy was unjust, and was injurious in its effects, whatever may have been the motive which prompted it. Neither was it in accordance with the high moral obligations of that international code whose chief sanction is the conscience of sovereigns and the public opinion of mankind, that those eminent Powers should decline the performance of a duty peculiarly incumbent on them from any apprehension of the consequences to themselves. One immediate and necessary result of their declining the responsibility of a decision which must have been adverse to the extravagant pretensions of the United States, was the prolongation of hostilities to which our enemies were thereby encouraged, and which have resulted in nothing but scenes of carnage and devastation on this continent, and of misery and suffering on the other, such as have scarcely a parallel in history. Had these Powers promptly admitted our right to be treated as all other independent nations, none can doubt that the moral effect of such action would have been to dispel the delusion under which the United States have persisted in their efforts to accomplish our subjugation.

To the continued hesitation of the same Powers in rendering this act of simple justice toward this confederacy is still due the continuance of the calamities which mankind suffers from the interruption of its peaceful pursuits both in the Old and New World. There are other matters in which less than justice has been rendered to this people by neutral Europe, and undue advantage effected on the aggressors in a wicked war. At the inception of hostilities the inhabitants of the confederacy were almost exclusively agriculturists; those of the United States, to a great extent, mechanics and merchants. We had no commercial marine,

while their merchant vessels covered the ocean. We were without a navy, while they had powerful fleets. The advantage which they possessed for inflicting injury on our coasts and harbors was thus counterbalanced in some measure by the exposure of their commerce to attack by private armed vessels.

It was known to Europe that within a very few years past the United States had peremptorily refused to accede to proposals for abolishing privateering, on the ground, as alleged by them, that nations owning powerful fleets would thereby obtain undue advantage over those possessing inferior naval forces. Yet, no sooner was war flagrant between the confederacy and the United States, than the maritime Powers of Europe issued orders prohibiting either party from bringing prizes into their ports. This prohibition, directed with apparent impartiality against both belligerents, was in reality effective against the Confederate States alone; for they alone could find a hostile commerce on the ocean. Merely nominal against the United States, the prohibition operated with intense severity on the confederacy, by depriving it of the only means of maintaining, with some approach to equality, its struggle on the ocean against the crushing superiority of naval force possessed by its enemies. The value and efficiency of the weapon which was thus wrested from our grasp by the combined action of neutral European Powers, in favor of a nation which professes openly its intention of ravaging their commerce by privateers in any future war, is strikingly illustrated by the terror inspired among the commercial classes of the United States by a single cruiser of the confederacy. One national steamer, commanded by officers and manned by a crew who are debarred by the closure of neutral ports from the opportunity of causing captured vessels to be condemned in their favor as prizes, has sufficed to double the rates of marine insurance in Northern ports, and consign to forced inaction numbers of Northern vessels, in addition to the direct damage inflicted by captures at sea. How difficult, then, to overestimate the effects that must have been produced by the hundreds of private armed vessels that would have swept the seas in pursuit of the commerce of our enemy if the means of disposing of their prizes had not been withheld by the action of neutral Europe!

But it is especially in relation to the so-called blockade of our coast that the policy of European Powers has been so shaped as to cause the greatest injury to the confederacy, and to confer signal advantages on the United States. The importance of this subject requires some development. Prior to the year 1856 the principles regulating the subject were to be gathered from the writings of eminent publicists, the decisions of admiralty courts, international treaties, and the usages of nations. The uncertainty and doubt which prevailed in reference to the true rules of maritime law in time of war, resulting from the discordant, and often conflicting, principles announced from such varied and independent sources, had become a grievous evil to mankind. Whether a blockade was allowable against a port not invested by land as well as by sea, whether a blockade was valid by sea if the investing fleet was merely sufficient to render ingress to the blockaded port evidently dangerous, or whether it was further required for its legality that it should be sufficient really to prevent access, and numerous other similar questions, had remained doubtful and undecided. Animated by the highly honorable desire to put an end to differences of opinion between neutrals and belligerents which may occasion serious difficulties and even conflicts—I quote the official language—the five great Powers of Europe, together with Sardinia and Turkey, adopted, in 1856, the following solemn declaration of principles:

Firstly—Privateering is and remains abolished.

Secondly—The neutral flag covers enemy's goods, with the exception of contraband of war.

Thirdly—Neutral goods, with the exception of contraband of war, are not liable to capture under enemy's flag.

Fourthly—Blockades, in order to be binding, must be effective; that is to say, maintained by a force sufficient really to prevent access to the coast of the enemy.

Not only did this solemn declaration announce to the world the principles to which the signing Powers agreed to conform in future wars, but it contained a clause to which those Powers gave immediate effect, and which provided that the states not parties to the Congress of Paris should be invited to accede to the declaration. Under this invitation every independent state in Europe yielded its assent. At least no instance is known to me of a refusal; and the United States, while declining to assent to the proposition which prohibited privateering, declared that the three remaining principles were in entire accordance with their own views of international law. No instance is known in history of the adoption of rules of public law under circumstances of like solemnity with like unanimity, and pledging the faith of nations with sanctity so peculiar.

When, therefore, this confederacy was formed, and when neutral Powers, while deferring action on its demand for admission into the family of nations, recognized it as a belligerent Power, Great Britain and France made informal proposals about the same time that their own rights as neutrals should be guaranteed by our acceding as belligerents to the declaration of principles made by the Congress of Paris. The request was addressed to our sense of justice, and therefore met immediate favorable response in the resolutions of the Provisional Congress of the 13th of August, 1861, by which all the principles announced by the Congress of Paris were adopted as the guide of our conduct during the war, with the sole exception of that relative to privateering. As the right to make use of privateers was one in which neutral nations had, as to the present war, no interest, as it was a right which the United States had refused to abandon, and which they remained at liberty to employ against us, as it was a right of which we were already in actual enjoyment, and which we could not be expected to renounce, *flagrante bello*, against an adversary possessing an overwhelming superiority of naval forces, it was reserved, with entire confidence that neutral nations could not fail to perceive that just reason existed for the reservation. Nor was this confidence misplaced; for the official documents published by the British Government, usually called Blue Books, contain the expression of the satisfaction of that Government with the conduct of the officials who conducted successfully the delicate business confided to their charge.

These solemn declarations of principle—this implied agreement between the confederacy and the two Powers just named—have been suffered to remain inoperative against the menaces and outrages on neutral rights committed by the United States with unceasing and progressing arrogance during the whole period of the war. Neutral Europe remained passive when the United States—with a naval force insufficient to blockade effectively the coast of a single State—proclaimed a paper blockade of thousands of miles of coast, extending from the Capes of the Chesapeake to those of Florida and to Key West, and encircling the Gulf of Mexico to the mouth of the Rio Grande. Compared with this monstrous pretension of the United States, the blockades known in history under the names of the Berlin and Milan Decrees, and the British Orders in Council, in the years 1806 and 1807, sink into insignificance. Yet those blockades were justified by the Powers that declared them on the sole ground that they were retaliatory; yet those blockades have since been condemned by the publicists of those very Powers as violations of international law; yet those blockades evoked angry remonstrances from neutral powers, amongst which the United States were the most conspicuous; yet those blockades became the chief cause of the war between Great Britain and the United States in 1812; yet those blockades were one of the principal motives that led to the declara-

tion of the Congress of Paris in 1856, in the fond hope of imposing an enduring check on the very abuse of maritime power which is now renewed by the United States in 1861 and 1862, under circumstances and with features of aggravated wrong without precedent in history.

The records of our State Department contain the evidence of the repeated and formal remonstrances made by this Government to neutral Powers against the recognition of this blockade. It has been shown by evidence not capable of contradiction, and which has been furnished in part by the officials of neutral nations, that the few ports of this confederacy, before which any naval forces at all have been stationed, have been invested so inefficiently that hundreds of entries have been effected into them since the declaration of the blockade; that our enemies have themselves admitted the inefficiency of their blockade in the most forcible manner, by repeated official complaints of the sale to us of goods contraband of war—a sale which could not possibly affect their interests if their pretended blockade was sufficient really to prevent access to our coast; that they have gone farther, and have alleged their inability to render their paper blockade effective, as the excuse for the odious barbarity of destroying the entrance to one of our harbors, by sinking vessels loaded with stone in the channel; that our commerce with foreign nations has been interrupted, not by the effective investment of our ports, or by the seizure of ships in the attempt to enter them, but by the capture on the high seas of neutral vessels by the cruisers of our enemies, whenever supposed to be bound to any point on our extensive coast, without inquiry whether a single blockading vessel was to be found at such point; that blockading vessels have left the ports at which they were stationed, for distant expeditions, have been absent for many days, and have returned without notice either of the cessation or renewal of the blockade. In a word, that every prescription of maritime law, and every right of neutral nations to trade with a belligerent under the sanction of principles heretofore universally respected, have been systematically and persistently violated by the United States. Neutral Europe has received our remonstrance, and has submitted in almost unbroken silence to all the wrongs that the United States have chosen to inflict on its commerce.

The cabinet of Great Britain, however, has not confined itself to such implied acquiescence in these breaches of international law as results from simple inaction, but has, in a published despatch of the Secretary of State for Foreign Affairs, assumed to make a change in the principle enunciated by the Congress of Paris, to which the faith of the British Government was considered to be pledged—a change too important and too prejudicial to the interests of the confederacy to be overlooked, and against which I have directed solemn protest to be made, after a vain attempt to obtain satisfactory explanation from the British Government. In a published despatch from her Majesty's Foreign Office to her Minister at Washington, under date of February 11th, 1862, occurs the following passage:

Her Majesty's Government, however, are of opinion that, assuming that the blockade was duly notified, and also that a number of ships are stationed and remain at the entrance of a port sufficient really to prevent access to it, *or to create an evident danger of entering it or leaving it*, and that these ships do not voluntarily permit ingress or egress, the fact that various ships may have successfully escaped through it (as in the particular instance here referred to) will not of itself prevent the blockade from being an effectual one by international law.

The words which I have italicized are an addition made by the British Government of its own authority to a principle, the exact terms of which were settled with deliberation by the common consent of civilized nations, and by implied convention with this Government, as already explained, and their effect is clearly to reopen, to the prejudice of the confederacy, one of the very disputed questions on the law of blockade,

VOL. III.—50 A

which the Congress of Paris professed to settle. The importance of this change is readily illustrated by taking one of our ports as an example. There is evident danger in entering the port of Wilmington, from the presence of a blockading force; and by this test the blockade is effective. "Access is not really prevented" by the blockading fleet to the same port; for steamers are continually arriving and departing; so that, tried by this test, the blockade is ineffective and invalid. The justice of our complaint on this point is so manifest, as to leave little room for doubt that further reflection will induce the British Government to give us such assurances as will efface the painful impressions that would result from its language if left unexplained.

From the foregoing remarks you will perceive that, during nearly two years of struggle, in which every energy of our country has been evoked for maintaining its very existence, the neutral nations of Europe have pursued a policy which, nominally impartial, has been practically most favorable to our enemies and most detrimental to us.

The exercise of the neutral right of refusing entry into their ports to prizes taken by both belligerents, was eminently hurtful to the confederacy. It was sternly asserted and maintained. The exercise of the neutral right of commerce with a belligerent whose ports are not blockaded by fleets sufficient really to prevent access to them, would have been eminently hurtful to the United States. It was complaisantly abandoned. The duty of neutral States to receive with cordiality and recognize with respect any new confederation that independent States may think proper to form, was too clear to admit of denial; but its postponement was obviously beneficial to the United States and detrimental to the confederacy. It was postponed.

In this review of our relations with the neutral nations of Europe, it has been my purpose to point out distinctly that this Government has no complaint to make that those nations declared their neutrality. It could neither expect nor desire more. The complaint is that the neutrality has been rather nominal than real, and that recognized neutral rights have been alternately asserted and waived in such manner as to bear with great severity on us, and to confer signal advantages on our enemy.

I have hitherto refrained from calling your attention to this condition of our relations with foreign Powers for various reasons. The chief of these was the fear that a statement of our last grounds of complaint against a course of policy so injurious to our interests, might be misconstrued into an appeal for aid. Unequal as we were in mere numbers and available resources to our enemies, we were conscious of powers of resistance in relation to which Europe was incredulous, and our remonstrances were therefore peculiarly liable to be misunderstood.

Proudly self-reliant, the confederacy, knowing full well the character of the contest into which it was forced, with full trust in the superior qualities of its population, the superior valor of its soldiers, the superior skill of its generals, and, above all, in the justice of its cause, felt it to be useless to appeal for the maintenance of its rights to other earthly aids, and it began and has continued this struggle with the calm confidence ever inspired in those who, with consciousness of right, can invoke the Divine blessing on their cause. This confidence has been so assured that we have never yielded to despondency under defeat, nor do we feel undue elation at the present brighter prospects of a successful issue to our contest. It is, therefore, because our just grounds of complaint can no longer be misinterpreted that I lay them clearly before you. It seems to me now proper to give you the information, and though no immediate results may be attained, it is well that truth should be preserved and recorded. It is well that those who are to follow us should understand the full nature and character of the tremendous conflict in which the blood of our people has been poured out like water, and in which we

have resisted, unaided, the shocks of hosts which would have sufficed to overthrow many of the Powers which, by their hesitation in according our rights as an independent nation, imply doubt of our ability to maintain our national existence. It may be, too, that if in future times unfriendly discussions not now anticipated shall unfortunately arise between this confederacy and some European Power, the recollection of our forbearance under the grievances which I have enumerated, may be evoked with happy influence in preventing any serious disturbance of peaceful relations.

It would not be proper to close my remarks on the subject of our foreign relations, without adverting to the fact that the correspondence between the cabinets of France, Great Britain, and Russia, recently published, indicates a gratifying advance in the appreciation by those Governments of the true interests of mankind, as involved in the war on this continent. It is to the enlightened ruler of the French nation that the public feeling of Europe is indebted for the first official exhibition of its sympathy for the sufferings endured by this people with so much heroism, of its horror at the awful carnage with which the progress of the war has been marked, and of its desire for a speedy peace. The clear and direct intimation contained in the language of the French note, that our ability to maintain our independence has been fully established, was not controverted by the answer of either of the cabinets to which it was addressed. It is, indeed, difficult to conceive a just ground for a longer delay on this subject, after reading the following statement of facts contained in the letter emanating from the Minister of his Imperial Majesty:

There has been established, from the very beginning of this war, an equilibrium of forces between the belligerents, which has since been almost constantly maintained, and after the spilling of so much blood, they are to-day, in this respect, in a situation which has not sensibly changed. Nothing authorizes the anticipation that more decisive military operations will shortly occur. According to the last advices received in Europe, the two armies were, on the contrary, in a condition which permitted neither to hope, within a short delay, advantages sufficiently marked to turn the balance definitely, and to accelerate the conclusion of peace.

As this Government has never professed the intention of conquering the United States, but has simply asserted its ability to defend itself against being conquered by that Power, we may safely conclude that the claims of this confederacy to its just place in the family of nations cannot long be withheld, after so frank and formal an admission of its capacity to cope, on equal terms, with its aggressive foes, and to maintain itself against their attempts to obtain decisive results by arms.

It is my painful duty again to inform you of the renewed examples of every conceivable atrocity committed by the armed forces of the United States at different points within the confederacy, and which must stamp indelible infamy, not only on the perpetrators, but on their superiors, who, having the power to check these outrages on humanity, numerous and well authenticated as they have been, have not yet, in a single instance of which I am aware, inflicted punishment on the wrong doers. Since my last communication to you, one General McNeil murdered seven prisoners of war in cold blood, and the demand for his punishment has remained unsatisfied. The Government of the United States, after promising examination and explanation in relation to the charges made against Gen. Benjamin F. Butler, has, by its subsequent silence after repeated efforts on my part to obtain some answer on the subject, not only admitted his guilt, but sanctioned it by acquiescence; and I have accordingly branded this criminal as an outlaw, and directed his execution in expiation of his crimes, if he should fall into the hands of any of our forces.

Recently I have received apparently authentic intelligence of another general, by the name of Milroy, who has issued orders in Western Virginia for the payment of money to him by the inhabitants, accompanied by

the most savage threats of shooting every recusant, besides burning his house, and threatening similar atrocities against any of our citizens who shall fail to betray their country by giving him prompt notice of the approach of any of our forces. And this subject has also been submitted to the superior military authorities of the United States, with but faint hope that they will evince any disapprobation of the act. Humanity shudders at the appalling atrocities which are being daily multiplied under the sanction of those who have obtained temporary possession of power in the United States, and who are fast making its once fair name a byword of reproach among civilized men. Not even the natural indignation inspired by this conduct should make us, however, so unjust as to attribute to the whole mass of the people who are subjected to the despotism that now reigns with unbridled license in the city of Washington a willing acquiescence in its conduct of the war. There must necessarily exist among our enemies very many, perhaps a majority, whose humanity recoils from all participation in such atrocities, but who cannot be held wholly guiltless while permitting their continuance without an effort at repression.

The public journals of the North have been received, containing a proclamation dated on the first day of the present month, signed by the President of the United States, in which he orders and declares all slaves within ten of the States of the confederacy to be free, except such as are found within certain districts now occupied in part by the armed forces of the enemy. We may well leave it to the instincts of that common humanity which a beneficent Creator has implanted in the breasts of our fellow men of all countries to pass judgment on a measure by which several millions of human beings of an inferior race—peaceful and contented laborers in their sphere—are doomed to extermination, while at the same time they are encouraged to a general assassination of their masters by the insidious recommendation “to abstain from violence unless in necessary self-defence.” Our own detestation of those who have attempted the most execrable measure recorded in the history of guilty man is tempered by profound contempt for the impotent rage which it discloses. So far as regards the action of this Government on such criminals as may attempt its execution, I confine myself to informing you that I shall—unless in your wisdom you deem some other course more expedient—deliver to the several State authorities all commissioned officers of the United States that may hereafter be captured by our forces in any of the States embraced in the proclamation, that they may be dealt with in accordance with the laws of those States providing for the punishment of criminals engaged in exciting servile insurrection. The enlisted soldiers I shall continue to treat as unwilling instruments in the commission of these crimes, and shall direct their discharge and return to their homes on the proper and usual parole.

In its political aspect this measure possesses great significance, and to it in this light I invite your attention. It affords to our whole people the complete and crowning proof of the true nature of the designs of the party which elevated to power the present occupant of the Presidential chair at Washington, and which sought to conceal its purposes by every variety of artful device, and by the perfidious use of the most solemn and repeated pledges on every possible occasion. I extract, in this connection, as a single example, the following declaration, made by President Lincoln under the solemnity of his oath as Chief Magistrate of the United States, on the 4th of March, 1861:

Apprehension seems to exist among the people of the Southern States that by the accession of a Republican Administration their property and their peace and personal security are to be endangered. There has never been any reasonable cause for such apprehensions. Indeed, the most ample evidence to the contrary has all the while existed and been open to their inspection. It is found in nearly all the public speeches of him who now addresses you. I do but quote from one of those speeches when I declare that I have no purpose, directly or indirectly, to interfere with the institu-

tion of slavery in the States where it exists. I believe I have no lawful right to do so, and I have no inclination to do so. Those who nominated and elected me, did so with full knowledge that I had made this and many similar declarations, and had never recanted them. And more than this, they placed in the platform for my acceptance, and as a law to themselves and to me, the clear and emphatic resolution which I now read:

Resolved, That the maintenance inviolate of the rights of the States, and especially the right of each State to order and control its own domestic institutions according to its own judgment exclusively, is essential to that balance of power, on which the perfection and endurance of our political fabric depend, and we denounce the lawless invasion by armed force of the soil of any State or Territory, no matter under what pretext, as among the gravest crimes.

Nor was this declaration of the want of power or disposition to interfere with our social system confined to a state of peace. Both before and after the actual commencement of hostilities, the President of the United States repeated in formal official communications to the cabinets of Great Britain and France that he was utterly without constitutional power to do the act which he has just committed, and that in no possible event, whether the secession of these States resulted in the establishment of a separate confederacy or in the restoration of the Union, was there any authority by virtue of which he could either restore a disaffected State to the Union by force of arms or make any change in any of its institutions. I refer especially for verification of this assertion to the despatches addressed by the Secretary of State of the United States, under direction of the President, to the Ministers of the United States at London and Paris, under date of the 10th and 22d of April, 1861.

The people of this confederacy, then, cannot fail to receive this proclamation as the fullest vindication of their own sagacity in foreseeing the uses to which the dominant party in the United States intended from the beginning to apply their power; nor can they cease to remember with devout thankfulness that it is to their own vigilance in resisting the first stealthy progress of approaching despotism that they owe their escape from consequences now apparent to the most sceptical.

This proclamation will have another salutary effect in calming the fears of those who have constantly evinced the apprehension that this war might end by some reconstruction of the old Union, or some renewal of close political relations with the United States. These fears have never been shared by me, nor have I ever been able to perceive on what basis they could rest. But the proclamation affords the fullest guarantees of the impossibility of such a result. It has established a state of things which can lead to but one of three possible consequences—the extermination of the slaves, the exile of the whole white population of the confederacy, or absolute and total separation of these States from the United States. This proclamation is also an authentic statement by the Government of the United States of its inability to subjugate the South by force of arms, and as such must be accepted by neutral nations, which can no longer find any justification in withholding our just claims to formal recognition. It is also in effect an intimation to the people of the North that they must prepare to submit to a separation, now become inevitable; for that people are too acute not to understand that a restitution of the Union has been rendered forever impossible by the adoption of a measure which, from its very nature, neither admits of retraction nor can coexist with union.

Among the subjects to which your attention will be specially devoted during the present session, you will, no doubt, deem the adoption of some comprehensive system of finance as being of paramount importance. The increasing public debt, the great augmentation in the volume of the currency, with its necessary concomitant of extravagant prices for all articles of consumption, the want of revenue from a taxation adequate to support the public credit, all unite in admonishing us that energetic and wise legislation alone can prevent serious embarrassment in our monetary affairs. It is my conviction that the people of the confederacy

will freely meet taxation on a scale adequate to the maintenance of the public credit and the support of their Government. When each family is sending forth its most precious ones to meet exposure in camp and death in battle, what ground can there be to doubt the disposition to devote a tithe of its income, and more, if more be necessary, to provide the Government with means for insuring the comfort of its defenders? If our enemies submit to an excise on every commodity they produce, and to the daily presence of the tax gatherer, with no higher motive than the hope of success in their wicked designs against us, the suggestion of an unwillingness on the part of this people to submit to the taxation necessary for the success of their defence is an imputation on their patriotism that few will be disposed to make and that none can justify.

The legislation of your last session, intended to hasten the funding of outstanding Treasury notes, has proved beneficial, as shown by the returns annexed to the report of the Secretary of the Treasury; but it was neither sufficiently prompt nor far reaching to meet the full extent of the evil. The passage of some enactment carrying still farther the policy of that law, by fixing a limitation not later than the 1st of July next to the delay allowed for funding the notes issued prior to the 1st of December, 1862, will, in the opinion of the Secretary, have the effect to withdraw from circulation nearly the entire sum issued previous to the last-named date. If to this be added a revenue from adequate taxation, and appropriation of bonds guaranteed proportionately by the seven per cents, as has already been generously proposed by some of them in enactments spontaneously adopted, there is little doubt that we shall see our finances restored to a sound and satisfactory condition, our circulation relieved of the redundancy now productive of so many mischiefs, and our credit placed on such a basis as to relieve us from further anxiety relative to our resources for the prosecution of the war.

It is true that at its close our debt will be large; but it will be due to our own people, and neither the interest nor the capital will be exported to distant countries, impoverishing ours for their benefit.

On the return of peace the untold wealth which will spring from our soil will render the burden of taxation far less onerous than is now supposed, especially if we take into consideration that we shall then be free from the large and steady drain of our substance, to which we were subjected in the late Union, through the instrumentality of sectional legislation and protective tariffs. I recommend to your earnest attention the whole report of the Secretary of the Treasury on this important subject, and trust that your legislation on it will be delayed no longer than may be required to enable your wisdom to devise the proper measures for insuring the accomplishment of the objects proposed.

The operations of the War Department have been in the main satisfactory. In the report of the Secretary, herewith submitted, will be found a summary of many memorable successes. They are with justice ascribed in large measure to the reorganization and reinforcement of our armies under the operation of the enactments for conscription. The wisdom and efficacy of these acts have been approved by results, and the like spirit of unity, endurance, and self-devotion of the people which has hitherto sustained their action, must be relied on to assure their enforcement under the continuing necessities of our situation. The recommendations of the Secretary to this effect are tempered by suggestions for their amelioration, and the subject deserves the consideration of Congress.

For the perfection of our military organization no appropriate means should be rejected, and on this subject the opinions of the Secretary merit early attention. It is gratifying to perceive that, under all the efforts and sacrifices of war, the power and means of the confederacy for its successful prosecution are increasing. Dependence on foreign supplies is to be deplored, and should as far as practicable be obviated by the development and employment of internal resour-

ces. The peculiar circumstances of the country, however, render this difficult, and require extraordinary encouragements and facilities to be granted by the Government.

The embarrassments resulting from the limited capacity of the railroads to afford transportation, and the impossibility of otherwise collecting and distributing the necessary supplies for the armies, render necessary the control of the roads under some general supervision, and resort to the power of impressment under military exigencies. While such powers have to be exercised, they should be guarded by judicious provisions against perversion or abuse, and be, as recommended by the Secretary, under due regulation of law.

I specially recommend in this connection some revision of the exemption law of last session. Serious complaints have reached me of the inequality of its operation from eminent and patriotic citizens whose opinions merit great consideration, and I trust that some means will be devised for leaving at home a sufficient local police, without making discriminations, always to be deprecated, between different classes of our citizens.

Our relations with the Indians generally continue to be friendly. A portion of the Cherokee people have assumed an attitude hostile to the Confederate Government; but it is gratifying to be able to state that the mass of intelligence and worth in that nation have remained true and loyal to their treaty engagements. With this exception there have been no important instances of dissatisfaction among any of the friendly nations and tribes. Dissatisfaction recently manifested itself among certain portions of them; but this resulted from a misapprehension of the intentions of the Government in their behalf. This has been removed, and no further difficulty is anticipated.

The report of the Secretary of the Navy, herewith transmitted, exhibits the progress made in this branch of the public service since your adjournment, as well as its present condition. The details embraced in it are of such a nature as to render it, in my opinion, incompatible with the public interests that they should be published with this message. I therefore confine myself to inviting your attention to the information therein contained.

The report of the Postmaster-General shows that during the first postal year under our Government, terminating on the 30th of June last, our revenues were in excess of those received by the former Government in its last postal year, while the expenses were greatly decreased. There is still, however, a considerable deficit in the revenues of the Department, as compared with its expenses, and, although the grants already made from the general treasury will suffice to cover all the liabilities to the close of the fiscal year ending on the 30th of June next, I recommend some legislation, if any can be constitutionally devised, for aiding the revenues of that Department during the ensuing fiscal year, in order to avoid too great a reduction of postal facilities. Your attention is also invited to numerous other improvements in the service recommended in the report, and for which legislation is required.

I recommend to the Congress to devise a proper mode of relief to those of our citizens whose property has been destroyed by order of the Government in pursuance of a policy adopted as a means of national defence. It is true that full indemnity cannot now be made; but some measure of relief is due to those patriotic citizens who have borne private loss for the public good, whose property in effect has been taken for public use, though not directly appropriated. Our Government, born of the spirit of freedom, and of the equality and independence of the States, could not have survived a selfish or jealous disposition, making each only careful of its own interest or safety.

The fate of the confederacy, under the blessing of Divine Providence, depends upon the harmony, energy, and unity of the States. It especially devolves on you, their representatives, as far as practicable, to re-

form abuses, to correct errors, to cultivate fraternity, and to sustain in the people a just confidence in the Government of their choice. To that confidence and to the unity and self-sacrificing patriotism hitherto displayed is due the success which has marked the unequal contest, and has brought our country into a condition at the present time such as the most sanguine would not have ventured to predict at the commencement of our struggle. Our armies are larger, better disciplined, and more thoroughly armed and equipped than at any previous period of the war; the energies of a whole nation, devoted to the single object of success in this war, have accomplished marvels, and many of our trials have by a beneficent Providence been converted into blessings. The magnitude of the perils which we encountered have developed the true qualities and illustrated the heroic character of our people, thus gaining for the confederacy from its birth a just appreciation from the other nations of the earth. The injuries resulting from the interruption of foreign commerce have received compensation by the developments of our internal resources. Cannon crown our fortresses that were cast from the proceeds of mines opened and furnaces built during the war. Our mountain caves yield much of the nitre for the manufacture of powder, and promise increase of product. From our own founderies and laboratories, from our own armories and workshops, we derive, in a great measure, the warlike material, the ordnance and ordnance stores which are expended so profusely in the numerous and desperate engagements that rapidly succeed each other. Cotton and woollen fabrics, shoes and harness, wagons and gun carriages are produced in daily increasing quantities, by the factories springing into existence. Our fields, no longer whitened by cotton that cannot be exported, are devoted to the production of cereals and the growth of stock formerly purchased with the proceeds of cotton. In the homes of our noble and devoted women—without whose sublime sacrifices our success would have been impossible—the noise of the loom and the spinning wheel may be heard throughout the land.

With hearts swelling with gratitude, let us, then, join in returning thanks to God, and in beseeching the continuance of His protecting care over our cause, and the restoration of peace, with its manifold blessings, to our beloved country.

JEFFERSON DAVIS.

RICHMOND, *January 12th*, 1863.

Message of JEFFERSON DAVIS, at the Second Session of the Confederate Congress, in 1863.

To the Senate and House of Representatives of the Confederate States:

The necessity for legislative action, arising out of the important events that have marked the interval since your adjournment, and my desire to have the aid of your counsel on other matters of grave public interest, render your presence at this time more than ordinarily welcome. Indeed, but for serious obstacles to convoking you in extraordinary session, and the necessity for my own temporary absence from the seat of government, I would have invited you to an earlier meeting than that fixed at the date of your adjournment.

Grave reverses befell our arms soon after your departure from Richmond. Early in July our strongholds at Vicksburg and Port Hudson, together with their entire garrisons, capitulated to the combined land and naval forces of the enemy. The important interior position of Jackson next fell into their temporary possession. Our unsuccessful assault on the post at Helena was followed, at a later period, by the invasion of Arkansas; and the retreat of our army from Little Rock gave to the enemy the control of the important valley in which it is situated.

The resolute spirit of the people soon rose superior to the temporary despondency naturally resulting from these reverses. The gallant troops so ably commanded in the States beyond the Mississippi inflicted repeated

defeats on the invading armies in Louisiana and on the coast of Texas. Detachments of troops and active bodies of partisans kept up so effective a war on the Mississippi river as practically to destroy its value as an avenue of commerce.

The determined and successful defence of Charleston against the joint land and naval operations of the enemy afforded an inspiring example of our ability to repel the attacks even of the ironclad fleet, on which they chiefly rely, while on the Northern frontier our success was still more marked.

The able commander who conducted the campaign in Virginia determined to meet the threatened advance on Richmond—for which the enemy had made long and costly preparations—by forcing their armies to cross the Potomac and fight in defence of their own capital and homes. Transferring the battle field to their own soil, he succeeded in compelling their rapid retreat from Virginia, and in the hard-fought battle of Gettysburg inflicted such severity of punishment as disabled them from early renewal of the campaign as originally projected. Unfortunately, the communications on which our general relied for receiving his supplies of munitions were interrupted by extraordinary floods, which so swelled the Potomac as to render impassable the fords by which his advance had been made, and he was thus forced to a withdrawal, which was conducted with deliberation, after securing large trains of captured supplies, and with a constant but unaccepted tender of battle. On more than one occasion the enemy has since made demonstrations of a purpose to advance, invariably followed by a precipitate retreat to intrenched lines on the approach of our forces.

The effective check thus opposed to the advance of invaders at all points was such as to afford hope of their early expulsion from portions of the territory previously occupied by them, when the country was painfully surprised by the intelligence that the officer in command of Cumberland Gap had surrendered that important and easily defensible pass without firing a shot, upon the summons of a force still believed to have been inadequate to its reduction, and when reinforcements were within supporting distance and had been ordered to his aid. The entire garrison, including the commander, being still held as prisoners by the enemy, I am unable to suggest any explanation of this disaster, which laid open Eastern Tennessee and South-western Virginia to hostile operations, and broke the line of communication between the seat of government and Middle Tennessee. This easy success of the enemy was followed by an advance of Gen. Rosecrans into Georgia, and our army evacuated Chattanooga and availed itself of the opportunity thus afforded of winning on the field of Chickamauga one of the most brilliant and decisive victories of the war. This signal defeat of Gen. Rosecrans was followed by his retreat into Chattanooga, where his imperilled position had the immediate effect of relieving the pressure of invasion at other points, forcing the concentration, for his relief, of large bodies of troops withdrawn from the armies in the Mississippi Valley and in Northern Virginia. The combined forces thus accumulated against us in Tennessee so greatly outnumbered our army as to encourage the enemy to attack. After a long and severe battle, in which great carnage was inflicted on him, some of our troops inexplicably abandoned positions of great strength, and by a disorderly retreat compelled the commander to withdraw the forces elsewhere successful, and finally to retire with his whole army to a position some twenty or thirty miles to the rear. It is believed that if the troops who yielded to the assault had fought with the valor which they had displayed on previous occasions, and which was manifested in this battle on the other part of the lines, the enemy would have been repulsed with very great slaughter, and our country would have escaped the misfortune and the army the mortification of the first defeat that has resulted from misconduct by the troops. In the mean time the army of General Burnside was driven from all its field positions in Eastern Tennessee, and forced to

retreat into its intrenchments at Knoxville, where for some weeks it was threatened with capture by the forces under General Longstreet. No information has reached me of the final result of the operations of our commander, though intelligence has arrived of his withdrawal from that place.

While, therefore, our success in driving the enemy from our soil has not equalled the expectations confidently entertained at the commencement of the campaign, his further progress has been checked. If we are forced to regret losses in Tennessee and Arkansas, we are not without ground for congratulation on successes in Louisiana and Texas. On the sea coast he is exhausted by vain efforts to capture our ports, while on the Northern frontier he has in turn felt the pressure and dreads the renewal of invasion. The indomitable courage and perseverance of the people in the defence of their homes have been nobly attested by the unanimity with which the Legislatures of Virginia, North Carolina, and Georgia have recently given expression to the popular sentiment; and like manifestations may be anticipated from all the States. Whatever obstinacy may be displayed by the enemy in his desperate sacrifices of money, life, and liberty, in the hope of enslaving us, the experience of mankind has too conclusively shown the superior endurance of those who fight for home, liberty, and independence, to permit any doubt of the result.

I regret to inform you that there has been no improvement in the state of our relations with foreign countries since my message in January last. On the contrary, there has been a still greater divergence in the conduct of European nations from that practical impartiality which alone deserves the name of neutrality, and their action in some cases has assumed a character positively unfriendly.

You have heretofore been informed that, by common understanding, the initiative in all action touching the contest on this continent had been left by foreign Powers to the two great maritime nations of Western Europe, and that the Governments of these two nations had agreed to take no measures without previous concert. The result of these arrangements has therefore placed it in the power of either France or England to obstruct at pleasure the recognition to which the confederacy is justly entitled, or even to prolong the continuance of hostilities on this side of the Atlantic, if the policy of either could be promoted by the postponement of peace. Each, too, thus became possessed of great influence in so shaping the general exercise of neutral rights in Europe, as to render them subservient to the purpose of aiding one of the belligerents to the detriment of the other. I referred, at your last session, to some of the leading points in the course pursued by professed neutrals, which betrayed a partisan leaning to the side of our enemies; but events have since occurred which induce me to renew the subject in greater detail than was then deemed necessary. In calling to your attention the action of these Governments, I shall refer to the documents appended to President Lincoln's messages, and to their own correspondence, as disclosing the true nature of their policy and the motives which guided it. To this course no exception can be taken, inasmuch as our attention has been invited to those sources of information by their official publication.

In May, 1861, the Government of her Britannic Majesty informed our enemies that it had not "allowed any other than an intermediate position on the part of the Southern States," and assured them "that the sympathies of this country (Great Britain) were rather with the North than with the South."

On the 1st day of June, 1861, the British Government interdicted the use of its ports "to armed ships and privateers, both of the United States and the so-called Confederate States," with their prizes. The Secretary of State of the United States fully appreciated the character and motive of this interdiction, when he observed to Lord Lyons, who communicated it, "that this measure, and that of the same character which had been adopted by France, would probably prove a death blow to Southern privateering."

On the 12th of June, 1861, the United States Minister in London informed her Majesty's Secretary for Foreign Affairs, that the fact of his having held interviews with the commissioners of this Government had given "great dissatisfaction," and, that a protraction of this relation would be viewed by the United States "as hostile in spirit, and to require some corresponding action accordingly." In response to this intimation, her Majesty's Secretary assured the Minister that "he had no expectation of seeing them any more."

By proclamations, issued on the 19th and 27th of April, 1861, President Lincoln proclaimed the blockade of the entire coast of the confederacy, extending from the Potomac to the Rio Grande, embracing, according to the returns of the United States coast survey, a coast line of three thousand five hundred and forty-nine statute miles, on which the number of rivers, bays, harbors, inlets, sounds, and passes, is one hundred and eighty-nine. The navy possessed by the United States for enforcing this blockade was stated, in the reports communicated by President Lincoln to the Congress of the United States, to consist of twenty-four vessels of all classes in commission, of which half were in distant seas. The absurdity of the pretension of such a blockade, in the face of the authoritative declaration of the maritime rights of neutrals made at Paris, in 1856, was so glaring that the attempt was regarded as an experiment on the forbearance of neutral powers, which they would promptly resist. This conclusion was justified by the fact that the Governments of France and Great Britain determined that it was necessary for their interests to obtain from both belligerents "securities concerning the proper treatment of neutrals." In the instructions which "confided the negotiation on this matter" to the British Consul at Charleston, he was informed that "the most perfect accord on this question exists between her Majesty's Government and the Government of the Emperor of the French," and these instructions were accompanied by a copy of a despatch of the British Foreign Office of the 18th May, 1861, stating that there was no difference of opinion between Great Britain and the United States, as to the validity of the principles enunciated in the fourth article of the declaration of Paris, in reference to blockades. Your predecessors of the Provisional Congress had, therefore, no difficulty in proclaiming, nor I in approving, the resolutions which abandoned, in favor of Great Britain and France, our right to capture enemy's property when covered by the flags of those Powers. The "securities" desired by those Governments were understood by us to be required from both belligerents. Neutrals were exposed on our part to the exercise of the belligerent right of capturing their vessels when conveying the property of our enemies. They were exposed, on the part of the United States, to interruption in their unquestioned right of trading with us, by the declaration of the paper blockade above referred to. We had no reason to doubt the good faith of the proposal made to us, nor to suspect that we were to be the only parties bound by its acceptance. It is true that the instructions of the neutral Powers informed their agents that it was "essential under present circumstances that they should act with great caution, in order to avoid raising the question of the recognition of the new confederation," and that the understanding on the subject did not assume, for that reason, the shape of a formal convention. But it was not deemed just by us to decline the arrangement on this ground, as little more than ninety days had elapsed since the arrival of our commissioners in Europe, and neutral nations were fairly entitled to a reasonable delay in acting on a subject of so much importance, and which, from their point of view, presented difficulties that we, perhaps, did not fully appreciate. Certain it is that the action of this Government on the occasion, and the faithful performance of its own engagements, have been such as to entitle it to expect on the part of those who sought in their own interests a mutual understanding, the most scrupulous adherence to their own promises. I feel constrained to inform you that in

this expectation we have been disappointed, and that not only have the Governments which entered into these arrangements yielded to the prohibition against commerce with us, which has been dictated by the United States, in defiance of the law of nations, but that this concession of their neutral rights to our detriment, has, on more than one occasion, been claimed, in intercourse with our enemies, as an evidence of friendly feeling toward them. A few extracts from the correspondence of her Majesty's Chief Secretary of State for Foreign Affairs will suffice to show marked encouragement to the United States to persevere in its paper blockade, and unmistakable intimations that her Majesty's Government would not contest its validity.

On the 21st of May, 1861, Earl Russell pointed out to the United States Minister in London, that "the blockade might no doubt be made effective, considering the small number of harbors on the Southern coast, even though the extent of three thousand miles were comprehended in terms of that blockade."

On the 14th of January, 1862, her Majesty's Minister in Washington communicated to his Government, that in extenuation of the barbarous attempt to destroy the port of Charleston by sinking a stone fleet in the harbor, Mr. Seward had explained "that the Government of the United States had, last spring, with a navy very little prepared for so extensive an operation, undertaken to blockade upward of three thousand miles of coast. The Secretary of the Navy had reported that he could stop up the 'large holes' by means of his ships, but that he could not stop up the 'small ones.' It has been found necessary, therefore, to close some of the numerous small inlets by sinking vessels in the channel."

On the 6th of May, 1862, so far from claiming the right of British subjects as neutrals to trade with us as belligerents, and to disregard the blockade on the ground of this explicit confession by our enemy of his inability to render it effective, her Majesty's Secretary of State for Foreign Affairs claimed credit with the United States for friendly action in respecting it. His lordship stated that "the United States Government, on the allegation of a rebellion pervading from nine to eleven States of the Union, have now, for more than twelve months, endeavored to maintain a blockade of three thousand miles of coast. This blockade, kept up irregularly, but, when enforced, enforced severely, has seriously injured the trade and manufactures of the United Kingdom. Thousands are now obliged to resort to the poor rates for subsistence, owing to this blockade, yet her Majesty's Government have never sought to take advantage of the obvious imperfections of this blockade, in order to declare it ineffective. They have, to the loss and detriment of the British nation, scrupulously observed the duties of Great Britain toward a friendly state."

Again, on the 22d of September, 1862, the same noble earl asserted that the United States were "very far indeed" from being in "a condition to ask other nations to assume that every part of the coasts of the so-styled Confederate States is effectively blockaded."

When, in view of these facts, of the obligations of the British nation to adhere to the pledge made by their Government at Paris, in 1856, and renewed to this confederacy in 1861, and of these repeated and explicit avowals of the imperfection, irregularity, and inefficiency of the pretended blockade of our coast, I directed our Commissioner at London to call upon the British Government to redeem its promise, and to withhold its moral aid and sanction from the flagrant violation of public law committed by our enemies, we were informed that her Majesty's Government could not regard the blockade of the Southern ports as having been otherwise than "practically effective," in February, 1862, and that "the manner in which it has since been enforced gives to neutral Governments no excuse for asserting that the blockade has not been effectually maintained." We were further informed, when we insisted that, by the terms of agreement, no blockade was to be considered effective unless "suffi-

cient really to prevent access to our coast," that the declaration of Paris was, in truth, directed against blockades not sustained by any actual force, or sustained by a notoriously inadequate force, such as the occasional appearance of a man-of-war in the offing, or the like.

It was impossible that this mode of construing an agreement, so as to make its terms mean almost the reverse of what they plainly conveyed, could be considered otherwise than as a notification of the refusal of the British Government to remain bound by its agreement, or longer to respect those articles of the declaration of Paris which had been repeatedly denounced by British statesmen, and had been characterized by Earl Russell as "very imprudent" and "most unsatisfactory."

If any doubt remained of the motives by which the British Ministry have been actuated in their conduct, it would be completely dissipated by the distinct avowals and explanations contained in the published speech recently made by her Majesty's Secretary for Foreign Affairs. In commenting on the remonstrances of this Government against the countenance given to an ineffective blockade, the following language is used: "It is said we have, contrary to the declarations of Paris, contrary to international law, permitted the blockade of three thousand miles of American coast. It is quite true we did so, and the presumable cause of complaint is quite true, that, although the blockade is kept up by a sufficient number of ships, yet these ships were sent into the United States navy in a hurry, and are ill fitted for the purpose, and did not keep up, so completely and effectively as was required, an effective blockade."

This unequivocal confession of violation, both of agreement with us and of international law, is defended on grounds the validity of which we submit with confidence to the candid judgment of mankind.

These grounds are thus stated: "Still, looking at the law of nations, it was a blockade we, as a great belligerent Power, in former times, should have acknowledged. We, ourselves, had a blockade of upward of two thousand miles, and it did seem to me that we were bound in justice to the Federal States of America to acknowledge that blockade. But there was another reason which weighed with me. Our people were suffering severely for the want of that material which was the main staff of their industry, and it was a question of self-interest whether we should not break the blockade. But, in my opinion, the men of England would have been forever infamous if, for the sake of their own interest, they had violated the law of nations, and made war in conjunction with these slaveholding States of America against the Federal States."

In the second of these reasons our rights are not involved; although it may be permitted to observe that the conduct of Governments has not heretofore, to my knowledge, been guided by the principle that it is infamous to assert their rights whenever the invasion of those rights creates severe suffering among their people, and injuriously affects great interests. But the intimation that relations with these States would be discreditable, because they are slaveholding, would probably have been omitted if the official personage who has published it to the world had remembered that these States were, when colonies, made slaveholding by the direct exercise of the power of Great Britain, whose dependencies they were, and whose interests in the slave trade were then supposed to require that her colonies should be made slaveholding.

But the other ground stated is of a very grave character. It asserts that a violation of the law of nations by Great Britain in 1807, when that Government declared a paper blockade of two thousand miles of coast (a violation then defended by her courts and jurists on the sole ground that her action was retaliatory), affords a justification for a similar outrage on neutral rights by the United States in 1861, for which no palliation can be suggested, and that Great Britain "is bound in justice to the Federal States," to make return for the

war waged against her by the United States, in resistance of her illegal blockade of 1807, by an acquiescence in the Federal illegal blockade of 1861. The most alarming feature in this statement is its admission of a just claim on the part of the United States to require of Great Britain, during this war, a disregard of the recognized principles of modern public law, and of her own compacts, whenever any questionable conduct of Great Britain "in former times" can be cited as a precedent. It is not inconsistent with respect and admiration for the great people whose Government have given us this warning, to suggest that their history, like that of mankind in general, offers exceptional instances of indefensible conduct "in former times," and we may well deny the morality of violating recent engagements through deference to the evil precedents of the past.

After defending in the manner just stated the course of the British Government on the subject of the blockade, her Majesty's Foreign Secretary takes care to leave no doubt of the further purpose of the British Government to prevent our purchase of vessels in Great Britain, while supplying our enemies with rifles and other munitions of war, and states the intention to apply to Parliament for the furtherance of this design. He gives to the United States the assurance that he will do in their favor not only "everything that the law of nations requires, everything that the present Foreign Enlistment act requires," but that he will ask the sanction of Parliament "to further measures that her Majesty's ministers may still add." This language is so unmistakably an official exposition of the policy adopted by the British Government in relation to our affairs, that the duty imposed on me by the Constitution, of giving you, from time to time, "information of the state of the confederacy," would not have been performed if I had failed to place it distinctly before you.

I refer you for fuller details on this whole subject to the correspondence of the State Department, which accompanies this Message. The facts which I have briefly narrated are, I trust, sufficient to enable you to appreciate the true nature of the neutrality professed in this war. It is not in my power to apprise you to what extent the Government of France shares the views so unreservedly avowed by that of Great Britain, no published correspondence of the French Government on the subject having been received. No public protest or opposition, however, has been made by his Imperial Majesty against the prohibition to trade with us, imposed on French citizens by the paper blockade of the United States, although I have reason to believe that an unsuccessful attempt was made on his part to secure the assent of the British Government to a course of action more consonant with the dictates of public law, and with the demands of justice toward us.

The partiality of her Majesty's Government in favor of our enemies has been further evinced in the marked difference of its conduct on the subject of the purchase of supplies by the two belligerents. This difference has been conspicuous since the very commencement of the war. As early as the 1st May, 1861, the British Minister in Washington was informed by the Secretary of State of the United States, that he had sent agents to England, and that others would go to France, to purchase arms, and this fact was communicated to the British Foreign Office, which interposed no objection. Yet in October of the same year, Earl Russell entertained the complaint of the United States Minister in London, that the Confederate States were importing contraband of war from the island of Nassau, directed inquiry into the matter, and obtained a report from the authorities of the island denying the allegations, which report was enclosed to Mr. Adams, and received by him as satisfactory evidence to dissipate "the suspicion naturally thrown upon the authorities of Nassau by that unwarrantable act." So, too, when the Confederate Government purchased in Great Britain, as a neutral country (and with strict observance both of the law of nations and the municipal law of Great Britain), vessels which were subsequently armed and commissioned as vessels of war after they had

been far removed from English waters, the British Government, in violation of its own laws, and in deference to the importunate demands of the United States, made an ineffectual attempt to seize one vessel, and did actually seize and detain another which touched at the island of Nassau, on her way to a Confederate port, and subjected her to an unfounded prosecution, at the very time when cargoes of munitions of war were being openly shipped from British ports to New York, to be used in warfare against us. Even now the public journals bring intelligence that the British Government has ordered the seizure, in a British port, of two vessels, on the suspicion that they may have been sold to this Government, and that they may be hereafter armed and equipped in our service, while British subjects are engaged in Ireland by tens of thousands to proceed to the United States for warfare against the confederacy, in defiance both of the law of nations and of the express terms of the British statutes, and are transported in British ships, without an effort of concealment, to the ports of the United States, there to be armed with rifles imported from Great Britain, and to be employed against our people in a war of conquest. No royal prerogative is invoked, no executive interference is interposed against this flagrant breach of municipal and international law, on the part of our enemies, while strained constructions are placed on existing statutes, new enactments proposed, and questionable expedients devised, for precluding the possibility of purchase by this Government of vessels that are useless for belligerent purposes, unless hereafter armed and equipped outside of the neutral jurisdiction of Great Britain.

For nearly three years this Government has exercised unquestioned jurisdiction over many millions of willing and united people. It has met and defeated vast armies of invaders, who have in vain sought its subversion. Supported by the confidence and affection of its citizens, the confederacy has lacked no element which distinguishes an independent nation, according to the principles of public law. Its legislative, executive, and judicial departments, each in its sphere, have performed their appropriate functions with a regularity as undisturbed as in a time of profound peace, and the whole energies of the people have been developed in the organization of vast armies, while their rights and liberties have rested secure under the protection of the courts of justice. This confederacy is either independent or it is a dependency of the United States, for no other earthly power claims the right to govern it. Without one historic fact on which the pretension can rest, without one line or word of treaty or covenant, which can give color to title, the United States have asserted, and the British Government has chosen to concede, that these sovereign States are dependencies of the Government which is administered at Washington. Great Britain has accordingly entertained with that Government the closest and most intimate relations, while refusing on its demand ordinary amicable intercourse with us, and has, under arrangements made with the other nations of Europe, not only denied our just claim of admission into the family of nations, but interposed a passive though effectual bar to the acknowledgment of our rights by other Powers. So soon as it had become apparent, by the declarations of the British ministers, in the debates of the British Parliament in July last, that her Majesty's Government was determined to persist indefinitely in a course of policy which, under professions of neutrality, had become subservient to the designs of our enemy, I felt it my duty to recall the commissioners formerly accredited to that court, and the correspondence on the subject is submitted to you.

It is due to you and to our country that this full statement should be made of the just grounds which exist for dissatisfaction with the conduct of the British Government. I am well aware that we are unfortunately without adequate remedy for the injustice under which we have suffered at the hands of a powerful nation, at a juncture when our entire resources are absorbed in the defence of our lives, liberties, and inde-

pendence, against an enemy possessed of greatly superior numbers and material resources. Claiming no favor, desiring no aid, conscious of our own ability to defend our own rights against the utmost efforts of an infuriated foe, we had thought it not extravagant to expect that assistance would be withheld from our enemies, and that the conduct of foreign nations would be marked by a genuine impartiality between the belligerents. It was not supposed that a professed neutrality would be so conducted as to justify the Foreign Secretary of the British nation in explaining, in correspondence with our enemies, how "the impartial observance of neutral obligations by her Majesty's Government has thus been exceedingly advantageous to the cause of the more powerful of the two contending parties." The British Government may deem this war a favorable occasion for establishing, by the temporary sacrifice of their neutral rights, a precedent which shall justify the future exercise of those extreme belligerent pretensions that their naval power renders so formidable. The opportunity for obtaining the tacit assent of European Governments to a line of conduct which ignores the obligations of the declarations of Paris, and treats that instrument rather as a theoretical exposition of principles than a binding agreement, may be considered by the British ministry as justifying them in seeking a great advantage for their own country at the expense of ours. But we cannot permit, without protest, the assertion that international law or morals regard as "impartial neutrality" conduct avowed to be "exceedingly advantageous" to one of the belligerents.

I have stated that we are without adequate remedy against the injustice under which we suffer. There are but two measures that seem applicable to the present condition of our relations with neutral Powers. One is, to imitate the wrong of which we complain, to retaliate by the declaration of a paper blockade of the coast of the United States, and to capture all neutral vessels trading with their ports, that our cruisers can intercept on the high seas. This measure I cannot recommend. It is true that, in so doing, we should but follow the precedents set by Great Britain and France in the Berlin and Milan decrees, and the British orders in council at the beginning of the present century. But it must be remembered that we, ourselves, protested against those very measures as signal violations of the law of nations, and declared the attempts to excuse them, on the ground of their being retaliatory, utterly insignificant. Those blockades are now quoted by writers on public law, as a standing reproach on the good name of the nations who were betrayed by temporary exasperation into wrong doing, and ought to be regarded rather as errors to be avoided than as examples to be followed.

The other measure is not open to this objection. The second article of the declaration of Paris, which provides "that the neutral flag covers enemy's goods, with the exception of contraband of war," was a new concession by belligerents in favor of neutrals, and not simply the enunciation of an acknowledged preëxisting rule, like the fourth article, which referred to blockades. To this concession we bound ourselves by the convention with Great Britain and France, which took the shape of the resolutions adopted by your predecessors on the 13th of August, 1861. The consideration tendered us for that concession has been withheld. We have, therefore, the undeniable right to refuse longer to remain bound by a compact which the other party refuses to fulfil. But we should not forget that war is but temporary, and that we desire that peace shall be permanent. The future policy of the confederacy must ever be to uphold neutral rights to their full extent. The principles of the declaration of Paris commend themselves to our judgment as more just, more humane, and more consonant with modern civilization than those belligerent pretensions which great naval Powers have heretofore sought to introduce into the maritime code. To forego our undeniable right to the exercise of those pretensions is a policy higher, worthier of us and our cause, than to re-

voke our adhesion to principles that we approve. Let our hope for redress rest rather on a returning sense of justice which cannot fail to awaken a great people to the consciousness that the war in which we are engaged ought rather to be made a reason for forbearance of advantage than an occasion for the unfriendly conduct of which we make just complaint.

The events of the last year have produced important changes in the condition of our southern neighbor. The occupation of the capital of Mexico by the French army, and the establishment of a provisional government followed by a radical change in the constitution of the country, have excited lively interest. Although preferring our own government and institutions to those of other countries, we can have no disposition to contest the exercise by them of the same right of self-government which we assert for ourselves. If the Mexican people prefer a monarchy to a republic, it is our plain duty cheerfully to acquiesce in their decision, and to evince a sincere and friendly interest in their prosperity. If, however, the Mexicans prefer maintaining their former institutions, we have no reason to apprehend any obstacle to the free exercise of their choice. The Emperor of the French has solemnly disclaimed any purpose to impose on Mexico a form of government not acceptable to the nation; and the eminent personage to whom the throne has been tendered declines its acceptance, unless the offer be sanctioned by the suffrages of the people. In either event, therefore, we may confidently expect the continuance of those peaceful relations which have been maintained on the frontier, and even a large development of the commerce already existing to the mutual advantage of the two countries.

It has been found necessary since your adjournment to take action on the subject of certain foreign consuls within the confederacy. The nature of this action, and the reasons on which it was based, are so fully exhibited in the correspondence of the State Department, which is transmitted to you, that no additional comment is required.

In connection with this subject of our relations with foreign countries, it is deemed opportune to communicate my views in reference to the treaties made by the Government of the United States at a date anterior to our separation, and which were consequently binding on us as well as on foreign Powers when the separation took effect. It was partly with a view to entering into such arrangements as the change in our government had made necessary, that we felt it our duty to send commissioners abroad, for the purpose of entering into the negotiations proper to fix the relative rights and obligations of the parties to those treaties. As this tender on our part has been declined, as foreign nations have refused us the benefit of the treaties to which we were parties, they certainly have ceased to be binding on us, and, in my opinion, our relations with European nations are, therefore, now controlled exclusively by the general rules of the laws of nations. It is proper to add that these remarks are intended to apply solely to treaty obligations toward foreign Governments, and have no reference to the rights of individuals.

The state of the public finances is such as to demand your earliest and most earnest attention. I need hardly say that a prompt and efficacious remedy for the present condition of the currency is necessary to the successful performance of the functions of government. Fortunately, the resources of our country are so ample, and the spirit of our people so devoted to its cause, that they are ready to make any necessary contribution. Relief is thus entirely within our reach, if we have the wisdom to legislate in such manner as to render available the means at our disposal.

At the commencement of the war, we were far from anticipating the magnitude and duration of the struggle in which we were engaged. The most sagacious foresight could not have predicted that the passions of the Northern people would lead them blindly to the sacrifice of life, treasure, and liberty, in so vain a hope as that of subjugating thirteen independent States, in-

habited by many millions of people, whose birthright of freedom is dearer to them than life. A long exemption from direct taxation by the General Government, has created an aversion to its raising revenue by any other means than by duties on imports, and it was supposed that these duties would be ample for current peace expenditures, while the means for conducting the war could be raised almost exclusively by the use of the public credit.

The first action of the Provisional Congress was, therefore, confined to passing a tariff law, and to raising a sum of fifteen millions of dollars by loan, with a pledge of a small export duty on cotton to provide for the redemption of the debt.

At its second session, war was declared to exist between the confederacy and the United States, and provision was made for the issue of twenty millions of dollars in Treasury notes, and for borrowing thirty millions of dollars on bonds. The tariff was revised, and preparatory measures taken to enable Congress to levy internal taxation at its succeeding session. These laws were passed in May, and the States of Virginia, North Carolina, Tennessee, and Arkansas having joined the confederacy, the Congress adjourned to meet in the city of Richmond, in the following month of July.

Prior to the assembling of your predecessors in Richmond at their third session, near the end of July, 1861, the President of the United States had developed in his message the purpose "to make the contest a short and decisive one," and had called on Congress for four hundred thousand men and four hundred millions of dollars. The Congress had exceeded the executive recommendation, and had authorized the levy of half a million of volunteers, besides largely increasing the regular land and naval forces of the United States. The necessity thus first became urgent that a financial scheme should be devised on a basis sufficiently large for the vast proportions of the contest with which we were threatened. Knowing that the struggle, instead of being "short and decisive," would be indefinite in duration, and could only end when the United States should awaken from their delusion of conquest, a permanent system was required, fully adapted to the great exigencies before us.

The plan devised by Congress at that time was based on the theory of issuing Treasury notes, convertible at the pleasure of the holder into eight per cent. bonds, the interest of which was to be payable in coin, and it was correctly assumed that any tendency to depreciation that might arise from over issue of the currency, would be checked by the constant exercise of the holder's right to fund the notes at a liberal interest, payable in specie. This system depended for success on the continued ability of Government to pay the interest in specie; and means were, therefore, provided for that purpose in the law authorizing the issues. An internal tax, termed a war tax, was levied, the proceeds of which, together with the revenue from imports, were deemed sufficient for the object designed. This scheme required for its operation that our commerce with foreign nations should not be suspended. It was not to be anticipated that such suspension would be permitted otherwise than by an effective blockade; and it was absurd to suppose that a blockade "sufficient really to prevent access" to our entire coast could be maintained.

We had the means, therefore (if neutral nations had not combined to aid our enemies by the sanction of an illegal prohibition on their commerce), to secure the receipt into the Treasury of coin sufficient to pay the interest on the bonds, and thus maintain the Treasury notes at rates nearly equal to par in specie. So long as the interest continued to be thus paid with the reserve of coin preëxisting in our country, experience sustained the expectations of those who devised the system. Thus, on the 1st of the following December, coin had only reached a premium of about twenty per cent., although it had already become apparent that the commerce of the country was threatened with permanent suspension by reason of the conduct of neu-

tral nations, and that the necessary result must be the exhaustion of our specie reserve. Wheat, in the beginning of the year 1862, was selling at one dollar and thirty cents per bushel, not exceeding, therefore, its average price in time of peace. The other agricultural products of the country were at similar moderate rates, thus indicating that there was no excess of circulation, and that the rate of premium on specie was heightened by the exceptional causes which tended to its exhaustion without the possibility of renewing the supply.

This review of the policy of your predecessors is given in justice to them, and it exhibits the condition of the finances at the date when the permanent Government was organized.

In the mean time, the popular aversion to internal taxation by the General Government had influenced the legislation of the several States, and in only three of them—South Carolina, Mississippi, and Texas—were the taxes actually collected from the people. The quotas devolving upon the remaining States had been raised by the issue of bonds and State Treasury notes, and the public debt of the country was thus actually increased instead of being diminished by the taxation imposed by Congress.

Neither at the first nor second session of the present Congress were means provided by taxation for maintaining the Government, the legislation being confined to authorizing further sales of bonds and issues of Treasury notes. Although repeated efforts were made to frame a proper system of taxation, you were confronted with an obstacle which did not exist for your predecessors, and which created grave embarrassment in devising any scheme of taxation. About two thirds of the entire taxable property of the Confederate States consists of lands and slaves. The general power of taxation vested in Congress by the provisional constitution (which was to be only temporary in its operation) was not restricted by any other condition than that "all duties, imposts, and excises should be uniform throughout the States of the confederacy." But the permanent constitution, sanctioning the principle that taxation and representation ought to rest on the same basis, specially provides that "representatives and direct taxes shall be apportioned among the several States according to their respective numbers, which shall be determined by adding to the whole number of free persons—including those bound to service for a term of years, and excluding Indians not taxed—three fifths of all slaves."

It was further ordered that a census should be made within three years after the first meeting of the Congress, and that "no capitation or other direct tax shall be laid, unless in proportion to the census or enumeration hereinbefore directed to be taken."

It is plain that, under these provisions, capitation and direct taxes must be levied in proportion to the census, when made. It is also plain that the duty is imposed on Congress to provide for making a census prior to the 22d of February, 1865. It may further be stated that, according to the received construction of the Constitution of the United States (a construction acquiesced in for upward of sixty years), taxes on lands and slaves are direct taxes, and the conclusion seems necessarily that, in repeating, without modification, in our constitution, this language of the Constitution of 1787, our convention intended to attach to it the meaning which had been sanctioned by long and uninterrupted acquiescence. So long as there seemed to be a probability of being able to carry out these provisions of the constitution in their entirety, and in conformity with the intentions of its authors, there was an obvious difficulty in framing any system of taxation. A law which should exempt from the burden two thirds of the property of the country, would be as unfair to the owners of the remaining third as it would be inadequate to meet the requirements of the public service. The urgency of the need was such, however, that, after very great embarrassment, and more than three months of assiduous labor, you succeeded in framing the law of the 24th April, 1863, by

which you sought to reach, so far as was practicable, every resource of the country, except the capital invested in real estate and slaves, and by means of an income tax and a tax in kind on the produce of the soil, as well as by licenses on business occupations and professions, to command resources sufficient for the wants of the country. But a very large proportion of these resources could only be made available at the close of the present and the commencement of the ensuing year, while the intervening exigencies permitted no delay. In this state of affairs, superinduced almost unavoidably by the fortunes of the war in which we are engaged, the issues of Treasury notes have been increased until the currency in circulation amounts to more than six hundred millions of dollars, or more than threefold the amount required by the business of the country.

I need not enlarge upon the evil effects of this condition of things. They are unfortunately but too apparent. In addition to the difficulty presented to the necessary operations of the Government and the efficient conduct of the war, the most deplorable of all its results is undoubtedly its corrupting influence on the morals of the people. The possession of large amounts of Treasury notes has naturally led to a desire for investment, and with a constantly increasing volume of currency, there has been an equally constant increase of price in all objects of investment. The effect has stimulated purchase by the apparent certainty of profit, and a spirit of speculation has thus been fostered, which has so debasing an influence and such ruinous consequences that it is our highest duty to remove the cause, and no measures directed to that end can be too prompt or too stringent.

Reverting to the constitutional provisions already cited, the question recurs whether it be possible to execute the duty of apportioning taxation in accordance with the census ordered to be made as a basis. So long as this appeared to be practicable, none can deny the propriety of your course in abstaining from the imposition of direct taxes, till you could exercise the power in the precise mode pointed out by the terms of the fundamental law. But it is obvious that there are many duties imposed by the constitution which depend for their fulfilment on the undisturbed possession of the territory within which they are to be performed. The same instrument which orders a census to be made in all the States imposes the duty on the confederacy "to guarantee to every State a republican form of government." It enjoins on us "to protect each State from invasion," and while declaring that its great objects and purposes are "to establish justice, insure domestic tranquillity, and secure the blessings of liberty to ourselves and our posterity," it confers the means and thereby imposes on us the paramount duty of effecting its intent, by "laying and collecting taxes, duties, imposts, and excises necessary to pay the debts, provide for the common defence, and carry on the Government of the Confederate States."

None would pretend that the constitution is violated because, by reason of the presence of hostile armies, we are unable to guarantee a republican form of Government to those States or portions of States now temporarily held by the enemy, and as little justice would there be in imputing blame for the failure to make the census, when that failure is attributable to causes not foreseen by the authors of the constitution, and beyond our control. The general intent of our constitutional charter is unquestionably that the property of the country is to be taxed in order to raise revenue for the common defence, and the special mode provided for levying this tax is impracticable from unforeseen causes. It is, in my judgment, our primary duty to execute the general intent expressed by the terms of the instrument which we have sworn to obey, and we cannot excuse ourselves for the failure to fulfil this obligation on the ground that we are unable to perform it in the precise mode pointed out. Whenever it shall be possible to execute our duty in all its parts, we must do so in exact compliance with the whole letter and spirit of the constitution. Until that period shall

arrive, we must execute so much of it as our condition renders practicable. Whenever the withdrawal of the enemy shall place it in our power to make a census and apportionment of direct taxes, any other mode of levying them will be contrary to the will of the law-giver, and incompatible with our obligation to obey that will; until that period, the alternative left is to obey the paramount precept, and to execute it according to the only other rule provided, which is to "make the tax uniform throughout the Confederate States."

The considerations just presented are greatly enforced by the reflection that any attempt to apportion taxes among States, some of which are wholly or partially in the occupation of hostile forces, would subvert the whole intention of the framers of the constitution, and be productive of the most revolting injustice, instead of that just correlation between taxation and representation which it was their purpose to secure. With large portions of some of the States occupied by the enemy, what justice would there be in imposing on the remainder the whole amount of the taxation of the entire State in proportion to its representation? What else would this be in effect than to increase the burden of those who are the heaviest sufferers by the war, and to make our own inability to protect them from invasion, as we are required to do by the constitution, the ground for adding to their losses by an attempted adherence to the letter, in violation of the spirit of that instrument? No such purpose could have been entertained and no such result contemplated by the framers of the constitution. It may add weight to these considerations if we reflect, that although the constitution provided that it should go into operation with a representation temporarily distributed among the States, it expressly ordains, after providing for a census within three years, that this temporary distribution of representative power is to endure "until such enumeration shall be made." Would any one argue that, because the census cannot be made within the fixed period, the Government must, at the expiration of that period, perish for want of a representative body? In any aspect in which the subject can be viewed, I am led to the conclusion already announced, and which is understood to be in accordance with a vote taken in one or both houses at your last session. I shall, therefore, until we are able to pursue the precise mode required by the constitution, deem it my duty to approve any law levying the taxation which you are bound to impose for the defence of the country, in any other practicable mode which shall distribute the burden uniformly and impartially on the whole property of the people.

In your former legislation you have sought to avoid the increase in the volume of notes in circulation by offering inducements to voluntary funding. The measures adopted for that purpose have been but partially successful, and the evil has now reached such a magnitude as to permit no other remedy than the compulsory reduction of the currency to the amount required by the business of the country. This reduction should be accompanied by a pledge that, under no stress of circumstances, will that amount be exceeded. No possible mode of using the credit of the Government can be so disastrous as one which disturbs the basis of all exchanges, renders impossible all calculations of future values, augments, in constantly increasing proportions, the price of all commodities, and so depreciates all fixed wages, salaries, and incomes as to render them inadequate to bare subsistence. If to these be added the still more fatal influence on the morals and character of the people, to which I have already adverted, I am persuaded you will concur in the conclusion that an inflexible adherence to a limitation of the currency at a fixed sum is an indispensable element of any system of finance now to be adopted.

The holders of the currency now outstanding can only be protected in the recovery of their just claims by substituting for their notes some other security. If the currency is not greatly and promptly reduced, the present scale of inflated prices will not only continue to exist, but by the very fact of the large amounts thus made requisite in the conduct of the war, those

prices will reach rates still more extravagant, and the whole system will fall under its own weight, thus rendering the redemption of the debt impossible, and destroying its whole value in the hands of the holder. If, on the contrary, a funded debt, with interest secured by adequate taxation, can be substituted for the outstanding currency, its entire amount will be made available to the holder, and the Government will be in a condition enabling it, beyond the reach of any probable contingency, to prosecute the war to a successful issue. It is therefore demanded, as well by the interest of the creditor as of the country at large, that the evidences of the public debt now outstanding in the shape of Treasury notes be converted into bonds bearing adequate interest, with a provision for taxation sufficient to insure punctual payment and final redemption of the whole debt.

The report of the Secretary of the Treasury presents the outlines of a system which, in conjunction with existing legislation, is intended to secure the several objects of a reduction of the circulation within fixed, reasonable limits; of providing for the future wants of the Government; of furnishing security for the punctual payment of interest and final extinction of the principal of the public debt, and of placing the whole business of the country on a basis as near a specie standard as is possible during the continuance of the war. I earnestly recommend it to your consideration, and that no delay be permitted to intervene before your action on this vital subject. I trust that it will be suffered to engross your attention until you shall have disposed of it in the manner best adapted to attain the important results which your country anticipates from your legislation.

It may be added that, in considering this subject, the people ought steadily to keep in view that the Government, in contracting debt, is but their agent; that its debt is their debt. As the currency is held exclusively by ourselves, it is obvious that, if each person held Treasury notes in exact proportion to the valuation of his whole means, each would in fact owe himself the amount of the notes held by him, and, were it possible to distribute the currency among the people in this exact proportion, a tax levied on the currency alone, to an amount sufficient to reduce it to its proper limits, would afford the best of all remedies. Under such circumstances, the notes remaining in the hands of each holder after the payment of his tax, would be worth quite as much as the whole sum previously held, for it would purchase at least an equal amount of commodities. This result cannot be perfectly attained by any device of legislation, but it can be approximated by taxation. A tax on all values has for its effect, not only to impose a due share of the burden on the noteholder, but to force those who have few or none of the notes to part with their possessions to those who hold the notes in excess, in order to obtain the means of satisfying the demands of the tax gatherer. This is the only mode by which it is practicable to make all contribute as equally as possible in the burden which all are bound to share, and it is for this reason that taxation adequate to the public exigencies, under our present circumstances, must be the basis of any funding system or other remedy for restoring stability to our finances.

To the report of the Secretary of War you are referred for details relative to the condition of the army, and the measures of legislation required for maintaining its efficiency, recruiting its numbers, and furnishing the supplies necessary for its support.

Though we have lost many of the best of our soldiers and most patriotic of our citizens—the sad but unavoidable result of the battles and toils of such a campaign as that which will render the year 1863 ever memorable in our annals—the army is believed to be, in all respects, in better condition than at any previous period of the war. Our gallant defenders, now veterans, familiar with danger, hardened by exposure, and confident in themselves and their officers, endure privations with cheerful fortitude and welcome battle with alacrity. The officers, by experience in field service

and the action of examining boards in relieving the incompetent, are now greatly more efficient than at the commencement of the war. The assertion is believed to be fully justified, that, regarded as a whole, for character, valor, efficiency, and patriotic devotion, our army has not been equalled by any like number of troops in the history of the war.

In view of the large conscription recently ordered by the enemy, and their subsequent call for volunteers, to be followed, if ineffectual, by a still further draft, we are admonished that no effort must be spared to add largely to our effective force as promptly as possible. The sources of supply are to be found by restoring to the army all who are improperly absent, putting an end to substitution, modifying the exemption law, restricting details, and placing in the ranks such of the able-bodied men now employed as wagoners, nurses, cooks, and other employees as are doing service for which the negroes may be found competent.

The act of the 16th of April, 1862, provides "that persons not liable for duty may be received as substitutes for those who are, under such regulations as may be prescribed by the Secretary of War." The policy of granting this privilege has not been sustained by experience. Not only has the numerical strength of the army been seriously impaired by the frequent desertions for which substitutes have become notorious, but dissatisfaction has been excited among those who have been unable or unwilling to avail themselves of the opportunity thus afforded of avoiding the military service of their country.

I fully concur in the opinion expressed by the Secretary, that there is no ground for the objection that a new provision to include those who furnished substitutes under the former call would be a breach of contract. To accept a substitute was to confer a privilege, not to enter into a contract, and whenever the substitute is rendered liable to conscription, it would seem to follow that the principal, whose place he had taken, should respond for him, as the Government had received no consideration for his exemption. Where, however, the new provision of law would fail to embrace a substitute now in the ranks, there appears, if the principal should again be conscribed, to be an equitable ground for compensation to the conscript, who then would have added to the service a soldier not otherwise liable to enrolment.

On the subject of exemptions, it is believed that abuses cannot be checked unless the system is placed on a basis entirely different from that now provided by law. The object of your legislation has been, not to confer privileges on classes, but to exonerate from military duty such number of persons skilled in the various trades, professions, and mechanical pursuits, as could render more valuable services to their country by laboring in their present occupation than by going into the ranks of the army. The policy is unquestionable, but the result would, it is thought, be better obtained by enrolling all such persons, and allowing details to be made of the number necessary to meet the wants of the country. Considerable numbers are believed to be now exempted from the military service who are not needful to the public in their civil vocations.

Certain duties are now performed throughout the country by details from the army which could be as well executed by persons above the present conscript age. An extension of the limit, so as to embrace persons over forty-five years, and physically fit for service, in guarding posts, railroads, and bridges, in apprehending deserters, and, where practicable, assuming the place of younger men detailed for duty with the nitre, ordnance, commissary and quartermasters' bureaus of the War Department, would, it is hoped, add largely to the effective force in the field, without an undue burden on the population.

If to the above measures be added a law to enlarge the policy of the act of the 21st April, 1862, so as to enable the Department to replace not only enlisted cooks, but wagoners and other employees in the army, by negroes, it is hoped that the ranks of the army will

be so strengthened for the ensuing campaign as to put at defiance the utmost efforts of the enemy.

In order to maintain, unimpaired, the existing organization of the army until the close of the war, your legislation contemplated a frequent supply of recruits, and it was expected that before the expiration of the three years for which the men were enrolled, under act of 16th April, 1862, the majority of men in each company would consist of those who joined it at different dates subsequent to the original muster of the company into service, and that the discharge of those who had completed their term would at no time be sufficient to leave the company with a less number than is required to enable it to retain its organization. The difficulty of obtaining recruits from certain localities, and the large number of exemptions from military service granted by different laws, have prevented sufficient accessions in many of the companies to preserve their organization after the discharge of the original members. The advantage of retaining tried and well approved officers, and of mingling recruits with experienced soldiers, is so obvious, and the policy of such a course is so clearly indicated, that it is not deemed necessary to point out the evil consequences which would result from the destruction of the old organizations, or to dwell upon the benefits to be secured from filling up the veteran companies as long before the discharge of the early members as may be possible. In the cases where it may be found impracticable to maintain regiments in sufficient strength to justify the retention of the present organization, economy and efficiency would be promoted by consolidation and reorganization. This would involve the necessity of disbanding a part of the officers, and making regulations for securing the most judicious selection of those who are retained, while least wounding the feelings of those who are discharged.

Experience has shown the necessity for further legislation in relation to the horses of the cavalry. Many men lose their horses by casualties of service, which are not included in the provisions made to compensate the owner for the loss, and it may thus not unfrequently happen that the most efficient troopers, without fault of their own—indeed, it may be because of their zeal and activity—are lost to the cavalry service.

It would also seem proper that the Government should have complete control over every horse mustered into the service, with the limitation that the owner should not be deprived of his horse except upon due compensation being made therefor. Otherwise, mounted men may not keep horses fit for the service; and the question whether they should serve mounted or on foot would depend, not upon the qualifications of the men, but upon the fact of their having horses.

Some provision is deemed requisite to correct the evils arising from the long-continued absence of commissioned officers. Where it is without sufficient cause, it would seem but just that the commission should be thereby vacated.

Where it results from capture by the enemy, which, under their barbarous refusal to exchange prisoners of war, may be regarded as absence for an indefinite time, there is a necessity to supply their places in their respective commands. This might be done by temporary appointments, to endure only until the return of the officers regularly commissioned. Where it results from permanent disability, incurred in the line of their duty, it would be proper to retire them, and fill the vacancies according to established mode. I would also suggest the organization of an invalid corps, and that the retired officers be transferred to it. Such a corps, it is thought, could be made useful in various employments for which efficient officers and troops are now detached.

An organization of the general staff of the army would be highly conducive to the efficiency of that most important branch of the service. The plan adopted for the military establishment furnishes a model for the staff of the provisional army, if it be deemed advisable to retain the distinction; but I re-

commend to your consideration the propriety of abolishing it, and providing for the organization of the several staff corps in such number and with such rank as will meet all the wants of the service. To secure the requisite ability for the more important positions, it will be necessary to provide for officers of higher rank than is now authorized for these corps. To give to the officers the proper relation and intelligence in their respective corps, and to preserve in the chief of each useful influence and control over his subordinates, there should be no gradation on the basis of the rank of the general with whom they might be serving by appointment. To the personal staff of a general it would seem proper to give a grade corresponding with his rank, and the number might be fixed to correspond with his command. To avoid the consequence of discharge upon a change of duty, the variable portion of the personal staff might be taken from the line of the army, and allowed to retain their line commissions.

The disordered condition of the currency, to which I have already alluded, has imposed upon the Government a system of supplying the wants of the army, which is so unequal in its operation, vexatious to the producer, and injurious to the industrial interests, and productive of such discontent among the people, as only to be justified by the existence of an absolute necessity. The report of the Secretary on this point establishes conclusively that the necessity which has forced the bureaux of supply to provide for the army by impressment, has resulted from the impossibility of purchase by contract, or in the open market, except at such rapidly increased rates as would have rendered the appropriations inadequate to the wants of the army. Indeed, it is believed that the temptation to hoard supplies for the higher prices which could be anticipated with certainty, has been checked mainly by the fear of the operations of the impressment law; and that commodities have been offered in the markets principally to escape impressment and obtain higher rates than those fixed by appraisement. The complaints against this vicious system have been well founded, but the true cause of the evil has been misapprehended. The remedy is to be found, not in a change of the impressment law, but in the restoration of the currency to such a basis as will enable the Department to purchase necessary supplies in the open market, and thus render impressment a rare and exceptional process.

The same remedy will effect the result universally desired, of an augmentation of the pay of the army. The proposals made at your previous sessions to increase the pay of the soldier by an additional amount of Treasury notes, would have conferred little benefit on him; but a radical reform of the currency will restore the pay to a value approximating that which it originally had, and materially improve his condition.

The reports from the ordnance and mining bureaux are very gratifying, and the extension of our means of supply of arms and munitions of war from our home resources, have been such as to insure our ability soon to become mainly, if not entirely, independent of supplies from foreign countries. The establishments for the casting of guns and projectiles, for the manufacture of small arms and of gunpowder, for the supply of nitre from artificial nitre beds, and mining operations generally, have been so distributed through the country as to place our resources beyond the reach of partial disasters.

The recommendations of the Secretary of War on other points are minutely detailed in his report, which is submitted to you, and extending, as they do, to almost every branch of the service, merit careful consideration.

I regret to inform you that the enemy have returned to the barbarous policy with which they inaugurated the war, and that the exchange of prisoners has been for some time suspended. The correspondence of the Commissioners of Exchange is submitted to you by the Secretary of War, and it has already been published for the information of all now suffering useless imprison-

ment. The conduct of the authorities of the United States has been consistently perfidious on this subject. An agreement for exchange, in the incipency of the war, had just been concluded, when the fall of Fort Donelson reversed the previous state of things, and gave them an excess of prisoners. The agreement was immediately repudiated by them, and so remained till the fortune of war again placed us in possession of the larger number. A new cartel was then made, and under it, for many months, we restored to them many thousands of prisoners in excess of those whom they held for exchange, and encampments of the surplus paroled prisoners delivered up by us were established in the United States, where the men were enabled to receive the comforts and solace of constant communication with their homes and families. In July last the fortunes of war again favored the enemy, and they were enabled to exchange for duty the men previously delivered to them, against those captured and paroled at Vicksburg and Port Hudson. The prisoners taken at Gettysburg, however, remained in their hands, and should have been returned to our lines on parole, to await exchange. Instead of executing a duty imposed by the plainest dictates of justice and good faith, pretexts were instantly sought for holding them in permanent captivity. General orders rapidly succeeded each other from the bureau at Washington, placing new constructions on an agreement which had given rise to no dispute while we retained the advantage in the number of prisoners. With a disregard of honorable obligations, almost unexampled, the enemy did not hesitate, in addition to retaining the prisoners captured by them, to declare null the paroles given by the prisoners captured by us in the same series of engagements, and liberated on condition of not again serving until exchanged. They have since openly insisted on treating the paroles given by their own soldiers as invalid, and those of our soldiers, given under precisely similar circumstances, as binding. A succession of similar unjust pretensions has been set up in a correspondence tediously prolonged, and every device employed to cover the disregard of an obligation which, between belligerent nations, is only to be enforced by a sense of honor.

No further comment is needed on this subject; but it may be permitted to direct your special attention to the close of the correspondence submitted to you, from which you will perceive that the final proposal made by the enemy, in settlement of all disputes under the cartel, is, that we should liberate all prisoners held by us, without offering to release from captivity any of those held by them.

In the mean time a systematic and concerted effort has been made to quiet the complaints in the United States of those relatives and friends of the prisoners in our hands, who are unable to understand why the cartel is not executed in their favor, by the groundless assertion that we are the parties who refuse compliance. Attempts are also made to shield themselves from the execration excited by their own odious treatment of our officers and soldiers now captive in their hands, by misstatements, such as that the prisoners held by us are deprived of food. To this last accusation the conclusive answer has been made that, in accordance with our law and the general orders of the Department, the rations of the prisons are precisely the same, in quantity and quality, as those served out to our own gallant soldiers in the field, and which have been found sufficient to support them in their arduous campaigns, while it is not pretended by the enemy that they treat prisoners by the same generous rule. By an indulgence, perhaps unprecedented, we have even allowed the prisoners in our hands to be supplied by their friends at home with comforts not enjoyed by the men who captured them in battle. In contrast to this treatment, the most revolting inhumanity has characterized the conduct of the United States toward prisoners held by them. One prominent fact, which admits no denial or palliation, must suffice as a test. The officers of our army, natives of Southern and semitropical climates, and unprepared for the cold of a

Northern winter, have been conveyed, for imprisonment, during the rigors of the present season, to the most northern and exposed situation that could be selected by the enemy. There, beyond the reach of comforts, and even of news from home and family, exposed to the piercing cold of the Northern lakes, they are held by men who cannot be ignorant of, even if they do not design, the probable result. How many of our unfortunate friends and comrades, who have passed unscathed through numerous battles, will perish on Johnson's Island, under the cruel trial to which they are subjected, none but the Omniscient can foretell. That they will endure this barbarous treatment with the same stern fortitude that they have ever evinced in their country's service, we cannot doubt. But who can be found to believe the assertion that it is our refusal to execute the cartel, and not the malignity of the foe, which has caused the infliction of such intolerable cruelty on our own loved and honored defenders?

Regular and punctual communication with the Trans-Mississippi is so obstructed as to render difficult a compliance with much of the legislation vesting authority in the executive branch of the Government. To supply vacancies in office; to exercise discretion on certain matters connected with the military organizations; to control the distribution of the funds collected from taxation, or remitted from the Treasury; to carry on the operations of the Post Office Department, and other like duties, require, under the constitution and existing laws, the action of the President and heads of departments. The necessities of the military service frequently forbid delay, and some legislation is required, providing for the exercise of temporary authority, until regular action can be had at the seat of government. I would suggest, especially in the Post Office Department, that an assistant be provided in the States beyond the Mississippi, with authority in the head of that Department to vest in his assistant all such powers now exercised by the Postmaster-General as may be requisite for provisional control of the funds of the Department in those States, and their application to the payment of mail contractors; for superintendence of the local post offices, and the contracts for carrying the mail; for the temporary employment of proper persons to fulfil the duties of postmasters and contractors in urgent cases, until appointments can be made, and for other like purposes. Without some legislative provision on the subject, there is serious risk of the destruction of the mail service, by reason of the delays and hardships suffered by contractors under the present system, which requires constant reference to Richmond of their accounts, as well as the returns of the local postmasters, before they can receive payment for services rendered. Like provision is also necessary in the Treasury Department; while, for military affairs, it would seem to be sufficient to authorize the President and Secretary of War to delegate to the commanding general so much of the discretionary powers vested in them by law as the exigencies of the service shall require.

The report of the Secretary of the Navy gives in detail the operations of that Department since January last, embracing information of the disposition and employment of the vessels, officers, and men, and the construction of vessels at Richmond, Wilmington, Charleston, Savannah, Mobile, Selma, and on the rivers Roanoke, Neuse, Pedee, Chattahoochee, and Tombigbee; the accumulation of ship timber and supplies, and the manufacture of ordnance, ordnance stores, and equipments. The foundries and workshops have been greatly improved, and their capacity to supply all demands for heavy ordnance for coast and harbor defences is only limited by our deficiency in the requisite skilled labor. The want of such labor and of seamen seriously affects the operations of the Department.

The skill, courage, and activity of our cruisers at sea cannot be too highly commended. They have inflicted heavy losses on the enemy without suffering a single disaster, and have seriously damaged the ship-

ping interests of the United States by compelling their foreign commerce to seek the protection of neutral flags.

Your attention is invited to the suggestions of the report on the subject of supplying seamen for the service, and of the provisions of the law in relation to the volunteer navy.

The Postmaster-General reports the receipts of that Department for the fiscal year ending the 30th June last, to have been \$3,337,853.01, and the expenditures for the same period \$2,662,804.67. The statement thus exhibits an excess of receipts amounting to \$675,048.44, instead of a deficiency of more than a million of dollars, as was the case in the preceding fiscal year. It is gratifying to perceive that the Department has thus been made self-sustaining, in accordance with sound principle, and with the express requirements of the constitution that its expenses should be paid out of its own revenues after the 1st March, 1863.

The report gives a full and satisfactory account of the operations of the Post Office Department for the last year, and explains the measures adopted for giving more certainty and regularity to the service in the States beyond the Mississippi, and on which reliance is placed for obviating the difficulties heretofore encountered in that service.

The settlement of the accounts of the Department is greatly delayed by reason of the inability of the First Auditor to perform all the duties now imposed on him by law. The accounts of the Departments of State, of the Treasury, of the Navy, and of Justice, are all supervised by that officer, and more than suffice to occupy his whole time. The necessity for a Third Auditor to examine and settle the accounts of a department so extensive as that of the Post Office, appears urgent, and his recommendation on that subject meets my concurrence.

I cannot close this Message without again adverting to the savage ferocity which still marks the conduct of the enemy in the prosecution of the war. After their repulse from the defences before Charleston, they first sought revenge by an abortive attempt to destroy the city with an incendiary composition, thrown by improved artillery from a distance of four miles. Failing in this, they changed their missiles, but fortunately have thus far succeeded only in killing two women in the city. Their commanders, Butler, McNeil, and Turchin, whose horrible barbarities have made their names widely notorious and everywhere execrable, are still honored and cherished by the authorities at Washington. The first named, after having been withdrawn from the scenes of his cruelties against women and prisoners of war (in reluctant concession to the demands of outraged humanity in Europe), has just been put in a new command at Norfolk, where helpless women and children are again placed at his mercy.

Nor has less unrelenting warfare been waged by these pretended friends of human rights and liberties against the unfortunate negroes. Wherever the enemy have been able to gain access, they have forced into the ranks of their army every able-bodied man that they could seize, and have either left the aged, the women, and the children to perish by starvation, or have gathered them into camps, where they have been wasted by a frightful mortality. Without clothing or shelter, often without food, incapable, without supervision, of taking the most ordinary precautions against disease, these helpless dependants, accustomed to have their wants supplied by the foresight of their masters, are being rapidly exterminated wherever brought in contact with the invaders. By the Northern man, on whose deep-rooted prejudices no kindly restraining influence is exercised, they are treated with aversion and neglect. There is little hazard in predicting that, in all localities where the enemy have gained a temporary foothold, the negroes, who, under our care, increased sixfold in number since their importation into the colonies of Great Britain, will have been reduced by mortality, during the war, to not more than one half their previous number.

Information on this subject is derived not only from

our own observation, and from the reports of the negroes who succeeded in escaping from the enemy, but full confirmation is afforded by statements published in the Northern journals by humane persons engaged in making appeals to the charitable for aid in preventing the ravages of disease, exposure, and starvation among the negro women and children who are crowded into encampments.

The frontier of our country bears witness to the alacrity and efficiency with which the general orders of the enemy have been executed in the devastation of the farms, the destruction of the agricultural implements, the burning of the houses, and the plunder of everything movable. Its whole aspect is a comment on the ethics of the general order issued by the United States on the 24th of April, 1863, comprising "instructions for the government of armies of the United States in the field," and of which the following is an example:

"Military necessity admits of all direct destruction of life or limb of armed enemies, and of other persons whose destruction is incidentally unavoidable in the armed contests of the war; it allows of the capturing of every armed enemy, and of every enemy of importance to the hostile government, or of peculiar danger to the captor; it allows of all destruction of property and obstructions of the ways and channels of traffic, travel, or communication, and of all withholding of sustenance or means of life from the enemy; of the appropriation of whatever an enemy's country affords necessary for the subsistence and safety of the army, and of such deception as does not involve the breaking of good faith, either positively pledged regarding agreements entered into during the war, or supposed by the modern law of war to exist. Men who take up arms against one another in public war, do not cease on this account to be moral beings, responsible to one another and to God."

The striking contrast to these teachings and practices, presented by our army when invading Pennsylvania, illustrates the moral character of our people. Though their forbearance may have been unmerited and unappreciated by the enemy, it was imposed by their own self-respect, which forbade their degenerating from Christian warriors into plundering ruffians, assailing the property, lives, and honor of helpless non-combatants. If their conduct, when thus contrasted with the inhuman practices of our foe, fail to command the respect and sympathy of civilized nations in our day, it cannot fail to be recognized by their less deceived posterity.

The hope last year entertained of an early termination of the war has not been realized. Could carnage have satisfied the appetite of our enemy for the destruction of human life, or grief have appeased their wanton desire to inflict human suffering, there has been bloodshed enough on both sides, and two lands have been sufficiently darkened by the weeds of mourning, to induce a disposition for peace.

If unanimity in a people could dispel delusion, it has been displayed too unmistakably not to have silenced the pretence that the Southern States were merely disturbed by a factious insurrection, and it must long since have been admitted that they were but exercising their reserved right to modify their own Government in such manner as would best secure their own happiness. But these considerations have been powerless to allay the unchristian hate of those who, long accustomed to draw large profits from a union with us, cannot control the rage excited by the conviction that they have, by their own folly, destroyed the richest sources of their prosperity. They refuse even to listen to proposals for the only peace possible between us—a peace which, recognizing the impassable gulf which divides us, may leave the two peoples separately to recover from the injuries inflicted on both by the causeless war now waged against us. Having begun the war in direct violation of their Constitution, which forbade the attempt to coerce a State, they have been hardened by crime, until they no longer attempt to veil their purpose to destroy the institutions and subvert the sovereignty and independence of these States.

We now know that the only reliable hope for peace is in the vigor of our resistance, as the cessation of their hostility is only to be expected from the pressure of their necessities.

The patriotism of the people has proved equal to every sacrifice demanded by their country's need. We have been united as a people never were united under like circumstances before. God has blessed us with success disproportionate to our means, and, under His divine favor, our labors must at last be crowned with the reward due to men who have given all they possessed to the righteous defence of their inalienable rights, their homes, and their altars.

JEFFERSON DAVIS.

RICHMOND, December 7th, 1863.

Correspondence of President LINCOLN.

ALBANY, May 19th, 1863.

To His Excellency the President of the United States:

The undersigned, officers of a public meeting held in the city of Albany the 16th day of May instant, herewith transmit to your Excellency a copy of the resolutions adopted at the said meeting, and respectfully request your earnest consideration of them. They deem it proper on their personal responsibility to state that the meeting was one of the most respectable as to numbers and character, and one of the most earnest in support of the Union, ever held in this city.

Yours, with great regard,

ERASTUS CORNING, President.

Vice-Presidents—Eli Perry, Peter Gansevoort, Peter Monteath, Samuel W. Gibbs, John Niblock, H. W. McClellan, Lemuel W. Rodgers, William Seymour, Jeremiah Osborn, William S. Paddock, J. B. Sanders, Edward Mulcahy, D. V. N. Radcliff.

Secretaries—William A. Rice, Edward Newcomb, R. W. Peckham, jr., M. A. Nolan, John R. Nettle, and others.

The resolutions were as follows:

Resolved, That the Democrats of New York point to their uniform course of action during the two years of civil war through which we have passed, to the alacrity which they have evinced in filling the ranks of the army, to their contributions and sacrifices, as the evidence of their patriotism and devotion to the cause of our imperilled country. Never in the history of civil wars has a Government been sustained with such ample resources of means and men, as the people have voluntarily placed in the hands of this Administration.

Resolved, That as Democrats, we are determined to maintain this patriotic attitude, and, despite of adverse and disheartening circumstances, to devote all our energies to sustain the cause of the Union, to secure peace through victory, and to bring about the restoration of all the States under the safeguards of the Constitution.

Resolved, That while we will not consent to be misrepresented upon these points, we are determined not to be misunderstood in regard to others not less essential. We demand that the Administration shall be true to the Constitution, shall recognize and maintain the rights of the States and the liberties of the citizen, shall everywhere outside of the lines of necessary military occupation and the scenes of insurrection, exert all its powers to maintain the supremacy of the civil over military law.

Resolved, That in view of these principles we denounce the recent assumption of a military commander to seize and try a citizen of Ohio, Clement L. Vallandigham, for no other reason than words addressed to a public meeting, in criticism of the course of the Administration, and in condemnation of the military orders of that general.

Resolved, That this assumption of power by a military tribunal, if successfully asserted, not only abrogates the right of the people to assemble and discuss the affairs of Government, the liberty of speech and of the press, the right of trial by jury, the law of evidence, and the privilege of habeas corpus, but it strikes a fatal blow at the supremacy of law, and the authority of the State and Federal Constitutions.

Resolved, That the Constitution of the United States—the supreme law of the land—has defined the crime of treason against the United States to consist "only in levying war against them, or adhering to their enemies, giving them aid and comfort;" and has provided that "no person shall be convicted of treason, unless on the testimony of two wit-

nesses to the same overt act, or on confession in open court." And it further provides that "no person shall be held to answer for a capital or otherwise infamous crime, unless on a presentment or indictment of a grand jury; except in cases arising in the land and naval forces, or in the militia, when in actual service in time of war or public danger;" and further, that "in all criminal prosecutions, the accused shall enjoy the right of a speedy and public trial, by an impartial jury of the State and district wherein the crime was committed."

Resolved, That these safeguards of the rights of the citizen against the pretensions of arbitrary power, were intended more especially for his protection in times of civil commotion. They were secured substantially to the English people, after years of protracted civil war, and were adopted into our own Constitution at the close of the Revolution. They have stood the test of seventy-six years of trial under our republican system, under circumstances which show that while they constitute the foundation of all free government, they are the elements of the enduring stability of the republic.

Resolved, That in adopting the language of Daniel Webster, we declare, "it is the ancient and undoubted prerogative of this people to canvass public measures and the merits of public men. It is a 'homebred right,' a fireside privilege. It has been enjoyed in every house, cottage, and cabin in the nation. It is as undoubted as the right of breathing the air or walking on the earth. Belonging to private life as a right, it belongs to public life as a duty, and it is the last duty which those whose representatives we are shall find us to abandon. Aiming at all times to be courteous and temperate in its use, except when the right itself is questioned, we shall place ourselves on the extreme boundary of our own right, and bid defiance to any arm that would move us from our ground. This high constitutional privilege we shall defend and exercise in all places; in time of peace, in time of war, and at all times. Living, we shall assert it; and should we leave no other inheritance to our children, by the blessing of God we will leave them the inheritance of free principles and the example of a manly, independent, and constitutional defence of them."

Resolved, That in the election of Gov. Seymour, the people of this State, by an emphatic majority, declared their condemnation of the system of arbitrary arrests, and their determination to stand by the Constitution. That the revival of this lawless system can have but one result, to divide and distract the North, and destroy its confidence in the purposes of the Administration. That we deprecate it as an element of confusion at home, of weakness to our armies in the field, and as calculated to lower the estimate of American character and magnify the apparent peril of our cause abroad. And that, regarding the blow struck at a citizen of Ohio as aimed at the rights of every citizen of the North, we denounce it as against the spirit of our laws and Constitution, and most earnestly call upon the President of the United States to reverse the action of the military tribunal which has passed a "cruel and unusual punishment" upon the party arrested, prohibited in terms by the Constitution, and to restore him to the liberty of which he has been deprived.

Resolved, That the president, vice-presidents, and secretary of this meeting be requested to transmit a copy of these resolutions to his Excellency the President of the United States, with the assurance of this meeting of their hearty and earnest desire to support the Government in every constitutional and lawful measure to suppress the existing rebellion.

EXECUTIVE MANSION, WASHINGTON, }
June 12th, 1863. }

Hon. Erastus Corning, and others :

GENTLEMEN: Your letter of May 19th, enclosing the resolutions of a public meeting held in Albany, N. Y., on the 16th of the same month, was received several days ago.

The resolutions, as I understand them, are resolvable into two propositions—first, the expression of a purpose to sustain the cause of the Union, to secure peace through victory, and to support the Administration in every constitutional and lawful measure to suppress the rebellion; and, secondly, a declaration of censure upon the Administration for supposed unconstitutional action, such as the making of military arrests. And from the two propositions a third is deduced, which is, that the gentlemen composing the meeting are resolved on doing their part to maintain our common Government and country, despite the folly or wickedness, as they may conceive, of any Administration. This position is eminently patriotic,

and as such I thank the meeting, and congratulate the nation for it. My own purpose is the same, so that the meeting and myself have a common object, and can have no difference, except in the choice of means or measures for effecting that object.

And here I ought to close this paper, and would close it, if there were no apprehension that more injurious consequences than any merely personal to myself might follow the censures systematically cast upon me for doing what, in my view of duty, I could not forbear. The resolutions promise to support me in every constitutional and lawful measure to suppress the rebellion; and I have not knowingly employed, nor shall knowingly employ, any other.

But the meeting, by their resolutions, assert and argue that certain military arrests, and proceedings following them, for which I am ultimately responsible, are unconstitutional. I think they are not. The resolutions quote from the Constitution the definition of treason, and also the limiting safeguards and guarantees therein provided for the citizen on trial for treason, and on his being held to answer for capital or otherwise infamous crimes, and in criminal prosecutions, his right to a speedy and public trial by an impartial jury. They proceed to resolve "that these safeguards of the rights of the citizen against the pretensions of arbitrary power were intended more especially for his protection in times of civil commotion." And, apparently to demonstrate the proposition, the resolutions proceed, "they were secured substantially to the English people after years of protracted civil war, and were adopted into our Constitution at the close of the Revolution." Would not the demonstration have been better if it could have been truly said that these safeguards had been adopted and applied during the civil wars and during our Revolution, instead of after the one and at the close of the other? I, too, am devotedly for them after civil war and before civil war, and at all times, "except when, in cases of rebellion and invasion, the public safety may require" their suspension. The resolutions proceed to tell us that these safeguards "have stood the test of seventy-six years of trial, under our republican system, under circumstances which show that while they constitute the foundation of all free government, they are the elements of the enduring stability of the republic." No one denies that they have so stood the test up to the beginning of the present rebellion, if we except a certain occurrence at New Orleans; nor does any one question that they will stand the same test much longer after the rebellion closes. But these provisions of the Constitution have no application to the case we have in hand, because the arrests complained of were not made for treason—that is, not for the treason defined in the Constitution, and upon the conviction of which the punishment is death; nor yet were they made to hold persons to answer for any capital or otherwise infamous crimes; nor were the proceedings following, in any constitutional or legal sense, "criminal prosecutions." The arrests were made on totally different grounds, and the proceedings following accorded with the grounds of the arrests.

Let us consider the real case with which we are dealing, and apply to it the parts of the Constitution plainly made for such cases.

Prior to my installation here it had been inculcated that any State had a lawful right to secede from the national Union, and that it would be expedient to exercise the right whenever the devotees of the doctrine should fail to elect a President to their own liking. I was elected contrary to their liking; and, accordingly, so far as it was legally possible, they had taken seven States out of the Union, had seized many of the United States forts, and had fired upon the United States flag, all before I was inaugurated, and, of course, before I had done any official act whatever. The rebellion thus begun soon ran into the present civil war; and, in certain respects, it began on very unequal terms between the parties. The insurgents had been preparing for it for more than thirty years, while the Government had taken no steps to resist them. The former had care-

fully considered all the means which could be turned to their account. It undoubtedly was a well-pondered reliance with them that in their own unrestricted efforts to destroy Union, Constitution, and law, all together, the Government would, in a great degree, be restrained by the same Constitution and law from arresting their progress. Their sympathizers pervaded all departments of the Government and nearly all communities of the people. From this material, under cover of "liberty of speech," "liberty of the press," and "habeas corpus," they hoped to keep on foot amongst us a most efficient corps of spies, informers, suppliers, and aiders and abettors of their cause in a thousand ways. They knew that in times such as they were inaugurating, by the Constitution itself, the habeas corpus might be suspended; but they also knew they had friends who would make a question as to who was to suspend it; meanwhile their spies and others might remain at large to help on their cause. Or if, as has happened, the executive should suspend the writ, without ruinous waste of time, instances of arresting innocent persons might occur, as are always likely to occur in such cases; and then a clamor could be raised in regard to this, which might be, at least, of some service to the insurgent cause. It needed no very keen perception to discover this part of the enemy's programme, so soon as by open hostilities their machinery was fairly put in motion. Yet thoroughly imbued with a reverence for the guaranteed rights of individuals, I was slow to adopt the strong measures which by degrees I have been forced to regard as being within the exceptions of the Constitution, and as indispensable to the public safety. Nothing is better known to history than that courts of justice are utterly incompetent to such cases. Civil courts are organized chiefly for trials of individuals, or, at most, a few individuals acting in concert, and this in quiet times, and on charges of crimes well defined in the law. Even in times of peace bands of horse thieves and robbers frequently grow too numerous and powerful for the ordinary courts of justice. But what comparison in numbers have such bands ever borne to the insurgent sympathizers, even in many of the loyal States? Again, a jury too frequently has at least one member more ready to hang the panel than to hang the traitor. And yet, again, he who dissuades one man from volunteering, or induces one soldier to desert, weakens the Union cause as much as he who kills a Union soldier in battle. Yet this dissuasion or inducement may be so conducted as to be no defined crime of which any civil court would take cognizance.

Ours is a case of rebellion—so called by the resolution before me—in fact, a clear, flagrant, and gigantic case of rebellion; and the provision of the Constitution that "the privilege of the writ of habeas corpus shall not be suspended unless when in case of rebellion or invasion the public safety may require it," is the provision which specially applies to our present case. This provision plainly attests the understanding of those who made the Constitution that ordinary courts of justice are inadequate to "cases of rebellion"—attests their purpose that, in such cases, men may be held in custody whom the courts, acting on ordinary rules, would discharge. Habeas corpus does not discharge men who are proved to be guilty of defined crime; and its suspension is allowed by the Constitution on purpose that men may be arrested and held who cannot be proved to be guilty of defined crime, "when, in case of rebellion or invasion, the public safety may require it." This is precisely our present case—a case of rebellion, wherein the public safety does require the suspension. Indeed, arrests by process of courts and arrests in cases of rebellion do not proceed altogether upon the same basis. The former is directed at the small percentage of ordinary and continuous perpetration of crime, while the latter is directed at sudden and extensive uprisings against the Government, which, at most, will succeed or fail in no great length of time. In the latter case arrests are made not so much for what has been done, as for what probably would be done. The latter is

more for the preventive and less for the vindictive than the former. In such cases the purposes of men are much more easily understood than in cases of ordinary crime. The man who stands by and says nothing when the peril of his Government is discussed cannot be misunderstood. If not hindered, he is sure to help the enemy; much more if he talks ambiguously—talks for his country with "buts" and "ifs" and "ands." Of how little value the constitutional provisions I have quoted will be rendered, if arrests shall never be made until defined crimes shall have been committed, may be illustrated by a few notable examples. Gen. John C. Breckinridge, Gen. Robert E. Lee, Gen. Joseph E. Johnston, Gen. John B. Magruder, Gen. William B. Preston, Gen. Simon B. Buckner, and Com. Franklin Buchanan, now occupying the very highest places in the rebel war service, were all within the power of the Government since the rebellion began, and were nearly as well known to be traitors then as now. Unquestionably, if we had seized and held them, the insurgent cause would be much weaker. But no one of them had committed any crime defined in the law. Every one of them, if arrested, would have been discharged on habeas corpus, were the writ allowed to operate. In view of these and similar cases, I think the time not unlikely to come when I shall be blamed for having made too few arrests rather than too many.

By the third resolution the meeting indicate their opinion that military arrests may be constitutional in localities where rebellion actually exists, but that such arrests are unconstitutional in localities where rebellion or insurrection does not actually exist. They insist that such arrests shall not be made "outside of the lines of necessary military occupation, and the scenes of insurrection." Inasmuch, however, as the Constitution itself makes no such distinction, I am unable to believe that there is any such constitutional distinction. I concede that the class of arrests complained of can be constitutional only when, in cases of rebellion or invasion, the public safety may require them; and I insist that in such cases they are constitutional wherever the public safety does require them; as well in places to which they may prevent the rebellion extending, as in those where it may be already prevailing; as well where they may restrain mischievous interference with the raising and supplying of armies to suppress the rebellion, as where the rebellion may actually be; as well where they may restrain the enticing men out of the army, as where they would prevent mutiny in the army; equally constitutional at all places where they will conduce to the public safety, as against the dangers of rebellion or invasion. Take the particular case mentioned by the meeting. It is asserted, in substance, that Mr. Vallandigham was, by a military commander, seized and tried "for no other reason than words addressed to a public meeting in criticism of the course of the Administration, and in condemnation of the military orders of the general." Now, if there be no mistake about this; if this assertion is the truth, and the whole truth; if there was no other reason for the arrest, then I concede that the arrest was wrong. But the arrest, as I understand, was made for a very different reason. Mr. Vallandigham avows his hostility to the war on the part of the Union; and his arrest was made because he was laboring, with some effect, to prevent the raising of troops; to encourage desertion from the army; and to leave the rebellion without an adequate military force to suppress it. He was not arrested because he was damaging the political prospects of the Administration, or the personal interests of the commanding general, but because he was damaging the army, upon the existence and vigor of which the life of the nation depends. He was warring upon the military, and this gave the military constitutional jurisdiction to lay hands upon him. If Mr. Vallandigham was not damaging the military power of the country, then his arrest was made on mistake of fact, which I would be glad to correct on reasonable satisfactory evidence. I understand the meeting whose resolutions I am considering, to be in

favor of suppressing the rebellion by military force—by armies. Long experience has shown that armies cannot be maintained unless desertion shall be punished by the severe penalty of death. The case requires, and the law and the Constitution sanction, this punishment. Must I shoot a simple-minded soldier boy who deserts, while I must not touch a hair of a wily agitator who induces him to desert? This is none the less injurious when effected by getting a father, or brother, or friend, into a public meeting, and there working upon his feelings until he is persuaded to write the soldier boy that he is fighting in a bad cause, for a wicked Administration of a contemptible Government, too weak to arrest and punish him if he shall desert. I think that in such a case, to silence the agitator and to save the boy, is not only constitutional, but withal a great mercy.

If I be wrong on this question of constitutional power, my error lies in believing that certain proceedings are constitutional when, in cases of rebellion or invasion, the public safety requires them, which would not be constitutional when, in absence of rebellion or invasion, the public safety does not require them; in other words, that the Constitution is not, in its application, in all respects the same, in cases of rebellion or invasion involving the public safety, as it is in times of profound peace and public security. The Constitution itself makes the distinction; and I can no more be persuaded that the Government can constitutionally take no strong measures in time of rebellion, because it can be shown that the same could not be lawfully taken in time of peace, than I can be persuaded that a particular drug is not good medicine for a sick man, because it can be shown not to be good food for a well one. Nor am I able to appreciate the danger apprehended by the meeting that the American people will, by means of military arrests during the rebellion, lose the right of public discussion, the liberty of speech and the press, the law of evidence, trial by jury, and habeas corpus, throughout the indefinite peaceful future which I trust lies before them, any more than I am able to believe that a man could contract so strong an appetite for emetics during temporary illness, as to persist in feeding upon them during the remainder of his healthful life.

In giving the resolutions that earnest consideration which you request of me, I cannot overlook the fact that the meeting speak as "Democrats." Nor can I, with full respect for their known intelligence, and the fairly presumed deliberation with which they prepared their resolutions, be permitted to suppose that this occurred by accident, or in any way other than that they preferred to designate themselves "Democrats" rather than "American citizens." In this time of national peril, I would have preferred to meet you upon a level one step higher than any party platform; because I am sure that, from such more elevated position, we could do better battle for the country we all love than we possibly can from those lower ones where, from the force of habit, the prejudices of the past, and selfish hopes of the future, we are sure to expend much of our ingenuity and strength in finding fault with and aiming blows at each other. But, since you have denied me this, I will yet be thankful, for the country's sake, that not all Democrats have done so. He on whose discretionary judgment Mr. Vallandigham was arrested and tried is a Democrat, having no old party affinity with me; and the judge who rejected the constitutional view expressed in these resolutions, by refusing to discharge Mr. Vallandigham on habeas corpus, is a Democrat of better days than these, having received his judicial mantle at the hands of President Jackson. And still more, of all those Democrats who are nobly exposing their lives and shedding their blood on the battle field, I have learned that many approve the course taken with Mr. Vallandigham, while I have not heard of a single one condemning it. I can assert that there are none such. And the name of President Jackson recalls an incident of pertinent history. After the battle of New Orleans, and while the fact that the treaty of peace had been concluded was

well known in the city, but before official knowledge of it had arrived, Gen. Jackson still maintained martial or military law. Now that it could be said the war was over, the clamor against martial law, which had existed from the first, grew more furious. Among other things, a Mr. Louaillier published a denunciatory newspaper article. Gen. Jackson arrested him. A lawyer, by the name of Morel, procured the United States Judge (Hall) to order a writ of habeas corpus to relieve Mr. Louaillier. Gen. Jackson arrested both the lawyer and the Judge. A Mr. Hollander ventured to say of some part of the matter that "it was a dirty trick." Gen. Jackson arrested him. When the officer undertook to serve the writ of habeas corpus, Gen. Jackson took it from him, and sent him away with a copy. Holding the Judge in custody a few days, the General sent him beyond the limits of his encampment, and set him at liberty, with an order to remain till the ratification of peace should be regularly announced, or until the British should have left the Southern coast. A day or two more elapsed, the ratification of the treaty of peace was regularly announced, and the Judge and others were fully liberated. A few days more, and the Judge called Gen. Jackson into court and fined him a thousand dollars for having arrested him and the others named. The General paid the fine, and there the matter rested for nearly thirty years, when Congress refunded principal and interest. The late Senator Douglas, then in the House of Representatives, took a leading part in the debates, in which the constitutional question was much discussed. I am not prepared to say whom the journals would show to have voted for the measure.

It may be remarked: First, that we had the same Constitution then as now; secondly, that we then had a case of invasion, and now we have a case of rebellion; and, thirdly, that the permanent right of the people to public discussion, the liberty of speech and of the press, the trial by jury, the law of evidence, and the habeas corpus suffered no detriment whatever by that conduct of Gen. Jackson, or its subsequent approval by the American Congress.

And yet, let me say, that, in my own discretion, I do not know whether I would have ordered the arrest of Mr. Vallandigham. While I cannot shift the responsibility from myself, I hold that, as a general rule, the commander in the field is the better judge of the necessity in any particular case. Of course I must practise a general directory and revisory power in the matter.

One of the resolutions expresses the opinion of the meeting that arbitrary arrests will have the effect to divide and distract those who should be united in suppressing the rebellion, and I am specially called on to discharge Mr. Vallandigham. I regard this act as at least a fair appeal to me on the expediency of exercising a constitutional power which I think exists. In response to such appeal, I have to say it gave me pain when I learned that Mr. Vallandigham had been arrested—that is, I was pained that there should have seemed to be a necessity for arresting him—and that it will afford me great pleasure to discharge him so soon as I can, by any means, believe the public safety will not suffer by it. I further say that, as the war progresses, it appears to me that opinion and action, which were in great confusion at first, take shape and fall into more regular channels, so that the necessity for strong dealing with them gradually decreases. I have every reason to desire that it should cease altogether, and far from the least is my regard for the opinions and wishes of those who, like the meeting at Albany, declare their purpose to sustain the Government in every constitutional and lawful measure to suppress the rebellion. Still I must continue to do so much as may seem to be required by the public safety. A. LINCOLN.

ALBANY, June 30th, 1863.

To His Excellency the President of the United States:

SIR: The undersigned, officers of the public meeting held in this city on the 16th day of May last, to whom your communication of the 12th of this month, com-

menting on the resolutions adopted at that meeting, was addressed, have the honor to send to your Excellency a reply to that communication by the committee who reported the resolutions. The great importance to the people of this country of the questions discussed, must be our apology, if any be needed, for saying, that we fully concur in this reply, and believe it to be in entire harmony with the views and sentiments of the meeting referred to.

We are, with great respect, very truly yours,
ERASTUS CORNING, President.

The following extracts from the reply of the committee contain the points presented in that document :

The fact has already passed into history that the sacred rights and immunities which were designed to be protected by these constitutional guarantees, have not been preserved to the people during your Administration. In violation of the first of them, the freedom of the press has been denied. In repeated instances newspapers have been suppressed in the loyal States, because they criticized, as constitutionally they might, those fatal errors of policy which have characterized the conduct of public affairs since your advent to power. In violation of the second of them, hundreds, and we believe, thousands of men, have been seized and immured in prisons and bastiles, not only without warrant upon probable cause, but without any warrant, and for no other cause than a constitutional exercise of freedom of speech. In violation of all these guarantees, a distinguished citizen of a peaceful and loyal State has been torn from his home at midnight by a band of soldiers, acting under the orders of one of your generals, tried before a military commission, without judge or jury, convicted and sentenced without even the suggestion of any offence known to the Constitution or laws of this country. For all these acts you avow yourself ultimately responsible. In the special case of Mr. Vallandigham, the injustice commenced by your subordinate was consummated by a sentence of exile from his home, pronounced by you. That great wrong, more than any other which preceded it, asserts the principles of a supreme despotism.

These repeated and continued invasions of constitutional liberty and private right, have occasioned profound anxiety in the public mind. The apprehension and alarm which they are calculated to produce, have been greatly enhanced by your attempt to justify them, because in that attempt you assume to yourself a rightful authority possessed by no constitutional monarch on earth. We accept the declaration that you prefer to exercise this authority with a moderation not hitherto exhibited. But, believing, as we do, that your forbearance is not the tenure by which liberty is enjoyed in this country, we propose to challenge the grounds on which your claim of supreme power is based. While yielding to you as a constitutional magistrate the deference to which you are entitled, we cannot accord to you the despotic power you claim, however indulgent and gracious you may promise to be in wielding it.

We have carefully considered the grounds on which your pretensions to more than regal authority are claimed to rest; and if we do not misinterpret the misty and cloudy forms of expression in which those pretensions are set forth, your meaning is, that while the rights of the citizen are protected by the Constitution in time of peace, they are suspended or lost in time of war, when invasion or rebellion exists. You do not, like many others in whose minds reason and the love of regulated liberty seem to be overthrown by the excitements of the hour, attempt to base this conclusion upon a supposed military necessity existing outside of, and transcending the Constitution, a military necessity behind which the Constitution itself disappears in a total eclipse. We do not find this gigantic and monstrous heresy put forth in your plea for absolute power, but we do find another equally subversive of liberty and law, and quite as certainly tending to the estab-

lishment of despotism. Your claim to have found, not outside, but within the Constitution, a principle or germ of arbitrary power, which in time of war expands at once into an absolute sovereignty, wielded by one man; so that liberty perishes, or is dependent on his will, his discretion, or his caprice. This extraordinary doctrine you claim to derive wholly from that clause of the Constitution which, in case of invasion or rebellion, permits the writ of habeas corpus to be suspended. Upon this ground your whole argument is based.

Correspondence between President LINCOLN and the Ohio Committee in the case of Mr. VALLANDIGHAM.

WASHINGTON, June 26th, 1863.

To His Excellency the President of the United States :

The undersigned, having been appointed a committee, under the authority of the resolutions of the State Convention held at the city of Columbus, Ohio, on the 11th instant, to communicate with you on the subject of the arrest and banishment of Clement L. Vallandigham, most respectfully submit the following as the resolutions of that Convention bearing upon the subject of this communication, and ask of your Excellency their earnest consideration. And they deem it proper to state that the Convention was one in which all parts of the State were represented, one of the most respectable as to numbers and character, and one of the most earnest and sincere in support of the Constitution and the Union, ever held in that State :

Resolved, That the will of the people is the foundation of all free government: that, to give effect to this free will, free thought, free speech, and a free press are absolutely indispensable. Without free discussion there is no certainty of sound judgment; without sound judgment there can be no wise government.

2. That it is an inherent and constitutional right of the people to discuss all measures of their Government, and to approve or disapprove, as to their best judgment seems right. That they have a like right to propose and advocate that policy which in their judgment is best, and to argue and vote against whatever policy seems to them to violate the Constitution, to impair their liberties, or to be detrimental to their welfare.

3. That these, and all other rights guaranteed to them by their constitutions, are their rights in time of war as well as in time of peace, and of far more value and necessity in war than in peace; for in peace liberty, security, and property are seldom endangered; in war they are ever in peril.

4. That we now say to all whom it may concern, not by way of threat, but calmly and firmly, that we will not surrender these rights, nor submit to their forcible violation. We will obey the laws ourselves, and all others must obey them.

11. That Ohio will adhere to the Constitution and the Union as the best—it may be the last—hope of popular freedom, and for all wrongs which may have been committed, or evils which may exist, will seek redress, under the Constitution and within the Union, by the peaceful but powerful agency of the suffrages of a free people.

14. That we will earnestly support every constitutional measure tending to preserve the Union of the States. No men have a greater interest in its preservation than we have, none desire it more; there are none who will make greater sacrifices or endure more than we will to accomplish that end. We are, as we ever have been, the devoted friends of the Constitution and the Union, and we have no sympathy with the enemies of either.

15. That the arrest, imprisonment, pretended trial, and actual banishment of Clement L. Vallandigham, a citizen of the State of Ohio, not belonging to the land or naval forces of the United States, nor to the militia in actual service, by alleged military authority, for no other pretended crime than that of uttering words of legitimate criticism upon the conduct of the Administration in power, and of appealing to the ballot box for a change of policy—said arrest and military trial taking place where the courts of law are open and unobstructed, and for no act done within the sphere of active military operations in carrying on the war—we regard as a palpable violation of the following provisions of the Constitution of the United States :

1. "Congress shall make no law abridging the freedom of speech or of the press, or the right of the people peaceably to assemble and to petition the Government for a redress of grievances."

2. "The right of the people to be secure in their persons,

houses, papers, and effects, against unreasonable searches and seizures, shall not be violated; and no warrants shall issue but upon probable cause, supported by oath or affirmation, and particularly describing the place to be searched and the persons or things to be seized."

3. "No person shall be held to answer for a capital or otherwise infamous crime, unless on a presentment or indictment of a grand jury, except in cases arising in the land or naval forces, or in the militia, when in actual service in time of war or public danger."

4. "In all criminal prosecutions, the accused shall enjoy the right to a speedy and public trial, by an impartial jury of the State and district wherein the crime shall have been committed, which district shall have been previously ascertained by law."

And we furthermore denounce said arrest, trial, and banishment as a direct insult offered to the sovereignty of the people of Ohio, by whose organic law it is declared that no person shall be transported out of the State for any offence committed within the same.

16. That Clement L. Vallandigham was, at the time of his arrest, a prominent candidate for nomination by the Democratic party of Ohio for the office of Governor of the State; that the Democratic party was fully competent to decide whether he is a fit man for that nomination, and that the attempt to deprive them of that right, by his arrest and banishment, was an unmerited imputation upon their intelligence and loyalty, as well as a violation of the Constitution.

17. That we respectfully, but most earnestly, call upon the President of the United States to restore Clement L. Vallandigham to his home in Ohio, and that a committee of one from each Congressional district of the State, to be selected by the presiding officer of this convention, is hereby appointed to present this application to the President.

The undersigned, in the discharge of the duty assigned them, do not think it necessary to reiterate the facts connected with the arrest, trial, and banishment of Mr. Vallandigham—they are well known to the President, and are a part of public history—nor to enlarge upon the positions taken by the Convention, nor to recapitulate the constitutional provisions which it is believed have been contravened; they have been stated at length, and with clearness, in the resolutions which have been recited. The undersigned content themselves with brief reference to other suggestions pertinent to the subject.

They do not call upon your Excellency as suppliants, praying the revocation of the order banishing Mr. Vallandigham as a favor; but, by the authority of a Convention representing a majority of the citizens of the State of Ohio, they respectfully ask it as a right due to an American citizen, in whose personal injury the sovereignty and dignity of the people of Ohio, as a free State, have been offended. And this duty they perform the more cordially from the consideration that, at a time of great national emergency, pregnant with danger to our Federal Union, it is all important that the true friends of the Constitution and the Union, however they may differ as to the mode of administering the Government, and the measures most likely to be successful in the maintenance of the Constitution and the restoration of the Union, should not be thrown into conflict with each other.

The arrest, unusual trial, and banishment of Mr. Vallandigham have created wide-spread and alarming disaffection among the people of the State, not only endangering the harmony of the friends of the Constitution and the Union, and tending to disturb the peace and tranquillity of the State, but also impairing that confidence in the fidelity of your Administration to the great landmarks of free government essential to a peaceful and successful enforcement of the laws in Ohio.

You are reported to have used, in a public communication on this subject, the following language: "It gave me pain when I learned that Mr. Vallandigham had been arrested—that is, I was pained that there should have seemed to be a necessity for arresting him, and it will afford me great pleasure to discharge him, so soon as I can by any means believe the public safety will not suffer by it."

The undersigned assure your Excellency, from our personal knowledge of the feelings of the people of Ohio, that the public safety will be far more endangered by continuing Mr. Vallandigham in exile than

by releasing him. It may be true that persons differing from him in political views may be found in Ohio, and elsewhere, who will express a different opinion. But they are certainly mistaken.

Mr. Vallandigham may differ with the President, and even with some of his own political party, as to the true and most effectual means of maintaining the Constitution and restoring the Union; but this difference of opinion does not prove him to be unfaithful to his duties as an American citizen. If a man, devotedly attached to the Constitution and the Union, conscientiously believes that, from the inherent nature of the Federal compact, the war, in the present condition of things in this country, cannot be used as a means of restoring the Union; or, that a war to subjugate a part of the States, or a war to revolutionize the social system in a part of the States, could not restore, but would inevitably result in the final destruction of both the Constitution and the Union, is he not to be allowed the right of an American citizen to appeal to the judgment of the people for a change of policy by the constitutional remedy of the ballot box?

During the war with Mexico, many of the political opponents of the Administration then in power thought it their duty to oppose and denounce the war, and to urge before the people of the country that it was unjust and prosecuted for unholy purposes. With equal reason it might have been said of them that their discussions before the people were calculated to discourage enlistments, "to prevent the raising of troops," and to induce desertions from the army, and leave the Government without an adequate military force to carry on the war.

If the freedom of speech and of the press are to be suspended in time of war, then the essential element of popular government to effect a change of policy in the constitutional mode is at an end. The freedom of speech and of the press is indispensable, and necessarily incident to the nature of popular government itself. If any inconvenience or evils arise from its exercise, they are unavoidable.

On this subject you are reported to have said further: "It is asserted, in substance, that Mr. Vallandigham was, by a military commander, seized and tried 'for no other reason than words addressed to a public meeting in criticism of the course of the Administration, and in condemnation of the military order of the general.' Now, if there be no mistake about this; if there was no other reason for the arrest, then I concede that the arrest was wrong. But the arrest, I understand, was made for a very different reason. Mr. Vallandigham avows his hostility to the war on the part of the Union; and his arrest was made because he was laboring, with some effect, to prevent the raising of troops, to encourage desertions from the army, and to leave the rebellion without an adequate military force to suppress it. He was not arrested because he was damaging the political prospects of the Administration or the personal interests of the commanding general, but because he was damaging the army, upon the existence and vigor of which the life of the nation depends. He was warring upon the military, and this gave the military constitutional jurisdiction to lay hands upon him. If Mr. Vallandigham was not damaging the military power of the country, then his arrest was made on mistake of facts, which I would be glad to correct on reasonable satisfactory evidence."

In answer to this, permit us to say, first, that neither the charge nor the specifications in support of the charge on which Mr. Vallandigham was tried, impute to him the act of either laboring to prevent the raising of troops or to encourage desertions from the army. Secondly, no evidence on the trial was offered with a view to support, or even tended to support, any such charge. In what instance, and by what act, did he either discourage enlistments or encourage desertion in the army? Who is the man who was discouraged from enlisting, and who encouraged to desert, by any act of Mr. Vallandigham? If it be assumed that perchance some person might have been discouraged from enlisting, or that some person might have been en-

couraged to desert, on account of hearing Mr. Vallandigham's views as to the policy of the war as a means of restoring the Union, would that have laid the foundation for his conviction and banishment? If so, upon the same grounds every political opponent of the Mexican war might have been convicted and banished from the country.

When gentlemen of high standing and extensive influence, including your Excellency, opposed, in the discussions before the people, the policy of the Mexican war, were they "warring upon the military," and did this "give the military constitutional jurisdiction to lay hands upon" them? And, finally, the charge in the specifications upon which Mr. Vallandigham was tried, entitled him to a trial before the civil tribunals, according to the express provisions of the late acts of Congress, approved by yourself July 17th, 1862, and March 3d, 1863, which were manifestly designed to supersede all necessity or pretext for arbitrary military arrests.

The undersigned are unable to agree with you in the opinion you have expressed that the Constitution is different in time of insurrection or invasion from what it is in time of peace and public security. The Constitution provides for no limitation upon or exceptions to the guarantees of personal liberty, except as to the writ of habeas corpus. Has the President, at the time of invasion or insurrection, the right to engraft limitations or exceptions upon these constitutional guarantees whenever, in his judgment, the public safety requires it?

True it is, the article of the Constitution which defines the various powers delegated to Congress declares that "the privilege of the writ of habeas corpus shall not be suspended unless when, in case of rebellion or invasion, the public safety may require it." But this qualification or limitation upon this restriction upon the powers of Congress has no reference to or connection with the other constitutional guarantees of personal liberty. Expunge from the Constitution this limitation upon the power of Congress to suspend the writ of habeas corpus, and yet the other guarantees of personal liberty would remain unchanged.

Although a man might not have a constitutional right to have an immediate investigation made as to the legality of his arrest upon habeas corpus, yet his "right to a speedy and public trial by an impartial jury of the State and district wherein the crime shall have been committed" will not be altered; neither will his right to the exemption from "cruel and unusual punishment," nor his right to be secure in his person, houses, papers, and effects, against unreasonable seizures and searches, nor his right not to be deprived of life, liberty, or property, without due process of law, nor his right not to be held to answer for a capital or otherwise infamous offence, unless on presentment or indictment of a grand jury, be in anywise changed.

And certainly the restriction upon the power of Congress to suspend the writ of habeas corpus in time of insurrection or invasion, could not affect the guarantee that the freedom of speech and of the press shall not be abridged. It is sometimes urged that the proceedings in the civil tribunals are too tardy and ineffective for cases arising in times of insurrection or invasion. It is a full reply to this to say that arrests by civil process may be equally as expeditious and effective as arrests by military orders. True, a summary trial and punishment are not allowed in the civil courts. But, if the offender be under arrest and imprisoned, and not entitled to a discharge on writ of habeas corpus before trial, what more can be required for the purposes of the Government? The idea that all the constitutional guarantees of personal liberty are suspended throughout the country at a time of insurrection or invasion in any part of it, places us upon a sea of uncertainty, and subjects the life, liberty, and property of every citizen to the mere will of a military commander, or what he may say that he considers the public safety requires. Does your Excellency wish to have it understood that you hold that the rights of every

man throughout this vast country are subject to be annulled whenever you may say that you consider the public safety requires it, in time of invasion or insurrection?

You are further reported as having said that the constitutional guarantees of personal liberty have "no application to the present case we have in hand, because the arrests complained of were not made for treason—that is, not for the treason defined in the Constitution, and upon the conviction of which the punishment is death—nor yet were they made to hold persons to answer for capital or otherwise infamous crimes; nor were the proceedings following in any constitutional or legal sense 'criminal prosecutions.' The arrests were made on totally different grounds, and the proceedings following accorded with the grounds of the arrests," &c.

The conclusion to be drawn from this position of your Excellency is, that where a man is liable to "a criminal prosecution," or is charged with a crime known to the laws of the land, he is clothed with all the constitutional guarantees for his safety and security from wrong and injustice; but that where he is not liable to "a criminal prosecution," or charged with any crime known to the laws, if the President or any military commander shall say that he considers that the public safety requires it, this man may be put outside of the pale of the constitutional guarantees, and arrested without charge of crime, imprisoned without knowing what for, and any length of time, or be tried before a court martial and sentenced to any kind of punishment, unknown to the laws of the land, which the President or the military commander may see proper to impose.

Did the Constitution intend to throw the shield of its securities around the man liable to be charged with treason as defined by it, and yet leave the man not liable to any such charge unprotected by the safeguards of personal liberty and personal security? Can a man not in the military or naval service, nor within the field of the operations of the army, be arrested and imprisoned without any law of the land to authorize it? Can a man thus, in civil life, be punished without any law defining the offence and prescribing the punishment? If the President or a court martial may prescribe one kind of punishment unauthorized by law, why not any other kind? Banishment is an unusual punishment and unknown to our laws. If the President has the right to prescribe the punishment of banishment, why not that of death and confiscation of property? If the President has the right to change the punishment prescribed by the court martial from imprisonment to banishment, why not from imprisonment to torture upon the rack or execution upon the gibbet?

If an indefinable kind of constructive treason is to be introduced and engrafted upon the Constitution, unknown to the laws of the land and subject to the will of the President whenever an insurrection or invasion shall occur in any part of this vast country, what safety or security will be left for the liberties of the people?

The constructive treason that gave the friends of freedom so many years of toil and trouble in England were inconsiderable compared to this. The precedents which you make will become a part of the Constitution for your successors, if sanctioned and acquiesced in by the people now.

The people of Ohio are willing to coöperate zealously with you in every effort warranted by the Constitution to restore the Union of the States, but they cannot consent to abandon those fundamental principles of civil liberty which are essential to their existence as a free people.

In their name, we ask that, by a revocation of the order of his banishment, Mr. Vallandigham may be restored to the enjoyment of those rights of which they believe he has been unconstitutionally deprived.

We have the honor to be respectfully, yours, &c. :

—
WASHINGTON, June 29th, 1863.

Messrs. M. Burchard, David A. Houck, George Bliss, T. W. Bartley, W. J. Gordon, John O'Neill, C. A. White, W. E. Finck, Alexander Long, J. W. White, George H. Pendleton, George S. Converse, Warren P. Noble, James R. Morris, W. A. Hutchins, Abner L. Backus, J. F. McKinney, P. C. Le Blond, Louis Schaefer:

GENTLEMEN: The resolutions of the Ohio Democratic State Convention, which you present me, together with your introductory and closing remarks, being in position and argument mainly the same as the resolutions of the Democratic meeting at Albany, New York, I refer you to my response to the latter as meeting most of the points in the former.

This response you evidently used in preparing your remarks, and I desire no more than that it be used with accuracy. In a single reading of your remarks, I only discovered one inaccuracy in matter which I suppose you took from that paper. It is where you say, "The undersigned are unable to agree with you in the opinion you have expressed that the Constitution is different in time of insurrection or invasion from what it is in time of peace and public security."

A recurrence to the paper will show you that I have not expressed the opinion you suppose. I expressed the opinion that the Constitution is different in its application in cases of rebellion or invasion, involving the public safety, from what it is in times of profound peace and public security; and this opinion I adhere to, simply because by the Constitution itself things may be done in the one case which may not be done in the other.

I dislike to waste a word on a merely personal point, but I must respectfully assure you that you will find yourselves at fault should you ever seek for evidence to prove your assumption that I "opposed in discussions before the people the policy of the Mexican war."

You say: "Expunge from the Constitution this limitation upon the power of Congress to suspend the writ of habeas corpus, and yet the other guarantees of personal liberty would remain unchanged." Doubtless if this clause of the Constitution, improperly called, as I think, a limitation upon the power of Congress, were expunged, the other guarantees would remain the same; but the question is, not how those guarantees would stand with that clause out of the Constitution, but how they stand with that clause remaining in it, in case of rebellion or invasion, involving the public safety. If the liberty could be indulged in expunging that clause, letter and spirit, I really think the constitutional argument would be with you.

My general view on this question was stated in the Albany response, and hence I do not state it now. I only add that, it seems to me, the benefit of the writ of habeas corpus is the great means through which the guarantees of personal liberty are conserved and made available in the last resort; and corroborative of this view is the fact that Mr. Vallandigham, in the very case in question, under the advice of able lawyers, saw not where else to go but to the habeas corpus. But by the Constitution the benefit of the writ of habeas corpus itself may be suspended, when, in case of rebellion or invasion, the public safety may require it.

You ask, in substance, whether I really claim that I may override all the guaranteed rights of individuals, on the plea of conserving the public safety—when I

may choose to say the public safety requires it. This question, divested of the phraseology calculated to represent me as struggling for an arbitrary personal prerogative, is either simply a question who shall decide, or an affirmation that nobody shall decide, what the public safety does require in cases of rebellion or invasion. The Constitution contemplates the question as likely to occur for decision, but it does not expressly declare who is to decide it. By necessary implication, when rebellion or invasion comes, the decision is to be made, from time to time; and I think the man whom, for the time, the people have under the Constitution, made the commander-in-chief of their army and navy, is the man who holds the power and bears the responsibility of making it. If he uses the power justly, the same people will probably justify him; if he abuses it, he is in their hands, to be dealt with by all the modes they have reserved to themselves in the Constitution.

The earnestness with which you insist that persons can only, in times of rebellion, be lawfully dealt with, in accordance with the rules for criminal trials and punishments in times of peace, induces me to add a word to what I said on that point in the Albany response. You claim that men may, if they choose, embarrass those whose duty it is to combat a giant rebellion, and then be dealt with only in turn as if there were no rebellion. The Constitution itself rejects this view. The military arrests and detentions which have been made, including those of Mr. Vallandigham, which are not different in principle from the other, have been for prevention, and not for punishment—as injunctions to stay injury, as proceedings to keep the peace—and hence, like proceedings in such cases and for like reasons, they have not been accompanied with indictments, or trials by juries, nor in a single case by any punishment whatever beyond what is purely incidental to the prevention. The original sentence of imprisonment in Mr. Vallandigham's case was to prevent injury to the military service only, and the modification of it was made as a less disagreeable mode to him of securing the same prevention.

I am unable to perceive an insult to Ohio in the case of Mr. Vallandigham. Quite surely nothing of this sort was or is intended. I was wholly unaware that Mr. Vallandigham was, at the time of his arrest, a candidate for the Democratic nomination for Governor, until so informed by your reading to me the resolutions of the Convention. I am grateful to the State of Ohio for many things, especially for the brave soldiers and officers she has given in the present national trial to the armies of the Union.

You claim, as I understand, that according to my own position in the Albany response, Mr. Vallandigham should be released; and this because, as you claim, he has not damaged the military service by discouraging enlistments, encouraging desertions, or otherwise; and that if he had, he should have been turned over to the civil authorities under the recent acts of Congress. I certainly do not know that Mr. Vallandigham has specifically and by direct language advised against enlistments, and in favor of desertion and resistance to drafting. We all know that combinations, armed in some instances, to resist the arrest of deserters, began several months ago; that more recently the like has appeared in resistance to the enrolment preparatory to a draft; and that quite a number of assassinations have occurred from the same animus. These had to be met by military force, and this again has led to bloodshed and death. And now, under a sense of responsibility more weighty and enduring than any which is merely official, I solemnly declare my belief that this hinderance of the military, including maiming and murder, is due to the course in which Mr. Vallandigham has been engaged, in a greater degree than to any other cause; and it is due to him personally in a greater degree than to any other man.

These things have been notorious, known to all, and of course known to Mr. Vallandigham. Perhaps I would not be wrong to say they originated with his

especial friends and adherents. With perfect knowledge of them he has frequently, if not constantly, made speeches in Congress and before popular assemblies; and if it can be shown that, with these things staring him in the face, he has ever uttered a word of rebuke or counsel against them, it will be a fact greatly in his favor with me, and one of which, as yet, I am totally ignorant. When it is known that the whole burden of his speeches has been to stir up men against the prosecution of the war, and that in the midst of resistance to it he has not been known in any instance to counsel against such resistance, it is next to impossible to repel the inference that he has counselled directly in favor of it.

With all this before their eyes, the Convention you represent have nominated Mr. Vallandigham for Governor of Ohio, and both they and you have declared the purpose to sustain the National Union by all constitutional means. But, of course, they and you, in common, reserve to yourselves to decide what are constitutional means, and, unlike the Albany meeting, you omit to state or intimate that, in your opinion, an army is a constitutional means of saving the Union against a rebellion, or even to intimate that you are conscious of an existing rebellion being in progress with the avowed object of destroying that very Union. At the same time, your nominee, for Governor, in whose behalf you appeal, is known to you and to the world to declare against the use of an army to suppress the rebellion. Your own attitude, therefore, encourages desertion, resistance to the draft, and the like, because it teaches those who incline to desert and to escape the draft to believe it is your purpose to protect them, and to hope that you will become strong enough to do so.

After a short personal intercourse with you, gentlemen of the committee, I cannot say I think you desire this effect to follow your attitude; but I assure you that both friends and enemies of the Union look upon it in this light. It is a substantial hope, and by consequence a real strength, to the enemy. It is a false hope, and one which you would willingly dispel. I will make the way exceedingly easy. I send you duplicates of this letter, in order that you, or a majority, may, if you choose, indorse your names upon one of them, and return it thus indorsed to me, with the understanding that those signing are thereby committed to the following propositions, and to nothing else:

1. That there is now a rebellion in the United States, the object and tendency of which is to destroy the National Union; and that, in your opinion, an army and navy are constitutional means for suppressing that rebellion.

2. That no one of you will do anything which, in his own judgment, will tend to hinder the increase or favor the decrease or lessen the efficiency of the army and navy, while engaged in the effort to suppress that rebellion; and

3. That each of you will, in his sphere, do all he can to have the officers, soldiers, and seamen of the army and navy, while engaged in the effort to suppress the rebellion, paid, fed, clad, and otherwise well provided for and supported.

And with the further understanding that, upon receiving the letter and names thus indorsed, I will cause them to be published, which publication shall be, within itself, a revocation of the order in relation to Mr. Vallandigham.

It will not escape observation that I consent to the release of Mr. Vallandigham upon terms not embracing any pledge from him, or from others, as to what he will or will not do. I do this because he is not present to speak for himself, or to authorize others to speak for him; and hence I shall expect that on returning he would not put himself practically in antagonism with the position of his friends. But I do it chiefly because I thereby prevail on other influential gentlemen of Ohio to so define their position as to be of immense value to the army—thus more than compensating for the consequences of any mistake in allowing Mr. Vallandigham to return, so that, on the whole, the public safety will not have suffered by it. Still, in regard to

Mr. Vallandigham and all others, I must hereafter, as heretofore, do so much as the public service may seem to require. I have the honor to be, respectfully,
yours, &c.
A. LINCOLN.

On the 1st of July, the committee made an answer to the letter of President Lincoln, in which, after urging objections to the positions taken by the President, they conclude as follows:

In the conclusion of your communication you propose that, if a majority of the committee shall affix their signatures to a duplicate copy of it, which you have furnished, they shall stand committed to three propositions, therein at length set forth, that you will publish the names thus signed, and that this publication shall operate as a revocation of the order of banishment. The committee cannot refrain from the expression of their surprise that the President should make the fate of Mr. Vallandigham depend upon the opinion of this committee upon these propositions. If the arrest and banishment were legal, and were deserved; if the President exercised a power clearly delegated, under the circumstances which warranted its exercise, the order ought not to be revoked, merely because the committee hold, or express, opinions accordant with those of the President. If the arrest and banishment were not legal, or were not deserved by Mr. Vallandigham, then surely he is entitled to an immediate and unconditional discharge.

The people of Ohio were not so deeply moved by the action of the President merely because they were concerned for the personal safety or convenience of Mr. Vallandigham, but because they saw in his arrest and banishment an attack upon their own personal rights; and they attach value to his discharge chiefly, as it will indicate an abandonment of the claim to the power of such arrest and banishment. However just the undersigned might regard the principles contained in the several propositions submitted by the President, or how much soever they might, under other circumstances, feel inclined to indorse the sentiments contained therein, yet they assure him that they have not been authorized to enter into any bargains, terms, contracts, or conditions with the President of the United States to procure the release of Mr. Vallandigham. The opinions of the undersigned touching the questions involved in these propositions are well known, have been many times publicly expressed, and are sufficiently manifested in the resolutions of the Convention which they represent, and they cannot suppose that the President expects that they will seek the discharge of Mr. Vallandigham by a pledge, implying not only an imputation upon their own sincerity and fidelity as citizens of the United States, and also carrying with it, by implication, a concession of the legality of his arrest, trial, and banishment, against which they and the Convention they represent have solemnly protested. And, while they have asked the revocation of the order of banishment, not as a favor, but as a right due to the people of Ohio, and with a view to avoid the possibility of conflict or disturbance of the public tranquility, they do not do this, nor does Mr. Vallandigham desire it, at any sacrifice of their dignity and self-respect.

The idea that such a pledge as that asked from the undersigned would secure the public safety sufficiently to compensate for any mistake of the President in discharging Mr. Vallandigham is, in their opinion, a mere evasion of the grave questions involved in this discussion, and of a direct answer to their demand. And this is made especially apparent by the fact that this pledge is asked in a communication which concludes with an intimation of a disposition, on the part of the President, to repeat the acts complained of.

The undersigned, therefore, having fully discharged the duty involved upon them, leave the responsibility with the President.

On the 26th of August, President Lincoln addressed the following letter to a mass convention or meeting to be held at Springfield, Ill.:

EXECUTIVE MANSION, WASHINGTON, Aug. 26th, 1863.

Hon. James C. Conklin :

MY DEAR SIR: Your letter, inviting me to attend a mass meeting of unconditional Union men, to be held at the capital of Illinois, on the 3d day of September, has been received. It would be very agreeable to me thus to meet my old friends at my own home; but I cannot, just now, be absent from this city so long as a visit there would require.

The meeting is to be of all those who maintain unconditional devotion to the Union, and I am sure that my old political friends will thank me for tendering, as I do, the nation's gratitude to those other noble men whom no partisan malice or partisan hope can make false to the nation's life. There are those who are dissatisfied with me. To such I would say, You desire peace, and you blame me that we do not have it. But how can we attain it?

There are but three conceivable ways. First, to suppress the rebellion by force of arms. This I am trying to do. Are you for it? If you are, so far we are agreed. If you are not for it, a second way is to give up the Union. I am against this. If you are, you should say so plainly. If you are not for force, nor yet for dissolution, there only remains some imaginary compromise. I do not believe that any compromise embracing the maintenance of the Union is now possible. All that I learn leads to a directly opposite belief. The strength of the rebellion is its military, its army. This army dominates all the country and all the people within its range. Any offer of terms, made by man or men, within that range, in opposition to that army, is simply nothing for the present, because such man or men have no power whatever to enforce their side of a compromise, if one were made with them.

To illustrate: Suppose refugees of the South and peace men of the North meet together in convention, and frame and proclaim a compromise, embracing a restoration of the Union, in what way can that compromise be used to keep Gen. Lee's army out of Pennsylvania? Gen. Meade's army can keep Gen. Lee's army out of Pennsylvania, and I think can ultimately drive it out of existence. But no paper compromise, to which the controllers of Gen. Lee's army are not agreed, can at all affect that army.

In an effort to make such compromise, we would waste time, which the enemy would improve to our disadvantage, and that would be all. A compromise, to be effective, must be made either with those who control the rebel army, or with the people, first liberated from the domination of that army by the success of our army.

Now, allow me to assure you that no word or intimation from the rebel army or from any of the men controlling it, in relation to any peace compromise, has ever come to my knowledge or belief. All charges and intimations to the contrary are deceptive and groundless, and I promise you that if any such proposition shall hereafter come, it shall not be rejected and kept secret from you. I freely acknowledge myself to be the servant of the people, according to the bond of the service, the United States Constitution, and that as such I am responsible to them. But to be plain, you are dissatisfied with me about the negro. Quite likely there is a difference of opinion between you and myself upon that subject. I certainly wish that all men could be free, while you, I suppose, do not. Yet I have neither adopted nor proposed any measure which is not consistent with even your views, provided that you are for the Union.

I suggested compensated emancipation, to which you replied that you wished not to be taxed to buy negroes. But I had not asked you to be taxed to buy negroes, except in such a way as to save you from greater taxation to save the Union exclusively by other means.

You dislike the Emancipation Proclamation, and, perhaps, would like to have it retracted. You say it is unconstitutional. I think differently. I think that the Constitution vests the commander-in-chief with the law of war in time of war. The most that can be said, if so much, is, that slaves are property. Has

there ever been any question that by law of war property, both of enemies and friends, may be taken when needed, and is it not needed whenever taking it helps us or hurts the enemy? Armies, the world over, destroy the enemy's property when they cannot use it, and even destroy their own to keep it from the enemy. Civilized belligerents do all in their power to help themselves or hurt the enemy, except a few things, regarded as barbarous and cruel. Among the exceptions are the massacre of vanquished foes and non-combatants, male and female. But the Proclamation law is valid or it is not valid. If it is not valid, it needs no retraction; if it is valid, it cannot be retracted any more than the dead can be brought to life. Some of you profess to think that retraction would operate favorably to the Union. Why better after the retraction than before the issue? There was more than a year and a half of trial to suppress the rebellion before the Proclamation was issued, the last one hundred days of which passed under an explicit notice that it was coming, unless averted by those in rebellion returning to their allegiance.

The war has certainly progressed as favorably to us since the issue of the Proclamation as before. I know, as fully as one can know the opinion of others, that some of the commanders of our armies in the field, who have given us our most important victories, believe the emancipation policy and the aid of colored troops constituted the heaviest blows yet dealt to the rebellion, and that at least one of these important successes could not have been achieved, but for the aid of black soldiers. Among the commanders holding these views, are some who have never had any affinity with what is called Abolitionism, or with Republican party politics, but who hold them purely as military opinions. I submit their opinion as being entitled to some weight against the objections often urged that emancipation and arming the blacks are unwise as military measures, and were not adopted in good faith.

You say you will not fight to free negroes. Some of them seem to be willing enough to fight for you. But no matter. They fight, then, exclusively to save the Union. I issued the Proclamation on purpose to aid you in saving the Union. Whenever you shall have conquered all resistance to the Union, if I shall urge upon you to continue fighting, it will be an apt time then for you to declare that you will not fight to free negroes. I thought that in your struggle for the Union, to whatever extent the negroes should cease helping the enemy, to that extent it weakened the enemy in their resistance to you.

Do you think differently? I thought that whatever negroes can be got to do as soldiers, leaves just so much less for white soldiers to do in saving the Union. Does it appear otherwise to you? But negroes, like other people, act upon motive. Why should they do anything for us, if we will do nothing for them? If they stake their lives for us, they must be prompted by the strongest motive, even the promise of freedom, and the promise being made, must be kept.

The signs look better. The Father of Waters again goes unvexed to the sea, thanks to the great Northwest for it; nor yet wholly to them, for three hundred miles up they met New England, Empire, Keystone, and Jersey hewing their way right and left. The sunny South, too, in more colors than one, also lent a hand. On the spot, then, part of the history was jotted down in black and white. The job was a great national one, and let none be bound who bore an honorable part in it; and while those who have cleared the great river may well be proud, even that is not all.

It is hard to say that any thing has been done more bravely and better done than Antietam, Murfreesboro, Gettysburg, and on many fields of less note; nor must Uncle Sam's webbed feet be forgotten. At all the traitors' margins they have been present, not only on the deep sea, the broad bay, and the rapid river, but also up the narrow, muddy bayou, and wherever the ground was a little damp, they have been, and made their tracks. Thanks to all, for the great republic, for the principles by which it lives and keeps alive for man's

vast future; thanks to all, that peace does not appear so distant as it did. I hope it will come soon, and come to stay, and so come as to be worth the keeping in all future time.

It will then have been proved that among freemen there can be no successful appeal from the ballot to the bullet, and that they who take such appeal are sure to lose their case and pay the costs; and then there will be some black men who can remember that, with silent tongue, and with clenched teeth, and with

steady eye and well-poised bayonet, they have helped mankind on to this great consummation, while I fear that there will be some white men unable to forget that, with malignant heart and deceitful speech, they have striven to hinder it. Still, let us not be over sanguine of a speedy and final triumph; let us be quite sober; let us diligently apply the means, never doubting that a just God, in His own good time, will give us the rightful result.

Yours, very truly, A. LINCOLN.

R

REFORMED CHURCH. The following is a summary view of the Reformed Protestant Dutch Church of North America for the year 1863: Particular synods, 3 (New York, Albany, Chicago), classes 32, churches 422, ministers 446, number of families 34,521, number of communicants 53,007, infants baptized during the past year 3,155, adults baptized 399, catechumens 19,826, Sunday-school scholars 38,539. Contributions for religious and benevolent purposes \$135,814, for congregational purposes \$402,900. One of the classes, that of Arcot, is in India; its membership (226) being deducted from the above total of members, the number of communicants in the United States will be found to amount to 52,781.

The fifty-seventh General Synod of the Reformed Protestant Dutch Church, convened at Newburg, New York, on June 3d, 1863, and organized by the election of the Rev. Dr. T. W. Chambers, of New York, as president, and the Rev. John Dewitt, of New Jersey, as assessor. The synod adopted, with but one dissenting voice, a series of resolutions on the state of the country, "tendering to the Government of the United States, and to those who represent it, the renewed expression of their warmest and deepest sympathy in its present protracted struggle to maintain its lawful authority, and to preserve unbroken the integrity and union of the States," declaring it their duty as ministers of the gospel and members of the synod "to strengthen by every possible means the hands of the Government, and to yield a cordial support to all such measures as may be necessary to suppress the existing rebellion, and to assert the complete authority of the Union over all its people, territory, and domain," and also declaring that they would "hail with satisfaction the earliest practicable period for the introduction and establishment of a salutary peace, founded on the full ascendancy of law and rightful authority, and guaranteed in its permanency by the removal or the sufficient coercion and restraint of whatever causes tend necessarily to imperil the existence of the nation, and to endanger the preservation of the Union."

The Reformed Dutch Church has, besides the missions in India, which constitute the classis of Arcot, three missionary churches in China (2 in Amoy, 1 in Chioh-be), with 309 communicants, and one missionary church in Japan (at Kanagawa). In 1857 the General Synod di-

rected the missionaries in China to apply to the particular synod of Albany to organize them into a classis as soon as they should have formed churches enough to make the permanency of such organization reasonably certain. The missionaries, however, did not regard the circumstances as favoring the formation of a classis of the Reformed Dutch Church, and deemed it preferable to form, in conjunction with three native congregations, established by English Presbyterians, a separate organization called "The Great Presbyterial or Classical Council of Amoy." The General Synod of the Church in 1863 adhered to its former resolution, and instructed the Board of Foreign Missions to inform the missionaries of the wish and expectation of the General Synod to have their action conform as soon as possible to the resolution of 1857.

Among the other acts of the General Synod we may mention its resolution to accept a proposal from the New School Presbyterian General Assembly, to open correspondence with the latter body "on the same terms on which they (the General Synod) correspond with other bodies," and to reopen a correspondence with the German Reformed Church, which some years ago was terminated by a vote of the General Synod against the most earnest protestations of the German Reformed Church.

The German Reformed Church consists of two synods, one east and the other west. The Eastern Synod, according to the statistics of 1863 (which statistics are, however, not in all respects complete) has 15 classes, 253 ministers, 711 congregations, and 79,676 members; and the Western Synod has 11 classes, 179 ministers, 411 congregations, and 21,015 members. The two synods together contain 26 classes, 432 members, 1,122 congregations, and 100,691 members. The synods and the classes both meet annually, the first in the fall, the latter in the spring. The denomination has five German and 4 English periodicals, 5 literary institutions, and 3 theological seminaries.

The Triennial General Convention assembled at Pittsburg on November 18th, 1863. With this convention a new era begins in the German Reformed Church, for it was the first clothed not only with advisory, but judicatory power. Delegates were present from all the classes, except three, Virginia, North Carolina, and Indiana. The Rev. Dr. J. W. Nevin was elected president. The proceedings presented many points of interest. An animated debate,

in particular, took place on the general introduction of the liturgy, which is now in use in the Eastern Synod. The Western Synod desired in place of it a new liturgy, and the General Convention complied with its desire. The following resolution on the state of the country was adopted:

Resolved, That in conformity with the admonitions of the Holy Scriptures, and in imitation of the example of our ecclesiastical fathers during the period of the Revolution, this synod admonishes the pastors and members of the churches under its care, to remember that the powers that be are ordained of God, and that it is the solemn duty of all Christians enjoying the protection of such civil rulers to pray for them, and that we should feel especially obligated to do during the time of peril like that through which our beloved country is now passing.

The three hundredth anniversary of the Heidelberg Catechism was commemorated during the year 1863, with much spirit and success by the German Reformed Church of this country. A grand convention was held in Philadelphia on the 19th of January, 1863, and lasted for several days. A number of essays, bearing upon important points in the history of the German Reformed Church, and prepared by some of the most prominent theologians of the German and Dutch Reformed Churches of Germany and Holland, were read to the convention, and subsequently published in a volume, called the "Tercentenary Monument." A superb triglot edition of the catechism, in Latin, German and English, was also published under the auspices of the church, in commemoration of the tercentenary.

REYNOLDS, JOHN FULTON, a major-general of U. S. volunteers, born in Lancaster, Pa., in 1820, killed at the battle of Gettysburg, July 1st, 1863. He graduated at West Point on the 30th of June, 1841, and on the 23d of October following, received his commission as second lieutenant in the third artillery. On the 13th of June, 1846, he was promoted to the rank of first lieutenant, and served throughout the Mexican war, winning the brevets of captain and major for his "gallant and meritorious conduct" at Monterey and Buena Vista. After his return from Mexico he was engaged in military service in California, and against the Indians on the Pacific coast. In 1852 he was appointed aid to Gen. Wool, and on the 3d of March, 1855, was promoted to a captaincy in the third artillery. On the 14th of May, 1861, he was appointed lieutenant-colonel of the 14th U. S. infantry. On the 20th of August, 1861, he was commissioned brigadier-general of volunteers, and appointed to the command of the first brigade of the Pennsylvania reserve corps, then under Gen. McCall. In June, 1862, the Reserves joined the army of the Potomac, on the peninsula, and Gen. Reynolds, on the 26th of June, 1862, participated in the battle of Mechanicsville, and the next day took part in the severe battle of Gaines's Mill. He was also engaged at Savage Station, and at Charles City Cross Roads, where he took command of the division

after Gen. McCall was taken prisoner, and at a late hour the same day was himself captured by the enemy and sent to Richmond. For his gallantry in these battles he received the brevets of colonel and brigadier-general in the regular army. After his release from Richmond, and on the 26th of September, he returned to the command of his division, and soon after assumed command of the first army corps, by virtue of seniority of rank. He commanded this corps in the first battle of Fredericksburg. In January, 1863, he was nominated major-general of volunteers. In the battles at Chancellorsville his corps took no active part, being in the reserve. On the 12th of June he was appointed to the command of the right wing of Hooker's army, having charge of three corps. He hastened forward to Gettysburg at the direction of the commanding general, and arrived there in the vanguard of the Union army, and bringing his little corps of eight thousand men into action against a Confederate force of three times their number, he rode forward to reconnoitre a grove in which the enemy had placed a large body of sharpshooters; and dismounting from his horse, approached a fence and looked over toward the wood, when he was struck in the neck by a rifle ball, and, falling upon his face, died in a few minutes.

RHODE ISLAND. The draft for soldiers in Rhode Island was completed in August. The number of men drawn who entered the service was 109; the number drawn who procured substitutes was 679; and the number who commuted by paying three hundred dollars was 461. The quota required from the State was 2,880, and the number drafted including the fifty per cent. was 4,320. Those who did not enter the service, or find substitutes, or commute, were discharged as aliens, or physically disqualified. In addition 716 recruits were furnished during the year to regiments in the field; one colored regiment numbering 1,400 was raised, and a cavalry regiment of 400 men. The State paid a bounty of \$300 to recruits for regiments in the field.

The following amendment to the Constitution of the State was submitted to the people on Oct. 4th. It required a majority of three fifths of the votes to become adopted:

Alien residents of this State who have enlisted or volunteered, or who may enlist or volunteer in any of the regiments of this State, and shall be honorably discharged therefrom, and who are now or may become naturalized citizens of the U. States, shall be admitted to vote at all elections in this State on the same terms as native born citizens of this State.

The votes were given as follows:

	Ay.	No.
Providence county.....	869	1,590
Newport county	147	388
Kent county	93	316
Washington county.....	153	303
Bristol county.....	48	208
Total.....	1,310	2,805

The election for State officers was held on

the first Wednesday of April. The Republican Convention nominated for governor James T. Smith, and the Democratic and Union Convention nominated Wm. W. Hoppin, who declined. Wm. E. Cozzens was subsequently nominated. The votes were given as follows: Smith, 10,828; Cozzens, 7,537; scattering 302.

The Legislature elect was divided as follows:

	Senate.	House.
Republicans	22	54
Democrats	12	18

The votes for members of Congress were as follows:

	Repub.	Dem.
1st Dist.—Jenckes....	6,532	Bradley.... 4,616
2nd Dist.—Dixon.....	4,202	Brown..... 3,180

The balance in the State Treasury on May 1st, 1863, was \$57,384. The receipts during the fiscal year had been \$334,115. A new valuation of property was made throughout the State, by which the amount of taxable property was increased twenty-seven millions.

RUBIDIUM. By igniting in a suitable apparatus the carbonized bitartrate of its oxide, Bunsen has obtained metallic rubidium. From 75 grammes of the salt, he secured 5 grammes of the metal (about 3 dwts. Troy) in a single mass. The metal rubidium is very brilliant, like silver, and is white with a scarcely perceptible tinge of yellow. In air it oxidizes instantly to bluish-gray sub-oxide, and takes fire (after a few minutes) much more easily than potassium. At 10° C., it has about the hardness of iron; it melts at 58° 5' C., and below a red heat is converted into a vapor which is of a blue color with a shade of green. Its density is about 1.52. It is much more electro-positive than potassium, and upon water takes fire with a flame not distinguishable by the eye from that of the latter element. It burns with brilliancy in chlorine, and in the vapors of bromine, iodine, sulphur, and arsenic.—(*Ann. der Chem. und Pharm.*, CXXV. 367.)

In the mother-liquors from which salt has been extracted, at the Nauheim Salt Works, Böttger finds the chlorides not only of magnesium, potassium, and sodium, but also, in comparatively large quantities, of cæsium and rubidium, and a trace moreover of that of thallium. He considers this mother-liquor the readiest now known source of cæsium and rubidium.

RIOTS IN NEW YORK, BOSTON, AND ELSEWHERE. After several postponements Col. Nugent, the provost-marshal of New York city, was directed to prepare the central office of the acting assistant provost-marshal-general, for the immediate execution of the provisions of the act for enrolling and calling out the national forces. The several deputies received official requisitions direct from the President, calling for specified numbers of men, and were instructed to commence operations on the 11th of July. In compliance with this order Provost-Marshal Jenkins, of the ninth congressional district in New York, publicly announced

through the press, that on Saturday, the 11th, the ballots would be publicly counted at the corner of Forty-sixth street and Third avenue, and that immediately thereafter the wheel would be turned and the draft begin. Rumors of popular dissatisfaction were heard on every side, trouble was apprehended, and the police were notified to hold themselves in readiness for any emergency. On Saturday morning a large crowd assembled at the appointed place, but as everything was conducted quietly, systematically, and fairly, no opportunity for disturbance occurred. The day passed pleasantly, the crowd were in good humor, well known names were saluted with cheers, and at night as the superintendent of the police passed out from the office, he remarked that there was no danger to be apprehended; the Rubicon was passed, and all would go well. The names of the conscripts were published by the press of Sunday morning, with incidents, jocular and otherwise, connected with the proceedings. In the neighborhood in which the initial working of the law was attempted, an excitable element of the city's population resided. Very many poor men were, by the turn of the wheel, forced instantly as it were from home and comfort, wrested from the support of a needy family, to be sent they knew not whither, unless to the battle field, or, perhaps, to the grave. Such were the apprehensions of many imprudent persons, who were liable to the draft, and such their anxieties for the fate of their wives and children, that associations were formed to resist it, at the last alternative, with bloodshed. Some of the inhabitants of the 9th district met in secret places on Sunday, and resolved to resist the further drafting by force, and, if necessary, to proceed to extremity. On the following morning, Monday the 13th, organized parties of men went from yard to yard, from shop to shop, to compel the workmen to leave their labor and join the several processions which were wending their way toward the corner of Third avenue and Forty-sixth street. Unconscious of impending danger, Captain Jenkins, with his assistants, prepared for the morning's work, and in the presence of a great multitude, many of whom had crowded into the little room, the draft recommenced, a few names were called and registered, when a huge paving stone came crash through the window, and shivered into a thousand pieces the glass, knocked over two or three quiet observers, upset the inkstand on the reporters' table, and astonished somewhat the officials. Hardly had their surprise found expression in words before a second and a third stone was sent straight from the crowd among the officials and reporters behind the railing. As if emboldened by these acts, the crowd developed instantly into a mob, and with frantic yells passionately rushed upon the place, breaking down the doors, throwing helter-skelter the furniture, smashing into fragments the tables and desks, and venting their fury

over the remains of the boxes connected with the office. The wheel was taken up stairs and eventually saved, but nothing else was spared from absolute wreck. The marshal escaped uninjured, as did the reporters; but one of the deputies, Lieutenant Vanderpoel, was badly beaten and taken home for dead. Having destroyed the material of the office, the enraged multitude thought of an additional outrage, and regardless of the women and children who occupied the upper portion of the house, sprinkled camphene upon the lower floor and set the place ablaze. In two hours from that time the entire block, of which this was the corner building, was a pile of smoking brick and mortar. At an early stage of the proceedings, Chief Engineer Decker, of the Fire Department, arrived, but the incendiaries had taken possession of the hydrants, and would not allow the engines to be worked. After much persuasion and an exhibition of absolute heroism, Chief Decker obtained permission to restrain the flames from further devastation, but it was too late to be of service. Police Superintendent Kennedy was attacked by the mob and nearly killed.

In the meantime, word had been sent to the lower part of the city, that the long threatened resistance had been made, and that success had crowned the efforts of the anti-conscriptionists. The most exaggerated rumors obtained ready currency, and while every one from the mayor to the ward-constable stood aghast, all business was suspended, and the voice of trade was hushed. There were no troops in the city, the militia regiments being nearly all on duty in Pennsylvania; the force in the several forts in the harbor was small, and the Navy Yard, at Brooklyn, could spare but a few marines. While therefore Maj.-Gen. Sandford, on the part of the State militia, Maj.-Gen. Wool, on behalf of the General Government, Mayor Opdyke, as the chief magistrate of the city, and their several staffs, were "consulting," the mob, whose proportions had attained the size of an army, had resolved itself into a peregrinating column of incendiaries, and was in the successful pursuit of an uninterrupted career of murder, pillage, and arson. No person was sacred from their touch, and before the day had passed, gangs of thieves joined the crowd, and availing themselves of the general disturbance, reaped vast harvests of money and other *desiderata*, which they unblushingly took from the pockets and persons of their proprietors. Several members of the press, in pursuit of their normal avocations, were maltreated and abused. A noticeable case was that a reporter, then of the "New York Times," who was surrounded by a set of ruffians on the corner of 46th street and Third avenue. Without a moment's parley, they robbed him of his watch, chain, diamond pin, and wallet, knocked him down, raised the cry of "Abolitionist!" and left him to the tender mercies of the crowd. Supposing him to be a spy, the rioters kicked and trampled

upon him, pulled him by the hair up and down the streets, and only let him alone when some firemen interfered in his behalf. He was carried to a neighboring engine-house, and barely escaped being stoned to death by a second crowd, which had gathered about the door, and whose volleys of missiles broke every window in the house. A fortunate incident attracted their attention, and the wounded man was permitted later in the day to retire.

While the up-town mob was delighting itself in the destruction of a brown stone block in Lexington Avenue, a detachment of marines, some fifty in number, with muskets and blank cartridges, were sent to quell the riot. Taking a Third avenue car, at the Broadway junction, they started for 46th street. Information reached the mob that the soldiers were coming, and they prepared to receive them. Tearing up the rails, they rendered it impossible for the car to be drawn beyond 43d street, and at that point several thousand men, women, and children stood anxiously waiting for the storming party of fifty. Many of them, particularly the women, were armed with pieces of thick telegraph wire, which they had broken from the lines, and which, as will be seen, they used with great effect. Such a scene has rarely been witnessed; the men were sober and quiet, but malignant and fearful in their aspect; the women, on the contrary, were merry, singing and dancing; they cheered their husbands, chatted gaily with bystanders, and boasted of what should yet be done by their brawny arms. As the car, containing the marines, reached the centre of the block, the lieutenant in command ordered the men to leave and form in line. Small groups and gatherings of women and children greeted them with hisses and derisive cheers; to these they paid no attention, but marched toward the larger mob at the corner. The lieutenant called upon the crowd to disperse, but no further notice was taken of the command than a sullen refusal; he then ordered his men to fire, which they did, with blank cartridges, and of course, with blank effect. The smoke had not cleared away before the infuriated mob rushed with vengeance upon the little band, broke them into confusion, seized their muskets, trampled them under foot, beat them with sticks, punched them with the long wires, and laughed at their impotence. Several of the marines managed to escape into the side streets, but each fugitive had his gang of temporary pursuers, and quite a number were killed, while all were terribly beaten. From this moment the spirit of the mob seemed changed. Resistance was no longer thought of: attack was the watchword. A squad of police attempted to arrest some of the ringleaders at this point, but they were signally defeated, badly beaten, and one of them was killed. Elated with this triumph, excited by the spilled blood, and the instinct of passion, the mob seemed beside themselves, and proposed an immediate on-

slaught upon the principal streets, the hotels, and other public buildings.

Against the negroes there seemed to exist a peculiar animosity, and incidents of barbaric cruelty occurred. The restaurants and hotels whose servants were of this class, were taken possession of by the rioters, who broke windows, smashed furniture, maltreated guests, and sought to kill the fleeing and terrified servants. In the afternoon, by which time the whole city was in alarm, the crowd had increased to great numbers, when some one suggested that the Colored Half Orphan Asylum was not far from their immediate neighborhood. The asylum was a substantial edifice, erected a few years since, on Fifth avenue, between Forty-third and Forty-fourth streets, and afforded a home to between 700 and 800 children. Its destruction was at once resolved upon, and headed by a gang of half-grown men, the crowd rapidly moved on the asylum. Entering it by doors or windows, they ransacked every room, drove the women and nurses out, and flung the children hither and thither, kicked and cuffed the little ones without regard to humanity, and after throwing everything they could lay their hands upon into the street, deliberately set fire to the building. Here, too, Chief Decker interfered. With one hand he extinguished the flames, with his person barred the progress of the rioters, and strove by the force of words to deter them from their purpose. But his efforts were in vain. With fearful yells and screams, the boys set fire again to the doomed building, while the men looked sternly on, and the women walked off laden with the spoils.

About the same hour, an attack was made upon the armory in Second avenue, corner of Twenty-first street. The object was to secure rifles and muskets which it was known the Government had stored there. Early in the day, the police authorities had placed a squad of men in charge of the building, with instructions to guard it and to prevent the entrance of any one. Against an army of three or four thousand rough men it was no easy task to defend the building. Sledge hammers and stones soon broke open the doors, when a grand rush was made, and the men began to push in. The police knew their duty, and did it; their first volley killed two men, and a subsequent discharge three others; but then the crowd pushed on more vigorously. A severe hand-to-hand fight ensued among those at the door, while the crowd outside stoned the windows, breaking every pane of glass in the building. Finding resistance useless, the police retired and effected an escape through a rear door. The building was instantly fired, and soon fell a mass of blackened ruins.

In the lower part of the city, the evidences of riotous demonstrations were confined to attacks upon colored men, and a threatened demolition of the Tribune newspaper office. Toward five o'clock, the Forty-sixth street crowd made its way to the park, where they joined a

smaller gathering of boys and men, who had been hooting and sneering at the establishment of the New York Tribune, and subjecting its inmates generally to an unpleasant inquisition. After some delay, the more venturesome approached the doors of the office. These were locked, but a few vigorous pushes broke them, and the crowd rushed in. The counters and desks were broken up, and preparations were made for a grand illumination, when a detachment of police suddenly made its appearance, and charged full upon them. So sudden was the attack that a panic seized them, and they fled like chaff before the wind.

The assaults upon negroes were among the most fiendish features of the proceedings. It was estimated that, during the twenty-four hours, at least a dozen unfortunate colored persons were brutally murdered, while some were beaten, forced to jump into the river, or driven from the city. A colored man residing in Carmine street, was caught by a mob of about four hundred men and boys, as he was leaving his stable in Clarkson street. Instantly an attack was made upon him, and he was beaten and kicked until life was seemingly extinct, and then his body was suspended to a tree, a fire kindled beneath it, the heat of which restored the sufferer to consciousness, while the smoke stifled him.

Several fierce battles were fought between the police and the mob, in which the former were invariably the victors. During the day and night, the city was protected solely and only by this arm of the civil service.

The office of Provost-Marshall Manierre was on Broadway near Twenty-eighth street. At nine o'clock drafting was begun there, but in consequence of the disturbances in the 9th district, at twelve o'clock it was suspended. Shortly afterward the mob arrived and entered and sacked the office, set fire to the building, and destroyed the entire block, of which the office was the centre building. The famous Bull's Head Hotel, on Forty-fourth street, between Lexington and Fifth avenues, shared the fate of other fine structures, and was burned to the ground, because its proprietor declined to furnish liquor. The residences of Provost-Marshall Jenkins and Postmaster Wakeman, the 23d precinct station house, and two brown stone private dwellings on Lexington Avenue, were totally destroyed by fire; several members of the police were killed and many badly wounded, some twenty negroes were murdered, and a number of marines stoned to death.

The Board of Aldermen of the city met at half past one o'clock, P. M., but a quorum not being present, that body adjourned.

It was the general belief, that a decided action on the part of the board in providing means whereby poor men, who should be drafted, would be furnished with substitutes, would at once check the riot; and to meet this view, Alderman Hall had proposed this resolution:

Whereas, It is apparent that the three hundred dol-

lar clause in the National Enrolment act of the late Congress is calculated to inflict great privations upon the poorer classes of our citizens; therefore, be it

Resolved, That the Committee on National Affairs be, and they are hereby, instructed to report to this board a plan whereby an appropriation can be made, to pay the commutation of such of our poorest citizens as are likely to be most sorely affected by the enforcement of a conscription.

Maj.-Gen. Wool was in command of the Department of the East, with his headquarters in New York, and about noon issued the following call to "veteran volunteers":

The veterans who have recently returned from the field of battle, have again an opportunity of serving, not only their country, but the great emporium of New York, from the threatened dangers of a ruthless mob.

The Commanding General of the Eastern Department trusts that those who have exhibited so much bravery in the field of battle, will not hesitate to come forward at this time, to tender their services to the Mayor, to stay the ravages of the city by men who have lost all sense of obligations to their country, as well as to the city of New York.

JOHN E. WOOL, Major-General.

P. S.—These men are requested to report to Major-General Sandford, corner of Elm and White streets, on Tuesday, July 14th, at 10 A. M.

The next morning at eight o'clock, several colonels of returned volunteer regiments called upon their former commands to rally, and in pursuance of orders from Gen. Wool, Gen. Harvey Brown assumed command of the Federal troops in the city.

The mob had full control of the city, and omitted no opportunity of breaking laws or violating ordinances, until midnight, when a heavy rain dispersed them.

On Tuesday, the spirit of the riot was more malignant. Governor Seymour having arrived in the city, issued the following proclamation:

NEW YORK, July 14th, 1863.

To the People of the City of New York:

A riotous demonstration in your city, originating in opposition to the conscription of soldiers for the military service of the United States, has swelled into vast proportions, directing its fury against the property and lives of peaceful citizens. I know that many who have participated in these proceedings would not have allowed themselves to be carried to such extremes of violence and of wrong, except under an apprehension of injustice, but such persons are reminded that the only opposition to the conscription which can be allowed, is an appeal to the courts.

The right of every citizen to make such an appeal will be maintained, and the decision of the courts must be respected and obeyed by rulers and people alike. No other course is consistent with the maintenance of the laws, the peace and order of the city, and the safety of its inhabitants.

Riotous proceedings must, and shall, be put down. The laws of the State of New York must be enforced, its peace and order maintained, and the lives and property of all its citizens protected at any and every hazard. The rights of every citizen will be properly guarded and defended by the Chief Magistrate of the State.

I do, therefore, call upon all persons engaged in these riotous proceedings, to retire to their homes and employments, declaring to them that unless they do so at once, I shall use all the power necessary to restore the peace and order of the city. I also call upon all well-disposed persons not enrolled for the preservation of order, to pursue their ordinary avocations.

Let all citizens stand firmly by the constituted au-

thorities, sustaining law and order in the city, and ready to answer any such demand as circumstances may render necessary for me to make upon their services; and they may rely upon a rigid enforcement of the laws of this State against all who violate them.

HORATIO SEYMOUR, Governor.

It was soon urged upon the governor that measures more rigorous must be taken; and becoming convinced that such was the case, he was induced to declare the city in a state of insurrection in the following proclamation:

NEW YORK, July 14th, 1863.

Whereas, It is manifest that combinations for forcible resistance to the laws of the State of New York and the execution of civil and criminal process exist in the city and county of New York, whereby the peace and safety of the city, and the lives and property of its inhabitants, are endangered; and

Whereas, The power of the said city and county has been exerted and is not sufficient to enable the officers of the said city and county to maintain the laws of the State and execute the legal process of its officers; and

Whereas, Application has been made to me by the sheriff of the city and county of New York, to declare the said city and county to be in a state of insurrection;

Now therefore I, Horatio Seymour, governor of the State of New York, and commander-in-chief of the forces of the same, do in its name, and by its authority, issue this proclamation, in accordance with the statute in such case made and provided, and do hereby declare the city and county of New York to be in a state of insurrection, and give notice to all persons that the means provided by the laws of this State for the maintenance of law and order will be employed to whatever degree may be necessary, and that all persons who shall, after the publication of this proclamation, resist, or aid and assist in resisting, any force ordered out by the Governor to quell or suppress such insurrection, will render themselves liable to the penalties prescribed by law. HORATIO SEYMOUR.

These proclamations, however, produced but little effect, and the second day was in many of its features the worst of the four. The stores were closed in all parts of the city; no signs of trade were visible. Between the several military officers, into whose hands the defence of the city and the suppression of the riot were committed, there were difficulties of which no one could obtain a satisfactory explanation. General Wool, as commanding general of the Department of the East, was in supreme control of the regular troops, and he delegated departments of his small command to General Brown and General Sandford, at different times, so that it was difficult for his more immediate subordinates to know the authority of each. The police were true to their great trust, and won for themselves an honorable record. The principal feature of these twenty-four hours was the onset upon the negroes, which was attended with fearful atrocities. Whenever a negro was found, death was his inexorable fate. Old men and infirm women were beaten without mercy; whole neighborhoods were burned out; the life of no person of color was safe for a moment in the presence of the infuriated mob. On several occasions during the day the military and the rioters were brought face to face. Twice an attempt was made to resist the progress of the soldiers, but ball cartridges were used and the rioters fled.

Lieut. Wood, in command of 150 "regulars" from Fort Lafayette, was directed to disperse a crowd of perhaps 2,000 men, who had assembled in the vicinity of Grand and Pitt streets. On the approach of the soldiers, the lieut. called upon the crowd to disperse. A volley of stones was the reply. He then ordered his men to fire above the crowd, which being done without apparent effect, he directed them to fire and take aim. The result was 12 dead men, several wounded, and a general flight. Two children were among the killed. In this way the mob was frequently broken up, but as it would continually reorganize, it became necessary to adopt some plan of absolute and general dispersion. The citizens generally prepared to defend themselves and their property. The governor was induced to speak from the steps of the City Hall to an immense gathering of the people, among whom were undoubtedly many who had been engaged in the riots. The governor made a few remarks, intended to allay the popular excitement, and earnestly counselled obedience to the laws and the constituted authorities. He also read the following note explanatory of what he had done about the draft:

NEW YORK, July 13th, 1863.

MY DEAR SIR: I have received your note about the draft. On Saturday last I sent my adjutant-general to Washington for the purpose of urging a suspension of the draft, for I know that the city of New York can furnish its full quota by volunteering. I have received a dispatch from Gen. Sprague that the draft is suspended. There is no doubt the conscription is postponed. I learn this from a number of sources. If I get any information of a change of policy at Washington, I will let you know. Truly yours,

HORATIO SEYMOUR.

Hon. SAMUEL SLOAN, President of the Hudson River Railroad Company, New York.

The governor was listened to with great respect, and the reading of the above letter caused general satisfaction among his hearers.

The murder of Col. O'Brien was, perhaps, the most fearful of the many incidents which occurred. Commissioned to disperse a mob in the Third avenue, he gallantly charged upon them with an efficient detachment of troops, and succeeded in breaking the front and turning the face of the rioters. Having sprained his ankle during the excitement, he stepped into a drug store in 32d street, while his command passed on. The store was soon surrounded, and the proprietor fearing it would be sacked begged the colonel to get away as soon as possible. With a brave heart O'Brien went out among the crowd alone; and while parleying with them a treacherous blow from behind laid him senseless upon the pavement. The crowd fell upon the prostrate form, beating and bruising it. For hours the bleeding body was drawn up and down the street, receiving a brutal treatment almost unparalleled, after which it was carried, with shouts and groans, to his residence, where the same conduct was repeated. A priest with kindly courtesy interfered, and read over the dead body

the prayers of its church, after which he directed the remains to be taken into the house. Hardly was his back turned, however, when a brutal fellow stamped upon the corpse, and his example was followed by many others.

Events followed each other in rapid succession. The Secretary of War ordered home the militia regiments that were doing duty in Pennsylvania, and the rioters became, to a great extent, "demoralized," their leaders having been killed or taken prisoners. The stages and cars were withdrawn from the streets until Thursday, when, by order of the Police Commissioners, the regular running was resumed. On Thursday, Mayor Opdyke issued the following proclamation:

MAYOR'S OFFICE, NEW YORK, July 15th, 1863.

To the Citizens of New York:

I am happy to announce to you that the riot which has for two days disgraced our city, has been in good measure subjected to the control of the public authorities. It would not have interrupted your peace for a day but for the temporary absence of all our organized local militia. What now remains of the mob are fragments prowling about for plunder; and for the purpose of meeting these, and saving the military and police from the exhaustion of continued movements, you are invited to form voluntary associations under competent leaders, to patrol and guard your various districts. With these exceptions you are again requested to resume your accustomed daily avocations. This is as necessary to your personal security as to the peace of the city.

The various lines of omnibuses, railways and telegrams must be put in full operation immediately. Adequate military protection against their further interruption will be furnished on application to the military authorities of the State.

Fellow citizens, the laws must and shall be obeyed; public order shall not be broken with impunity. Our first duty now is to restore the public peace and preserve it unbroken, and to pursue and punish the offenders against the majesty of the laws.

GEORGE OPDYKE, Mayor.

On the 16th the following notice was placarded about the city:

NEW YORK, July 16th, 1863.

To the men of New York, who are now called in many of the papers rioters:

Men! I am not able, owing to the rheumatism in my limbs, to visit you; but that is not a reason why you should not pay me a visit in your whole strength. Come, then, to-morrow (Friday) at two o'clock, to my residence, northwest corner of Madison Avenue and Thirty-sixth street. I shall have a speech prepared for you.

There is abundant space for the meeting around my house. I can address you from the corner of the balcony. If I should be unable to stand during its delivery, you will permit me to address you sitting; my voice is much stronger than my limbs. I take upon myself the responsibility of assuring you that, in paying me this visit, or in retiring from it, you shall not be disturbed by any exhibition of municipal or military presence. You who are Catholics, or as many of you as are, have a right to visit your bishop without molestation.

+ JOHN HUGHES.

Archbishop of New York.

Its authenticity was doubted by many persons, but inquiry proved that it was genuine.

Before the appointed hour on the following day, a crowd of between 3,000 and 5,000 persons assembled in front of the archbishop's residence, and patiently waited for his appear-

ance. Precisely at 2 P. M., the archbishop, clad in his purple robes and the other insignia of his office, stepped upon the balcony from a window of his house, and was greeted with long and enthusiastic applause. A number of priests and influential citizens belonging to the Roman Catholic Church accompanied him upon the balcony. After courteously acknowledging his reception, the archbishop proceeded to address his audience at some length, in an off-hand manner, alternately eliciting their laughter and their applause. The following is the portion of his remarks which particularly related to the riots:

In the case of a violent and unjust assault on you without provocation, my notion is, that every man has a right to defend his house or his shanty at the risk of his life. The cause, however, must be just. It must be aggressive, not offensive. Do you want my advice? I have been hurt by the reports that you are rioters. You cannot imagine that I could hear those things without being pained grievously. Is there not some way by which you can stop these proceedings, and support the laws, of which none have been enacted against you as Irishmen and Catholics? You have suffered enough already. No Government can stand or protect itself unless it protects its citizens. Military force will be let loose on you, and you know what that is. The innocent will be shot down and the guilty likely to escape. Would it not be better for you to retire quietly; not to give up your principles or convictions, but to keep out of the crowd where immortal souls are launched into eternity, and, at all events, get into no trouble till you are at home? Would it not be better? There is one thing in which I would ask your advice. When these so-called riots are over, and the blame is justly laid on Irish Catholics, I wish you to tell me in what country I could claim to be born? [Voices—Ireland.] Yes, but what shall I say if these stories be true? Ireland, that never committed a single act of cruelty until she was oppressed. Ireland, that has been the mother of heroes and poets, but never the mother of cowards. I took upon myself to say that you should not be molested in paying me a visit. I thank you for your kindness, and I hope nothing will occur till you return home, and if, by chance, as you go thither, you should meet a police officer or a military man, why just—look at him.

The archbishop then retired, and his hearers slowly and peaceably returned to their homes.

By this time it had become generally known that the draft was suspended. The municipal authorities had passed a relief bill to pay \$300 commutation, or substitute money, to every drafted man of the poorer classes. These facts contributed greatly to appease the mob, though they had been practically subdued by the gallant conduct of the regular troops, the militia, and the police. The riot ceased as an organized operation, on the 16th instant. A large force of cavalry patrolled the disaffected districts on the evening of that day, and met with no armed opposition. On the morning of the 17th the cavalry found and took possession of seventy stands of revolvers and carbines, and several casks of pavingstones, which had been secreted by the rioters, and also captured several prisoners. On the 18th instant, Maj.-Gen. Wool was relieved of the command of the Department of the East by Maj.-Gen. Dix, by orders of the President, dated the 15th.

Gen. Harvey Brown who had been in command of the city and harbor of New York (under General Wool) during the riots, was relieved on the 17th instant by Brig.-Gen. Canby.

The twelve militia regiments had by this time returned from Pennsylvania. Detachments from their number, amounting to over 1,000 men, were constantly on duty for many days after the suppression of the riots, and the entire 1st division was ready to support them at short notice. But there was not the least symptom of a renewal of the disturbances, although rioters were arrested by civil processes, tried, and sent to prison, from day to day.

The number of persons killed during these terrible riots is not known. The mortality statistics for the week, at the city inspector's office, show an increase of 450 over the average weekly mortality of the year. About 90 deaths from gunshot wounds were reported at his office. It was said—but this is, doubtless, incorrect—that the remains of many of the rioters were secretly taken into the country and buried there. A large number of wounded persons probably died during the following week. Governor Seymour in his annual message states that the "number of killed and wounded is estimated by the police to be at least one thousand." The police and the regular and local military forces suffered but little in comparison with the mob. With regard to the militia of the 1st division, General Sandford gives the exact figures of their losses in a portion of the riots. He says that "one private soldier was killed; and twenty-two men dangerously, and fifty officers and soldiers slightly, wounded, at the defeat of the mob in 42d street, the storming of the barricade erected by the rioters in 29th street, and in the other conflicts which followed."

The losses, by the destruction of buildings and other property, were originally estimated at \$400,000. A committee was appointed by the county supervisors, to audit claims for damages, for all of which the county was responsible, under the law, and for the payment of which a large appropriation was made. The aggregate of the claims far surpassed the highest expectations, amounting to over \$2,500,000. The committee disallowed many, and cut down most of the remainder 50 per cent. At last accounts over \$1,000,000 had been paid to claimants, and it was supposed that \$500,000 more would be needed for the same purpose.

On the night of the 15th of July, a riot broke out in Boston, under the following circumstances: Two of the provost-marshal's assistants were engaged in distributing notifications to drafted men, when one of the officers was struck by a woman, at whose house a notification had been left. An attempt being made to arrest the woman, a number of her friends collected and attacked the officer, severely beating him. A police force was soon upon the ground, and succeeded in temporarily

quelling the disturbance; but a crowd lingered in the vicinity of the scene, and increased as night approached, and the military authorities thought it best to order out the Lancers, the 11th battery (Capt. Jones), the 44th regiment, three companies from Fort Warren, a company of regulars from Fort Independence, and a squad of the second cavalry from Readsville, to check the riot which was believed to be imminent. The entire police force was also placed on duty, and stationed at points where difficulties were most likely to occur. About 8½ P. M., a crowd of men and boys, estimated at from 500 to 1,000, gathered in front of the armory of the 11th battery, in Cooper street, and although warned off by Captain Jones, the commanding officer, threw a shower of stones and bricks at the building, breaking the windows and the door, and wounding several of the soldiers. The mob then attempted to carry the building by storm, and had succeeded in forcing an entrance, when a gun loaded with canister shot was fired into them with terrible effect, but they did not break and run until a bayonet charge was made upon them. Six or eight persons were killed on the spot, and a large number wounded. Simultaneously with the attack on the armory a mob of several hundred persons broke into the gun store of Thomas P. Barnes, in Dock Square, and carried away about a hundred muskets and a large quantity of pistols and bowie knives. They next made a rush at the gun store of Wm. Read and Son, Faneuil Hall Square, but the police had received information of the intended attack, and were on hand in time to repel it. One of the rioters was shot by the police, and a few others were slightly injured. The formidable array of military and police, and the promptness with which they had quelled disturbances thus far, seemed to frighten the rioters at this stage of operations, and they gradually dispersed. The only other riotous incident of note during the night was an attempt to set fire to the armory in Cooper street, in the absence of the guard. The fire was soon discovered and extinguished, with but little loss. This was the only riot of any importance in Boston during the year.

At Portsmouth, N. H., there was some trouble on the day of drafting. An excited throng of men, women, and children, gathered about the provost-marshal's office, which was in charge of volunteers from Fort Constitution, and U. S. marines from the navy yard, under command of Col. Marston. A large police force was also in attendance, and instructed to disperse the crowd. Two men who resisted were taken to the station house. About 9½ P. M., an attack was made upon the station house by about 100 friends of the arrested parties, but was repelled by the small force of police then on the ground. A squad of soldiers from the provost-marshal's office was sent to their assistance, and charged upon the mob with bayonets, dispersing it instantly. Two of the police and four of the rioters were wounded, but none re-

ported killed; and there was no further obstruction of the draft in Portsmouth.

A disturbance which threatened at one time to assume formidable proportions occurred in Holmes county, Ohio, in June. It appears that on the 5th of that month, Elias Robinson, an enrolling officer, was stoned out of Richland township by a party of men, of whom the names of four were known. Captain Drake, the provost-marshal of that district, went with a posse of men to the village of Napoleon, in the above-named township, to arrest those persons, and found them in the upper story of a house, armed and ready for resistance. They refused to surrender, saying that they would not consent to be tried by court-martial. On the promise, however, that they should be tried by the U. S. court at Cleveland, they gave themselves up, and the party started for Wooster. On the way they met a party of fifteen or twenty armed men, friends of the prisoners, who were apparently designing to rescue them. But when Greiner, one of the arrested persons, informed them that they were going voluntarily to Cleveland for trial, the armed men were satisfied, and dispersed. Other armed parties were soon after met, and satisfied with the same explanation, and disappeared. But before Captain Drake had succeeded in getting his prisoners beyond the limits of Holmes county he was overtaken by an armed force of 150 men, who ordered the prisoners from the wagons, took revolvers from several of Captain Drake's men, and surrounding Captain Drake with a score of rifles pointed at his breast, demanded that he should take an oath never to enter Holmes county on such business again, on penalty of death. It is said that he refused to take the oath and also to give up his pistols. The rescuers finally let him and his posse go, and carried the prisoners back to their homes. On the 12th and 13th the enrolling officers were also driven out of two of the townships of Holmes county.

These facts having been reported to the United States authorities, Colonel Parrot, provost-marshal of the State, was ordered to call out troops and suppress the insurrection. About 600 soldiers, infantry, cavalry, and artillery, were at once sent up to Holmes county, under command of General Mason. Previous to their departure, Governor Tod addressed the following letter to the commandant:

THE STATE OF OHIO, EXECUTIVE DEPARTMENT, }
COLUMBUS, June 16th, 1863. }

Brig.-Gen. Mason, Present:

Learning that you are about to send a military force to Holmes county, for the purpose of arresting a body of armed men who are there assembled to resist the execution of the laws of the United States, I have to request that, before firing upon the party, you send forward, under a flag of truce, the enclosed appeal or proclamation I have made to them. If, in obedience to my admonition, the party shall promptly offer to disperse, that you permit them to do so. Of course, I do not wish, in the slightest degree, to interfere with the performance of any military duty committed to any of your officers before this assemblage took place. Should

the rioters refuse to give obedience to my request, then show them no quarter whatever.

Respectfully yours,
DAVID TOD,
Governor of the State of Ohio.

EXECUTIVE DEPARTMENT, COLUMBUS, }
June 16th, 1863. }

To the men who are now assembled in Holmes county for the purpose of using armed force in resisting the execution of the laws of the National Government:

I have heard, with pain and mortification, of your unlawful assemblage; and, as governor of the State to which you owe obedience, and as the friend of law and order, as well as the friend of yourselves and your families, I call upon you to at once disperse and return to your quiet homes.

This order must be immediately complied with, or the consequences to yourselves will be destructive in the extreme.

The Government, both of the State and nation, must and shall be maintained.

Do not indulge the belief, for a moment, that there is not a power at hand to compel obedience to what I now require of you. Time cannot be given you for schemes or machinations of any kind whatever.

I have felt it my duty to give you this timely warning; and having done my duty, sincerely hope you will do yours.

DAVID TOD, Governor.

In the meantime it was reported that over 1,000 men from Holmes, Knox, Coshocton, Summit, and other counties, armed with squirrel rifles and revolvers, were in camp at Napoleon, and regularly organized. On the arrival of the U. S. troops in the county, a large force under the command of Colonel Wallace was distributed in squads throughout the township. Several collisions took place between small parties of the soldiers and the insurgents, without serious results, until a committee of the most influential citizens of the county undertook to compromise the difficulty without further bloodshed. This was finally done, on the terms that the four men who had been engaged in driving out Enrolling Officer Robinson should deliver themselves up for trial by the United States court, and that Provost-Marshal Drake should be allowed to arrest nine persons who had taken an important part in the rescue. With this understanding the soldiers were withdrawn, and the insurgents dispersed. The arrests were made, as agreed upon, without difficulty.

Riots occurred during the year in portions of North Carolina under rebel rule. On the 18th of March a mob of soldiers' wives at Salisbury, being impelled by hunger, armed themselves with hatchets, and made an attack on the railroad depot, where flour was stored. The agent in charge, finding remonstrance useless, gave them ten barrels of flour. The women also carried off several bags of salt. Another flour operator bought off the enraged women with ten barrels, and another with three. A dealer in molasses surrendered all he had of that article; two or three other merchants were compelled to give up provisions in the same way. Later in the month disturbances of a similar character, in which women alone were concerned, occurred at High Point, near Raleigh.

On the 9th of November, a party of soldiers belonging to Benning's (Georgia) brigade, passing through Raleigh, attacked the office of the "Standard" newspaper, throwing the type into the street, and doing considerable other damage. On being addressed by Governor Vance, the soldiers desisted from the work. On the following day, by way of retaliation for the assault on the "Standard" office, a mob of about 200 citizens attacked the "State Journal" office, broke its presses, and knocked its type into "pi." The "Raleigh Register" was also doomed to destruction, but was spared at the earnest solicitations of the governor, Mayor Harrison, and others.

A women's bread riot occurred in Mobile on the 5th of September. (*See ALABAMA.*)

Richmond was also visited by a women's bread riot, of which none of the Southern papers give a detailed account. It was reported that 5,000 women were engaged in it, and that not only flour stores and bakers' shops were cleared out, but also dry goods, millinery, and fancy goods stores. The riot was finally checked, partly by force and partly by promises that bread would be freely distributed to the hungry. A Richmond paper stated that 2,900 loaves per month were distributed free to the needy families of soldiers in the field.

Popular disturbances of less importance occurred at several other places both at the North and South.

ROBINSON, EDWARD, an American philologist and biblical scholar, born in Southington, Conn., April 10th, 1794, died in New York, Jan. 27th, 1863. He was graduated at Hamilton College, N. Y., in 1816, remained there for a year as tutor, and in 1821 removed to Andover, Mass., where he studied Hebrew and became associated with Prof. Stuart of the theological seminary in the translation of some text books from the German and in the instruction of his classes. In 1826 he went to Europe, spent several years in travel and study, and in 1828 was married to Miss Theresa A. L. von Jakob, daughter of Prof. von Jakob, of Halle, and widely known in Europe and America by her writings published under the *nom de plume* of "Talvi." Returning to America in 1830, he received the appointment of professor extraordinary of sacred literature and librarian at Andover, which he resigned in 1833 and removed to Boston. Four years later he was appointed professor of biblical literature in Union Theological Seminary of the city of New York, which position he held until his death. Previous to entering upon the active duties of his professorship he made a visit to Palestine, and in company with Dr. Eli Smith, devoted a year or more to a minute and careful geographical survey of that country. At Berlin he embodied the results of his visit in a narrative published simultaneously in Europe and America under the title of "Biblical Researches in Palestine, and in the Adjacent Countries, a Journal of Travels in the year 1838," (3 vols. 8vo, Halle, London

and Boston, 1841). The work was received with great favor by biblical scholars, and immediately became a leading book of reference for all students in that department of research. In 1840 he took up his residence in New York, and for a number of years was occupied exclusively with the duties of his professorship and with philological and geographical studies. In 1852 he revisited Palestine with Dr. Smith for the purpose of completing the investigations previously commenced, and in 1856 published a supplementary volume embodying his new discoveries, in connection with a revised edition of his original work. During the latter part of his life he was engaged upon a physical and historical geography of the Holy Land, which he did not live to complete. Among his other literary productions were translations of Buttmann's Greek Grammar and Gesenius's Hebrew Lexicon; A Greek and English Lexicon of the New Testament; "The Harmony of the Four Gospels," in Greek and in English; editions of Calmet's "Biblical Dictionary," and other works, &c. He also edited for several years the "Biblical Repository," a theological quarterly, and the "Bibliotheca Sacra," with which it was subsequently united. He was a prominent member of the American geographical, oriental, and ethnological societies, and received the degree of D. D. from Dartmouth College and the University of Halle, and that of LL.D. from Yale College. He was in feeble health during the latter part of his life and in the summer of 1862 visited Germany for surgical treatment of his eyes, which were for some time threatened with total deprivation of sight. He died of dropsy, having for a few months previous been unable to discharge the active duties of his professorship.

ROMAN CATHOLIC CHURCH. The present Head of the Church is Pope Pius IX., before his elevation to the Papal See, Count John Maria Mastai Ferretti, born at Sinigaglia, on 13th of May, 1792; after the death of Pope Gregory XVI. (1st June, 1846), elected Pope 16th June, 1846; crowned 21st June, 1846. The Pope is assisted in the administration of the Church by the college of cardinals, which consists (Oct., 1863) of 6 cardinal bishops, 46 cardinal priests, and 10 cardinal deacons. The majority of the cardinals are natives of Italy; of foreigners, there are now in the college of cardinals 8 Frenchmen, 4 Germans, 4 Spaniards, 1 Hungarian, 1 Slavonian, 1 Englishman, 1 Portuguese, 1 Belgian. According to the *Annuario Pontifico*, for 1863, there are five patriarchates of the Oriental Rite with patriarchal jurisdiction, namely: three in Antioch for the Melchites, Maronites, and Syrians; one in Babylon for the Chaldeans; one in Cilicia for the Armenians. There are, further, seven patriarchates of the Latin Rite, namely: Constantinople, Alexandria, Antioch, Jerusalem, Venice, West India, and Lisbon. There are 176 archbishoprics; of the 131 belonging to the Latin Rite, 12 are dependent directly upon the

Roman patriarchate; 119 of these sees are endowed with church provinces. There are 694 bishoprics—640 of Latin, 54 of Oriental Rites. At this moment there are filled 646 bishoprics, with residence. Beside these, there are 234 titular bishoprics, that is, *in partibus infidelium*; so that the total of the bishops amounts to 980.

The population connected at the present with the Roman Catholic Church amounts to about 185,041,000, of whom 38,759,000 belong to America, 138,103,000 to Europe, 7,167,000 to Asia, 1,113,000 to Africa, and 280,000 to Australia and Polynesia.

It has for a long time been the endeavor of the Popes to educate at Rome theological students from all countries of the world, and to found for that purpose national ecclesiastical seminaries. The total number of seminaries at Rome is 25, containing 1,027 students. Among them are the Roman seminary, with 94 students; the Pio seminary, with 76; the Vatican seminary, with 41; the French, with 58; the South American, with 45; the North American, with 53. The Propaganda college contains 128 students; the German, 59; the English and the Pio-English together, 49; the Scotch, 15; the Irish, 50; the Belgian, 6; the Græco-Ruthenian, 22; the Lombard, 11.

On October 18th, 1862, the Pope addressed the following letter on the subject of the war in the United States, to the archbishop of New York:

To our Venerable Brother, John, Archbishop of New York.

POPE PIUS IX.

Venerable Brother, Health and Apostolic Benediction: Amongst the various and most oppressive cares which weigh on us in those turbulent and perilous times, we are greatly afflicted by the truly lamentable state in which the Christian people of the United States of America are placed by the destructive civil war broken out amongst them.

For, venerable brother, we cannot but be overwhelmed with the deepest sorrow whilst we recapitulate, with paternal feelings, the slaughter, ruin, destruction, devastation, and the other innumerable and ever-to-be deplored calamities by which the people themselves are most miserably harassed and lacerated. Hence, we have not ceased to offer up, in the humility of our hearts, our most fervent prayers to God, that He would deliver them from so many and so great evils.

And we are fully assured that you also, venerable brother, pray and implore, without ceasing, the Lord of Mercies to grant solid peace and prosperity to that country. But since we, by virtue of the office of apostolic ministry, embrace, with the deepest sentiments of charity, all the nations of the Christian world, and, though unworthy, administer here on earth the vicergerent work of Him who is the Author of Peace and the Lover of Charity, we cannot refrain from inculcating again and again, on the minds of the people themselves, and their chief rulers, mutual charity and peace.

Wherefore, we write you this letter, in which we urge you, venerable brother, with all the force and earnestness of our mind, to exhort, with your eminent piety and episcopal zeal, your clergy and faithful, to offer up their prayers, and also apply all your study and exertion, with the people and their chief rulers, to restore forthwith the desired tranquillity and peace by which the happiness of both the Christian and the civil republic is principally maintained. Wherefore, omit

nothing you can undertake and accomplish by your wisdom, authority and exertion, as far as compatible with the nature of the holy ministry, to conciliate the minds of the combatants, pacify, reconcile, and bring back the desired tranquillity and peace, by all those means that are most conducive to the best interests of the people.

Take every pains, besides, to cause the people and their chief rulers seriously to reflect on the grievous evils with which they are afflicted, and which are the result of civil war, the direst, most destructive and dismal of all the evils that could befall a people or nation.

Neither omit to admonish and exhort the people and their supreme rulers, even in our name, that, with conciliated minds, they would embrace peace, and love each other with uninterrupted charity. For we are confident that they would comply with our paternal admonitions and hearken to our words the more willingly, as of themselves they plainly and clearly understand that we are influenced by no political reasons, no earthly considerations, but impelled solely by paternal charity, to exhort them to tranquillity and peace. And study with your surpassing wisdom, to persuade all that true prosperity, even in this life, is sought for in vain out of the true religion of Christ and its salutary doctrines.

We have no hesitation, venerable brother, but that, calling to your aid the services and assistance even of your associate bishops, you would abundantly satisfy these our wishes, and by your wise and prudent efforts bring a matter of such moment to a happy termination.

We wish you, moreover, to be informed that we write in a similar manner this very day to our venerable brother John Mary, archbishop of New Orleans, that, counselling and conferring with you, he would direct all his thoughts and care most earnestly to accomplish the same object.

May God, rich in mercy, grant that these our most ardent desires be accomplished, and as soon as possible our heart may exult in the Lord over peace restored to that people.

In fine, it is most pleasing to us to avail ourselves of this opportunity to again testify the special esteem in which we hold you. Of which, also, receive a most assured pledge, the apostolic benediction, which, coming from the inmost recesses of our heart, we most lovingly bestow on you, venerable brother, and the flock committed to your charge.

Dated Rome, at St. Peter's, Oct. 18th, 1862, in the 17th year of our Pontificate. POPE PIUS IX.

In consequence of these letters the following correspondence took place between Mr. Jefferson Davis and Pope Pius IX.:

RICHMOND, September 23d, 1863.

Very Venerable Sovereign Pontiff: The letters which you have written to the clergy of New Orleans and New York have been communicated to me, and I have read with emotion the deep grief therein expressed for the ruin and devastation caused by the war which is now being waged by the United States against the States and people which have selected me as their President, and your orders to your clergy to exhort the people to peace and charity. I am deeply sensible of the Christian charity which has impelled you to this reiterated appeal to the clergy. It is for this reason that I feel it my duty to express personally, and in the name of the Confederate States, our gratitude for such sentiments of Christian good-feeling and love, and to assure your Holiness that the people, threatened even on their own hearths with the most cruel oppression and terrible carnage, is desirous now, as it has always been, to see the end of this impious war; that we have ever addressed prayers to heaven for that issue which your Holiness now desires; that we desire none of our enemy's possessions, but that we fight merely to resist the devastation of our country, and the shedding of our best blood, and to force them to let us live in peace under the protection of our own institutions, and under

our laws, which not only insure to every one the enjoyment of his temporal rights, but also the free exercise of his religion. I pray your Holiness to accept on the part of myself and the people of the Confederate States, our sincere thanks for your efforts in favor of peace. May the Lord preserve the days of your Holiness, and keep you under his divine protection.

JEFFERSON DAVIS.

Illustrious and Honorable President: We have just received, with all suitable welcome, the persons sent by you to place in our hands your letter, dated 23d of September last. Not slight was the pleasure we experienced when we learned, from these persons and the letter, with what feelings of joy and gratitude you were animated, illustrious and honorable President, as soon as you were informed of our letters to our venerable brothers, John Archbishop of New York and John Archbishop of New Orleans, dated the 18th of October of last year, and in which we have, with all our strength, excited and exhorted these venerable brothers that in their episcopal piety and solicitude they should endeavor, with the most ardent zeal, and in our name, to bring about the end of the fatal civil war which has broken out in those countries, in order that the American people may obtain peace and concord, and dwell charitably together. It is particularly agreeable to us to see that you, illustrious and honorable President, and your people, are animated with the same desires of peace and tranquillity which we have in our letters inculcated upon our venerable brothers. May it please God at the same time to make the other peoples of America and their rulers, reflecting seriously how terrible is civil war, and what calamities it engenders, listen to the inspirations of a calmer spirit, and adopt resolutely the part of peace. As for us, we shall not cease to offer up the most fervent prayers to God Almighty that He may pour out upon all the peoples of America the spirit of peace and charity, and that He will stop the great evils which afflict them. We, at the same time, beseech the God of mercy and pity to shed abroad upon you the light of His grace, and attach you to us by a perfect friendship.

Given at Rome, at St. Peter's, the 3d day of December, 1863, of our Pontificate 18. PIUS IX.

One of the most important events in the history of the Roman Catholic Church in Europe during the year 1863 was the meeting of the Roman Catholic Congress at Malines, Belgium. In Germany and Switzerland the Roman Catholics have had, since 1848, annual conventions of priests and laymen, to consult on important interests of the church. Belgium, in 1863, followed their example, and held its first "Catholic Congress." This Belgian assembly awakened a more universal interest than the Congress of Germany and Switzerland, as it was understood that it would virtually be a Congress of both Belgium and France, in the latter of which countries such meetings will not be allowed by the Government to take place, and that it would be, moreover, largely attended from nearly every country in Europe. The expectation that many celebrated priests and laymen from other countries would be present was realized, for England sent Cardinal Wiseman, and France Montalembert, De Broglie, and Cochin. Cardinal Wiseman made an eloquent speech on the religious and civil position of the Roman Catholics of England; but the great event in the history of the Congress was the speech of Count Montalembert on "Freedom of Worship." The orator spoke in the most eloquent terms against

every kind of religious intolerance. Though he did not expressly censure the legislation of such Catholic countries as prohibit or restrict the exercise of Protestant worship, nor the Papal efforts for keeping, by means of concordats, the Protestants excluded from the Catholic countries, he did so impliedly by saying: "I must confess that the enthusiastic devotion for religious freedom by which I am animated is not everywhere to be found among Catholics. They desire freedom for themselves, but that is of no great merit; men in general want freedom of every kind for themselves. But the freedom of creeds which we reject and deny terrifies and troubles many among us. If we inquire into the origin of this terror we shall find that it rests on the notion entertained by many Catholics, that freedom of worship is of anti-Christian origin. The consequence of this error have been seen in many bloodstained and deplorable pages in the book of history, though every impartial judge will confess that the cruelties of the Spanish Inquisition and of the edict of Nantes fell short of the horrors of the British reformation and its reign of terror." The sentiments of Count Montalembert were received by the Congress with great applause, and most of the papers of the Catholic world bestowed likewise upon his speech an unqualified approval; but the *Monde* of Paris, with a few other newspapers, rejected the views of Montalembert as uncatholic.

The Catholic Congress of Germany held its annual meeting at Frankfort-on-the-Main. There, as in Malines, the Congress claimed to be in favor of liberty, but did not express an opinion on the prohibition of Protestantism in Roman Catholic countries.

In a great many Catholic countries, the question whether Protestants should have equal rights with Catholics, was discussed with great animation. The republic of Ecuador concluded a concordat with the Pope, which contains the following articles:

1. The Catholic religion is the religion of the State; consequently the practice of any other mode of worship, rejected by the Church, is forbidden in the republic.
3. Every book forbidden by a bishop is confiscated by the Government.
6. The Government will lend the bishops its powerful aid in putting down every one who attempts to lead the faithful into the paths of error.
8. An ecclesiastic can be summoned to answer even for offences against the common law, before an ecclesiastical court alone.
9. The Pope grants permission to the clergy to pay taxes; but in case they do not, they are accountable for the failure, to their spiritual superiors only.
11. Every church and cloister has the right of asylum. No criminal can be seized in such places, without the express and particular consent of the authorities of the church.

The Government of the United States of Colombia (formerly New Granada) have introduced religious liberty. The Pope addressed an encyclical letter to the bishops of New Granada, in which he deplores cruel persecution con-

ducted by the Government against the doctrines, authority, and rights of the Church, and condemns the laws promulgated against the clergy and ecclesiastical property. The Pope censures the introduction of liberty of worship, and the conduct of the ecclesiastics who obey iniquitous laws. He praises the firmness of the bishops, for protesting against several laws passed by the Government, and for refusing to take the oath under the new Constitution, and enjoins the members of the clergy remaining faithful, together with the people, to persevere in their faith, and to pray God that the persecution may cease.

In Spain, the legislation against Protestant meetings continued to be strictly enforced. On April 23d, 1863, the Court of Appeal, in Granada, passed sentences in the case of the Protestants Matamoras, Trigo, and Alhama. Matamoras was condemned to nine years' punishment at the galleys, Alhama likewise to nine, and Trigo to seven. The queen subsequently commuted these sentences into an equal number of years of imprisonment.

In one of the Austrian provinces, the Tyrol, the bishops moved, at the Provincial Diet, that the Diet request the Imperial Government to exempt the Tyrol from the law which grants to the Protestants of Austria equal rights with the Roman Catholics, and to decree that no Protestant parish should exist in the Tyrol; that the public exercise of the Protestant religion be prohibited, and that Protestants shall have the right of acquiring landed property, only if authorized, in every case, by a special decree. This motion, after long debate, was adopted by thirty-four against eighteen votes, but the Imperial Government did not grant the request.

The Roman Catholic Church continued to make progress in a number of pagan countries. In China, the Church enjoys the efficient patronage of the Government, and the native Christians, among whom are a number of mandarins, are in no way molested in the free exercise of their religion. Very favorable news has been received from the missionaries in Thibet. They report that whole villages are embracing the Catholic religion, and that even numerous bonzes are asking for missionaries. The bloody persecution which for many years has been desolating the Roman Catholic congregations in Cochin China, has ceased. The cession of several provinces of Cochin China to France, and the establishment of a French protectorate over the adjoining kingdom of Farther India, make a rapid progress of the Roman Catholic Church in Farther India highly probable.

In Japan, chapels have been erected in the European settlements. In Africa, Madagascar especially bids fair to witness the progress of the Roman Catholic missions. In Turkey, the movement among the Bulgarians toward a union with the Roman Catholic Church has again made some progress.

RUSSIA, an empire in Northeastern Europe and Northern Asia. The reigning emperor is Alexander II. (Nicolajevitch), who was born 29th April (17th, old style), 1818, succeeded his father, Nicholas I. (Paulovitch), 2d March (18th Feb., o. s.), 1855, was crowned 7th September (26th August, o. s.), 1856. He was married on 28th April (16th, o. s.), 1841, to Maria Alexandrovna, daughter of the late Grand Duke Ludwig II., of Hesse Darmstadt. His oldest son and heir to the crown is the Czarévitch, Nicholas Alexandrovitch, born 20th September (8th, o. s.), 1843.

We can find room in this volume to notice only the emancipation movement in this great country.

On March 3d, 1863, the transitory epoch which the law for the abolition of serfdom had provided for, terminated, and serfdom definitely expired throughout the Russian empire. The event was celebrated everywhere with the greatest solemnity, and all classes of society showed a full consciousness of the immense influence which it cannot fail to have upon the destiny of Russia. On the immediate results which emancipation has already had in Russia, interesting statements have been published by an English clergyman, the Rev. J. Long, who spent five months in Russia, mainly in order to gain information from the best sources, on the facts connected with this movement. Mr. Long states that the serfs have shown by their peaceable demeanor, and by avoiding any violent excess, that they know how to appreciate their newly acquired liberty. As municipal constitutions were conceded to the peasants simultaneously with emancipation, Mr. Long found among intelligent Russians the conviction that provincial assemblies would be the results of municipal freedom, and that a Constitution would be the fruit of provincial assemblies. "To carry out the Emancipation Act, 1,500 unpaid justices of the peace were nominated by Government. The administration of these men, who were selected for their character and public spirit, generally gave satis-

faction, and it was intended that they should be continued, to discharge similar duties to those of county magistrates in England. Within two years, more than 8,000 new schools have sprung into existence, through individual efforts among the peasantry, and they are rapidly on the increase. The peasant is anxious to be able to read the laws by which he is governed; besides, the elevation of his social position through emancipation gives him the means, as well as the inclination, to learn to read. The example of peasant elevation in other parts of Europe confirms this. In Russia, before emancipation, there was scarcely a day school among the peasantry; but these 8,000 schools have arisen spontaneously from the wish of the peasants, aided by the clergy and gentry. The Government has spent nothing on them. The Emperor Nicholas allowed only colleges and universities, and that to a very limited degree: serf emancipation inaugurates the education of the masses.

"The social condition of the peasant is being improved. The anxiety of the peasant to purchase land, so strongly marked in France, is showing itself also in Russia, thus leading to habits of industry, in order to procure the means of making the purchase. Indolence, the natural fruit of serfdom, is giving way to the encouragement of industry. One million peasants have bought up the land on which they were formerly located, borrowing the money from Government. The price of land is rising all through Russia, owing to the peasants renting or hiring it to a far greater extent than formerly, though the enemies of emancipation said the peasants would be too indolent to cultivate the land. Money is no longer hidden in earthen pots in the ground, or in the wall, through fear of the steward. The peasants' houses in some quarters are exhibiting a greater appearance of comfort, and providing more rooms, instead of—after the old fashion—crowding twenty-five into a room. More houses have been built within the last two years than during the previous six."

S

SCHLESWIG-HOLSTEIN. Schleswig and Holstein are two duchies in Northern Europe, which, until November 15th, 1863, were a part of the dominions of the king of Denmark, but, having always had a different law of succession from Denmark Proper, claimed to become independent of Denmark upon the death of King Frederick VII. In Denmark Proper, the crown of the monarchy was transmissible to females; in the two duchies the Salic law prevailed, according to which the crown can only descend to heirs male. Prince Christian, of Schleswig-Holstein-Sonderburg-Glücksburg succeeded as King Christian IX., in the kingdom of Denmark; but in the two duchies the Prince

Frederic of Schleswig-Holstein-Sonderburg-Augustenburg claimed to be entitled to succession, and assumed at once the title of Duke of Schleswig-Holstein. He was recognized as such by the majority of the Diets of each duchy and by a considerable number of the German princes. The peculiar relations of Holstein to the German Confederacy, and its close connection with Schleswig, involved the whole of Germany in this Schleswig-Holstein difficulty, while a previous treaty of 1852, concerning the succession in the Danish monarchy, made it at once a European question, in which all the European powers felt a deep interest, and some even claimed a right to interfere.

The duchy of Schleswig has an area of 167 geographical square miles, with a population, in 1855, of 409,970; Holstein has an area of 155 geographical square miles, with a population of 544,419 inhabitants. Holstein is exclusively inhabited by Germans, and is a member of the German Confederacy. Schleswig is inhabited by a mixed population, consisting of Germans, Danes, and Frisians. The statistics of these three different nationalities are differently estimated; according to the *Almanac de Gotha* for 1864, they were as follows: 146,500 inhabitants speak German as their native language, 135,000 Danish, 85,000 Danish and German, and 33,000 Frisians. The little duchy of Lauenburg which is, like Holstein, exclusively inhabited by Germans, and belongs likewise to the German Confederacy, has a population of 50,147 inhabitants. Together the three duchies have an area of 341 geographical square miles, against 696 of Denmark Proper, and an aggregate population of 1,004,473, against 1,600,551 of Denmark Proper.

Schleswig does not belong to the German Confederacy; but, according to the fundamental law of the duchies, it is inseparably connected with Holstein. This fundamental law dates from the year 1460 when, Adolphus VIII., Count of Holstein and Duke of Schleswig, having died without direct issue, the estates of both united countries elected, after prolonged negotiations, King Christian I. of Denmark, of the house of Oldenburg, their duke and lord on these principal conditions: 1. That they elected him not in his quality as King of Denmark, but as Duke and Lord of Schleswig and Holstein. 2. That the estates and people of Schleswig-Holstein be free in future to elect their ruler from among his heirs, under certain safeguards. 3. That Schleswig and Holstein should remain forever undivided and inseparably united. All the following king-dukes of Denmark and Schleswig-Holstein, up to Frederic VII., deceased in 1863, confirmed this Magna Charta of the two duchies. In 1616 the estates of the two duchies consented to renounce their elective franchise in favor of the right of primogeniture. By a family statute of both the branches, into which the house of Oldenburg had divided in the 16th century, the law of male primogeniture and *agnatic (male)* lineal succession was finally substituted for the former system of election. Since 1660, only the *male line* of the house of Oldenburg was entitled to succession *in the duchies*. A different order of succession, however, was established in the kingdom of Denmark, by the *Lex Regia*, published by King Frederic III. in 1665. According to this law the *cognatic (female)* descendants of King Frederick were to succeed *in Denmark*, in case his male line should fail. The same king had already, in 1658, dissolved the feudal connection between Denmark and Schleswig, and declared the latter an independent state. Holstein had always been a fief of the German empire, and, in 1815, became an independent

state of the restored German Confederacy. As, at the beginning of the present century, it became apparent that the male line of King Frederick III. was likely soon to fail, the kings of Denmark made great efforts to secure, in such an event, the integrity of the Danish monarchy. King Christian VIII., by his famous Letters Patent of July 8th, 1846, declared that the validity of the cognatic succession in the duchies of Schleswig and Lauenburg was unquestionable, but that in regard to some parts of the duchy of Holstein there existed certain facts militating against an equally positive opinion concerning the rights of inheritance of all his royal hereditary successors in that duchy. The estates of Holstein (on August 3d) applied to the German Diet for protection. The king, in reply (September 7th), declared that it had never entered his mind to violate the independence of Holstein, its constitution, and its union with Schleswig, and that it was not his object to infringe upon well established rights of the agnates. Still the efforts, both for dissolving the connection between Schleswig and Holstein, and for securing the integrity of the monarchy, were not abandoned. On March 24th, 1848, King Frederic VII. declared, by royal proclamation, that Denmark and Schleswig were henceforth to form an inseparable union under the same constitution, thus dissolving the ancient union between Schleswig and Holstein. This proclamation led to a three years' war between the people of the duchies, who regarded the proclamation as an abolition of their independence, and the Government of Denmark. The German Diet sent auxiliary troops to assist Holstein, but in 1851 peace was restored on the basis of the state of things before the war. The people of the duchies complained, however, that the Danish Government persistently continued to violate their constitutional rights. Against some of these measures complained of, not only the states of the German Confederacy, but also the Governments of England and Russia remonstrated. On November 18th, 1863, the present king of Denmark, Christian IX., signed a new constitution, under which Schleswig was again incorporated in the kingdom of Denmark. The German Diet, and, particularly, the Governments of Austria and Prussia declared this to be a violation of the constitutional rights of the duchies, and by order of the Federal Diet, troops of Austria, Prussia, Saxony, and Hanover, were called out to prevent the execution of the new Danish Constitution. But the people of the two duchies, who were supported by the almost unanimous voice of the people of all the German States, and by several German Governments, asserted that all and every connection between the duchies and Denmark had ceased forever with the extinction of the last prince of the royal line of Oldenburg, on the 15th of November, 1863, and that, in accordance with the law of succession, Prince Frederick of Schleswig-Holstein-Sonderburg-Au-

gustenburg is the next legitimate heir to the duchies.

To forestall the claims which it was foreseen Prince Frederick of Schleswig-Holstein-Sonderburg-Augustenburg would raise to the succession in the duchies upon the death of the childless King Frederick VII., the Danish Government had prevailed upon the Great Powers of Europe (England, Austria, Prussia, France, Russia, and Sweden) to agree upon the "Treaty of London," of May 8th, 1852, by which the said Powers acknowledged the "integrity of the Danish monarchy" as a perpetual principle in European politics, and engaged to recognize the succession of Prince Christian, of Glücksburg, and his male issue, to all the lands united under the sceptre of Frederic VII. The London treaty was afterward acceded to by Hanover, Würtemberg, Saxony, Electoral Hesse, Oldenburg, Holland, Belgium, Spain, Portugal, Greece, and the Italian States. The Duke of Augustenburg was also prevailed upon to sign an act (December 30th, 1852), by which he renounced his claims to succession. The London treaty was not acceded to by the Federal Diet, and the Diets of the two duchies. The eldest son and the brother of the Duke of Augustenburg declared that they did not consider themselves bound by the declaration of the duke, and the former (Prince Frederic) therefore, in the place of his father, asserted his claims to the duchies. Those who advocate his rights, assert, that "to change the order of succession in any country subject to princely rule, it is required to obtain: 1. The consent and renunciation of all the male and female heirs (agnati and cognati), whose right to the inheritance would be impaired by the change. 2. The consent of the people of that country, or its lawful representatives, and that neither of these two conditions has been fulfilled.

The Federal Diet of Germany, at the close of 1863, had not yet decided the question, whether Germany would recognize Prince Frederic as Duke of Holstein, or confine itself to compel Denmark to repeal the Constitution of November 18th, 1863, and give guarantees for the protection of the constitutional rights of the duchies.

SIDERIUM. In course of the development of his invention for producing on a commercial scale the metal magnesium, Mr. E. Sonnstadt, of Loughborough, England, is said to have discovered a new metal. This he found in the "carcasse" remaining when the chloride of magnesium is obtained by evaporating and igniting the mixed chloride of the same and of sodium. In many of its reactions this new metal corresponds almost precisely with iron, for which it may hitherto have been mistaken. It appears to occur invariably in connection with magnesium, which cannot be entirely freed from it.

SOUTH CAROLINA. A special session of the Legislature of South Carolina was held in April. Governor Bonham, in his message,

made a number of recommendations of which the following are the most important: To prohibit the planting of over a half, or at most one acre with cotton, to the "full hand" (able-bodied slave), and that the hands to be enumerated should only be such as "work in the crop;" also, to adopt some legislation to arrest the purchase and monopoly of articles of prime necessity, even when it is not intended to export them beyond the limits of the State; also, to prevent the undue distillation of spirits from the cereals and molasses, for which the enormous profits on whiskey offered a great temptation. The governor declares that the act to supply negro labor for the coast defences cannot be made effectual for the accomplishment of its objects.

Early in June, Colonel Montgomery, with five companies of his negro regiment, and a section of company G, 3d Rhode Island artillery, left Beaufort with three steamers on an expedition up the Combahee river. They carried eight guns, a portion of them 10-lb. Parrotts, and the rest 12 and 24-lb. howitzers. The party landed at Field's Point, about twenty miles up the river, and there found two deserted forts and numerous rifle pits. A rebel force appeared in the distance, but hastily retired. Leaving a few men in the forts and rifle pits, Colonel Montgomery threw out the balance of his command as skirmishers, making the enemy believe that he had a large force in reserve. Upon the withdrawal of the rebels, the gangs of slaves who were just going to work on the plantations broke away from their overseers, and came rushing down to the landing-place in droves of hundreds and thousands. They were sent on board the steamers, till all the spare room was taken up. Meanwhile companies of negro soldiers were sent in various directions to burn buildings and secure horses, provisions, and other property. Several rice-mills, store houses filled with rice and cotton, and every house, barn, or other building belonging to any known rebel were burned, and all the portable property of value brought away. One store house that was fired contained two years' crops of rice; and another \$10,000 worth of cotton. The locks by which the plantations are irrigated were destroyed, flooding the fields of rice and destroying the young crop. One company alone burned twenty-five buildings, many of them containing immense quantities of rice. All this work of devastation was done in a few hours, when Colonel Montgomery thought it prudent to withdraw, and did so without loss, arriving at Beaufort within twenty-nine hours of the time of his departure. The trophies of the expedition were over eight hundred slaves, men, women, and children, several hundred bags of hominy, a fine lot of horses, and a large quantity of household furniture.

About the same time that the above raid was made, Colonel Barton, with a large picked force, made an expedition on three steamers

to the village of Bluffton. The village was captured, with but little opposition, and burned to the ground, only one building, a church, being spared.

On the 12th of June, General Hunter was relieved from his command by order of the President, and General Q. A. Gillmore was appointed his successor.

General Gillmore's operations against Charleston caused a feeling of anxiety among the people of that city such as they never felt before. The newspapers were filled with appeals to the courage and local pride of the citizens. They were called upon to welcome "destruction and extermination" sooner than succumb to "Yankee dominion and all its nameless enormities." Gov. Bonham repeated the same sentiments in his proclamation ordering non-combatants to leave the city. The commission who had been elected in 1862, to remove women, children, and other non-combatants from the city, whenever, in their opinion, it should become necessary, now proceeded to act. Free transportation and board, and lodging, at safe places out of the city, were given to all persons who were unable to pay. It is probable that the city was (with but few exceptions) cleared of all women and children before Gillmore commenced throwing his shells into it.

The disposition of the Federal negro troops captured by the rebels on Morris and James Islands, was a mystery which the rebel authorities did not take the trouble to clear up. It was generally supposed that they had been hung or sold into slavery. General Beauregard authorized a statement, on the 12th of August in the "Charleston Mercury," to the effect that the Secretary of War had ordered the negro prisoners to be turned over to the State authorities by virtue of the joint resolution of Congress. Governor Bonham had therefore been notified that the negroes were held subject to his orders. The governor had requested General Beauregard to retain them in military custody until he could make arrangements to dispose of them. That was their situation on the date above given, and of their fate nothing further is definitely known.

The proceedings of the Legislature during the latter part of the year were chiefly confined to the increase, equipment, and maintenance of the military forces of the State; and were devoid of special interest.

SPAIN, a kingdom in Southern Europe. The present queen is Isabella II., who was born 10th of October, 1830, and succeeded her father, the late King Ferdinand VI., on 29th of September, 1833, remaining under guardianship until 8th of November, 1843, when she was declared of age by the Cortes (Legislature). She was married 10th of October, 1846, to Francis d'Assisi, her cousin german. Her eldest son and heir to the throne is Alfons, Prince of Asturias, who was born 28th of November, 1857.

The difficulties between Spain and St. Do-

mingo form the only topic we can notice in this volume.

In Feb., 1863, the people of the late republic of Santo Domingo, which in 1861 was sold by its President Santana, to Spain, rose again in insurrection for the recovery of their national independence. The movement showed itself in particular in the two provinces of Cibao and Santiago de los Caballeros. The chief of the insurrection, Lucas de la Pena, had counted upon the support of the Government of Hayti; but the latter refused to take part in any hostile demonstrations, and the commander of Fort Liberté, who had favorably received a communication from the chief of the insurgents, and replied to it, was promptly deposed. On February 26th, a body of from six to seven hundred insurgents, under the command of Lucas de la Pena, presented themselves before the town of Guayabin, and captured the small garrison of twenty-four men. Almost at the same time they occupied the town of Savaneta. In Manga and Santiago the attempts at making an insurrection were unsuccessful. Savaneta was likewise soon wrested from them again, and on March 21st the whole insurrection seemed to be suppressed, and the captain-general proclaimed a general amnesty, from which he only exempted the leaders. Soon, however, the insurrection broke out again on a larger scale than before. Though the Spanish accounts and those received from the neighboring Turks Island (the latter were friendly to the cause of the insurgents) materially differed, there is no doubt that the Spanish forces were defeated in several engagements, and driven from Guayabin, Savaneta, Moca, la Vega, and Macoris. Even the city of Santiago, the largest city in the north, was burned by the insurgents, and the Spanish troops had to retire to the seaport town, Puerto Plata. But even this place was abandoned, on the ground that it was not adapted for a base of extensive operations, and Monte Christo, another seaport town near the Haytian frontier, selected for that purpose. The insurgents fought with the utmost bravery, and it was only owing to the immense superiority of the Spanish forces in numbers, that they had gradually to yield. An offer was made by the authorities at Santiago, to the President of Hayti, to annex themselves to Hayti; but the offer was not accepted. An appeal was made to all the republics of America for assistance, but although much sympathy was expressed for them, no material aid was given; and toward the close of the year, the insurrection, although still holding out, had been greatly reduced.

STEAM. The controversy between Messrs. Dickerson and Isherwood on the value of expansion in the cylinder of the steam engine, has been brought prominently before the public by a trial at Washington, in which Mr. Dickerson appeared as attorney to establish the value of the Sickles cut-off in the saving of fuel, and

Mr. Isherwood as a witness on the opposite side. The jury gave their verdict for a saving of 34 per cent. produced by the Sickles cut-off. The positions taken by Mr. Isherwood in his book are as follows:

The causes of the great discrepancy found to exist in steam engines using steam with different measures of expansion between the economy as promised by the law of Mariotte and as realized experimentally, may be summed up as follows, premising that the same initial and back pressures are supposed to be employed in the cylinder, namely:

1st. The law of the expansion of steam is not rigorously that of Mariotte, even when condensation is prevented by superheating; the pressure decreases in a higher ratio than the volume increases.

2d. The condensation of steam in the cylinder due to the production of power.

3d. The condensation of steam in the cylinder due to superheating the back pressure vapor as a gas.

4th. The condensation of steam in the cylinder due to its expansion *per se*.

5th. The condensation of steam in the cylinder due to external radiation.

6th. The condensation of steam in the cylinder due to the re-evaporation of water deposited on its internal surface.

7th. The loss of dynamic effect in the cylinder clearance and steam-passage.

8th. The influence of the back pressure in the cylinder resisting the stroke of the piston.

9th. The influence of the pressure required to work the engine *per se*.

10th. The difference of dynamic effect due to an equal weight of steam used at the average cylinder pressure and at the boiler pressure.

To which Mr. Dickerson replies:

Now, each and all of these statements are either false or do not affect the economy of expansion any more than the economy of non-expansion.

1st. The first one is false. Expanded steam increases its pressure—not diminishes it—in a higher ratio than the volume increases; and this is the discovery of Regnault.

2d. The second one is false, no such condensation occurs; but if it did, there would be no difference of practical consequence between expansion and non-expansion.

3d. The third one is of itself immaterial, and not adverse to expansion.

4th. The steam does not condense by expansion in an engine, as Regnault shows.

5th. The loss by external radiation from the cylinder is too insignificant to mention, but Isherwood says of it that "the radiation from the exterior surface of the cylinder and the condensation by the interior surfaces will be about the same," whether expansion or non-expansion is used.

6th. No such effect is produced—no "water is deposited on the interior surface of the cylinder," and of course none is re-evaporated.

7th. The total loss of power by clearance is perfectly calculable, but is less with expansion than without it, although it is a greater percentage of the total power with expansion than without it.

8th and 9th. The answer is that the back pressure and friction are just like all other resistances which oppose the steam in its effort to drive down the piston—just such resistance as the friction of the boat going through the water, or of the mill-stone which grinds the grain—and by whatever means any of these resistances are overcome with less steam than otherwise would be needed, by that same means all of these resistances are overcome more economically.

But "back pressure" is diminished by increasing expansion—that is to say, a lower "vacuum" is produced by cutting off short than by following full stroke—and therefore, in respect to this item, there is a re-

duction of resistance to be overcome, effected by the very act of economizing the means by which it is to be overcome.

10th. I trust I shall not be considered intensely ignorant when I confess that I don't understand what this means—either philologically or scientifically considered.

SUEZ, CANAL OF. The project of a ship canal across the Isthmus of Suez, for which M. de Lesseps, a Frenchman, has received the concession from the Pasha of Egypt, is not only of the utmost importance for the commercial world, but has, of late, also led to some political complications. According to the plan of M. de Lesseps a canal was to be dug, ninety miles long, three hundred and thirty feet wide at the water line, and sloping at the sides down to the bottom, which was to be twenty feet below low-water level in the Mediterranean. A sluice-lock, three hundred and thirty feet long, by seventy wide, was to be formed at each end; and by taking advantage of the rise of the tides at Suez, it was expected, or hoped, that an additional depth of three or four feet might be obtained. The more formidable portions of the work would be two artificial harbors, necessary to be constructed at the ends of the canal; seeing that no ship could enter it from the sea except through a harbor protected at all times from sands and shoals. At Suez, the piers would have to be carried out to the length of three miles, in order to inclose a harbor deep enough for such a purpose, and would have to pass through shifting sand; but still the stone to construct them is near at hand, and the difficulties are only such as engineers are accustomed to deal with. At the Mediterranean end of the canal, however, near Tyneh or Pelusium, the indispensable harbor would be much more difficult of construction, and much more costly. The Nile annually pours out thirteen million cubic yards of sand and mud into the Mediterranean, beside that which is deposited on the land of the Delta, or Lower Egypt. These thirty million cubic yards are borne by a current directly toward the shore of the Mediterranean near the region of Tyneh, making the sea at that spot shallower and shallower every year, full of shifting mud banks and sand banks. The English, in general, showed a great opposition to the plan, and the French naturally attributed this to political reasons. After seven years of discussion, the matter was taken up, in 1855, somewhat in an international spirit. The nations that would be most benefited commercially by the opening of a canal across the isthmus—France, England, Austria, Prussia, and Holland—were invited by the pasha to send out a joint commission of civil engineers, to test the plans of Lesseps and Talabot, and to report upon the feasibility of the whole project. After they had made their report, a larger commission, appointed by the pasha, devoted the greater part of 1856 to a consideration of the matter. The commission came to the conclusion that a canal, differing in certain points from Lesseps' plan, could be

constructed with profit. The result of all this was: that M. de Lesseps obtained requisite powers from the pasha; that a company was formed; that the pasha and French shareholders agreed to furnish the funds; and that the works were commenced, and have been progressing, with a few interruptions, ever since.

The new canal commences many miles to the westward of Tyneh, near the old Damietta mouth of the Nile, and takes Lake Temsah on the way. As there is scarcely a drop of fresh water to be met with along the arid region to be traversed by the canal, and as the laborers employed in the works must be reckoned by tens of thousands, an important preliminary enterprise has been necessary, to bring the fresh water of the Nile to the villages or encampments where the laborers are stationed. This has been accomplished, from the Nile at Cairo to a point near Lake Temsah; from thence iron pipes convey the water along the northern half of the route toward Damietta, while arrangements are also being made for conveying it along the southern half toward Suez. Another auxiliary work is being constructed in the shape of a service-canal, designed to take men and materials from place to place. It was opened from Lake Temsah northward, some months ago.

Said Pasha of Egypt, although he always declared that the sanction of the Ottoman Porte was indispensable even for the commencement of the canal, did not debar the director of the company from preliminary works or from employing forced labor. He even became responsible for nearly one half of the capital of the company. On his death, the sultan was induced to visit Egypt and examine the works personally, and on his return to Constantinople, he declared that he could not sanction the large grants of territory which the company claimed, and which would have rendered them proprietors of a great portion of the soil of Egypt, and that, further, he could not allow the continuance of forced labor, which had decimated the people by exhaustion and fever. M. de Lesseps declared this order of the sultan contrary to his treaty with Said Pasha, and denied the right of the sultan to interfere in any way with its execution. The present Pasha of Egypt, Ismail, despatched, therefore, one of his councillors, Nubar Bey, to Paris, to lay before the company and its directors the chief demands of the Porte, which were concurred in by the pasha, and to entreat their acquiescence. When his offers were rejected, Nubar Bey laid the whole circumstances before three of the most eminent French lawyers, Odillon Bar-

rot, Jules Favre, and Dufaure, who declared in emphatic terms that the Government of Egypt had acted with perfect propriety, and that the canal company was unwise in asking for more than it had thought fit to accord.

SUMNER, Major-General Edwin Vose, an officer of U. S. volunteers, and brevet major-general in the U. S. army, born in Boston, Mass., in 1796, died at Syracuse, N. Y., March 21st, 1863. He was educated at the Milton Academy, Boston, and in March, 1819, was appointed second lieutenant in the 2d infantry, and served in the Black Hawk war. When the 2d regiment of dragoons was raised by Gen. Jackson, he was commissioned as its captain, and was for many years employed in service on the Indian frontier, and subsequently commanded the school of cavalry practice, at Carlisle, Penn. He was promoted to be major in 1846, and in April, 1847, led the famous cavalry charge at Cerro Gordo; was wounded, and obtained the brevet of lieutenant-colonel. At Contreras and Churubusco he won much honor, and at the battle of Molino del Rey commanded the entire cavalry, holding in check 5,000 Mexican lancers. For his gallant conduct, he received the brevet of colonel, and in July, 1848, was commissioned lieutenant-colonel of the 1st dragoons. At the close of the war, he was placed in command of the department of New Mexico. In 1855, he was promoted to the colonelcy of the 1st cavalry, and the following year was in command at Fort Leavenworth, Kansas. In July of 1857, he led a successful expedition against the Cheyenne Indians, and in 1858 was appointed commander of the department of the West. In March, 1861, he was appointed brigadier-general in the regular army, in place of General Twiggs, and in March, 1862, appointed commander of the first army corps in the army of the Potomac. At the siege of Yorktown he commanded the left wing, and was engaged in all the battles of the Chickahominy, during which he was twice wounded. For his services before Richmond, he was made major-general of volunteers, and brevet major-general in the regular army. Upon the reorganization of the army, Gen. Sumner was assigned to the second corps, and in the battle of Antietam, was wounded. Subsequently he was placed in command of the right grand division of the army of the Potomac, but, upon the appointment of Gen. Hooker as chief of that army, he asked to be relieved, and after a few weeks was ordered to the command of the army of the frontier. Upon the way thither he was taken sick, and died after a short illness, at Syracuse.

T

TELEGRAPH. The construction of a telegraph around the earth made a considerable progress during the year. Grants and privileges were made by the Russian and British Governments, which are highly favorable to this object. Through an arrangement with Mr. Perry McD. Collins, the Russian Government undertakes to construct a line of telegraph from St. Petersburg to the mouth of the Amoor river, in Eastern Asia, a distance of about seven thousand miles; and it has already built the line as far as Irrutsk, on Lake Baikal, nearly three fourths of the distance. Mr. Collins and his associates then take up the line at the mouth of the Amoor river, and continue it by way of Behring's strait, until it shall intersect at some point between Chicago and the Pacific coast, the present lines. The Russian Government grants the exclusive privilege for 33 years for the construction of this line through its territory on the northwest coast. The British Government has proceeded with great liberality relative to its territory, known as British Columbia. Where the line crosses Behring's strait is about 66° N. latitude. From the Russian line others will soon stretch into India and China, and other parts of Asia. A line from San Francisco already extends some distance north on the Pacific coast.

TENNESSEE. After the retreat of General Bragg from Murfreesboro' in July, Western and Middle Tennessee were entirely under the control of the Federal army. The advance of Gen. Burnside into East Tennessee was followed by a defeat of the Confederate force, and a reduction of their strength in that part of the State. (*See ARMY OPERATIONS.*) The subject of a restoration of the State to the Union was considerably discussed, and some conventions were held, one of which assembled at Nashville on the 1st of July. The military governor expressed a willingness to issue writs of election whenever the people in a suitable manner manifested their willingness and solicitude to choose legislators and commence in good faith the work of re-organization. The guerilla system prevailed so extensively that it furnished the greatest obstacle to this object. The State was exempted from the operation of the emancipation proclamation, and upon its re-organization an effort will probably be made to remove slavery. The views of Gov. Johnson were thus expressed in a public speech made in September:

Tennessee is not out of the Union, never has been and never will be out. The bonds of the Constitution and the Federal power will always prevent that. This Government is perpetual; provision is made for reforming the Government and amending the Constitution, and admitting States into the Union; not for letting them out of it. * * *

Where are we now? There is a rebellion; this was anticipated, as I said. The rebel army is driven back. Here lies your State; a sick man in his bed, emaciated and exhausted, paralyzed in all his powers and unable

to walk alone. The physician comes. Don't quarrel about antecedents, but administer to his wants; and cure him as quickly as possible. The United States sends an agent or a military governor, whichever you please to call him, to aid you in restoring your government. Whenever you desire, in good faith, to restore civil authority, you can do so, and a proclamation for an election will be issued as speedily as it is practicable to hold one. One by one all the agencies of your State government will be set in motion. A legislature will be elected. Judges will be appointed temporarily, until you can elect them at the polls; and so of sheriffs, county court judges, justices and other officers, until the way is fairly open for the people, and all the parts of civil government resume their ordinary functions. This is no nice intricate metaphysical question. It is a plain, common sense matter, and there is nothing in the way but obstinacy.

The provisional organization previously created by the President continued throughout the year, and on the 26th of January ensuing, Governor Johnson issued his proclamation for a State election. About twenty-five thousand of the citizens of the State entered the Union army, and several colored regiments were also organized. The desolations of the State in consequence of the war were without a parallel, especially in East Tennessee.

TERRITORIES OF THE UNITED STATES. These are Arizona, Colorado, Dakota, Idaho, Nebraska, Nevada, New Mexico, Utah, and Washington. These vast districts have attracted considerable attention during the year, in consequence of the mineral wealth of several of them. Large numbers of persons have emigrated thither, and mining has been commenced on an extensive scale. For the details of their area, population, and civil organizations, the reader is referred to the *ANNUAL CYCLOPEDIA*, 1862.

TEXAS. Gov. Lubbock of Texas, in his message to the Legislature on the 3d of February said that the State had contributed 68,500 men to the Confederate armies, or 4,773 in excess of her highest popular vote. He then estimated the number of men remaining in the State between the ages of 16 and 60, at only 27,000. In his message in November following, he states that the number of soldiers furnished by Texas had at that time reached the aggregate of 90,000. According to this estimate only 5,500 men were left between the ages of 16 and 60. In the latter message the governor discussed the situation of the Confederacy and the State at great length. With regard to the loss of Vicksburg and Port Hudson he makes the novel observation that those places cost the North a great deal more than they were worth, and thinks that the Confederacy could afford to fortify and lose several other places on the same terms. He denounced the system of exemptions and substitutes, and maintained that every man in the State, including aliens, should be forced into the army. He reported the revenues for the year to August 31st, at \$2,-

468,061 including a balance of \$36,866. The expenditures were the same, with a balance of \$15,819. Up to the same date the public works at the Texas Penitentiary had turned out 2,258-660 yards of cotton goods and 293,298 yards of woollens, of which the larger part had been distributed among the army. The State foundry had not been successful in the manufacture of cannon. Large quantities of percussion caps had, however, been made in the State. The governor recommended the appropriation of at least \$1,000,000 (to be based on cotton bonds, or that cotton be purchased and paid for in bonds, to supply the State with arms and munitions of war. He declared himself opposed to any peace which did not recognize the independence of the Confederate States. He "regards reconstruction" as intolerable on any terms, and would admit no State into the Confederacy whose laws did not recognize and protect slavery.

The tyrannical conduct of the rebel authorities in impressing men and seizing provisions produced great dissatisfaction throughout the State, alike among the soldiers and the people. Two serious riots occurred at Galveston. In one case, the troops, being short of rations, turned their guns on the town and compelled the commandant to give them what they wanted. In the other instance, the troops paraded the streets in a body, took the poor rations that had been issued in the morning and burned them in the public square, and demanded fresh and better ones, which were accordingly furnished. Desertions were numerous—sometimes as many as 50 or 60 a day. About 2,000 deserters had fortified themselves near the Red River, and defied the Confederacy. At last accounts they had been established at that rendezvous for eight months, and were constantly receiving accessions of discontented rebels and desperadoes.

The following were reported to be the prices of some articles in the State, in rebel money: corn meal, \$10 a bushel; flour, \$2 per lb.; coffee, \$20 per lb.; sugar, \$1 per lb.; butter, \$3 per lb.; eggs, \$4 a dozen; calf boots, from \$150 to \$175 per pair.

Blockade running via Nassau was brisk during the year. It was principally done by schooners, to and from the Brazos river, taking out cotton and bringing back materials of war, provisions and selected goods. Ten schooners with cotton were counted at one time in the Brazos river waiting a chance to get out. The enemy established a signal corps all along the Texas coast, in expectation of the arrival of a fleet of iron or steelclad blockade runners from Europe; but they did not come. The Anglo-rebel steamer, *Sir Wm. Peel*, with over 900 bales of cotton was captured by the sloop of war *Seminole*, as she was running out. She had taken to *Matamoras* a cargo of arms and ammunition contributed by the Southern Association in Europe; and it was believed that after landing her cotton at Nassau or Havana,

she was to be converted into a privateer. Her crew consisted of 50 men, some of whom belonged to the British navy.

The Legislature generally sustained the rebel cause during the year, but refused to pass a resolution recommending Congress to declare the Confederate notes a legal tender.

At the fall election Pendleton Murray was chosen governor. He is a native of Alabama, a lawyer by profession, and said to be intensely devoted to the Confederate cause.

THACKERAY, WILLIAM MAKEPEACE, an English author, born in Calcutta in 1811, died in London, December 24th, 1863. In early childhood he lost his father, a civil officer in the service of the East India Company, and when about seven years of age was carried to England. A vivid recollection of the country of his birth remained with him through life, and traits and reminiscences of Anglo-Indian society often occur in his novels. In London he was sent to the Charter-house school, and thence went to the University of Cambridge, which, however, he left without taking a degree. Inheriting upon coming of age a property of about £20,000, he went abroad with the idea of making art his profession, and for several years pursued his studies and travels in Germany, France, and Italy. He finally decided that literature rather than art was his proper vocation, and that the latter, if followed at all, should be made subordinate to his literary labors. The loss of a considerable portion of his property by unlucky speculations induced him to rely upon his pen for support, and returning to England, at the age of twenty-five, or thereabouts, he commenced the long struggle toward fame and publicity, which was at the last crowned with success.

His first essays were in the London "Times," and were on subjects connected with art and general literature. He then became a regular contributor to "Fraser's Magazine," under the pseudonyms of Michael Angelo Titmarsh and George Fitz-Boodle, Esq., and produced a variety of tales, criticisms, descriptive sketches and verses, which, though lively, and often showing originality of thought and direction, had more in them of the trifle than the worker with a purpose. Then came travelling sketches of men and manners, of which the "Paris Sketch Book" (2 vols., 1840) was his earliest separate publication, followed by the "Irish Sketch Book," and an amusing and highly characteristic account of a voyage to the East, entitled "From Cornhill to Cairo." During this period of gradually growing reputation, his hand could be frequently traced in the pages of Fraser, where his "Men's Wives," his "Yellow-plush Papers," his "Shabby-Genteel Story," his "Great Hoggarty Diamond," and his "Luck of Barry Lyndon," successively appeared. None of these obtained popularity, though the last is one of the most vigorous and dramatic tales in English literature. They are all marked by an exaggerated humor for

banter and indifference, characteristic of the periodical in which they appeared, which was at that time sarcastic and unscrupulous. But the germs of that delicate irony, and playful, yet chaste and vigorous style, for which he afterward became famous, are also clearly indicated.

The establishment of "Punch" in 1841 opened to Thackeray a new and congenial field of labor, in which some of his happiest efforts were achieved. With his connection with this periodical his contributions also became more tempered by feeling and taste, and he evidently discovered a purpose worthy of guiding and influencing his pen. In "Punch" appeared his "Snob Papers," his "Prize Novelists," his "Jeames's Diary," &c., beside many excellent lyrics and ludicrous ballads, all illustrated by quaint designs from his own pencil. It was the publication of "Vanity Fair" (1846-'48), however—a work declined by many publishers—that gave Thackeray his place among the chief novelists of modern times. It was succeeded in due course of time by three other novels of modern society, "Pendennis," "The Newcomes," and "Philip," and by two other tales illustrating an elder world of manners, "Esmond," and "The Virginians," of which the former is considered the most artistically complete and scholarly of any of his larger works. They have obtained, for the most part, a very wide popularity in Europe and America, and as striking pictures of social life in England, impregnated with kindly satire of prominent social faults, their excellence can be scarcely overrated. The characters are among the most real ever drawn by novelist, and the style is clear, admirably void of affectation and thoroughly English. A prominent feature of these, and, indeed, of most of his works, is the characteristic illustrations by himself.

Among his numerous minor works may be mentioned a series of Christmas books, including "Mrs. Perkins's Ball," "Our Street," "Dr. Birch," "The Kickleburys on the Rhine," "The Rose and the Ring," and "Rebecca and Rowena," all reflecting with equal force, though on a lesser scale, the qualities of his novels. In 1851-'52 he lectured to delighted audiences in England and America on the "English Humorists," and also in 1852-'56 on the "Four Georges." Both series of lectures were published in book form, and have added not a little to his reputation as an author. In 1860 the "Cornhill Magazine" was commenced under his editorship, and during the two years that he remained in that capacity, he published in the magazine "Lovel the Widower," and "The Adventures of Philip." Here also appeared a number of charming essays by him, lately published under the title of "The Roundabout Papers." He had commenced a new serial tale when death overtook him, respecting which we have the statement of Charles Dickens that "in respect of earnest feeling, far-seeing purpose, character, incident, and a certain picturesque

blending of the whole, it was much the best of all his works." He was found dead in his bed on the morning of December 24th; leaving two daughters, of whom one has already shown literary talents worthy of her name. His domestic happiness was saddened by the insanity of his wife, brought on many years ago by a fit of illness. Of his private character it is sufficient to say, that the death of no author, during the present century, has called forth more universal and genuine expressions of regret from all classes of the community.

THALLIUM. The contest between Mr. Crookes and M. Lamy in reference to priority of discovery of this metal, has been carried on during the past fourteen months, and chiefly by a paper read, Dec. 15th, 1862, by M. Dumas, before the French Academy, advocating the claim of Lamy, and by a reply in the Chemical News, Jan. 10th, 1863, by Mr. Crookes, in which latter—admitting that the exposure of the labelled metal in the International Exhibition (of 1862) constituted publication—Mr. Crookes' precedence in the discovery, not merely of a new element, but also of its *metallic* character, is clearly established. M. Lamy's first communication was published, May 16th, 1862. Mr. Crookes' specimen of thallium, labelled as "a new metallic element," and on a card described also as a "*heavy metal*, forming compounds which are volatile below a red heat," &c., was exposed to the view of scientific men in attendance on the exhibition, as early as May 1st of the same year. The same author had previously published the discovery of a new element, though at the dates of those earlier papers supposing it a metalloid.

Mr. Crookes has still more recently determined by means of spectrum observations the presence of thallium in varying proportions in many specimens of pyrites, sulphur, zinc, cadmium, sulphide of cadmium, and copper and bismuth ores. A native sulphur from Lipari contained so much thallium as almost to take rank as a new mineral.

The spectrum of thallium has been said to be characterized by a single bright green line, nearly coincident with Ba δ . This, owing to volatility of the thallium compounds, is usually perceived but a moment; hence its intensity and duration do not safely indicate the richness in thallium of the material thus examined. Usually, however, thallium is by the spectroscopist at once determined in pyrites, flue-dust, and the sediment of the lead-chamber in sulphuric acid manufacture; and the metal is now much sought in such sources. Prof. W. A. Miller does not agree in respect to the simplicity of the thallium spectrum. Having obtained this spectrum by the induction of spark in hydrogen gas, and secured a photograph of it on a collodion surface, he states that it is marked by several very characteristic groups of lines, recalling features of the spectra of cadmium, zinc, and less strongly, of lead.

U

UNITARIANS, or UNITARIAN CONGREGATIONALISTS. According to the monthly journal of the American Unitarian Association, the denomination numbered in 1863, in the United States, 260 "societies," of which 64 had no pastor; 343 ministers, of whom 140 were "not settled"; 2 theological seminaries, Cambridge and Meadville; 6 periodicals (of which 5 are published in Boston); and 13 religious charitable societies. The population connected with the denomination is differently estimated at from 13,000 to 30,000.

In England there are 259 ministers who have charge of congregations, and 284 places which have chapels; 7 periodicals. The denomination has, in London, the British and Foreign Unitarian Association, the London Domestic Mission Society, and 8 other societies. In the country they have 10 domestic missions, and 26 tract and other societies. In Ireland there are three Presbyterian bodies which, in point of doctrine, are regarded as Unitarians, namely: the Presbytery of Antrim, the Remonstrant Synod of Ulster, and the Synod of Munster. Together they form the "Non-subscribing Presbyterian Association of Ireland," which meets annually. In the English colonies the Unitarians have 7 chapels.

On the continent of Europe the Unitarians exist as a separate denomination only in the Austrian province of Transylvania, where they number a population of 50,870. Their peculiar views are, however, largely diffused in a number of other Protestant churches. The Unitarians of Transylvania have lately commenced to cultivate more intimate relations with those of Great Britain. In East India the Unitarians have established a mission school in Calcutta.

UNITED STATES. On the first day of the year, President Lincoln issued the following proclamation declaring freedom to all the slaves in the insurrectionary States excepting Tennessee, some counties in Virginia, and some parishes in Louisiana. Its appearance was announced by a preliminary proclamation issued in September, 1862. (*See ANNUAL CYCLOPEDIA, 1862, PUBLIC DOCUMENTS.*)

Whereas on the 22d day of September, in the year of our Lord one thousand eight hundred and sixty-two, a proclamation was issued by the President of the United States, containing, among other things, the following, to wit:

"That on the first day of January, in the year of our Lord one thousand eight hundred and sixty-three, all persons held as slaves within any State or designated part of a State, the people whereof shall then be in rebellion against the United States, shall be then, thenceforward, and forever free; and the Executive Government of the United States, including the military and naval authority thereof, will recognize and maintain the freedom of such persons, and will do no act or acts to repress such persons, or any of them, in any efforts they may make for their actual freedom.

"That the Executive will, on the first day of January aforesaid, by proclamation, designate the States and

parts of States, if any, in which the people thereof, respectively, shall then be in rebellion against the United States; and the fact that any State, or the people thereof, shall on that day be in good faith represented in the Congress of the United States, by members chosen thereto at elections wherein a majority of the qualified voters of such State shall have participated, shall, in the absence of strong countervailing testimony, be deemed conclusive evidence that such State, and the people thereof, are not then in rebellion against the United States."

Now, therefore, I, Abraham Lincoln, President of the United States, by virtue of the power in me vested as Commander-in-Chief of the Army and Navy of the United States in time of actual armed rebellion against the authority and Government of the United States, and as a fit and necessary war measure for suppressing said rebellion, do, on this first day of January, in the year of our Lord one thousand eight hundred and sixty-three, and in accordance with my purpose so to do, publicly proclaimed for the full period of one hundred days, from the day first above mentioned, order and designate as the States and parts of States wherein the people thereof respectively are this day in rebellion against the United States, the following, to wit:

Arkansas, Texas, Louisiana (except the parishes of St. Bernard, Plaquemines, Jefferson, St. John, St. Charles, St. James, Ascension, Assumption, Terre Bonne, Lafourche, Ste. Marie, St. Martin, and Orleans, including the city of New Orleans), Mississippi, Alabama, Florida, Georgia, South Carolina, North Carolina, and Virginia (except the forty-eight counties designated as West Virginia, and also the counties of Berkeley, Accomac, Northampton, Elizabeth City, York, Princess Ann, and Norfolk, including the cities of Norfolk and Portsmouth), and which excepted parts are for the present left precisely as if this proclamation were not issued.

And by virtue of the power and for the purpose aforesaid, I do order and declare that all persons held as slaves within said designated States and parts of States are and henceforward shall be free; and that the Executive Government of the United States, including the military and naval authorities thereof, will recognize and maintain the freedom of said persons.

And I hereby enjoin upon the people so declared to be free to abstain from all violence, unless in necessary self-defence; and I recommend to them that, in all cases when allowed, they labor faithfully for reasonable wages.

And I further declare and make known that such persons, of suitable condition, will be received into the armed service of the United States to garrison forts, positions, stations, and other places, and to man vessels of all sorts in said service.

And upon this act, sincerely believed to be an act of justice, warranted by the Constitution upon military necessity, I invoke the considerate judgment of mankind, and the gracious favor of Almighty God.

In testimony whereof I have hereunto set my name, and caused the seal of the United States to be affixed.

Done at the city of Washington this first day of January, in the year of our Lord one thousand [L.S.] eight hundred and sixty-three, and of the independence of the United States the eighty-seventh.

ABRAHAM LINCOLN.

By the President:

WILLIAM H. SEWARD, Secretary of State.

One hundred guns were fired in Pittsburg on January 2d, in honor of the proclamation. The same number were fired in Buffalo on the 3d. On the 2d Governor Andrew of Massachusetts issued a proclamation ordering a salute of one hundred guns, "as an official recog-

nition of its justice and necessity, by the Commonwealth of Massachusetts."

As the year advanced the views of the Government were made known relative to the importance of the measure and the influence which it should exert in the administration of affairs growing out of the war; the views of the people were also expressed relative to its legality; and its operation could be seen.

The view of the President relative to the proclamation is expressed in these words: "a fit and necessary war measure for suppressing said rebellion."

Mr. Seward, Secretary of State, in a letter to the American minister at Paris, dated December 1st, 1863, more than two months after the future appearance of the proclamation had been announced by the President, presented the following view of the position of slavery in the conflict:

The great problem of domestic slavery in the United States presented itself for solution when the war began. It is in process of solution, and so the war goes on. It is not yet solved, and so the war is not yet ended. The people of the United States are intensely engaged in the difficult task. If it questions and rejects one process of solution after another, that does not prove that it is abandoning the task. On the contrary it is the very act of performance of the task itself. If the performer seems slow, let the observer ask where or when did any nation advance faster in a labor so complex and so difficult. The President's message will carry the public mind still more directly and more earnestly on its great work. The war would have had no terrors for the people if they had not feared that the Union could not endure the trial of solving that problem. Apprehensions of that kind are beginning now to be dismissed. In all the elements of strength, power, and stability, the Union is stronger when Congress meets to-day than it was when Congress met a year ago. In all the same elements the insurrection is weaker. Revolutions do not revive their strength or their energy. They must succeed at first, or at least gain advantage continually, or they must perish. A year ago it seemed that any foreign nation might assail and destroy us at a blow. I am sure that no one foreign nation would now conceive such an attempt, while a combination of several powers for that purpose is impossible.

In a letter addressed to the Committee on the Inauguration of the Loyal National League of New York, dated April 9th, the Secretary of the Treasury, Mr. Chase, thus describes the extent of the emancipation and its good faith:

Nothing, in my judgment, is more certain than the fulfilment of these predictions. Safe in the States, before rebellion, from all Federal interference, slavery has come out from its shelter under State constitutions and laws to assail the national life. It will surely die, pierced by its own fangs and stings. What matter now how it dies? Whether as a consequence or object of the war, what matter? Is this a time to split hairs of logic? To me it seems that Providence indicates clearly enough how the end of slavery must come. It comes in rebel Slave States by military order, decree, or proclamation, not to be disregarded or set aside in any event as a nullity, but maintained and executed with perfect good faith to all the enfranchised; and it will come in the loyal Slave States by the unconstrained action of the people and their Legislatures, aided freely and generously by their brethren of the Free States. I may be mistaken in this; but if I am, another and better way will be revealed.

Meantime, it seems to me very necessary to say dis-

tinctly what many yet shrink from saying. The American blacks must be called into this conflict, not as cattle, not now even as contrabands, but as men. In the Free States, and, by the proclamation, in the rebel States they are freemen. The Attorney General, in an opinion which defies refutation, has pronounced these freemen citizens of the United States. Let then the example of Andrew Jackson, who did not hesitate to oppose colored regiments to British invasion, be now fearlessly followed. Let these blacks, acclimated, familiar with the country, capable of great endurance, receive suitable military organization, and do their part. We need their good will, and must make them our friends by showing ourselves their friends. We must have them for guides, for scouts, for all military service in camp or field for which they are qualified. Thus employed, from a burden they will become a support; and the hazards, privations, and labors of the white soldiers will be proportionally diminished. Some will object of course. There are always objections to everything practical. Let experience dispel honest fears, and refute captious or disloyal cavil.

The postmaster-general, Mr. Blair, in a speech delivered at Cleveland, Ohio, somewhat later, thus spoke of the permanence of the emancipation:

That measure, which as commander-in-chief, the President rightfully adopted under the Constitution, and in accordance with national law, to obtain the co-operation of the whole race of people, and which involves both life and freedom in its results when proclaimed, was beyond revocation by either civil or military authority of the nation. The people once slaves in the rebel States can never again be recognized as such by the United States. No judicial decision, no legislative action, State or national, can be admitted to re-enslave a people who are associated with our own destinies in this war of defence to save the Government, and whose manumission was deemed essential to the restoration and preservation of the Union and to its permanent peace.

In a speech delivered at Cincinnati, on October 15th, the Secretary of the Treasury, Mr. Chase, more fully related the cause which led to the issue of the proclamation, the design of it, and the advantages which had arisen from it. He said:

It was very simple and very plain, that slavery depended for its existence outside of those States upon the national will, which is simply saying your will and my will, that slavery outside of those States should not exist antagonistic to free labor. But with slavery in South Carolina, we in Ohio had nothing to do, and I was just as much averse to any interference with anything within the limits of other States. Although I dislike the institution and condemn it, yet I was just as much averse to any interference with it as I should be with their interference with our institutions here in Ohio. That was my doctrine; and so when this rebellion commenced, it would have been extremely agreeable to me if we could have put our foot upon the snake—I mean the rebellion—and crushed it out without any further trouble. But while I greatly desired that, and had I been general-in-chief I should have attempted, in an awkward way, to accomplish it; still we all know the rebellion went on, and assumed greater and greater proportions. We put greater and greater armies into the field, but the slave population of the South was the real prop of the rebellion—raising provisions for the army while it was fighting in the field, so that they could have pretty much all their laboring population in the battle-field; and they had another laboring population behind them to feed and support them; and therefore it appeared evident, especially as we had to depend upon the blacks in the South for information for our armies, and the whole country was so demoralized that they were the only friends our armies

could find when they passed through. It seemed, I say, perfectly clear that we had to strike at this underprop of the rebellion; and so, when President Lincoln thought fit to issue his proclamation, I said Amen, with all my heart.

It was never intended to interfere with the States that were loyal. The proclamation comes up as a great feature in this war. In my judgment the proclamation was the right thing in the right place, and without it, I am just as sure as I am of my own existence, that we could not have made the progress we have made; and I hold the man who denounces the proclamation either speaks ignorantly of that of which he knows but little or nothing, or else he really desires that the rebellion should succeed. There is no alternative. The rebellion would have succeeded but for the proclamation. He opposes it because he does not understand it, or because he wishes the rebellion to succeed. But then, say some, you are making war upon the people of the South, and you will not let them come back into the Union with their slaves. Well, now, gentlemen, there are two classes of States in the South; there is the class of States not affected by the proclamation. We have simply nothing to do except to bid God speed to the unconditional Union men of those States. They will do their own work in their own way, and in their own time, and all we have to do is to stand by them. But in the States which are affected by the proclamation, the case is different. Either the proclamation was a great monstrous sham and an imposition in the face of the whole world, or else that proclamation was an effectual thing, and there are no slaves to-day in the rebel States. They are all enfranchised by the proclamation, for what says it: all the slaves are declared now and forever free, and the executive power is pledged to the maintenance of this freedom. If it were not so, it would be a national imposture, and I would not be guilty of that piece of infamy than I would steal into your house at night and rob your pantry. But what have we to do with this proclamation in the rebellious Slave States? It is a very simple thing. Just simply to recognize the Union men who remain in those States. Such men as Durand, Mr. Flanders, and Mr. May, and a whole host of others who were known as slaveowners, are now satisfied that the Union men of the South must see to it, that slavery must never be permitted to be reestablished in those States.

Take such a man as the Hon. Mr. Anderson. When he went home and stood up for the Union, what did the slave aristocracy do for him? They drove him from the State, and his wife and little ones were obliged to take shelter in the bushes; and so with multitudes of Union men in Texas at the present day, but all of them wish to get back and establish a free State in Texas, because they say no other than a free State can ever protect them from the enemies of freedom, and I was going to say, of human nature. Again, in Florida, there were many, who were driven away who are now anxious to return. Is there a man here who wants these noble, generous Union men of the South to go back to be trampled under foot by restored rebels? Let them go back, but let them go back under the ægis of the American Union, with the protection of the Government pledged to them, and then they will take care to settle this question of slavery. They will amend the Constitution so as to put the slavery question where it ought to be. When that is done, who is going to talk about the proclamation? You have here, my fellow citizens, an intelligent statement, as it seems to me of the manner in which this thing can be settled, simply by standing by the unconditional Union men, who almost all of them have embraced the doctrine of emancipation in the border States, and standing by the Union men in the pro-slavery States, and letting them protect themselves against the institution of slavery.

In Baltimore, at a large meeting two days previous to the State election in November, the Secretary of the Treasury, in a brief speech, thus alluded to the progress made in emancipation:

VOL. III.—53 A

Fellow citizens, one word more. The unconditional Union cause is one and the same throughout the land; it is one in Ohio; it is one in Missouri; and the time has come when all unconditional Union men of the whole country must stand together, and shrink from no responsibility which the times may bring about. You will shrink from none. You will do your duty on the 4th of November. You will proclaim your adhesion to the cause of the Union and to the cause of emancipation in tones which cannot be misunderstood.

In June, an appeal was made to the President by a delegation claiming to represent the wishes of forty out of fifty parishes of Louisiana, to grant "a full recognition of all the rights of the State as they existed previous to the passage of an act of secession, upon the principle of the existence of the State Constitution unimpaired." The President declined to give the committee authority to act under the existing State Constitution, as a portion of the people desired to amend it. (*See LOUISIANA.*)

The views of the President relative to his proclamation, were still further expressed in a letter to a mass convention at Springfield, Illinois, dated August 26th:

I suggested compensated emancipation, to which you replied you wished not to be taxed to buy negroes. But I had not asked you to be taxed to buy negroes, except in such way as to save you from greater taxation to save the Union exclusively by other means. You dislike the emancipation proclamation, and perhaps you would have it retracted. You say it is unconstitutional. I think differently. I think the Constitution invests its commander-in-chief with the law of war in time of war. The most that can be said, if so much, is that slaves are property. Is there, has there ever been any question that, by the law of war, property both of enemies and friends may be taken when needed? And is it not needed whenever taking it helps us or hurts the enemy? Armies, the world over, destroy enemies' property when they cannot use it, and even destroy their own to keep it from the enemy. Civilized belligerents do all in their power to help themselves or hurt the enemy, except a few things regarded as barbarous or cruel. Among the exceptions are the massacre of vanquished foes and non-combatants, male and female. But the proclamation, as law, either is valid or is not valid. If it is not valid it needs no retraction. If it is valid it cannot be retracted any more than the dead can be brought to life. Some of you profess to think its retraction would operate favorably for the Union. Why better after the retraction than before the issue? There was more than a year and a half of trial to suppress the rebellion before the proclamation issued; the last one hundred days of which passed under an explicit notice that it was coming unless averted by those in revolt returning to their allegiance. The war has certainly progressed as favorably for us since the issue of the proclamation as before. (*See PUBLIC DOCUMENTS.*)

The views of the President were still farther manifested relative to the permanency designed to attach to this proclamation, in his amnesty proclamation accompanying his message to Congress, early in December. In the oath required to be taken before a pardon will be granted to any person, is the following clause: "that I will, in like manner, abide by and faithfully support all proclamations of the President, made during the existing rebellion, having reference to slaves, so long and so far as not modified or declared void by decision of the Supreme Court."

The views entertained by the public on the Emancipation Proclamation, are a subject of history, and referred chiefly to the question of constitutionality. Those who sustained the proclamation, claimed for the Government of the United States that, in conducting the hostilities in progress, it might exercise full sovereign and belligerent rights against the enemy; that the familiar right of eminent domain embraced in its scope the authority to confiscate all the property, real and personal, situated in the insurgent district, together with the effects of the inhabitants of that district in the loyal territory; that this right might be further deduced in time of war, from the clause of the Constitution empowering Congress to provide for the general welfare and common defence, by which whatever powers are, in the judgment of Congress, or of the President as commander-in-chief of the army and navy, necessary and proper against the enemy, are granted; that the law of nations established by modern usage, conferred upon the North, as belligerents, the universal right of confiscation and emancipation; and, finally, that there was no limit upon the power of Congress to provide the punishment of treason.

Those who opposed these views replied, that the extent of the sovereign powers of the Government of the United States is defined and limited by the Constitution. In dealing with its citizens, it can do no act not embraced within the scope of the powers there granted, upon which certain broad restrictions have been placed, both by specific prohibitions, and by the general rule of interpretation; that the powers not expressly conferred are reserved to the States. In this manner the sovereign power of the United States is made up, defined, and limited. It is a fundamental principle of law, that every man is presumed to be innocent until he has been proved guilty; and nothing is more carefully provided for in the Constitution than the separation of the legislative and judicial powers. Therefore Congress, in the exercise of its powers of legislation, cannot treat the inhabitants of a certain part of the country as guilty of treason; for by its very nature it is incompetent to distinguish between the guilt and the innocence of any portion of its constituency. It can indeed learn that the laws of the United States are impeded by combinations of armed men; it can provide laws by which the courts may condemn the guilty; it can furnish means to the executive for the enforcement of its authority; but it cannot apply the penalties which it creates, nor wield the force which it calls into the field, against any class of citizens.

As to the claim of war powers arising from the doctrine of self-preservation, it was replied, that history, and the theory of English liberty brought to this continent by the colonists and adopted as the corner stone of American Bills of Rights, united to condemn this proposition. There was no such thing as State necessity

known to the Government. The English language had not been used in defence of that doctrine for more than two hundred years. The last time it was invoked it called forth the most memorable struggle in English history, and made wet the soil of England with the blood of civil war.

In the light of the usages of war among civilized nations, the question of emancipating enemies' slaves stands thus. It was practised in South America, by the chiefs of contending factions, but without the sanction of recognized Governments. By servile insurrection the slaves in St. Domingo wrested from their masters a freedom *de facto*, which was afterward granted to them by a decree of the French Convention. In both instances the hostilities were conducted in a manner long since reprobated by the public law, and by the consent of civilized powers. The English Government in the war of the American Revolution, and in 1812, sought to stir up the slaves and to seduce them from their masters, but in both instances the treaties of peace seem to recognize the illegality of this expedient by provision for partial or complete indemnity. The Government of the United States has denied the right to interfere with enemies' slaves, by acts and declarations of the most solemn and public character; and Napoleon, in the Russian war, refused to avail himself of this means of injuring the enemy, on the express ground of the nature of the warfare which would be its necessary result. These statements embrace the strongest points urged by the opponents of the proclamation. The views of the English Government were expressed in the following letter of Earl Russell to Lord Lyons:

FOREIGN OFFICE, Jan. 17th, 1863.

MY LORD: The proclamation of the President of the United States, enclosed in your Lordship's despatch of the 2d instant, appears to be of a very strange nature.

It professes to emancipate all slaves in places where the United States' authorities cannot, exercising jurisdiction, now make emancipation a reality, but it does not decree emancipation of slaves in any States or parts of States occupied by Federal troops and subject to Federal jurisdiction, and where, therefore, emancipation, if decreed, might have been carried into effect.

It would seem to follow, as in the Border States, and also in New Orleans, that a slaveowner may recover his fugitive slave by the ordinary process of law, but that, in the ten States in which the proclamation decrees emancipation, a fugitive slave arrested by legal warrant may resist, and his resistance, if successful, is to be upheld and aided by the United States' authorities and the United States' armed forces.

The proclamation, therefore, makes slavery at once legal and illegal, and makes slaves either punishable for running away from their masters, or entitled to be supported and encouraged by so doing, according to the locality of the plantation to which they belong, and the loyalty in which they may happen to be.

There seems to be no declaration of a principle adverse to slavery in this proclamation. It is a measure of war, and a measure of war of a very questionable kind.

As President Lincoln has twice appealed to the judgment of mankind in his proclamation, I venture to say that I do not think it can or ought to satisfy the friends of abolition, who look for total and impartial freedom for the slave, and not for vengeance on the slaveowner. I am, &c., Signed, RUSSELL.

The extent of the operation of the proclamation as regards the institution, was as follows: all the slaves in the Border States of Delaware, Maryland, Kentucky, Missouri, and Tennessee, were exempted from its scope, and remained in bondage, as before, under the State laws. The number in these States was, by the census of 1860, 705,115. Besides the States thus exempted from the application of the proclamation there were thirteen parishes in Louisiana and fifty-five counties in Virginia similarly excepted. In the thirteen parishes in Louisiana the number of the slaves was 87,812. In the fifty-five counties of Virginia there were 39,332—total in these two States, 127,144. The gross number, therefore, which the proclamation recognized as slaves was 832,259. On the other hand, the slaves in the following States are declared to be free:

Alabama.....	435,080
Arkansas.....	111,115
Florida.....	61,745
Georgia.....	462,198
Mississippi.....	436,631
North Carolina.....	331,059
South Carolina.....	402,406
Texas.....	182,566
Total.....	2,412,750

The slaves declared to be free in parts of States in rebellion are as follows;

In Louisiana, in thirty-five parishes, 243,914
In Virginia, in ninety-three counties, 451,533

The total number of slaves "ordered and declared" to be free in the designated States and parts of States amounts, therefore, to about 3,108,197.

The efficacy of the proclamation was probably very imperfectly manifested during 1863. On the one hand, it did not appear to make free any slave by its own operation during the year. All those became free who came in contact with the armies or within the military lines. This freedom would have been obtained equally as well without the existence of the proclamation, for all officers and soldiers had been forbidden to restore fugitives to rebel masters. On the other hand it tended to awaken a great sympathy among the slaves for the Union cause, which held out to them the promise of certain freedom by its success (*see FREEDMEN*); it presented a strong stimulus to free blacks to enter the army and fight for a cause which would give freedom to their race; it also stimulated the unconditional Union men in Maryland, Missouri and Louisiana, to make every effort to change the constitutions of the former States so as to secure immediate emancipation. (*See MARYLAND, MISSOURI and LOUISIANA.*) But the great efficacy of the proclamation was expected to become apparent at a future day, when the insurrectionary States should be recovered to the Union. In short it made emancipation the policy of the Administration, and encouraged the friends of that great cause to make every exertion to secure its speedy accomplishment. But it must

not be supposed that this policy was adopted without opposition. The President nowhere during the year states that it is anything more than a measure for the preservation of the Union, and limits himself to this position. The opposition to the Administration protested against it. (*See under the several States.*) The friends of the Administration, known as Union men, approved of it as a war measure, and a resolution to this effect passed the Republican State convention of New York. The friends of the Administration, known as unconditional Union men, not only warmly approved of the proclamation, but demanded a most vigorous enforcement of it, by every method. (*See under the several States.*)

It now remains to notice the efforts which were made to secure the advantages of the proclamation, and the new questions which arose in connection with those efforts. The first movement was to bring the colored men into the field as soldiers. For this purpose the Secretary of War issued an order authorizing the governor of Massachusetts to raise volunteer companies of artillery and corps of infantry which might include persons of African descent. In March Gen. Thomas was sent to the Mississippi valley to organize colored regiments. (*See ARMY OF THE UNITED STATES.*) On the 27th of January a bill was introduced into Congress to authorize the President to raise one hundred and fifty thousand colored volunteers. (*See page 268.*) The impulse thus given by the Government resulted in bringing more than fifty thousand into the field during the year. On the 31st of July the President issued an order declaring that the Government would give the same protection to all of its soldiers; and that if the enemy should sell or enslave any one because of his color, the offence should be punished by retaliation upon the enemy's prisoners. An opinion had already been given by the attorney-general, Mr. Bates, that the colored man was a citizen of the United States (*see ANNUAL CYCLOPEDIA, 1862, page 752*); and upon his appearance in the field under arms, it was insisted by many that he should possess all the rights and enjoy all the privileges peculiar to that citizenship. He should become a voter, they argued, and eligible to public office. A few went still further and advocated an entire wiping out of all civil and social distinctions between the whites and blacks, and an establishment of all the intimate relations which exist between persons of one and the same race.

But these questions were generally regarded as of little importance compared with the greater one which arose relative to the relations of the insurrectionary States to the Federal Government, and which involved the *status* of the slave at the close of the civil war. Previous to the adoption of emancipation as a principle and a policy of the Government, it had been held by all except those who were looking to ultimate emancipation, that it was

only necessary for the Southern States, in good faith, to send representatives to Congress where vacant chairs were in place for them, to restore the States to their original position in the Union. But now, under the operation of the principle of emancipation, they could not recover their position as slaveholding States, but must appear as non-slaveholding States. The problem thus to be solved was to accomplish the re-appearance of the slaveholding insurrectionary States in the Union, with the shackles of their slaves knocked off, with their bondmen and women and children sent forth as free. A problem of this magnitude called into exercise for its solution the ablest intellects of the unconditional Union men, or emancipationists. In the first place it assumes that the United States shall prescribe the terms and conditions of the re-appearance of the insurrectionary States in the Union, and be able to secure their re-appearance upon those terms. To accomplish this measure involves the entire subjugation of those States, the extinction of their existing Governments and the creation of new ones. The argument, however, upon the relations of the insurrectionary States is too important to be passed over.

As early as the session of Congress which commenced in December, 1861, and continued through the first part of 1862, the ground was taken by the majority of that body that slavery was the cause of the war. They reasoned that there could be no permanent peace as long as it existed, and that the future interests of the country demanded its extermination. In the Border States this end could be accomplished, it was suggested, by inducing the Union men who had successfully resisted secession, to become emancipationists either immediate or gradual. Gradual emancipation with compensation was proposed by the President and rejected in Maryland, Delaware and Kentucky, and held in suspense in Missouri in order to ascertain the action of Congress relative to an appropriation for that purpose. (*See ANNUAL CYCLOPEDIA, 1862, PUBLIC DOCUMENTS.*) The appropriation failed to pass Congress, and the subject was dropped. Subsequent proceedings will be seen by reference to all the Border States and Louisiana. The doctrine of "contraband," as announced by Gen. Butler, had been followed by the freeing of the slaves of those already engaged in the rebellion, whenever they came within the field of army operations, and the emancipation proclamation declared free all persons held as slaves within the insurrectionary States. But in case of the ultimate success of the Federal forces, or of the people of the Confederate States returning to their allegiance to the United States, under the constitution and laws of their respective States at the time of secession, the slaves not within the lines of the army, or which had belonged to masters who had not sympathized with the rebellion, would remain in bondage unless the doctrine that those in rebellion could lay down

their arms and return to their allegiance under the constitution and laws of their respective States, was set aside. Under this view the doctrine of reconstruction was announced. Some held that by the act of secession the States had committed, as it were, political suicide; others, that by the occupation of the States by the Federal forces, they were reduced to the condition of conquered provinces; others, that their condition would be similar to that of the territories; all, however, agreed that the consent of the United States was necessary to their re-assuming their positions as States, and that, too, upon such conditions as might be imposed—the principal one of which of course would be that slavery should not exist in such States. It was contended that the faith of the nation had been pledged to this end, by the fact that slavery was the cause of the war, and by the Proclamation of Emancipation. These views were enforced in the public journals and by addresses, without much reference to authority, until the decision of the prize cases (claimants of the *Hiawatha*, &c., *vs.* United States, &c.), in which the actual status of the people of the seceded States in reference to the United States came before the Supreme Court of the United States, on appeal from the District Courts, and which were decided March 9th. This decision has been made the foundation of arguments to prove that, by the act of war, the Constitution in regard to the seceded States is abrogated in the same manner as a treaty made between two countries in time of peace is by a declaration of war; and therefore that those States have lost all rights which they had under the Constitution before secession, and are in a position to be reduced to conquered provinces by the success of the Federal forces. (*See CONGRESS, U. S., pages 260, 309, 311, 312.*) Mr. Whiting, Solicitor of War Dept., to whose opinion great weight was given, not only on account of his position, but as a just tribute to his acknowledged ability, presented this view of the case in a letter to the Union League of Philadelphia, in July:

Beware of committing yourselves to the fatal doctrine of recognizing the existence, in the Union, of States which have been declared by the President's proclamation to be in rebellion. For, by this new device of the enemy—this new version of the poisonous State rights doctrine—the secessionists will be able to get back by fraud what they failed to get by fighting. Do not permit them, without proper safeguards, to resume in your councils in the Senate and in the House the power which their treason has stripped from them.

Do not allow old States, with their Constitutions still unaltered, to resume State powers.

Beware of entangling yourselves with the technical doctrine of forfeitures of State rights; as such doctrines admit, by necessary implication, the operation of a code of laws and of corresponding civil rights, the existence of which you deny.

The solution of all our difficulty rests in the enforcement, against our public enemy, of our belligerent rights of civil war.

When the insurrection commenced by illegal acts of secession, and by certain exhibitions of force against the Government, in distant parts of the country, it was supposed that the insurgents might be quelled

and peace restored without requiring a large military force, and without involving those who did not actively participate in overt acts of treason. Hence the Government, relying upon the patriotism of the people, and confident in its strength, exhibited a generous forbearance toward the insurrectionists.

When, at last, seventy-five thousand of the militia were called out, the President still relied upon the Union sentiments of the South; still announced the intention not to interfere with loyal men; but, on the contrary, to regard their rights as still under the protection of the Constitution. The action of Congress was in accordance with this policy. The war waged by this Government was then a personal war, a war against rebels; a war prosecuted in the hope and belief that the body of the people were still friendly to the Union, who, temporarily overborne, would soon right themselves by the aid of the army. Hence Congress declared, and the President proclaimed, that it was not their object to injure loyal men; to interfere with their rights or their domestic institutions.

This position of the Government toward the rebellious States was just, forbearing, and magnanimous, while the citizens thereof were generally loyal. But the revolution swept onward. The entire circle of the Southern States abandoned the Union, and carried with them all the Border States which they could influence or control.

Having set up a new Government for themselves; having declared war against us; having sought foreign alliances; having passed acts of non-intercourse; having seized public property and made attempts to invade States which refused to serve their cause; having raised and maintained large armies and an incipient navy; assuming, in all respects, to act as an independent, hostile nation at war with the United States—claiming belligerent rights as an independent people alone could claim them, and offering to enter into treaties of alliance with foreign countries, and treaties of peace with ours;—under these circumstances they were no longer merely insurgents and rebels, but became a belligerent public enemy. The war was no longer against “certain persons” in the rebellious States. It became a territorial war—that is to say, a war by all persons situated in the belligerent territory against the United States.

If we were in a war with England, every Englishman would become a public enemy, irrespective of his personal feelings toward America. However friendly he might be toward America, his ships on the sea would be liable to capture; himself would be liable to be killed in battle, or his property situated in this country would be subject to confiscation.

By a similar rule of the law of nations, whenever two nations are at war, every subject of one belligerent nation is a public enemy of the other.

An individual may be a personal friend and at the same time a public enemy to the United States. The law of war defines international relations.

When the civil war in America became a territorial war, every citizen residing in the belligerent districts became a public enemy, irrespective of his private sentiments, whether loyal or disloyal, friendly or hostile, unionist or secessionist; guilty or innocent.

As public enemies the belligerents have claimed to be exchanged as prisoners of war, instead of admitting our right to hang them as murderers and pirates. As public enemies they claim the right to make war upon us, in plain violation of many of the obligations they would have admitted if they acknowledged the obligations or claimed the protection of our Constitution.

If they had claimed any State rights under our Constitution, they would not have violated every one of the provisions thereof, limiting the powers of States. Asserting no such rights, they claim immunity from all obligations as States, or as people—to this Government or to the United States.

Two questions must be considered: 1st. When did the rebellion become a territorial, civil war? 2d. What are the rights of the enemy under the laws of war?

The first question has been settled by the Supreme

Court of the United States, in the case of the *Hia-watha*, decided on the 9th of March, 1863. In that case, which should be read and studied by every citizen of the Union, the members of the court differed in opinion as to the time when the war became territorial. The majority decided that when the fact of general hostilities existed, the war was territorial, and the Supreme Court was bound to take judicial cognizance thereof. The minority argued that Congress alone had power to recognize the existence of war; and they contended that it was not until the Act of Congress of July 13th, 1861, commonly called the Non-Intervention Act, that a state of civil, territorial war was legitimately recognized. All the judges agree in the position “that since July 13th, 1861, there has existed between the United States and the Confederate States a civil, territorial war. That since that time the United States have full, belligerent rights against all persons residing in the districts declared by the President’s proclamation to be in rebellion.”

That the laws of war, “whether that war be civil or *inter gentes*, convert every citizen of the hostile States into a public enemy, and treat him accordingly, whatever may have been his previous conduct.”

That all the rights derived from the laws of war, may now, since 1861, be lawfully and constitutionally exercised against all the citizens of the districts in rebellion.

Such being the law of the land, as declared by the Supreme Court, in order to ascertain what are the legal or constitutional rights of public enemies, we have only to refer to the settled principles of the belligerent law of nations, or the laws of war.

Some of the laws of war are stated in the dissenting opinion, in the case above mentioned.

A state of foreign war instantly annuls the most solemn treaties between nations. It terminates all obligations in the nature of compacts or contracts, at the option of the party obligated thereby. It destroys all claims of one belligerent upon the other, except those which may be sanctioned by a treaty of peace. A civil, territorial war has the same effect, excepting, only, that the sovereign may treat the rebels as subjects as well as belligerents.

Hence, civil war, in which the belligerents have become territorial enemies, instantly annuls all rights or claims of public enemies against the United States, under the Constitution or laws, whether that Constitution be called a compact, a treaty, or a covenant, and whether the parties to it were States, in their sovereign capacity, or the people of the United States as individuals.

Any other result would be as incomprehensible as it would be mischievous. A public enemy cannot, lawfully, claim the right of entering Congress, and voting down the measures taken to subdue him.

Why not? Because he is a public enemy; because, by becoming a public enemy, he has annulled and lost his rights in the Government, and can never regain them, except by our consent.

If the inhabitants of a large part of the Union have, by becoming public enemies, surrendered and annulled their former rights, the question arises, can they recover them? Such rights cannot be regained by reason of their having ceased to fight. The character of a public enemy having once been stamped upon them by the laws of war, remains fixed until it shall have been, by our consent, removed.

To stop fighting does not make them cease to be public enemies, because they may have laid down their arms for want of powder, not for want of will. Peace does not restore the noble dead who have fallen a sacrifice to treason. Nor does it revive the rights once extinguished by civil, territorial war. The land of the Union belongs to the people of the United States, subject to the rights of individual ownership. Each person inhabiting those sections of the country declared by the President’s proclamation to be in rebellion, has the right to what belongs to a public enemy, and no more. He can have no right to take any part in Government. That right does not belong to an enemy of the country

while he is waging war or after he has been subdued. A public enemy has a right to participate in or to assume the Government of the United States only when he has conquered the United States. We find in this well settled doctrine of belligerent law, the solution of all questions in relation to State rights. After the inhabitants of a district have become public enemies, they have no rights, either State or personal, against the United States. They are belligerents only, and have left to them only belligerent rights.

Suppose that the inhabitants of South Carolina should be swept off, so that solitude should reign throughout its borders, unbroken by any living thing, would the State rights of South Carolina still exist as attached to the land itself?

Can there be a sovereignty without a people, or a State without inhabitants? State rights, so far as they concern the Union, are the rights of persons, as members of a State, in relation to the General Government; and when the person has become a public enemy, then he loses all rights except the rights of war. And when all the inhabitants have (by engaging in civil, territorial war) become public enemies, it is the same, in legal effect, as though the inhabitants had been annihilated. So far as this Government is concerned, civil war obliterates all lines of States or countries; the only lines recognized by war are the lines which separate us from a public enemy.

Among the war measures sanctioned by the President, to which he has, more than once, pledged his sacred honor, and which Congress has enforced by solemn laws, is the liberation of slaves. The Government has invited them to share the dangers, the honor, and the advantages of sustaining the Union, and has pledged itself to the world for their freedom.

Whatever disasters may befall our arms, whatever humiliations may be in store for us, it is earnestly hoped that we may be saved the unfathomable infamy of breaking the nation's faith with Europe, and with colored citizens and slaves in the Union.

Now if the rebellious States shall attempt to return to the Union with Constitutions guaranteeing the perpetuity of slavery; if the laws of those States shall be again revived and put in force against free blacks and slaves, we shall, at once, have reinstated in the Union, in all its force and wickedness, that very curse which has brought on the war and all its terrible train of sufferings. The war is fought by slaveholders for the perpetuity of slavery. Shall we hand over to them, at the end of the war, just what they have been fighting for? Shall all our blood and treasure be spilled uselessly on the ground? Shall the country not protect itself against the evil which has caused all our woes? Will you breathe new life into the strangled serpent, when, without your aid, he will perish?

If you concede State rights to your enemies, what security can you have that traitors will not pass State laws which will render the position of the blacks intolerable; or reduce them all to slavery?

Allow the inhabitants of conquered territory to form themselves into States, only by adopting Constitutions such as will forever remove all cause of collision with the United States, by excluding slavery therefrom, or continue military government over the conquered district until there shall appear therein a sufficient number of loyal inhabitants to form a republican government, which, by guaranteeing freedom to all, shall be in accordance with the true spirit of the Constitution of the United States.

The same position was assumed by Robert Dale Owen, in a letter to Mr. Seward, on the subject of the representation of the seceded States in Congress, dated August 27th:

Who are constitutionally entitled to fill the vacant chairs?

The Supreme Court has decided, by a unanimous vote, that since the passage of a law (sometimes called the "non-intercourse law"), approved July 13th, 1861, the inhabitants of the insurrectionary portions of the

Union are public enemies; not the disloyal alone, not those who have taken up arms alone, but all. After stating that the territory "held in hostility to the United States has a defined boundary,"* the court adds:

The decision of our highest legal tribunal is, that these men, without distinction as to individual loyalty or disloyalty, have, in law, the same rights, and the same rights only, as alien enemies invading the United States. Men cannot, by their own act, release themselves from constitutional obligations; but they can and they do, by levying war against the Government, forfeit their constitutional rights.

For war annuls all treaties, all conventions, all agreements, how solemn soever, securing privileges or protection to a hostile party. The rights of war alone remain. By civil war the insurrectionists lose every privilege, every protection, which the Constitution affords to the citizen. We act upon this principle every day. By the Constitution, the home and the effects of the citizen are inviolate except after warrant issued, upon probable cause and under oath, specially describing the premises. Does this apply to the house of a rebel in an insurrectionary State? The Constitution declares that the citizen shall not be deprived of life, liberty, or property, without due process of law. What process of law precedes the opening of a battery on the Confederate ranks? or the confinement of our prisoners of war? or the appropriation of the enemy's ammunition or commissary stores?

When we make and ratify, with a foreign nation in time of peace, a treaty granting to the subjects of that nation certain rights and immunities, that treaty becomes part and parcel of the supreme law of the land; as much so as the Constitution itself. But when that nation declares war, its subjects can no more claim one of these solemnly granted rights and immunities than if the treaty had never existed. No single rule of international law is better established than this.

But under that rule the insurgents, having levied war, and having thus become public enemies, can no more claim any of the privileges or immunities once guaranteed to them under the Constitution than an alien enemy can claim rights under a treaty ratified during peace, but cancelled on the day his government declared war.

Therefore, by a rule of public law, applicable in all wars, and sanctioned by the assent and the constant usage of every civilized nation, no inhabitant of the insurrectionary territory has a constitutional right to elect a member to the Congress of the United States; and no Senator or Representative elected by these insurrectionists, though according to the forms prescribed by the Constitution, can legally fill a single vacant seat in our congressional halls.

Nor is the legal aspect of the case one whit changed, if the men lay down their arms. A treaty made during

* This boundary, earlier defined by the respective acts of secession, was officially declared by proclamation of the President, issued under date of July 1st, 1862. This was done in accordance with a requisition contained in the second section of an act of Congress, approved June 7th, 1862. The list includes eleven States, reckoning Eastern Virginia as one. It does not include Western Virginia, nor Maryland, nor Kentucky, nor Missouri. Nothing here said, therefore, applies to the constitutional rights of the inhabitants of any of these States. To a proper understanding of the legal points involved, it is indispensable to bear in mind which States are, in the eye of the law, insurrectionary, and which are not.

All persons residing within this territory, whose property may be used to increase the revenue of the hostile power, are, in this contest, liable to be treated as enemies, though not foreigners. * * * When the regular course of justice is interrupted by rebellion or insurrection, so that the courts of justice cannot be kept open, civil war exists; and hostilities may be prosecuted on the same footing as if those opposing the Government were foreign enemies invading the land. * * * Whether property be liable to capture as enemy's property, does not, in any manner, depend upon the personal allegiance of the owner.†

† Claimants of Brilliant, etc., versus United States. March term, 1863. Opinion by Grier J. Amer, Law Register, April, 1863, pp. 334 to 344.

peace and cancelled by war, does not revive with the cessation of hostilities. The matter is then as completely open to negotiation as if no treaty had ever been made. A treaty in the same words, or with entirely different conditions, may be made, but it is a new treaty, and whether it shall be made, or shall not be made, is a matter entirely at the option of the contracting parties.

Any rule of law in contravention of this would be an absurdity too flagrant even to merit discussion. Does the insurgent who appeals to the wager of battle risk nothing? Is he to be secure and successful, whatever betide? If he conquer, is everything to be under his control? And if he be vanquished, is he still to retain each right and privilege which he ever possessed? Who, under such a State of things, so safe and prosperous as a rebel?

In virtue, then, of one of the plainest and best established rules of international law, the inhabitants of the insurgent States, whether in arms or after submission, have no constitutional right whatever to add, by election, one member to the Congress of the United States.

* * * * *

Assuming, what seems probable, that we shall remain victors in this war, suffer me, in conclusion, briefly to group together the main positions that have been advanced.

The inhabitants of the insurrectionary States have, at present, no constitutional right to elect a member to Congress.

We, the inhabitants of the non-insurrectionary States, may, by law, restore to them that right; and with us it rests to decide upon what conditions it shall be restored.

The preliminary condition ought to be some sufficient guarantee that the emancipation proclamation shall never be repudiated, and that the institution of slavery shall never again, in any part of the insurrectionary territory, be revived.

Our own national faith, already pledged before the world to three millions of suffering people, demands this. The law of nations permits and enjoins it.

We had a right, by that law, to destroy slave-property belonging to a public enemy. It was a national duty to destroy property so dangerous, in order to render the enemy "incapable of doing mischief with the same ease in future."

We offend against no principle of humanity in destroying this property; in other words, in cancelling life-long claims to service or labor. The inhumanity would have been to refrain from cancelling them.

Nor do we actually harm the slave-claimant by cancelling his claims. In point of fact it is greatly to his advantage, socially and pecuniarily, to be without them. Are we impertinently interfering with his business—arrogantly and improperly assuming to judge what is best for him—when we determine this? Not at all. The business is emphatically our own; for it intimately concerns our national safety. In deciding it as we see fit, there is neither impropriety nor arrogance, but proper precaution and prudent foresight. If he had refrained from levying war against his Government, he would have had the undoubted right to judge and to act in this affair. As it is, he has lost it; and we have now the right and the power to decide the matter; not he.

Before the vacant chairs in Congress are filled, let us make the decision. Failing in this high duty, we sacrifice at once the public honor and the public safety.

While these views were cheerfully embraced and earnestly defended by the more earnest emancipationists or unconditional Union men, they were attacked by others who contended that the conclusions were not fairly drawn from the decision of the court. J. J. Combes, Esq., of Washington, reviewing the argument of Mr. Whiting as deduced from that decision, says:

What the learned judge delivering the opinion of the court did say on this point was in these words:

It [the rebellion] is no loose, unorganized insurrection, having no definite boundary or possession. It has a boundary marked by lines of bayonets, and which can be crossed only by force. South of this line is enemies' territory, because it is claimed and held in possession by an organized, hostile, and belligerent power. All persons residing within this territory, whose property may be used to increase the revenues of the hostile power, are, in this contest, liable to be treated as enemies, though not foreigners.

To understand the force and effect of this language, it is necessary to know what questions were before the court. In the language of the court, they were as follows:

1st. Had the President a right to institute a blockade of ports in possession of persons in armed rebellion against the Government, on the principles of international law, as known and acknowledged among civilized States?

2d. Was the property of persons domiciled and residing within these States a proper subject of capture on the sea as "enemies' " property?

These were the questions and the only questions decided. The learned judge delivering the decision in support of it reasoned thus: When a civil war becomes territorial, the Government may enforce certain belligerent rights against the territory, to cripple the resources of the enemy, by acts which are territorial in their operation and effect, among which is the right of blockade. As to the enforcement of such rights, "all persons residing within the hostile territory" are "liable to be treated as enemies," because "their property may be used to increase the revenues of the hostile power." The learned judge might have given another reason why they are liable to be so treated, that is to say, because, in resorting to belligerent acts which are territorial in their operation and effects, it is impossible to discriminate between friends and foes in the territory assailed. Loyal persons residing in the hostile territory are liable to be treated as enemies—not because they are such in fact or in law, but because belligerent acts against the territory necessarily operate upon all the inhabitants alike. This is one of the many misfortunes incident to their unhappy situation and surroundings.

It is impossible that the court could have intended to affirm any such principle as the learned writer deduces from their decision. If his deduction is legitimate, it puts one, if not two, of the judges in the ridiculous position of deciding that he himself was a public enemy to the Government whose highest judicial functions he was then administering.* Two of the Supreme Judges are citizens and in law residents of revolting States. One of them lives in a State [Tennessee] excepted by the President in his proclamation of January 1st, 1863; and the writer seems to entertain the opinion that somehow or other this would save him from becoming a public enemy—or, rather, would take him out of that category which, according to his theory, he certainly must have been in prior to the proclamation. But the other has no such chance of escape. No portion of his State [Georgia] is excepted by the proclamation. It is probably true that he has not been personally within the limits of that State since the rebellion broke out; but he has never renounced his citizenship, nor abandoned his residence there. He is in the condition of thousands of loyal refugees, who have temporarily fled from the rebellious territory, intending to return to their estates and homes as soon as the rebellion is put down. They are still in law citizens and residents of their respective States. No principle of law is better settled than that a man does not lose his residence by leaving it for a temporary purpose, with the intention to return when that temporary purpose is accomplished, even though he may remain absent for years. So long as the *animus revertendi* exists, his legal domicile remains unchanged. The loyal citizen of a rebellious State, who, being absent from the rebellious territory when the war broke out, has remained away with the intention of returning to his home when the rebellion shall be suppressed, is in

* Judges Wayne of Georgia, and Catron of Tennessee.

no different condition from the loyal refugee who has fled and remained away from his home with the same intention; and neither of them is, or ought to be, in any better condition than the loyal citizen who has remained at home because he could not get away. They are all in the same boat. If one has lost his political rights in the Union by becoming a public enemy to his Government, all have.

The discussion was continued in the public journals of the day, and the positions taken, attacked with much warmth. The "National Intelligencer," in commenting upon the subject, after stating the positions and deductions of Mr. Whiting, says:

Now, in order to ascertain the purport and scope of this reasoning it is only necessary to note the question before the court, arising under "public law as regards captures on the ocean," and as if expressly to exclude any such generalizations as those sophistically drawn from their language by Mr. Whiting, the majority of the court proceeded immediately to add, in a passage not cited by Mr. Solicitor Whiting (for it would cut up his dogma by the roots), the following limitations of the doctrine propounded under cover of the technical meaning and extent of the term "enemies' property," employed in prize cases:

But in defining the meaning of the term "enemies' property," we will be led into error if we refer to Fleta and Lord Coke for their definition of the word "enemy." It is a technical phrase peculiar to prize courts, and depends upon principles of public as distinguished from common law. Whether property be liable to capture as enemies' property does not in any manner depend on the personal allegiance of the owner. "It is illegal traffic that stamps it as enemies' property." "It is of no consequence whether it belongs to an ally or a citizen (8 Cranch, 354), the owner *pro hac vice* is an enemy (3 Washington, C. C. 183). The produce of the soil of the hostile territory, as well as other property engaged in the commerce of the hostile power, as sources of its wealth and strength, are always regarded as legitimate prize, without regard to the domicile of the owner, and much more so if he reside and trade within their territory. (See Upton, chap. 3.) That finishes the examination of these two general questions. It remains to apply these conclusions, and examine the several cases before us in reference to the circumstances peculiar to each.

This decision of the court, it will be seen, goes simply to the extent of declaring that by the armed insurrection now pending in a certain portion of the territory of the United States the inhabitants thereof are liable to be treated as "enemies," by the confiscation, under admiralty law, of "property that may be used to increase the resources of the hostile power." The decision has this extent and no more. Nor is the doctrine new, though it seems to be new to Mr. Whiting, because of the novel use he has made of it. The same doctrine, as we understand, was put forth by the Supreme Court in the case of the United States *vs.* Rice (4 Wheaton, p. 246), in which the court declared that "by the conquest and military occupation of a portion of the territory of the United States by a public enemy, that portion is to be deemed a foreign country, so far as regards our revenue laws." The circumstances under which the case arose, it will be remembered, were as follows:

On the 1st day of September, 1814, Castine, in the State of Maine, was captured by the British, and remained in the exclusive possession of the enemy until after the ratification of the treaty of peace in February, 1815. During this period the British Government exercised all civil and military authority over the place, and established a customhouse, and admitted goods to be imported according to the regulations prescribed by itself, and among others admitted the goods upon which duties were subsequently demanded (after the resumption of the national authority) by the United States authorities in the case brought before the court. These goods remained at Castine until after the town was evacuated by the enemy, and, upon the reestablishment thereof of the United States Government, the collector of the customs, claiming a right to United States

duties on the goods, took a bond from the defendant as security for their payment, and it was in order to enforce the payment of these duties that the action was brought by the Government against Rice. The decision of the court in the premises was as follows:

Under these circumstances we are all of opinion that the claim for duties cannot be sustained. By the conquest and military occupation of Castine, the enemy acquired that firm possession which enabled him to exercise the fullest rights of sovereignty over that place. The sovereignty of the United States over the territory was of course suspended, and the laws of the United States could no longer be rightfully enforced there, or be obligatory upon the inhabitants who remained and submitted to the conquerors. By the surrender the inhabitants passed under a temporary allegiance to the British Government, and were bound by such laws, and such only, as it chose to recognize and impose. From the nature of the case no other laws could be obligatory upon them, for where there is no protection, or allegiance, or sovereignty, there can be no claim to obedience. Castine was, therefore, during this period, so far as respected our revenue laws, to be deemed a foreign port; and goods imported into it by the inhabitants were subject to such duties only as the British Government chose to require. Such goods were in no correct sense imported into the United States. The subsequent evacuation by the enemy, and resumption of authority by the United States, did not, and could not, change the character of the previous transactions. The doctrines respecting the *jus postliminii* are wholly inapplicable to the case. The goods were liable to American duties, when imported, or not at all. That they are not so liable at the time of importation is clear from what has been already stated: and when, upon the return of peace, the jurisdiction of the United States was resumed, they were in the same predicament as they would have been if Castine had been a foreign territory, ceded by treaty to the United States, and the goods had been previously imported there. In the latter case there would be no pretence to say that American duties could be demanded; and, upon principles of public or municipal law, the cases are not distinguishable.

Now, suppose there had been some pundit living in the year 1819 (when this case was decided), who was as learned in the law as Mr. Solicitor Whiting. Who does not see that he would have educed from this decision the marvellous conclusion that the people of the town of Castine, in the State of Maine, by passing under temporary allegiance to the British Government (as the Southern people have passed under temporary allegiance to the usurping authority of Gen. Jefferson Davis), had thereby so forfeited all their rights as citizens of the United States as henceforth to have none save "such as the Federal Government might allow them" by special enactment after the restoration of the national authority in Castine. Nobody, of course, was then found shallow enough to propound any such preposterous doctrine, because then nobody had any motive to pervert a decision which carried its meaning on its face. It was then seen, as indeed the court state in making their decision, that "upon the return of peace the jurisdiction of the United States was reassumed," and that all the rights of the people and duties of the National Government reverted to the *status quo ante bellum*. And all men would see the same truth with equal clearness as regards the temporary domination of the insurgents in a portion of the country, if some did not suppose that a contrary theory would give them a right to affix unconstitutional terms and conditions to what they call "the readmission of the revolted States."

Judge Sprague, of the U. S. District Court at Boston, thus spoke of the error of drawing political conclusions from the decisions of the court in admiralty:

An objection to the prize decisions of the District Court has arisen from an apprehension of radical consequences. It has been supposed that if the Government have the rights of a belligerent, then, after the rebellion is suppressed, it will have the rights of conquest; that a State and its inhabitants may be permanently divested of all political privileges, and treated as foreign territory acquired by force of arms. This is an error—a grave and dangerous error.

Conquest of a foreign country gives absolute

and unlimited sovereign rights. But no nation ever makes such a conquest of its own territory. If a hostile power, either from without or within a nation, takes possession and holds absolute dominion over any portion of its territory, and the nation, by force of arms, expels or overthrows the enemy, and suppresses hostilities, it acquires no new title, but merely regains the possession of which it had been temporarily deprived. The nation acquires no new sovereignty, but merely the power to maintain its previous rights.

Another objection to these decisions of the district courts is founded upon the apprehension that they may lead to or countenance cruel and impolitic confiscations of private property found on land. This apprehension is unfounded. No such consequences can legitimately follow. Those decisions undoubtedly assert that the United States have the rights of a belligerent. But the extent of those rights on land, or the manner in which they are to be exercised, was not discussed. They were not even adverted to, except to say that enemy's property found by a belligerent on land, within his own country, on the breaking out of a war, will not be condemned by the courts, although it could be if found at sea. This distinction, so far as it goes, tends to show that the doctrine of maritime captures is not to be applied to seizures on land. But the danger upon which this objection is founded does not arise from the administration of the prize laws by the courts, or the exercise of belligerent rights by military commanders upon military exigencies. The objection really arises from fear of the legislation of Congress. It is apprehended that they may pass sweeping or general acts of confiscation, to take practical effect only after the rebellion shall have been suppressed; that the whole estates, real and personal, which have not been seized during the war, may be taken and confiscated upon coming within reach of the Government, after hostilities shall have ceased. This, as we have seen, would not be the exercise of belligerent rights, the war being at an end. Belligerent confiscations take effect only upon property of which possession is taken during the war. As against property which continues under the control of the enemy they are wholly inoperative. If possession be acquired by or after the peace, then previous legislation may take effect, but it will be by the right of sovereignty, not as an act of war. Under despotic governments the power of municipal confiscation may be unlimited, but under our Government, the right of sovereignty over any portion of a State is given and limited by the Constitution, and will be the same after the war as it was before. When the United States take possession of any rebel district they acquire no new title, but merely vindicate that which previously existed, and are to do only what is necessary for that purpose. Confiscations of property, not for any use that has been made of it, which go not against an offending thing, but are inflicted for the personal delinquency of the owner, are punitive; and punishment should be inflicted only upon due conviction of personal guilt. What offences shall be created and what penalties affixed, must be left to the justice and wisdom of Congress within the limits prescribed by the Constitution. Such penal enactments have no connection whatever with the decisions of prize courts, enforcing belligerent rights upon property captured at sea during the war.

In January, John P. Usher was appointed Secretary of the Interior to succeed Mr. Smith, appointed judge of the U. S. District Court of Indiana. The Cabinet of Mr. Lincoln was thus composed as follows:

WILLIAM H. SEWARD, New York, Secretary of State.
 SALMON P. CHASE, Ohio, Secretary of the Treasury.
 EDWIN M. STANTON, Pennsylvania, Secretary of War.
 GIDEON WELLES, Connecticut, Secretary of the Navy.
 JOHN P. USHER, Indiana, Secretary of the Interior.
 MONTGOMERY BLAIR, Maryland, Postmaster-General.
 EDWARD BATES, Missouri, Attorney-General.

The most important questions in the foreign relations of the country arose with Great Britain. (*See DIPLOMATIC CORRESPONDENCE.*)

Intercourse of a private nature was allowed between the citizens of the Northern and Southern States, under certain simple regulations, as follows:

1. No letter must exceed one page of a letter sheet, or relate to any other than purely domestic matters.
2. Every letter must be signed with the writer's name in full.
3. All letters must be sent with five cents postage enclosed if to go to Richmond, and ten cents if beyond.
4. All letters must be enclosed to the commanding general of the Department of Virginia, at Fortress Monroe. No letter sent to any other address will be forwarded.

At intervals, females and children were granted passes to go South, under certain regulations.

It was asserted that the Southern States would send representatives to the session of Congress commencing in December, if an amnesty was granted to them; and a correspondence took place at the close of 1862, and was first published in September, 1863, which is important as showing the views of the Government at that time. On the 8th of December, 1862, a letter was addressed to the President by Fernando Wood, of New York, which commenced thus:

DEAR SIR: On the 25th of November last I was advised by an authority which I deemed likely to be well informed, as well as trustworthy and truthful, that the Southern States would send representatives to the next Congress, provided that a full and general amnesty should permit them to do so. No guarantee or terms were asked for, other than the amnesty referred to.

Mr. Wood then states that he sought the aid of influential persons to procure from the Government permission for a correspondence, to be conducted under its inspection, to develop these facts. Being unsuccessful in obtaining this aid, he directly addressed Mr. Lincoln. The President replied, on December 12th, 1862, saying:

I strongly suspect your information will prove to be groundless; nevertheless, I thank you for communicating it to me. Understanding the phrase in the paragraph above quoted—"the Southern States would send representatives to the next Congress"—to be substantially the same as that "the people of the Southern States would cease resistance, and would inaugurate, submit to, and maintain the national authority within the limits of such States, under the Constitution of the United States," I say that in such case the war would cease on the part of the United States; and that if within a reasonable time "a full and general amnesty" were necessary to such end, it would not be withheld.

I do not think it would be proper now to communicate this, formally or informally, to the people of the Southern States. My belief is that they already know it, and when they choose, if ever, they can communicate with me unequivocally. Nor do I think it proper now to suspend military operations to try any experiment of negotiation. I should, nevertheless, receive, with great pleasure, the exact information you now have, and also such other as you may in any way obtain. Such information might be more valuable before the 1st of January than afterward. While there

is nothing in this letter which I shall dread to see in history, it is, perhaps, better, for the present, that its existence should not become public. I therefore have to request that you will regard it as confidential.' Your obedient servant,

A. LINCOLN.

It is not known that any propositions were made either by the Federal Government or that at Richmond relative to peace, or a suspension of hostilities, or an amnesty, other than the proclamation of the President, accompanying his message to Congress, in December (for which see PUBLIC DOCUMENTS). This amnesty was subsequently explained by the President as not intended to embrace persons held as prisoners of war.

Several conventions assembled during the year, distinct from the local State conventions, and designed to consider subjects of national interest.

The earliest in date was a convention of Colored People, which convened at Poughkeepsie, New York, about June 15th. J. W. C. Pennington was chosen president of the convention. A lengthy address and resolutions were adopted—among the latter were the following:

Resolved, That more effective remedies ought now to be thoroughly tried, in the shape of warm lead and cold steel, duly administered by 200,000 black doctors, more or less under the direction of Surgeon General John Charles Fremont, or such other person, fit for the office, as might be selected.

Resolved, That we, the colored citizens of this State, are loyal and true to the Government; that our fortunes rise or fall with it; that we are ready, anxious, and willing to demonstrate that truth and loyalty on the field of battle, or wherever else we can aid in restoring the nation to its integrity and prosperity; that we firmly and confidently rely on the Government for the protection and treatment due to civilized men, and believe that we shall receive it.

On the 23d of August a convention of War Democrats was convened at Indianapolis, Ind. Gen. Nathan Kimball was chosen president. A series of resolutions was adopted, of which the following were among the most distinctive:

That the Democratic principles heretofore avowed, to which we stand pledged, imperatively demand of us to repudiate the doctrines of secession and all sympathy with them, and to give our unqualified support to our country and its constituted authorities in the great trial of war, until the last vestige of the present rebellion is suppressed and destroyed.

That the conspiracy to break up the Union of Democratic States, and to establish aristocracies was deliberately planned and executed by those who broke up and purposely defeated the Democratic party. We have no apologies to offer for the acts of the traitors who declared that the "election of Mr. Lincoln would be a good cause for secession, disunion, and revolution," and we denounce all organizations that oppose or fail with their whole strength to support the war and crush out the rebellion, as anti-Democratic, fanatic, and treasonable.

Subsequently, on November 24th, a conference of War Democrats was held at Chicago. Representatives were present from Ohio, Indiana, Illinois, Wisconsin, and Minnesota. A declaration of principles was adopted, and measures taken looking to a national organization. The platform declared unequivocally in favor of the Union, denied that the Constitu-

tion afforded any pretext for secession, providing, on the contrary, a peaceful remedy for every grievance that may occur in any part of the country; denounced the rebellion, and called upon the Administration to employ all the power of the nation for its suppression; affirmed continued devotion to the Monroe doctrine of non-intervention in the affairs of this continent by European nations; applauded the valor and unselfish patriotism of the soldiers: declared in favor of the colonization of the blacks freed by the war at the earliest practicable period; and protested against the incorporation of the negro contingent upon the peace establishment of the Federal army, holding that the disbandment of that contingent, upon the conclusion of hostilities, was "demanded by every consideration of wise and provident statesmanship."

The meeting recommended the War Democrats of the several States to meet in national convention on the first Wednesday in May, 1864, for the purpose of taking such action as appeared best respecting the nomination of a President and vice-President.

On the 19th of August, a conference or convention of conservative Union men assembled in Rochester, composed of persons invited to meet "for the purpose of consultation and taking such action as may be deemed most effective to unite the conservative elements of the country in the approaching presidential campaign." Representatives were present from several States, including Missouri, Kentucky, Maryland, and Wisconsin. A series of resolutions were adopted, of which the following were the most distinctive:

Resolved, That this meeting favors an association of conservative Union men for the next presidential campaign; and that we invite the union and coöperation of all who are opposed to the election to any office in the gift of the people of any person in political connection or sympathizing with secession, abolitionism, or fanaticism of any kind; that our abiding purpose in brief, is: The suppression of the rebellion, the maintenance of the Union, adherence to the Constitution, fidelity to the Government, the enforcement of the laws, and opposition to foreign intervention.

Resolved, That the rights of property, whether in lands, personalty, or slaves in the States, is exclusively within the authority and jurisdiction of the States respectively; and the owners of all or either of these three classes of property cannot be deprived of it by the Government of the United States, the President, or any military or civil officer thereof except for public use and just compensation, or for crimes committed of which they shall be convicted according to the mode and form of trial prescribed by the Constitution.

A committee was appointed, with authority to call a National Convention for the nomination of a President, and make all necessary arrangements. Under the auspices of this committee a convention was held on December 4th, in Cincinnati, of persons invited thus:

For the purpose of consultation, and taking such action as may be deemed most effective to secure the nomination and election of conservative men in the approaching presidential campaign. The meeting will be composed of Old Line Whigs, War Democrats, conservative men, without regard to former party predi-

lections—friends of Jackson, Webster, Clay, and Crittenden, who desire to preserve the Union and the Constitution unimpaired—who are willing to take their stand upon the Kentucky platform, opposed alike to secession and abolition fanaticism—who believe that the war should be carried on till those in armed revolt are compelled to obey the Constitution and the laws of Congress, and who hold that the State Governments suspended by the revolt should be restored under their State Constitutions respectively.

At this meeting the following resolution was adopted:

Resolved, That this convention of consultation adopts and reaffirms the Kentucky platform of 1863 (see page 563), and suggests to the conservative Union national committee the name of George B. McClellan for the next presidency, and recommends to the said committee to take such action in regard to the nomination of candidates for President and Vice-President as they may deem expedient.

A more considerable meeting of this committee was held in Philadelphia, on December 24th, at which the following, among other resolutions, were adopted:

Resolved, That this committee recommend to the people of the United States, General George B. McClellan as a candidate for the presidency, and Governor William B. Campbell, of Tennessee, as a candidate for the vice-presidency.

Resolved, That as a basis of Union this committee recommends the Kentucky platform, embodying the twofold idea of the support of the Government in its contest with the rebellion, and of opposition to all efforts to substitute the dogmas of radicalism for the principles of the Constitution.

Late in the year a convention of Germans was held at Cleveland, Ohio. An address and resolutions were adopted in which the members of the convention declared themselves to be independent of parties. They said:

We have not convened for the purpose of president-making, nor are we to arrogate to ourselves to forestall in this question our fellow-citizens. Nevertheless, we deem it proper to take advantage of our meeting, for the expression of our sympathies and antipathies. Therefore, we declare, that the confidence and sympathy of the German radicals will be ensured only by a decided and well-tried representation of a progressive and, as early as possible, a radical policy, and that we should consider it as incompatible with our principles, to support any representative of that so-called conservative policy which exposes the republic to disrepute and jeopardy at home and abroad.

The substance of the resolutions adopted is expressed as follows:

Integrity of the Union, and subordination of the several States under the sovereignty of the people of the United States.

Unconditional suppression of the rebellion.

Abolition of slavery in the entire territory of the United States in the shortest way.

Revision of the Constitution in the spirit of the Declaration of Independence.

Treatment of the reconquered rebel States as territories for the purpose of reconstruction.

Cession of the confiscated lands in the spirit of the homestead bill, as well as donation of portions of the land to the defenders of the country, of whatever color, and to the liberated slaves.

Realization of the Monroe doctrine.

Alliance with European revolution against foreign intervention.

Protection of the freedom of the press and speech against military usurpation.

Establishment of a national military system similar to the Swiss system—universal obligation for military service.

Support of such candidates for public offices as stand nearest to the principles laid down in this platform.

(See FINANCES of the UNITED STATES, ARMY, NAVY, CONGRESS, U. S., PRISONERS, COMMERCE, &c., &c.)

V

VERMONT. The number of troops sent into the army from this State up to Jan. 1864, was 18,224. The Vermont regiments have suffered greatly during the war, having been in active service in various portions of the South, and, at the above date, 7,884 were all that remained in the service, of whom only 6,150 were on duty. The quota assigned to Vermont under the conscription act of 1863, was 4,715, of which number only 948 had entered the service or furnished substitutes, and 1,833 paid the commutation.

The annual State election caused some excitement. The Democratic State Convention met at Montpelier on the 26th of June, and nominated for governor Hon. T. P. Redfield; lieutenant-governor, E. A. Chapin; treasurer, R. McK. Ormsby. They adopted resolutions declaring that the liberties of the people are endangered by the Administration in establishing martial law in States where the Government is unobstructed, and committing tyrannical acts on loyal and unoffending citizens. The "platform" was similar to the one adopted by the Democratic State Convention of Ohio. An additional resolution thanked Gov. Seymour of

New York, for his letter to the Vallandigham meeting at Albany. The Union State Convention met at Burlington on the 8th of July, and nominated for governor, John G. Smith; lieutenant-governor, Paul Dillingham; treasurer, John R. Page. Resolutions were adopted pledging the men and means of Vermont to aid in putting down the rebellion; approving of the lawful and necessary use of the martial and civil powers of the Government for that object, and declaring that Northern traitors deserve greater reproach than Southern rebels. The Union ticket was elected by a large majority. The vote for governor stood as follows: Smith, 29,613; Redfield, 11,962; majority for Smith, 17,651. The agricultural interests of the State prospered during the year.

VERNET, EMILE JEAN HORACE, commonly known as Horace Vernet, a French painter, born in Paris, June 30th, 1789, died Jan. 17th, 1863. He was a member of a family well known in the history of French art, and at an early age manifested an unusual taste and facility for painting. While yet a boy he was compelled to use his pencil for his own support, and when about 17 years of age competed un-

successfully for the grand prize of the Academy of Fine Arts. Subsequently he was drafted into the army, and after two years' service was married, and commenced his artistic career. He had previously followed the classical manner of David, but finding it entirely inadequate to portray modern subjects with truthfulness or effect, he broke away from the conventionalisms of the predominant school and determined to make nature alone his guide. His experience of a soldier's life now proved of considerable service to him, and with happy tact he prepared to minister to the national love of military glory by painting the battles in which France had been victorious and the striking incidents or episodes of the wars of the republic and the empire. The first piece which brought him into notice was his "Capture of a Redoubt," followed within a few years by "The Dog of the Regiment," "The Trumpeters," "Halt of French Soldiers," "Battle of Tolosa," "Massacre of the Mamelukes," "Barrier of Olichy," "Battle of Jemmapes," "Battle of Valmy," "Soldier of Waterloo," "The last Cartridge," "Death of Poniatowski," &c., which for dramatic vigor and life-like detail soon gained a high position among contemporary works of their class, although the sticklers for the old style found much to condemn in them.

In 1822 his works were denied admission into the annual exhibition of the Louvre on account of their "seditious" tendency; whereupon he transformed his studio into an exhibition room, and presented to the public a numerous collection of his own works. In spite of this petty persecution he fared well under the Bourbons, and was made an officer of the Legion of Honor, 1825, and a member of the Institute, 1826. In 1828 he was appointed director of the French academy in Rome, where he remained 10 years, executing in that interval a number of works somewhat different in subject and treatment from his previous efforts, and of which his "Judith and Holofernes," "School of Raphael," "Confession of the Dying Brigand," and "Pope Pius VIII. carried into St. Peter's," may be taken as examples. Louis Philippe, who proved a warm friend of Vernet, commissioned him to paint for the Constantine Hall of the palace at Versailles a series of large pictures, illustrating the triumphs of the French arms in Algeria, conspicuous among which are several episodes in the siege of Constantine, "The Capture of the Smala," "The Battle of Isly," and "The Capture of Bougiah," which are perhaps the largest and finest pictures of their class ever painted. While engaged upon these works he made several visits to Algeria and the Holy Land, for the purpose of studying costumes, physiognomy and scenery, and was thus led to attempt numerous subsequent works illustrating oriental life and history. Prominent among these were a series of biblical subjects in which the characters are habited in the Arabian costume of the present day, as "Rebecca at the Well,"

"Hagar driven out by Abraham," and "The Good Samaritan." Other well known eastern subjects were his "Lion Hunt," "Council of Arabs," and "Arab Mother Rescuing her Child from a Lion." To the series of French battle pieces already mentioned must be added his battles of Jena, Friedland, Wagram, Arcola and Fontenoy, "The Bombardment of San Juan d'Ulloa," "The Attack on the Citadel of Antwerp," "The Fleet forcing the Entrance of the Tagus," and "The Capture of Rome by Gen. Oudinot." During the latter part of his life he was said to be engaged upon works illustrating the recent campaigns in Italy and the Crimea. He also painted many excellent portraits, including those of Napoleon I. and III., and Louis Philippe.

He declined a peerage from Louis Philippe, and it is honorable to his artistic self-respect that he refused, at the request of that monarch, to falsify history by representing Louis XIV. leading the assault at Valenciennes. In consequence their friendly relations were for a time suspended, and Vernet repaired to St. Petersburg, where he received flattering attentions from the Czar. Subsequently he became reconciled with the king. He was decorated with the chief orders of continental Europe, and at his death stood at the head of his profession in France.

VIRGINIA. That portion of the State which recognizes the Confederate Government, has been so completely occupied by the armies and by that Government, that the details of the army operations and of the Confederate States engross nearly all subjects of interest. The entire military force of the State was absorbed by the Confederate conscription. The State bank circulation entirely disappeared, and the State treasury notes were funded. The debt of the State is \$34,399,680. This sum includes interest on the debt which has been uncalled for, and is due to the United States and her citizens, viz., \$2,730,921; also the sum borrowed to aid in the war, and which is by agreement to be returned by the Confederate Government, viz., \$8,500,000. Deducting the debt due to the literary fund, and the balance is \$20,506,097. To offset this, the State holds bank and other stocks, from which can be realized sufficient to provide for all excepting \$943,947. An election for governor took place during the year. William Smith was chosen.

VIRGINIA, EAST. A loyal State government for East Virginia was organized during the year by the election of a legislature and the following State officers: governor, Francis H. Pierpont; lieutenant-governor, L. P. C. Cowper; secretary of State, L. A. Hagers; treasurer, G. T. Smith; auditor, L. W. Webb; adjutant-general, F. E. Foster; attorney-general, T. R. Bowden. The loyal eastern counties of the State participated in the election. Alexandria was selected as the temporary capital. In his message to the Legislature, Gov. Pierpont spoke of slavery as doomed, and rec-

commended the calling of a convention to alter the State constitution so as to abolish slavery forever. In December the Legislature passed an act directing that a convention should be held at Alexandria on the 13th of February, 1864, to amend the constitution and prohibit slavery in the counties of Accomac, Northampton, Princess Ann, Elizabeth City, and York, including the cities of Norfolk and Portsmouth. None but loyal citizens who had not assisted the rebels since January 1st, 1863, were allowed to vote, and any one whose vote might be challenged was required to take an oath to support the constitution, and to declare that he had not in any way given aid and comfort to the enemy. In December, J. C. McLeod (a native Virginian) was elected to Congress from the 37th district.

VIRGINIA, WEST. The constitutional convention of West Virginia met during the month of February, and, among other important acts, adopted a resolution asking Congress to make an appropriation to aid West Virginia in emancipating her slaves.

On the 26th of March an election was held at which the "Willey amendment" was almost unanimously ratified. The effect of this amendment was to strike out from the constitution the clause excluding free negroes from the State, and to insert in place thereof certain provisions relative to freeing the slaves.

On the 20th of April the President issued a proclamation declaring that the State had

complied with the required conditions. An election of State officers was held in May, and the following unconditional Union candidates were chosen by a vote of 30,000, without opposition: governor, Arthur I. Boreman; secretary of State, J. E. Boyers; treasurer, Campbell Tarr; auditor, Samuel Crane; attorney-general, A. B. Caldwell; judges of court of appeals, Ralph L. Berkshire, William A. Harrison, James H. Brown.

The inauguration of the new State took place at Wheeling (the capital), on the 20th of June, with imposing ceremonies. The retiring governor (Pierpont) briefly addressed the citizens, urging them not to forsake the national flag, and introduced the governor elect, whom he pronounced "true as steel." Gov. Boreman made a short speech, in which he said that the only terms of peace were that the rebels should lay down their arms and submit to the regularly constituted authority of the United States. The General Assembly organized on the same day. In his inaugural message to the Legislature Gov. Boreman recommended the immediate passage of laws to effectually extirpate slavery from the State, and that no man should be permitted to vote or hold office until he had taken the oath of allegiance. The Legislature elected W. T. Willey, of Morgantown, and P. G. Van Winkle, of Parkersburg, U. S. senators.

West Virginia was called upon for 10,000 militia during the war. She had already put 20,000 troops into the field.

W

WASIUM.—*Supposed New Metal.* Bahr claims to have discovered in a mineral from Ronsholm, an island near Stockholm, a new metal which, in honor of the royal family of Wasa, he proposes to name *Wasium*. The mineral itself has been termed *Wasite*; the supposed new metal was also found in Norwegian orthite, and in gadolinite from Ytterby. From the first named of these, about 1 per cent. of the supposed oxide of wasium was obtained, in form of a brownish sandy powder, of density 3.726. Bahr regards as especially characteristic of the new oxide that, upon being treated with strong nitric acid and evaporated, it assumes a gelatinous consistency.

Prof. J. Nicklès, however, declares (*Comptes Rendus*, lvii. 1740), that the supposed wasium of Bahr is nothing more than yttrium blended with a little of its congener didymium, or perhaps terbium. He cites the fact that Klapproth's nitrate of yttria furnishes, on evaporation of its watery solution, the same gelatinous precipitate which Bahr insists on as characteristic of the new metallic oxide.

WHATELY, RICHARD, D. D., Lord Archbishop of London, born in Cavendish Square, London, February 1st, 1787, died in Dublin, Ireland, October 8th, 1863. He was the fourth son of the Rev. Dr. Joseph Whately, preben-

dary of Bristol. He was educated at Oriel College, Oxford, then the great school of speculative philosophy, and ranked among the most eminent scholars in that celebrated college. He received the degree of B. A. in 1808, and of M. A. in 1812. In 1810, he obtained the prize for his English essay, "What are the Arts in the Cultivation of which the Ancients were less successful than the Moderns?" In 1811, he was elected Fellow of Oriel, then considered the highest honor in Oxford, except the provostship of the same college. The Fellows of Oriel were, at this period, and for many years later, men of the highest intellectual rank in Great Britain. J. H. Newman, E. B. Pusey, Bishops Miant, Copleston, Wilberforce, Hampden, and others, beside Whately, were among the number. In 1822, Mr. Whately was Bampton Lecturer, taking for his subject "The Use and Abuse of Party Feeling in Matters of Religion," and the same year he was presented to the rectory of Halesworth, Suffolk. In 1825, Lord Grenville, chancellor of Oxford, recalled him to the university as Principal of St. Alban's Hall, on which occasion he took the degree of B. D. and D. D. In 1830, he was elected Professor of Political Economy in the University. In 1831, on the death of Archbishop Magee, Earl Grey appointed Dr.

Whately to the Archbishop of Dublin, and in 1846, on the death of Dr. Charles Lind-say, he succeeded to the bishopric of Kildare also, that see having been united with Dublin, by the Church Temporalities Act. He was also Visitor of Trinity College, Dublin; Prebendary *ex officio* of Cullen in St. Patrick's Cathedral; Vice-President of the Royal Irish Academy, and Chancellor of the Order of St. Patrick. For more than twenty years he was one of the Commissioners of National Education in Ireland, and during that period he bent all his energies to its advancement and defence. He endowed the Professorship of Political Economy in the Dublin University; not from his abundant wealth, but by the exercise of a strict economy in his personal and family expenditure. The archbishop was a voluminous writer. The published productions of his pen, many of them pamphlets, and local or occasional in character, are more than a hundred in number; but he has also written many books which will live. The following list comprises the most important of his published works: "The Christian's Duty with respect to the Established Government and the Laws," London, 1821; "Historic Doubts relative to Napoleon Bonaparte," Oxford, 1821; "The Bampton Lectures for 1822, on the Use and Abuse of Party Feeling in Religion," 1822; "Essay on some of the Peculiarities of the Christian Religion," 1825; "Elements of Logic," 1826; "Elements of Rhetoric," 1828; "Essays on some of the Difficulties in the Writings of St. Paul," &c., 1828; "Errors of Romanism," 1830; "Introductory Lectures to Political Economy," 1831; "Essay on the Omission of Creeds, Liturgies, &c., in the New Testament," 1831; "Thoughts on Secondary Punishment," Dublin, 1832; "Sermons on Various Subjects," Oxford, 1835; "Essays on some of the Dangers of Christian Faith which may arise from the Teaching or Conduct of its Professors," 1839; "The Kingdom of Christ Delineated," 1841; "Thoughts on the proposed Evangelical Alliance," 1846; "Introductory Lectures on the Study of St. Paul's Epistles," 1849; "English Synonymes," 1851; manuals for the national schools on "Money Matters," on "Reasoning," on the "Evidences of Christianity," and on the "British Constitution," published between 1840 and 1852; "Thoughts on the New Dogma of the Church of Rome,"

1855; "Scripture Revelations as to Good and Evil Angels," 1855; "Scripture Revelations as to a Future State," 1856; "Bacon's Essays, with Notes," 1856.

WISCONSIN. In June a correspondence took place between Governor Salomon, of Wisconsin, and Gen. Pope, commanding the Department of the Northwest, in reference to the exercise of military authority in enforcing the conscription. The governor, learning that requests had been made to supply State arms to the assistant provost-marshal, expressed the belief that the people were willing to obey the law, and the civil authorities to execute it. In his reply Gen. Pope says that he will employ military force only after every resource of the civil authority has been used without success. He uses the following language:

I have been satisfied from the beginning that in nearly every case the conscription law can be executed by the civil authorities alone, through the people acting under their direction in the legal and usual forms. In the discretion intrusted to me by the Government, as to the employment of military force for the execution of this law within this military department, I have steadily declined to permit the use of any troops under my command, unless I could be convinced that all other legitimate means had been tried without success. Already, in one or two cases, I have found that application for military aid had been made without necessity, the enrolment under the law having been completed thoroughly by the willing aid of the civil authorities.

The habit of resorting to military force in every trifling case of opposition or resistance to the laws, is becoming so common as to excite in the minds of judicious men very serious alarm. Such a practice entirely supplants the civil authorities, sets aside time-honored means for the enforcement of the laws in this country, destroys in the citizen that feeling of personal interest in their execution, through which alone we have maintained popular government, and prepares the public mind for complete abdication of civil rule. It is impossible to believe that citizens of this country, except under the immediate influence of excitement, can be willing to trust the enforcement of civil law to military force, and thus to surrender the very highest privilege and duty of American citizens.

The Legislature gave an earnest support to the war, and appropriated \$350,000 to organize and bring into active service the militia, "to repel invasion, suppress insurrection and defend the State in time of war."

The vote for governor at the fall election stood as follows: Lewis (Republican), 79,959; Palmer (Democrat), 55,218; majority for Lewis, 24,711. The number of troops sent to the army by Wisconsin up to Nov. 1st, 1863, was 42,585.

Y

YANCEY, WILLIAM LOWNDES, an American politician, born in Columbia, S. C., in 1815, died near Montgomery, Ala., July 28th, 1863. Early in life he removed to Alabama, and represented that State in the 28th and 29th Congresses. He subsequently became known as a prominent leader of the extreme Southern States' Rights party. In 1858 he advocated the organization of "Committees of Safety" in the South, and in 1859 urged the calling of a convention by

the State of Alabama, in the event of the election of the Republican candidate for President in 1860. In Jan., 1861, he reported the secession ordinance in the Alabama Convention, and in the succeeding March went to Europe to urge upon foreign powers the recognition of the Confederate States. Early in 1862 he took his seat in the rebel Congress as one of the senators from Alabama, and until near the close of his life was actively engaged with legislative duties.

- Ambulance corps, 29; orders for, 29; organization, 30.
- Signal corps, 30; telegraph corps, 30; pensioners, 30; expenditures for fortifications, 30; army material provided, 30; ordnance material on hand, 30; officers relieved, 31; army corps commanders, 31; departments, 31; officers of the army, 32, 33; casualties, 33.
- Army Operations*.—Plan of the movement against Vicksburg, 34; surrender of Holly Springs, 34; Gen. Grant's order, 34;

loss at Holly Springs, 34; attack on Davis's Mills, 34; other stations on railroad to Corinth, 34; effects on Gen. Grant, 34; do. on the plan of the campaign, 35; movements of Gen. Sherman, 35; appears at the mouth of the Yazoo, 35; moves up the river, 35; his plan, 35; character of the country, 36; bayous, 36; landing of Gen. Blair, 36; organization of Gen. Sherman's force, 36; plan of attack on the bluffs in the rear of Vicksburg, 36; landing and movement of the troops, 36; bivouac, 36; reconnoitring, 36; repulse of Gen. Steele, 36; change in the order of movements, 36; position of the forces, 37; assaults upon the bluffs, 37, 38; repulse, 38; withdrawal of the troops, 38; arrival of Gen. McClernand, 38; address of Gen. Sherman to the troops, 38; Gen. Pemberton in command at Vicksburg, 38; address to his troops, 38.

Plan to attack Arkansas Point, 39; White river, 39; movement of the fleet, 39; position of Fort Hindman, 39; bombardment, 39; assault, 39; surrender, 39, 40; expedition up the White river, 41.

Gen. Grant leaves Memphis for Vicksburg, 41; assumes command, 41; plans for the attack on Vicksburg, 41; the canal, 41; routes by which to reach the rear of Vicksburg, 42; Lake Providence, 42; Yazoo Pass, 42.

Queen of the West runs the blockade, 42; her expedition down the river, 43; returns, 43; second expedition, 43; moves up the Atchafalaya, 43; captures the *Era* No. 5, 43; Fort Taylor, 43; attack on, 43; injury to the Queen, 44; capture of, 44; escape of the officers with the *De Soto*, 44; meets the *Indianola*, 44; description of the *Indianola*, 44; runs the batteries at Vicksburg, 44; pursues the *Webb*, 45; returns to Big Black river, 45; is captured by the *Webb* and *Queen of the West*, 45.

Situation of Lake Providence, 45; how connected with Red River, 45; route of the proposed canal, 45; Situation of Moon Lake, 45; Yazoo Pass, 45; Coldwater, 45; route, 45; advance of the gunboats, 46; the force, 46; Fort Pemberton, 46; its situation, 46; Greenwood, 46; force of the enemy, 46; attack on the fort, 47; repulse, 47; its cause, 47; expedition withdrawn, 47.

Expedition by way of Cypress Bayou, 47; the route, 47; its progress, 47; fleet withdrawn, 47; cause of the failure, 47.

Route from Milliken's Bend to New Carthage, 48; rams *Switzerland* and *Lancaster* attempt to pass the batteries at Vicksburg, 48; Gen. Grant orders New Carthage to be occupied, 48; advance of Gen. McClernand, 48; Perkins' plantation reached, 48; bad roads, 48; transports at the same time run the batteries at Vicksburg, 49; march of the troops below Vicksburg, 50; attack on Grand Gulf by the gunboats, 50; report of Admiral Porter, 50; do. Gen. Grant's, 50; transports run the batteries at Grand Gulf, 50; troops prepare to cross the Mississippi, 50; landed at Bruinsburg, 50; advance of the Thirteenth Corps, 50; Port Gibson, 50; enemy encountered, 50; repulsed, 50; Bayou Pierre, 50; Hawkinson's Ferry, 51; Gen. Grant's report of the crossing of the Mississippi, 51; Admiral Porter's report of the capture of Grand Gulf, 51; movement of Gen. Sherman up the Yazoo, 51; its object, 51; attacks Haines's Bluff, 51; position of Gen. Banks at this time, 51; ferries over the Big Black river, 52.

Col. Grierson's raid, 52; his force, 52; leaves La Grange, 52; reaches Ripley, 52; New Albany, 52; skirmish, 52; King's Bridge, 52; Pontotoc, 52; return of Major Lall, 52; Columbus, 52; Louisville, 52; Nichols's plantation, 52; Raleigh, 52; Brandon, 52; Storkville, 52; expedition of Capt. Forbes, 52; Pearl river, 53; Gallatin, 53; Brookhaven, 53; Summit, 53; Edward's Bridge, 53; preparation to stop him at Osyka,

54; Greensburg, 54; Clinton, 54; arrives at Baton Rouge, 54.

Arrival of Gen. Sherman, 54; advance of Gen. Grant, 54; route of Gen. McPherson, 54; do. of Gen. Sherman, 54; do. of Gen. McClernand, 54; despatch of Gen. Grant, 54; battle of Raymond, 54; further advance, 55; capture of Jackson, 55; movements of the enemy, 55; battle of Champion Hills, 57; fight at Black river, 58; Gen. Sherman marches upon Bridgeport, 58; Walnut Hills occupied, 58; supplies for the troops, 58; investment of Vicksburg, 58; report of Admiral Porter, 58; do. of expedition to Yazoo City, 59; retreat of Pemberton to Vicksburg, 59; assault on the works made by Gen. Grant, 59; a second assault, 60; how made, 60; report of Gen. Grant, 60; report of the enemy, 61; report of Admiral Porter on the assault on Vicksburg, 61; siege determined upon, 62; how conducted, 62; reinforcements to Gen. Grant, 62; attack on Milliken's Bend, 62; sinking of the *Cincinnati*, 63; report of Capt. Bache, 63; progress of the siege, 63; flag of truce, 63; proposal to surrender, 63; correspondence, 63; opinion of Gen. Grant of the terms of surrender, 64; despatch of Admiral Porter, 65; result of the campaign, 65; letter of President Lincoln to Gen. Grant, 65; report of Gen. Halleck, 66; new expeditions, 66; Gen. Sherman sent to attack Gen. Johnston, 66; despatches of Gen. Grant, 66.

Destruction of property at Jackson, Miss., 66; negroes flocking after the army, 67; their views, 67; expedition against Yazoo City, 67; movement of Gen. McPherson, 68; vast extent of the military campaign, 68.

Gen. Banks sails for New Orleans, 68; the expedition, 68; his movements, 68; naval force on the lower Mississippi, 68; attack on Port Hudson, 68; loss of the Mississippi, 68; movement of the land forces, 69; the Teche country, 69; forces there, 69; movements of Gen. Weitzel, 69; objects of Gen. Banks, 69; concentrates at Brashear, 69; advances, 70; success of Gen. Grover, 70; New Iberia, 70; further operations, 70; surrender of Alexandria to Admiral Porter, 70; country occupied by Gen. Banks, 70; despatch of Admiral Porter on the capture of Alexandria, 71; order of Gen. Banks to organize a *corps d'Afrique*, 71; movements of Gen. Sherman, 71; do. of Gen. Augur, 71; advance upon Port Hudson, 72; Port Hudson, 72; fire opened by Gen. Banks, 72; report of Gen. Banks on the conduct of colored troops, 73; second assault on Port Hudson, 73; activity of the enemy west of the Mississippi, 73; their success, 73; complete investment of Port Hudson, 74; its surrender, 74; correspondence, 74; terms of surrender, 75; further movements of Gen. Banks, 75.

Gen. Burnside's position, 75; another movement contemplated, 75; storm, 75; movement abandoned, 76; order of Gen. Burnside surrendering the command, 76; his statement relative to his resignation, 76; order of Gen. Hooker on taking command, 76; order of the War Department, 76; Congress passes a resolution of inquiry, 76; report of the Committee of Inquiry, 77; letter of Gen. Cochrane, 78; order of Gen. Burnside dismissing certain officers, 78; his testimony before the committee, 79; assumes command of the Department of Ohio, 79; raids, 79; position of Gen. Hooker's and Gen. Lee's armies, 80; advance of Gen. Hooker across the Rappahannock, 81; his order, 81; his position, 81; movements of the enemy, 81, 82; report of Gen. Lee, 82; movements of Gen. Sedgwick, 82; Lee's report of these movements, 83; further movements of Gen. Hooker, 83.

Movements of Gen. Stoneman, 83; Kilpatrick's movements, 84; his report, 84; movements of Lieut.-Col. Davis, 84; his report, 85.

Orders of Gen. Hooker, 85; orders of Gen. Lee, 85; despatch of Secretary Stanton to governors of Northern States, 85; proclamation of President Lincoln relative to the conscription of aliens, 85; order of Secretary Stanton relative to the sending of intelligence by telegraph, 86; order of Gen. Wool, 86; official report of the loss at Chancellorsville, 86; flag of truce from Gen. Lee, 86; report of Gen. Halleck, 86; loss of the enemy, 86; letter of Gen. Lee to Gen. Jackson, 87; Gen. Jackson's wounds and death, 87; order of Gen. Lee, 87; reconnaissance, 87; Movements of Gen. Lee northward, 87; his objects, 88; commencement of his march, 88.

Order of the War Department creating two new departments, 88; departments and commanders, 88; proclamation of Gov. Curtin, 88; order of Gen. Couch, 89; position of Gen. Hooker, 89; movements of Gen. Lee, 89, 90; his purpose, 90; attack at Berryville, 90; do. on Winchester, 90; retreat of Gen. Milroy, 92; court-martialled, 92; decision of President Lincoln on its verdict, 92; report of Gen. Halleck, 92; evacuation of Martinsburg, 92; report of Gen. Lee, 92; spoils taken, 92; advance of Col. Jenkins, 93; invasion of Maryland and Pennsylvania, 93; proclamation of President Lincoln, 93; despatch to Gov. Seymour of New York, 93; movements in New York, 94; thanks of the President to Gov. Seymour, 94; proclamation of Gov. Curtin, 94; do. of Gov. Parker, of New Jersey, 94; do. of the governor of Maryland, 94; do. of the governor of West Virginia, 95; do. of the governor of Ohio, 95; movement of troops from New York, 95; troops from New Jersey, 96; appeal of Gov. Curtin to the people of Philadelphia, 96; State organizations in the field, 96; proclamation of Gov. Pleasanton's report, 98; Gen. Lee's report of Hooker's position, 98; orders to his troops, 99; Gen. Cooper's letter to Gen. Lee, 99; do. of Mr. Davis, 99; advance of the Confederate army, 100; order of Gen. Ewell, 100; advance toward Harrisburg, 100; do. York, 101; order of Gen. Lee, 101; Confederates fall back, 101; Gen. Hooker resigns his command, 102; Gen. Meade assumes command, 102; impression upon the army, 102; its advance toward Gettysburg, 102; Meade's address before battle, 102; Gettysburg, 102; Gen. Reynolds encounters the enemy, 103; the battle of Wednesday, 103; Gen. Meade's position, 104; Gen. Lee's position, 104; battle of Thursday, 105; report of Gen. Lee, 106; despatch of Gen. Meade, 106; battle of Thursday, 106; despatch of Gen. Meade, 107; address to his army, 107; announcement of President Lincoln, 108; movements of Gen. Lee, 108; movements of Pennsylvania troops, 108; address of Gen. Lee to his army, 108; pursuit by Gen. Meade, 108, 109; despatches of Gen. Meade, 109; denied by Gen. Lee, 109; contradicted by Gen. Meade, 109; Col. Kilpatrick's report, 111; capture of Vicksburg announced, 111; proclamation of President Lincoln, 111; address of Gen. Meade to citizens along the Orange and Alexandria railroad, 111; movements of Gen. Dix, 112.

Advance of Gen. Morgan, 112; crosses the Cumberland, 112; moves across Kentucky, 112; crosses the Ohio, 112; pursuit by Gen. Hobson, 112; movements in Indiana, 113; enters Ohio, 114; advances toward Western Virginia, 114; skirmishes at the Ohio river, 114; despatches of Gen. Shackelford, 115; capture of Gen. Morgan, 115.

Operations of Gen. Rosecrans, 115; expedition of Gen. Jeff. C. Davis, 115; attack on Fort Donelson, 115; expedition under Col. Colburn, 115; do. under Gen. Sheri-

dan, 116; do. under Col. Hall, 116; attack on Gen. Granger, 116; movement on McMinnsville, 116; expedition of Col. Streight, 116; instructions to Col. Streight by Gen. Garfield, 116; movements of Col. Streight, 117; his surrender, 117; letter of Gen. Rosecrans to Gen. Halleck relative to the force in his front, 118; reply of Gen. Halleck, 118; answer of Gen. Rosecrans, 118; movements commenced by Gen. Rosecrans, 118; movements of his corps, 119; retreat of Gen. Bragg, 119; its effect, 119; first object of Gen. Rosecrans, 119; crossing the Tennessee, 119.

Movement of Gen. Burnside, 120; his command, 120; position of Gen. Buckner, 120; advance of Gen. Burnside, 120; reaches Kingston, 121; enters Knoxville, 121; his reception, 121; movement upon Cumberland Gap, 121; other movements, 121; occupation of Chattanooga, 121; despatch of Gen. Halleck to Gen. Rosecrans, 121; do. to Gen. Burnside, 122; reply of Gen. Rosecrans, 122; reports of Gens. Rosecrans, Foster, and Meade, as to movements of the enemy, 122; despatches of Gen. Halleck, 122; position of Gen. Rosecrans' forces, 123; his advance, 123; Lafayette, 123; attack on Gen. Negley, 123; concentration of Gen. Rosecrans, 124; operations of the Confederate army, 124; topographical view, 125; order of Gen. Bragg to advance, 125; charge of incapacity against Gen. Bragg, 125; approach of the two armies, 125; battle of Chickamauga, 126; firmness of Gen. Thomas, 128; he falls back, 128; loss of Gen. Rosecrans, 128; concentrates at Chattanooga, 128; address of Gen. Rosecrans to the army, 128; forces sent to Gen. Rosecrans, 128; Hooker's corps, 129; Grant ordered to the command, 129; movements of Gen. Hooker, 129; opens the river below Chattanooga, 129; supplies reach Chattanooga, 130; movement of Gen. Longstreet in East Tennessee, 130; plan of Gen. Grant, 130; his attack on Gen. Bragg, 130; his defeat, 131.

Movements of Gen. Burnside in East Tennessee, 131; advance of Gen. Longstreet, 131; siege of Knoxville, 131; movements of Gen. Sherman, 133; diversion of Gen. Averill in West Virginia, 133.

Position of the armies of Gens. Meade and Lee, 133; Meade falls back, 133; advance of Gen. Lee, 133; he retires, 134; losses in cavalry, 134; advance of Gen. Meade, 134; Mine Run, 134; movements in West Virginia, 134; Gen. Averill's raid, 134; operations in North Carolina, 135; do. in southeast Virginia, 135; Gen. Foster sent to Charleston, 135.

Gen. Gilmore moves on Charleston, 135; attacks Morris Island, 135; his report, 135; capture of a portion, 136; fortifications, 136; naval force, 136; attack on Fort Wagner, 137; repulse, 137; Gen. Gilmore's works on Morris Island, 138; Swamp Angel, 138; advances his works, 138; opens fire upon Fort Sumter, 138; report of the enemy of the bombardment, 139; report of Gen. Gilmore, 139, 140; letter of Gen. Beauregard, 141; reply of Gen. Gilmore, 141; effect of the shells fired at Charleston, 142; capture of Fort Wagner, 142; report of Gen. Gilmore, 142; night assault upon Sumter, 142.

Movements of Gen. Banks, 142; expedition to the mouth of the Sabine 142; its repulse, 143; capture of Brownsville, 143.

Movements in Missouri, 143; operations of Gen. Marmaduke, 144; retires to Arkansas, 144; movement of Gen. Cahill, 144; Gen. McNeill, 145; expedition of Col. Clayton, 145; advance of Gen. Blunt, 145; Gen. Steele's movements, 146; capture of Little Rock, 146; Quantrell's raid, 146; attack on Gen. Blunt, 146.

Department of the Northwest, 146; operations against the Indians, 147.

Result of the operations of the year, 147.

Asia.—Three countries purely Asiatic, 147; Persia, 147; area, &c., 147; Bokhara, 148; British rule in India, 148; efforts of France, 148; war in Circassia, 148; religious denominations, 148.

Astronomical Phenomena and Progress.—Progress of Astronomy, 148; asteroids, 149; comets, 149; spectra of fixed stars, 150; sun and stars photometrically considered, 151; sun's distance from the earth, 152; motion of the sun in space, 154; constitution of the sun, 154; heat of the sun's surface and currents in the atmosphere, 155; zodiacal light, 155; nebulae, 156; the La Lande prize, 156.

Austria.—Population, 156; budget, 156; army, 157; navy, 157; Parliament, 157; proceedings, 157; proclamation of Kossuth, 157, diplomatic complications, 158.

B

BACHE, GEORGE M., report of the sinking of the Cincinnati, 63.

BAIRD, ROBERT.—Birth, 158; death, 158; education, 158; pursuits, 159; writings, 159.

BALDINGER, JOHN, the case of, 491.

BALDWIN, ROGER S.—Birth, 159; death, 159; education, 159; pursuits, 159; character, 160.

BANKS, GEN.—His order to raise a corps d'Afrique, 27, 71; report on the bravery of colored troops at Port Hudson, 28, 73; his regulations relative to working plantations, 594.

Baptists.—Numbers, 160; anniversaries, 160; resolutions, 160; proceedings of societies, 161; churches in Canada, 161; churches in the Confederate States, 161; English Baptists, 161; decision on open communion, 161; address of the English Baptist Union, 162; church in Hamburg, 162; do. Sweden, 162; do. Poland, 162.

BARRETT, MICHAEL, the case of, 489.

BAYARD, JAMES A., Senator from Delaware, 233; remarks on arrests in Delaware, 235, 236, 240; on the transfer of certain suits to the United States Courts, 250, 252; on the discharge of State prisoners, 257; on the resolution of inquiry, 259; on the conscript bill, 274; on compensated emancipation in Missouri, 315.

BEAUCHAMP, EARL.—Birth, 162; death, 162; public services, 163.

BEAUREGARD, GEN., correspondence with Gen. Gilmore, 137-141.

BEECHER, LYMAN.—Birth, 163; death, 163; education, 163; labors, 163; writings, 163.

BERRY, HIRAM, G.—Birth, 163; death, 163; military services, 164.

BIDDLE, CHARLES J., Representative from Pennsylvania, 233; on the conscript bill, 280.

Big Black River.—Its source, 164; length, 164.

BILLAULT, AUGUSTE, A. M.—Birth, 164; death, 164; public services in France, 165.

BINGHAM, JOHN A., Representative from Ohio, 233; on the admission of West Virginia, 310; on the admission of members from Louisiana, 324.

BLAIR, JACOB B., Representative from Virginia, 233; on the admission of West Virginia, 307.

Blockade (see *Prize*).

BOILEAU, ALBERT D., case of, 470.

Bolton.—Its situation, 165; capture, 165.

BOTFIELD, BERIAH.—Birth, 165; death, 165; pursuits, 165.

BRADFORD, GOV. A. W.—Letter to President Lincoln, 618; his proclamation relative to the election, 619; reply to President Lincoln, 621; message relative to the Maryland election, 623.

BRADISH, LUTHER.—Birth, 166; death, 166; pursuits, 166.

Brazil.—Emperor, 166; army, 166; navy, 166; shipping, 166; coal fields, 166; difficulty with England, 167; arbitration, 167; action relative to the Alabama, 167; commerce, 168.

Bridgeport.—Its situation, 168; occupation by Gen. Hooker, 168.

BRONSON, GREENE C.—Birth, 168; death, 168; pursuits, 168.

BROWN, WILLIAM G., Representative from Virginia, 233; on the admission of West Virginia, 305.

BROWNING, ORVILLE H., on the transfer of certain suits to the United States Courts, 250, 251.

Bruinsburg.—Its situation, 168.

BUFORD, JOHN.—Birth, 168; death, 168; military services, 169.

BURNS, ROBERT E.—Birth, 169; education, 169; pursuits, 169; death, 169.

BURNSIDE, GEN., surrenders the command of the army to Gen. Hooker, 76; his statement, 76; his order of dismissal, 78; his testimony before the Committee of Inquiry, 79; assumes command of the Department of Ohio, 79; order suppressing certain papers, 423; his order of arrest in Ohio, 473; letter of explanation to the Circuit Court in Ohio, 481; order relative to arrests, 485; further order, 486; return to a writ, 488.

C

Cæsium.—An element, 169; how found, 170.

California.—History, 170; Government, 170; Legislature, 170; mining, 170; different modes of operation, 170; hydraulic mining, 171; quartz mining, 171; agricultural products, 171; silk, 171; gold, 171; grain, 171; fruit, 171; internal revenue, 172; duties, how paid, 172; currency and gold, 172; exports, 172; treasure exported, 172; silver mines, 172.

CANNON, GOV., message to the Legislature denouncing an act passed, 335.

Cape Colony.—Its people, 2.

CARLILE, JOHN S., Senator from Virginia, 233; on the bill to discharge State prisoners, 256; on the conscript bill, 273, 276, 277.

Central American Republics.—Guatemala, 173; army, 173; finances, 173; San Salvador, 173; Honduras, 173; Nicaragua, 173; Costa Rica, 173; Union, 173.

CHASE, SEC.—Letter to loyal league in New York, 832; speech at Cincinnati on Emancipation Proclamation, 832; do. at Baltimore, 833.

Chattanooga.—Situation, 174.

Chemistry.—Elements, 174; allotropic states, 174; new modification of sulphur, 175; new series of metallic oxides, 175; new compound of arsenic and hydrogen, 176; nitric acid, 176; alcohol from olefiant gas, 178; manufacture of alcohol by olefiant gas, 178; bases of anilin colors, 178; physico-chemical phenomena and principles, 179; dissociation of bodies by heat, 179; deposit of camphor toward light, 180; numerical relations of the alkali-metal equivalents, 180; coloring articles of copper and brass, 180; bronzing cast iron, 180; new uses of aluminium bronze, 180; paints from iron slag, 181; silvering cloth, 181; rendering fabrics non-inflammable, 181; caustic soap for cleaning flax, 181; concentration of water by freezing, 181; manufacture of ice, 182; protection of skins and furs from vermin, 182; gold rubber plates for artificial teeth, 182.

Chili.—Population, 182; army, 182; finances, 182; difficulty with England, 182; burning of a church, 183; action of the United States representative, 183.

China.—Emperor, 183; ports open, 183; contest with the rebels, 183; Gen. Ward, 183; Burgevine, 184; battles

- 184; Major Gordon's successes, 184; agreement for steamers broken, 185; terms, 185; details, 185; reforms, 185; concessions, 186; system of international law adopted, 186; treaty with Denmark, 186.
- CLERKE, Judge THOMAS W.—Opinion in the case of *Jones vs. Seward*, 518-520.
- Clinton.—Its situation, 187; capture, 187.
- CLYDE, Lord.—Birth, 187; death, 187; military services, 187; personal appearance, 188; character, 188.
- COCHRANE, Gen. JOHN—Letter from the army of the Potomac, 78.
- COCKERELL, CHARLES R.—Birth, 188; death, 188; adventures, 188; explorations, 188; works as an architect, 189.
- COLFAX, SCHUYLER, Representative from Indiana, 233; on indemnifying the President, 242; on the admission of West Virginia, 306.
- COLLAMER, JACOB, Senator from Vermont, remarks on arrests, 238, 239; on the bill to discharge State prisoners, 248; offers a substitute for the House bill, 249; on the substitute, 250, 251; on the conscript bill, 275; on a national currency, 290.
- Colombia, *United States of*.—States composing, 189; capitals, 189; population, 189; finances, 189; army, 189; revolution in, 189; its close, 189; new constitution, 189; war with Ecuador, 190.
- Colored Troops, first order to enlist, 26; details of enlistment, 26.
- COMBES, J. J.—Letter on the relations of the insurrectionary States to the Union, 839.
- Commerce.—During 1863, 190; imports and exports, 190; balance of trade, 190; prices in New York and San Francisco, 190; dutiable goods, 190; monthly imports at New York, 191; stock of goods in the country, 191; failures, 191; imported articles at New York, 192; exported articles, 194; barrels of flour, 194; decline of prices abroad, 194; grain and flour received by the Erie Canal, 194; freight and tonnage of the lakes, 195; export of petroleum, 195; effect of the Confederate cruisers, 195; cotton imported into Great Britain, 195.
- Commercial Intercourse.—Regulations of the Government for trade with inhabitants of Confederate States, 196; act of Congress of July, 1861, 196; proclamation of the President in August, 1861, 196; proceedings under it, 196; proclamation of March, 1863, 196; act of Congress of March, 1862, 196; do. of May, 1862, 196; orders of the Secretaries of War and Navy relative to abandoned property, 196; further regulations, 196; regulations of the Secretary of the Treasury, 197; circular to the agent at Memphis, 197, 198; letter from Gen. Grant, 199; revised regulations of the Secretary of the Treasury, 199; special rules for agency districts, 200; decision of Chief Justice Taney relative to trade regulations in Maryland, 202.
- COMONFORT, YGNACIO.—Birth, 202; death, 202; public services in Mexico, 202.
- Confederate States.—Officers of the Government, 203; bad effects of the currency, 203; impressions when the war commenced, 203; finances of the Government, 204; depreciation of the currency, 204; letter of Mr. Toombs, 205; measures suggested by him relative to the currency, 205; plan of Mr. Oldham, 205; schemes for improvement proposed, 205; letters from the people, 205; consequences of the depreciation, 206.
- Order relative to the impressment of provisions, 206; commissioners of impressment, 206; resolutions, 206; effect of these measures, 207; remarks of Senator Toombs in the hall of the Assembly of Georgia, 207, 208; decay of the railroads, 208; extent of their failure, 208; roads made by the Government, 209; consequences of deficient transportation, 209.
- Appeals to the people to raise grain, 209; address of Mr. Davis to the people, 209; appeals of the governors of States, 210; do. of the governor of Georgia, 210; do. of the governor of Alabama, 210; letter from the Commissary-General, 210; causes of the distress for provisions, 211; public disturbances, 211; contributions of the people, 211; reports from different parts of the country, 211; prices in Richmond market, 212.
- Cotton accumulated by the Government, 212; circular of the purchasing agent, 212; foreign relations, 212; difficulty with the consuls, 213; letter of Mr. Benjamin explaining the action of the Government, 213; instructions to Mr. Mason, 213; proclamation of emancipation how received, 213; address to Christians throughout the world, 214; exchange of prisoners, 214; mission of A. H. Stephens, 214.
- Military strength of the Confederacy, 215; effect of the surrender of Vicksburg, 216; division of the Confederacy, 216; a levy *en masse* ordered, 216; loss of East Tennessee, 216; lack of military supplies, 216; prospect for subsistence of the army, 216; deficiency of labor, 217; losses, 217; supposed letter of T. Butler King, 217; speech of Mr. Stephens, 218; do. of Senator Johnson, 218; apprehensions, 218; gleam of light, 219.
- Confiscation.—Discussion on the power of Congress, 219; acts of Congress, 219; instructions of the Attorney-General relative to proceedings, 219; legal status of the inhabitants of the Confederate States, 220; opinion of Judge Wylie, 220; case of Leroy M. Wiley, 220; opinion of Judge Betts, 220; comment on this opinion, 220; duration of the forfeiture, 221; opinion of Judge Underwood, 221; other cases, 222; is real estate covered by the act of 1861? 222; opinion of Judge Trigg, 222; the constitutionality of the acts of Congress, 223; opinion of Judge Trigg, 223; a case in New Orleans, 223; argument of counsel in behalf of the United States, 223; do. in behalf of the claimants, 223; argument of the District Attorney, 224; opinion in Kentucky, 570.
- Congregationalists, Trinitarian.—Statistics, 225; case of Charles Beecher, 225; Canada Union, 225; English Congregational Union, 225; statistics, 225.
- Congress, Confederate.—List of members, 226; resolutions on the conduct of the war and the Emancipation Proclamation, 226; retaliatory measures suggested, 226; the Government should take the responsibility, 226; resolution offered in the Senate, 227; joint resolutions on retaliation, 227; free navigation of the Mississippi, 227; bills introduced, 227; tax law, 227; tax on farmers, 228; new flag, 228; impressment act, 228; resolutions relative to army substitutes, 228; do. to the currency, 228; do. on prisoners, 228; acts of officers, 229; resolution relative to declaring all persons in the army, 229; do. relative to the issue of bonds, 229; various other resolutions, 229; remarks on impressment of provisions, 230; bill to continue all troops in service, 230; substitutes, 230; act relative to exemptions, 230; use of negroes, 230; debate relative to substitutes in the army, 231; conscription act finally adopted, 232.
- Congress, United States.—List of members, 233; resolution relative to arrests, 233; do. relative to persons in prisons, 233, 234; do. relative to a convention, 234; do. relative to the sale of freemen into slavery by the enemy, 234; do. relative to propositions for peace, 234; do. relative to a military governor in the district of Columbia, 234; do. relative to assisting the Government, 235; do. explanatory, 235.
- Resolution relative to arrests in Delaware, 235; why were the persons arrested? 235; no cause ever stated, 235; the Senate ought not to be engaged in calling upon the Government for this kind of information, 235; ought

to have had several thousand arrests, 235; never has any Government been so humane, so just, so merciful, 235; the value of a Government heretofore consisted in the guardianship it afforded to the individual liberty of the citizen, 235; prison door open to all arrested on suspicion if they will take the oath, 236; soldiers sent to every voting place in the two lower counties of Delaware at the last election, 236; it is said men ought not only to have been arrested and imprisoned, but hung or shot, 236; explanation, 236; exercise of this power regretted, 236; the President has asserted and claimed the right to dispense with the law requiring the habeas corpus to issue, 236; judiciary powerless for redress, 237; can a government be free with the judiciary set at defiance? 237; we cannot afford these arrests, 237; if the writ is suspended, there is no right to make these arrests, 237; point to the clause of the Constitution or the law that authorizes officials to make arrests, 238; a question proposed, 238; is the habeas corpus used only for the purpose of inquiring whether the process was legal? 238; in some cases the guilt or innocence may be inquired into, 238; does the suspension of the writ authorize the President to arrest and imprison a man? 239; what if certain persons are arrested in Delaware? 239; willing to trust these affairs to the President, 240; loyalty must be to an administration and not to a government, 240; the safety of the republic is the supreme law, 240; supposing the intention of the President is honest, therefore you are not to question his acts, 240; is the right to repeal a law an executive power? 241; the President and all men who do these acts are trespassers, 241; "away with this nonsense that slavery has been the cause of the war," 241; yeas and nays on the resolution, 241.

In the House, a bill to indemnify the President and other persons for suspending the privilege of the writ of habeas corpus, &c., considered, 241; the President had the authority by law, 241; the majority are prepared to pass this bill now, 242; we must vindicate him now or leave him to be persecuted as soon as he retires from office, 242; sections of the bill, 242; bill explained, 242; a bill of indemnity does not necessarily deprive a party of his civil remedy, 242; the bill is drawn according to the English precedents, 242; yeas and nays on the bill, 243; protest of certain members, 243.

In the Senate, a motion to strike out the third section of their bill to discharge State prisoners, and to authorize the suspension of the writ of habeas corpus, considered, 244; the section, 244; this legislation an improper interference with the duties and powers of the executive office, 244; power of the President, 244; the most improper appeals are made to the ignorant to alarm their fears on this subject, 245; two objections to the section, 245; nothing to show the power to suspend the writ of habeas corpus is a legislative power, 246; whose duty is it to preserve the Government, protect the Constitution, and execute the laws? 246; Congress alone has the power, 246; the English Parliament alone can suspend it, 247; the hypothesis of the power in the President is an assumption, 247; on what is the right to arrest based? 247; examination of Mr. Binney's views, 247; no bill should be passed and sent to the President for approval which implied that his decision relative to the suspension was wrong, 248; propositions before the Senate, 248; a person sued should be allowed to remove the case to the U. S. Circuit Court, 248; what is the object of getting a case into the Circuit Court? 249.

A substitute for the House bill offered, 249; referred and reported in place of the House bill, 249; amendments offered, 249; effect of the amendments, 249; Mar-

shall on this power of removal of causes, 250; crimes committed against the States cannot be transferred to U. S. courts, 250; the governors of States only have power to pardon for offences against the criminal codes of States, 250; statement of Chief Justice Marshall, 250; this is the entire destruction of the powers of the States as regards their criminal jurisdiction, 250; substitute accepted, 250; no precedent, 250; copy of the act of 1815, 251; case already provided for, under right of appeal, 251; nothing alarming in the provision, 251; this right of transfer is restricted to one of the parties and denied to the other, 251; bill ordered to a third reading, 251; nothing in the bill that does aught than advance us toward a desperate exercise of power, 252; bill passed and sent to the House, 252; yeas and nays on its passage, 252.

Considered in the House, 252; the bill has no parallel in the history of this or any other people, 252; this bill goes beyond the principle of the celebrated Force bill of 1833, 252; unheard of and most monstrous provisions, 253; House refuse to concur, 253.

Committee of conference appointed, 253; report, 253; report considered in the Senate, 253; if the legislature suspends the privilege of the writ of habeas corpus, either the judicial or the ministerial officer shall apply the law to the exigency, 253; duty of the executive to see every law faithfully executed, 253; what is the privilege of the writ? 253; who shall suspend it? 253; further debate, 254; report concurred in, 255; yeas and nays, 255; the bill, 255.

In the Senate, the bill to discharge State prisoners further considered, 256; amendments offered, 256; precept to be issued by the President, 257; amendments explained, 257; delegation of power to the President, 257; opposed, 258; bill passed, 258; yeas and nays, 258; laid aside in the House, 258.

In the Senate, a resolution of inquiry relative to the presence of armed soldiers at the polls in Delaware considered, 258; affairs at the polls, 259; the information desired, 259; motion to refer to the committee on military affairs, 259; further debate, 260.

In the House, the appropriation bill considered, 260; no warrant in the Constitution for the admission of West Virginia, 260; reasons, 260; are not the seceded States still members of the Union? 260; the ordinances of secession took them out, 260; how then levy a tax on them? 260; as a war measure, 260; we are to treat them simply as provinces to be conquered, 261; are these people now citizens of the United States, or are they an independent nation? 261; belligerents, 261; right to treat them as we would any conquered provinces, 261; further remarks, 262; duty of the Government to protect loyal citizens in seceded States, 262; no authority in the Constitution for the appointment of military governors, 263; object of the present bill to enforce the collection of a tax in the disaffected States, 263; upon what ground, 263; the authority of the National Government binds and covers every inch of the national domain, 263; issue of the war depends on the border States, 264; cannot execute the Constitution in the seceding States, 264; the idea repudiated that it is unconstitutional to annihilate or extirpate the rebels, 264; the State belongs to the loyal citizens if composing only a third or a fourth, 264.

In the House, resolutions relative to public affairs considered, 265.

In the House, a bill to raise additional soldiers considered, 268; substitute proposed to raise colored troops, 268; motion to refer to Committee on Military Affairs, 268; it is intended to put the African soldier on equality with the white soldier as to the protection which the

President could afford them, 268; amendment moved, 268; what have we heard in this Hall? 269; we have not only to conquer the rebel country, but to hold it after it is conquered, 269; what is the reason for this bill? 269; they are not necessary for the putting down of this rebellion, 269; their employment will result in a servile war, 270; you want to abolish slavery, whether you call it the means of the end, or the end of the means, 270; right of the Government to take slaves for the army, 270; this policy has been dictated by necessity rather than by choice, 270; course of the administration, 270; object of this bill to make final the dissolution of the Union, 271; proposes to vest in the President a larger power than was ever vested by Congress in the hands of one man, 271; financial prospect of this question, 271; the term of enlistment, 272; object of the war, 272; bill as it passed, 272; yeas and nays, 273; laid aside in the Senate as already provided for, 273.

In the Senate, the bill for enrolling and drafting the militia considered, 273; puts the militia of the States under the control of the President, 273; motion to strike out, 273; no bill of such fearful import ever introduced before Congress, 273; does not trench in any way on the provisions of the Constitution, 274; the Constitution makes a difference between the army and navy of the United States and the militia of the United States, 274; the power which it is proposed to confer on the President is merely to go into force antecedent to these militiamen becoming a portion of the army, 275; the provisions that when drafted a man shall be subject to the articles of war, 275; precedents, 275; other precedents 275; a prevailing opinion that this war is not being waged for the maintenance of the Constitution and the Union, 276; opinion of Judge Story, 276; the case referred to, 297; opinion of Judge Washington, 299; opinion of Justice Johnson, 278; reasons for the passage of the bill, 278; other amendments offered, 279; bill passed, 279.

Same bill considered in the House, 279; House asked to pass it without amendment, 279; chief objections, 279; amendments proposed, 280; further objections, 280; turns the militia into a regular army, 280; interferes with the personal liberty of the citizen, 281; will this bill increase the efficiency of the national forces? 281; our fathers were jealous of the power of an overshadowing army, 281; no power to force soldiers into the army but by means of the militia organizations, 281; subjects the entire militia to be brought into service at the pleasure of the President, 282; why is this measure called for at this time? 282; a confession of incompetency to manage this stupendous war, 282; its principles subversive of the Constitution, 282; the necessity is upon us to pass a bill of this character, 282; what power has this Government over the militia? 283; look at the provisions of this bill, 283; the constitutional power of the Government to raise armies, 283; let Congress retain some power over the army, 284; a surrender by Congress of the sovereignty of the States, 284; it is a beneficent and a benevolent bill, 284; its provisions, 284; \$300 provision objectionable, 285; who made the necessity for the bill? 285; a terrible bill, 285; the power of Congress to pass it, 285; a question to this nation of life and death, 286; the policy inaugurated December, 1861, has been fruitless of good, 286; the negro will not save you, 286; paper money will not save you, 286; you did without this measure, 286; the natural result of the policy which this Congress has pursued from very near the commencement of the war, 286; pledges of this Congress, 287; what has brought this mighty change? 287; what have we seen at this session? 287; why is

it that we have every man in the field that we can get voluntarily? 287; why will the people no longer volunteer? 288; if we want to get back the Union how must we do it? 288; discouragements of the country and the remedy, 288; tweedledum and tweedledee, 289; have we found abolition necessary for the salvation of the Union? 289; amendment offered and rejected, 289; bill passed, 289; yeas and nays, 289.

Returned to the Senate, with amendments, 290; the amendments and the vote on them, 290.

In the Senate, a bill to provide a national currency considered, 290; what are its objects and purposes, 290; circulation of the existing banks to be withdrawn, 291; case of *McCulloch vs. State of Maryland*, 291; United States has no power to tax a State institution out of existence, 291; it establishes corporations in all the States entirely independent of any power of visitation by those States, 291; propriety of saying that we will be responsible for the ultimate redemption of those bills, 291; the moment the war ends every man wants his money that he has lent on stocks, 292; why did the United States Bank go down? 292; look at this proposition, 292; you propose to hire those people to go into these associations, 293; all there is about it, 293; examples of the operation of the bill, 293; the advantage to the United States, 294; illustrations, 294; it is said the Secretary will become a dangerous person, 294; the bill ignores the great principle that a proper circulation should be convertible into specie, 295; it will absorb the existing banking system, 295; we must go on with the war on paper money, 295; necessity of the Government to take control of the paper currency, 295; bill passed, 295; yeas and nays, 295; in the House, the bill considered, 295; advantages of the measure, 296; bill passed, 296; yeas and nays, 296; the bill, 296.

In the House, a bill to admit West Virginia considered, 304; a bill for the division of an old State, 304; the division has not received that assent from the Legislature of Virginia which the Constitution requires, 305; policy of the President, 305; legitimacy of the Wheeling Government, 305; its history, 305; reasons why West Virginia is entitled to admission, 306; the theory upon which Virginia is represented in Congress, 306; if Virginia is already in the Union, what need of another act to let her in? 306; it is not Virginia, but West Virginia that is being admitted, 306; no argument can make stronger the case than the mere statement of the question, 306; it is said that Old Virginia no longer exists, and therefore cannot give consent, 307; the Government at Wheeling is not the Government of Virginia, 307; the only question is whether the State of Virginia has consented, 307; nobody has given a consent who does not reside in the new State itself, 308; but mocking to say the Legislature of Virginia has ever consented to this division, 308; Governor Letcher is the governor of Virginia, 308; these rebellious States are belligerents, and the Constitution has no longer the least effect on them, 309; conduct of the President, 309; proceedings take place in virtue of the laws of war, 309; this bill subverts the principle that the people are the source of all power, 309; look at the facts, 309; how did the people vote? 310; who constitute the State of Virginia? is the great point in discussion, 310; the majority of the people of any State are not the State when they organize treason, 310; can a minority, by the treasonable act of a majority, be stripped of their right of protection by the Federal Government? 311; where the majority become rebels, the minority are the State, 311; views of Mr. Madison, 311; further remarks, 311; when the storm of revolution shakes the civil fabric of a State of the Union, the final

arbitrator to determine who constitute the Government of a State is Congress, 312; the case of Rhode Island, 312; decision of the Supreme Court, 312; bill passed, 313; yeas and nays, 313.

In the Senate, a bill to aid the State of Missouri in emancipation considered, 313; second section, 313; proposes gradual emancipation, 313; will not vote to hold a man in bondage thirteen years longer, 313; constitutionality of the measure doubtful, 313; an obligation upon Congress to stand by the pledge it has given, 314; the accomplishment of the object will be worth all it will cost 314; the real difficulty is whether the emancipation shall be gradual or immediate, 314; we ask that the Government shall not violate the Constitution by attempting to interfere with slavery in the States, 315; have we a right to use all reasonable means to put an end to the civil war in Missouri? 315; what security have we that they will not continue slavery? 315; this is not a means of restoring the Union, 316; features of the bill, 316; no authority by which Congress can appropriate this money for this object, 316; resolution recommended by the President to Congress, 317; what said the President in his correspondence with the Border State members? 317; the Treasury cannot stand it, 317; the military interference secured an emancipation legislature, 317; emancipation should be immediate, 318; how can you best put an end to the rebellion? 318; this measure of emancipation is under the war power, 318; some adopt the policy that this rebellion is to be put down by proclamation, 318; can you give money to establish slavery in a State? 318; what is the provision of this bill that renders it constitutional? 318; what is the provision of the Constitution in reference to this matter? 319; the constitutional question, 319; further debate, 320; for money paid down freedom must be paid down, 320; as a war measure, it is vindicated under the Constitution of the United States, 321; bill passed, 321; yeas and nays, 321; failed in the House, 321.

In the House, the report of the committee to admit to seats members from Louisiana considered, 321; views of the committee, 321; facts of the case, 322; the question one of paramount importance, 322; the law in such cases, 323; how many votes were cast, 323; the ballot box is the test of an election, 323; power of a military governor to issue writs of election, 324; functions of a military governor, 324; this election not held under a law of the State, 324; for what are we carrying on war? 325; questions arising out of the case, 325; report adopted, 326.

Resolutions relative to foreign interference offered, 326; passed in the Senate, 326; yeas and nays, 326; passed in the House, 326; yeas and nays, 326; act to prevent correspondence with citizens of the Confederate States, 327; act relative to the collection of taxes in insurrectionary States, 327; act to facilitate the taking of depositions to be used in other countries, 327; act concerning letters of marque, &c., 328; object, 328; features of the bill, 328; a new agency against rebellion, 328; a provision for privateers in any future war, 328; yeas and nays in the Senate, 329.

Connecticut.—Finances of the State, 329; school fund, 329; State institutions, 329; railroads, 329; banks, 329; soldiers furnished, 329; the draft, 330; its operation, 330; State election, 330; soldiers' vote, 330.

CONNOR, SKEFFINGTON.—Birth, 330; education, 330; pursuits, 330; death, 330.

CONSTABLE, Judge CHAS. H., the case of, 472.

CONWAY, MARTIN F., Representative from Kansas, 233; on the admission of West Virginia, 304.

COOPER, Gen., letter to Gen. Lee, 99.
